All action taken by Avianca as such General Traffic and Sales Agent, whether specifically referred to herein or otherwise, shall be in accordance with instructions, rules, regulations, rates and tariffs of Pan American and its affiliated carriers. Pan American's representatives may from time to time visit Avianca's sales offices and general agencies for the purpose of discussing with Avianca's sales representatives any and all aspects of their selling activities for Pan American [fol. 2247] and its affiliated carriers; provided, however, that Pan American shall consult with Avianca a reasonable time prior to making such visits regarding the purpose of such visits, and a representative of Avianca may, if Avianca desires, accompany such representatives of Pan American on such visits.

2. Avianca agrees to designate as its agents for the purpose of this Agreement all of its authorized sales agents in the Avianca General Agency Territory, to appoint such additional agents as Pan American may from time to time request, all in accordance with, and upon such terms and conditions as shall be set forth in the instructions (including published agency rules, regulations, policies and practices) given by Pan American, and to cancel the appointment of any agent, for the purposes of this Agreement, upon request by Pan American.

3. Pan American hereby authorizes Avianca to issue (a) tickets, or exchange orders exchangeable for tickets, for transportation of passengers (but not to check baggage

unless the parties hereto shall so agree) and (b) airwaybills or other appropriate forms of contract for transportation of cargo over the lines of Pan American and of its affiliated carriers and to execute and issue all other documents necessary or appropriate for such transportation, all in the form, and subject to and in accordance with the tariffs, rates, rules and regulations and the terms, provisions and conditions of the tickets, airwaybills and other transportation contracts, prescribed and approved from time to time by Pan American or its affiliated carriers, as the case may be, it being understood that no such ticket, exchange order, airwaybill or contract will be issued unless an advance reservation shall have been made for the transportation, if required by such tariffs, rules and regulations, and Avianca shall have received payment of the total charges payable therefor at the point of issuance in accordance with such tariffs, rules and regulations, or shall have made arrangements satisfactory to Pan American for the collection of such charges, and that Avianca will not, directly or indirectly, or through any agent or broker, or otherwise, rebate, or remit any portion of the charges specified in said tariffs. [fol. 2248] Pan American agrees to accept and to carry out the obligation of, or to cause the appropriate affiliated carriers to accept and to carry out the obligation of, each ticket, exchange order, airwaybill, or contract so issued by Avianca. Such airwaybills or contracts may provide for turning over to other transportation agencies for onward carriage by them of cargo destined to points beyond points served by Pan American and its affiliated carriers, and in such event it is agreed that Pan American and its affiliated carriers will act in accordance with the terms of such provision. In issuing tickets, exchange orders, airwaybills and contracts for transportation over the lines of Pan American or any of its affiliated carriers, Avianca shall be deemed to act only as an agent of Pan American or its affiliated carriers, as the case may be. Avianca, including its officers, employees, agents, or servants, shall not be liable, and Pan American agrees to indemnify Avianca, including its officers, employees, agents, or servants, and hold it harmless from and against all claims for any loss, damage, injury or delay of any nature whatsoever, includ-

ing costs and expenses, which shall occur in connection with the transportation services of Pan American or in connection with the carrying out or failure to carry out any obligation to third parties arising by reason of action taken by Avianca pursuant to this paragraph; unless such loss, damage, injury or delay shall be caused by the negligence or wilful misconduct of Avianca, its officers, employees, agents or servants. Pan American shall furnish to Avianca from time to time the aforementioned tariffs, rates, rules and regulations and information regarding the transportation services currently being offered by Pan American and its affiliated carriers. Any act which Avianca is authorized or permitted by this paragraph to take may be taken through an agent of Avianca authorized in accordance herewith.

4. (a) In case Avianca shall receive notice of any claims relating to transportation over the routes of Pan American or its affiliated carriers, Avianca will immediately notify Pan American of such notice, giving all pertinent information available.

(b) In case any tariff, rate, form of ticket, exchange order, airwaybill or other transportation contract, or any rule or regulation of Pan American or its affiliated car- [fol. 2249] riers relating to transportation over their lines, shall be modified or amended at any time, or in case any service of Pan American or its affiliated carriers shall be suspended, modified or cancelled, Pan American will notify Avianca as far in advance as practicable of the effective date of any such modification, amendment, suspension or cancellation, it being understood that Pan American will indemnify and hold harmless Avianca from and against all losses, including costs and expenses, by reason of claims insofar as they arise out of such modification, amendment, suspension or cancellation and the sale by Avianca of transportation prior to receipt by Avianca of notice thereof.

(c) Avianca shall make no refund of any fare, charge, or other sum relating to transportation over the lines of Pan American or its affiliated carriers, unless such refund shall be in accordance with the tariffs, rules, regulations and instructions of Pan American.

(d) In case any claim shall be asserted against Avianca in respect to transportation over the lines of Pan American or any of its affiliated carriers, or in case any action at law, suit or proceeding shall be instituted against Avianca relating thereto, Avianca shall promptly notify Pan American and promptly transmit to Pan American from time to time all communications, legal processes and other documents and information coming into the possession of Avianca and relating to such claim, action at law, suit or proceeding. Avianca shall permit Pan American to settle and to conduct the defense against any such claim, action at law, suit or proceeding and Avianca will cooperate with and assist Pan American, to the extent requested by Pan American, in settling or conducting the defense against any such claim, action at law, suit or proceeding.

5. Pan American hereby agrees to pay or reimburse Avianca the following amounts:

(a) In the case of sales made in the Avianca General Agency Territory by Avianca or any agent of Avianca or of Pan American or any of its affiliated carriers:

(i) *For Passenger Transportation* over the lines of Pan American and its affiliated carriers, a com- [fol. 2250] mission equal to either (1) in case such transportation shall have been sold directly by Avianca, ten percent (10%) of the total amount of the fares for such transportation (including excess baggage weight charges but excluding valuation and insurance charges on baggage) collected by Avianca in the Avianca General Agency Territory including fares for such passenger and excess baggage transportation sold in the Avianca General Agency Territory by Avianca and furnished under Universal Air Travel Cards acceptable to Pan American or its affiliated carriers or under government transportation requests or warrants presented by passengers for transportation over the lines of Pan American or any of its affiliated carriers, but excluding any fares payable to other carriers, under tickets and exchange orders issued by Avianca in accordance

with the provisions of this agreement; or (2) in case such transportation shall have been sold by or through an agent of Avianca or of Pan American or any of its affiliated carriers or by another carrier authorized so to do, two and one-half percent (2½%) of the total amount of the fares for such transportation, excluding charges for excess baggage weight, and ten percent (10%) of the excess baggage weight charges collected by Avianca, either directly or through its agents, in the Avianca General Agency Territory, including fares for such passenger and excess baggage transportation sold in the Avianca General Agency Territory by such agents of Avianca or such carriers and furnished under Universal Air Travel Cards acceptable to Pan American or its affiliated carriers or under government transportation requests or warrants presented by passengers for transportation over the lines of Pan American or any of its affiliated carriers, but excluding any fares payable to other carriers, under tickets and exchange orders issued by Avianca in accordance with the provisions of this Agreement, plus the commission, if any, payable to such agents in accordance with the rules and regulations of Pan American then in effect, and of which Avianca has been advised, it being understood that in such case the commission, [fol. 2251] if any, payable to the agent, shall be paid to the agent and Avianca will retain the balance equal to two and one-half percent (2½%) of the fare and ten percent (10%) of the excess baggage weight charges, and

(ii) *For Cargo Transportation* over the lines of Pan American and its affiliated carriers, a commission equal to either (1) in case such transportation shall have been sold directly by Avianca, seven and one-half percent (7½%) of the total amount of the charges (not including valuation, insurance, C.O.D. or collect charges) for such transportation collected by Avianca in the Avianca General Agency Territory, or, in the case of collect shipments, col-

lected otherwise on behalf of Pan American or any of its affiliated carriers, including transportation sold in the Avianca General Agency Territory by Avianca and furnished under government bills of lading or similar warrants presented by shippers, but excluding any charges payable to other carriers, under airwaybills or other cargo transportation contracts issued by Avianca in accordance with the provisions of this Agreement; or (2) in case such transportation shall have been sold by or through an agent of Avianca or of Pan American or any of its affiliated carriers or by another carrier authorized so to do, two and one-half percent (2½%) of the total amount of such charges (not including valuation, insurance, C.O.D. or collect charges), collected by Avianca either directly or through such agents in the Avianca General Agency Territory or, in the case of collect shipments, collected otherwise on behalf of Pan American or any of its affiliated carriers, including transportation sold in the Avianca General Agency Territory by such agents or such carriers and furnished under government bills of lading or similar warrants furnished by shippers, but excluding any charges payable to other carriers under airwaybills or other cargo transportation contracts issued by Avianca in accordance with the provisions of this Agreement, plus the commission, if any, payable to [fol. 2252] such agents in accordance with the rules and regulations of Pan American, it being understood that in such cases the commission, if any, payable to the agent shall be paid to the agent and Avianca will retain the balance equal to two and one-half percent (2½%) of the charges.

(b) In case of sales of transportation over the lines of Pan American and its affiliated carriers made by Avianca outside the Avianca General Agency Territory and in case of sales of transportation over the lines of Pan American-Grace Airways made by Avianca within the Avianca General Agency Territory:

(i) *For Passenger Transportation*, a commission equal to seven and one-half percent (7½%) of the

total amount of the fares for such transportation, excluding charges for excess baggage and valuation and insurance charges on baggage, collected by Avianca on behalf of Pan American or any of its affiliated carriers, including fares for such transportation sold by Avianca and furnished under Universal Air Travel Cars acceptable to Pan American or its affiliated carriers or under Government transportation requests or warrants presented by passengers for transportation over the lines of Pan American or any of its affiliated carriers, but excluding any fares payable to other carriers under tickets and exchange orders issued by Avianca in accordance with the provisions of this Agreement; and

(ii) *For Cargo Transportation*, a commission equal to five percent (5%) of the total amount of the charges (not including valuation, insurance, C.O.D. or collect charges) for such transportation, collected by Avianca or, in the case of collect shipments collected otherwise on behalf of Pan American or any of its affiliated carriers, including transportation sold by Avianca and furnished under government bills of lading or similar warrants presented by shippers, but excluding any charges payable to other carriers under airwaybills or other cargo transportation contracts issued by Avianca in accordance with the provisions of this Agreement.

[fol. 2253] (c) Any out-of-pocket expenses specifically requested and approved by Pan American which are incurred by Avianca in carrying out special services (including advertising or publicity) requested by Pan American under this Agreement, it being understood that routine expenses of distribution of information, timetables and advertising material to agents, prospective travelers and shippers and similar activities which are classed as a general agent's normal sales promotional activities shall not be reimburseable hereunder.

Except with respect to transportation issued under Universal Air Travel Cards, government transportation requests or warrants, or government bills of lading or warrants or collect shipments, as provided above, the commissions shall be payable hereunder only in respect of the aforementioned fares and charges actually collected by Avianca or the said agents and paid over to Pan American and no commission shall be payable with respect to any fare or charge which shall be refunded, except as otherwise specifically authorized by Pan American. Sales of cargo transportation with transportation charges collect shall be deemed to have been made by the party who issued the airwaybill and not by the party who collects the charges.

6. In case Pan American or any of its affiliated carriers receives a commission from any other air, rail, water or bus carrier for the sale of such carrier's passenger tickets, exchange orders or cargo transportation documents issued directly by Avianca or by an agent of Avianca in the Avianca General Agency Territory or elsewhere in connection with interline transportation over the lines of Pan American and its affiliated carriers and such other carrier, Pan American shall pay Avianca or such agents the amount of such commission.

7. Avianca hereby appoints Pan American, and Pan American agrees to act as, General Traffic and Sales Agent for Avianca in the United States of America and throughout the world, except in Colombia and Ecuador, the territory in which Pan American is hereby appointed to act as General Traffic and Sales Agent being hereinafter sometimes referred to as the "Pan American General Agency Territory". As such General Traffic and Sales Agent, Pan American agrees that it will perform such services as may be appropriate to promote passenger, mail, and cargo traffic [fol. 2254] over the lines of Avianca and to arrange for transportation of passengers, baggage, mail and cargo over such lines, including the furnishing of necessary personnel, office space, equipment and supplies and doing all other things appropriate to carry out the following activities:

(a) Solicitation and sale within the Pan American General Agency Territory of passenger, mail and

cargo transportation for Avianca, including furnishing instructions to, and supervision of, such solicitation and sale by Pan American's General Sales Agents and Passenger and Cargo Sales Agents appointed in accordance with this Agreement;

(b) Servicing all passengers and cargo sales agents of Avianca located within the Pan American General Agency Territory; and if and as required by Avianca, obtaining remittances of funds from and paying to such agents commissions for sales of transportation made over the lines of Avianca, all in accordance with the policies, practices, rules, regulations and instructions of Avianca pertaining thereto.

(c) Performance of such acts and preparation and checking of such documents in the Pan American General Agency Territory as may be required for the transportation of passengers, baggage, mail and cargo and movement of aircraft over the lines of Avianca, including the making of arrangements for the presence of such government officials as may be required in connection therewith;

(d) Checking such baggage of outgoing passengers at points in the Pan American General Agency Territory as is to be through checked from points served by Pan American or its affiliated carriers to points served by Avianca, it being understood that baggage of passengers traveling over the lines of Pan American or its affiliated carriers and then over the lines of Avianca will be through checked by Pan American or its affiliated carriers only if, and to the extent that, the parties shall expressly so agree, collecting for the account of Avianca any excess baggage payable with respect to any baggage checked by Pan American or [fol. 2255] its affiliated carriers for transportation over the lines of Avianca, receiving and forwarding by carriers with which Avianca or Pan American has forwarding arrangements, any trunks or other heavy baggage delivered to Pan American or its affiliated carriers for the purpose of passengers traveling, or

proposing to travel, over the lines of Avianca, and collecting any charges payable therefor;

(e) Making arrangements in the Pan American General Agency Territory for adequate ground transportation from and to the airport for passengers, baggage and cargo transported or to be transported over the lines of Avianca;

(f) Making arrangements on behalf of such passengers for adequate hotel accomodations in the Pan American General Agency Territory and at points of call of Avianca, Pan American and its affiliated carriers, and at other cities.

(g) Making reservations for and facilitating transportation over the lines of Avianca and connecting carriers;

(h) Furnishing such advice and information as Avianca may from time to time request with respect to transportation formalities required by governments in the Pan American General Agency Territory pertaining to passengers, baggage and cargo moving over the lines of Pan American or its affiliated carriers and Avianca;

(i) Distribution of timetables, advertising materials and other information to agents and the public covering the services of Avianca as Avianca may from time to time reasonably request;

(j) Maintaining and operating, at points served by Pan American or its affiliated carriers in the Pan American General Agency Territory, centrally located sales offices for the sale of passenger, express and cargo transportation over the lines of Avianca, which offices shall be staffed with competent traffic and sales personnel for the promotion and sale of passenger, mail and cargo transportation over the lines of Avianca and for the handling of all matters pertaining thereto [fol. 2256] pursuant to this Agreement, it being contemplated that the entire sales organization of Pan American and it affiliated carriers will be available

to perform services pursuant to this Agreement, but nothing contained in this Agreement shall obligate Pan American or its affiliated carriers to establish any new office or organization to render any service to Avianca at any point not served by Pan American or its affiliated carriers, except as otherwise specifically provided herein with respect to the continental United States;

(k) Publicizing in the Pan American General Agency Territory, in such appropriate manner as Avianca shall request, that Pan American is the General Traffic and Sales Agent for Avianca.

(l) Furnishing Avianca with appropriate reports, monthly and at such other times as may be requested reasonably by Avianca, as to the extent and character of sales made by each Pan American office or agency or its affiliated carriers for Avianca;

(m) Making personal visits in the United States through sales representatives to sales agencies and to persons and firms which have been or which are potential customers for transportation via Avianca, it being understood that, if Avianca so requests, a representative of Avianca may accompany Pan American's sales representatives on any such visits.

(n) Requiring any general sales agent, appointed by Pan American to function on behalf of Pan American in lieu of a sales office operated directly by Pan American, to provide adequate sales office facilities.

(o) Pan American's traffic personnel, including that of its general sales agents, responsible for the handling of traffic over the lines of Avianca, shall be adequately trained in airline practice and suitably indoctrinated in required procedures, methods and information to enable them to furnish satisfactory performance hereunder.

All action taken by Pan American as General Traffic and Sales Agent, whether specifically referred to herein or otherwise, shall be in accordance with in-

structions, rules, regulations, rates and tariffs of [fol. 2257] Avianca. Avianca's representatives may from time to time visit Pan American's sales offices and general agencies for the purpose of discussing with Pan American's sales representatives any and all aspects of their selling activities for Avianca; provided, however, that Avianca shall consult with Pan American a reasonable time prior to making such visits regarding the purpose of such visits and a representative of Pan American may, if Pan American desires, accompany such representatives of Avianca on such visits.

8. Pan American agrees to designate as its agents for the purposes of this Agreement all of its authorized sales agents in the Pan American General Agency Territory, to appoint such additional agents as Avianca may from time to time request, all in accordance with, and upon such terms and conditions as shall be set forth in, the instructions (including published agency rules, regulations, policies and practices) given by Avianca and to cancel the appointment of any agent, for the purposes of this Agreement, upon request by Avianca.

9. Avianca hereby authorizes Pan American and its affiliated carriers to issue (a) tickets, or exchange orders exchangeable for tickets, for transportation of passengers, and (b) airwaybills or other appropriate forms of contract for transportation of cargo over the lines of Avianca and to execute and issue all other documents necessary or appropriate for such transportation, all in the form, and subject to and in accordance with the tariffs, rates, rules and regulations and the terms, provisions and conditions of the tickets, airwaybills and other transportation contracts, prescribed and approved from time to time by Avianca, it being understood that no such ticket, exchange order, airwaybill or contract will be issued unless an advance reservation shall have been made for the transportation, if required by such tariffs, rules and regulations, and Pan American or one of its affiliated carriers shall have received payment of the total charges payable therefor at the point of issuance in accordance with such tariffs, rules

and regulations, or shall have made arrangements satisfactory to Avianca for the collection of such charges, and Pan American will not, directly or indirectly, or through any agent or broker, or otherwise, rebate or remit any [fol. 2258] portion of the charges specified in said tariffs. Avianca agrees to accept and to carry our the obligations of each ticket, exchange order, airwaybill or contract so issued by Pan American or any of its affiliated carriers. Such airwaybills or contracts may provide for turning over to other transportation agencies for onward carriage by them of cargo destined to points beyond points served by Avianca, and in such event it is agreed that Avianca will act in accordance with the terms of such provision. In issuing tickets, exchange orders, airwaybills and contracts for transportation over the lines of Avianca, Pan American and its affiliated carriers shall be deemed to act only as agents for Avianca. Neither Pan American nor any of its affiliated carriers, including their officers, employees, agents, or servants, shall be liable, and Avianca agrees to indemnify and hold harmless Pan American and its affiliated carriers, including their officers, employees, agents or servants, from and against all claims, for any loss, damage, injury or delay of any nature whatsoever, including costs and expenses, which shall occur in connection with the transportation services of Avianca or in connection with the carrying out or failure to carry out of any obligation to third parties, arising by reason of action taken by Pan American or any of its affiliated carriers pursuant to this paragraph, unless such loss, damage, injury or delay shall be caused by the negligence or wilful misconduct of Pan American or one of its affiliated carriers, including their officers, employees, agents or servants.

Avianca shall furnish to Pan American and its affiliated carriers from time to time the aforementioned tariffs, rates, rules, regulations and information regarding the transportation services currently being offered by Avianca.

Any act which Pan American or its affiliated carriers is authorized or permitted by this paragraph to take may be taken through an agent of Pan American or its affiliated carriers authorized in accordance herewith.

10. (a) In case Pan American or its affiliated carriers shall receive notice of any claim relating to transportation over the routes of Avianca, Pan American or its affiliated carriers will immediately notify Avianca of such notice, giving all pertinent information available.

(b) In case any tariff, rate, form of ticket, exchange order, airwaybill or other transportation contract, or any rule or regulation of Avianca relating to transportation over its lines, shall be modified or amended at any time, or in case any service of Avianca shall be suspended, modi- [fol. 2259] fied, or cancelled, Avianca will notify Pan American as far in advance as practicable of the effective date of any such modification, amendment, suspension or cancellation, it being understood that Avianca will indemnify and hold harmless Pan American and its affiliated carriers from and against all losses, including costs and expenses, by reason of claims insofar as they arise out of such modification, amendment, suspension or cancellation and the sale by Pan American or an affiliated carrier of transportation prior to receipt by Pan American of notice thereof, or in case of a sale by an affiliated carrier, prior to receipt of notice thereof by such carrier if transmitted promptly by Pan American.

(c) Pan American or its affiliated carriers shall make no refund of any fare or other sum relating to transportation over the lines of Avianca, unless such refund shall be in accordance with the tariffs, rules, regulations and instructions of Avianca.

(d) In case any claim shall be asserted against Pan American or any of its affiliated carriers in respect of transportation over the lines of Avianca, or in case any action at law, suit or proceeding shall be instituted against Pan American or any of its affiliated carriers relating thereto, Pan American shall promptly notify Avianca and promptly transmit to Avianca from time to time all communications, legal processes and other documents and information coming into the possession of Pan American and relating to such claim, action at law, suit or proceeding. Pan American shall permit Avianca to settle and to conduct the defense against any such action at law, suit

or proceeding and Pan American will cooperate with and assist Avianca, to the extent requested by Avianca, in settling or conducting the defense against any such claim, action at law, suit or proceeding.

11. Avianca hereby agrees to pay or reimburse to Pan American the following amounts:

(a) In the case of sales made in the Pan American General Agency Territory by Pan American or its affiliated carriers or any agent thereof or of Avianca:

(i) *For Passenger Transportation* over the lines of Avianca, a commission equal to either (1) in case such [fol. 2260] transportation shall have been sold directly by Pan American or its affiliated carriers or a general sales agent of Pan American, ten percent (10%) of the total amount of the fares for such transportation (including excess baggage weight charges but excluding valuation and insurance charges on baggage) collected by Pan American or its general sales agent in the Pan American General Agency Territory including fares for such passenger and excess baggage transportation sold in the Pan American General Agency Territory by Pan American or its general sales agent and furnished under Universal Air Travel Cards acceptable to Avianca or under government transportation requests or warrants presented by passengers for transportation over the lines of Avianca, but excluding any fares payable to other carriers under tickets and exchange orders issued by Pan American or its affiliated carriers or its general sales agent in accordance with the provisions of this Agreement, or (2) in case such transportation shall have been sold by or through an agent of Pan American, (other than a general sales agent of Pan American) its affiliated carriers or Avianca or by another carrier authorized so to do, two and one-half percent (2½%) of the total amount of the fares for such transportation excluding charges for excess baggage weight, and ten percent (10%) of the excess baggage weight charges, collected by Pan American or its general sales agent, either directly or through such agents in the Pan

American General Agency Territory, including fares for such passenger and excess baggage transportation sold in the Pan American General Agency Territory by such agents or such carriers and furnished under Universal Air Travel Cards acceptable to Avianca or under government transportation requests or warrants presented by passengers for transportation over the lines of Avianca, but excluding any fares payable to other carriers, under tickets and exchange orders issued by Pan American in accordance with the provisions of this Agreement, plus the commission, if [fol. 2261] any, payable to such agents in accordance with the rules and regulations of Avianca then in effect, and of which Pan American has been advised, it being understood that in such case the commission, if any, payable to the agent shall be paid to the agent and Pan American will retain the balance equal to two and one-half percent (2½%) of the fare and ten percent (10%) of the excess baggage weight charges, and

(ii) *For Cargo Transportation* over the lines of Avianca, a commission equal to either (1) in case such transportation shall have been sold directly by Pan American or a general sales agent of Pan American, seven and one-half percent (7½%) of the total amount of the charges (not including valuation, insurance, C.O.D. or collect charges) for such transportation collected by Pan American or its general sales agent in the Pan American General Agency Territory or, in the case of collect shipments, collected otherwise on behalf of Avianca, including transportation sold in the Pan American General Agency Territory by Pan American or its general sales agent and furnished under government bills of lading or similar warrants presented by shippers, but excluding any charges payable to other carriers, under airwaybills or other cargo transportation contracts issued by Pan American or any of its affiliated carriers in accordance with the provisions of this Agreement; or (2) in case such transportation shall have been sold by or through an agent of Pan American (other than a general sales agent of

Pan American), its affiliated carriers or Avianca or by [fol. 2262] another carrier authorized so to do, two and one-half percent (2½%) of the total amount of such charges (not including valuation, insurance, C.O.D. or collect charges) collected by Pan American or its general agent either directly or through such agents in the Pan American General Agency Territory or, in the case of collect shipments, collected otherwise on behalf of Avianca, including transportation sold in the Pan American General Agency Territory by such agents or such carriers and furnished under government bills of lading or similar warrants furnished by shippers, but excluding any charges payable to other carriers under airwaybills or other cargo transportation contracts issued by Pan American or any of its affiliated carriers in accordance with the provisions of this Agreement, plus the commission, if any, payable to such agents in accordance with the rules and regulations of Avianca, it being understood that in such cases the commission, if any, payable to the agent shall be paid to the agent and Pan American will retain the balance equal to two and one-half percent (2½%) of the charges.

(b) In the case of sales made by Pan American or any of its affiliated carriers outside the Pan American General Agency Territory:

(i) *For Passenger Transportation* over the lines of Avianca a commission equal to seven and one-half percent (7½%) of the total amount of the fares for such transportation, excluding charges for excess baggage and valuation and insurance charges on baggage, collected by Pan American or any of its affiliated carriers on behalf of Avianca including fares for such [fol. 2263] transportation sold by Pan American or any of its affiliated carriers and furnished under Universal Air Travel Cards acceptable to Avianca, or under government transportation requests or warrants presented by passengers for transportation over the lines of Avianca, but excluding any fares payable to other

carriers under tickets and exchange orders issued by Pan American or any of its affiliated carriers in accordance with the provisions of this Agreement; and

(ii) *For Cargo Transportation* over the lines of Avianca, a commission equal to five percent (5%) of the total amount of the charges (not including valuation, insurance, C.O.D. or collect charges) for such transportation, collected by Pan American or any of its affiliated carriers or, in the case of collect shipments, collected otherwise on behalf of Avianca, including transportation sold by Pan American or any of its affiliated carriers and furnished under government bills of lading or similar warrants presented by shippers, but excluding any charges payable to other carriers under airwaybills or other cargo transportation contracts issued by Pan American or any of its affiliated carriers in accordance with the provisions of this Agreement.

(c) Any out-of-pocket expenses specifically requested and approved by Avianca which are incurred by Pan American or its affiliated carriers in carrying out special services (including advertising or publicity) requested by Avianca under this Agreement, it being understood that routine expenses of distribution of information, timetables and advertising material to agents and prospective travelers and shippers and similar activities which are classed as a general agent's normal sales promotion activities shall not be reimbursable hereunder.

Except with respect to transportation issued under Universal Air Travel Cards, government transportation requests or warrants, government bills of lading or warrants, [fol. 2264] or collect shipments, as provided above, commissions shall be payable hereunder only in respect of the aforementioned fares and charges actually collected by Pan American or its affiliated carriers or the said sales agents and paid over to Avianca, and no commission will be payable with respect to any fare or charge which shall be refunded, except as otherwise specifically authorized by Avianca. Sales of cargo transportation with transportation

charges collect shall be deemed to have been made by the party who issues the airwaybill and not by the party who collects the charges.

12. In case Avianca receives a commission from any other air, rail, water or bus carriers for the sale of such carrier's passenger tickets, exchange orders or cargo transportation documents issued directly by Pan American or its affiliated carriers or by an agent thereof in the Pan American General Agency Territory or elsewhere in connection with interline transportation over the lines of Avianca and such other carrier, Avianca shall pay Pan American, its affiliated carriers or such agents, the amount of such commission.

13. Settlement of all amounts collected or payable pursuant to this agreement shall be made monthly or at such shorter intervals as may be mutually agreed upon by Pan American and Avianca. Statements of account covering all such amounts shall be exchanged as soon as practicable after the end of each month and balances will be settled promptly after such statements are exchanged by a cash payment in United States currency or in such other currency as may be mutually agreed upon in writing from time to time by Pan American and Avianca.

14. Nothing herein contained shall be deemed to require Avianca or Pan American or any of its affiliated carriers to initiate or maintain service between any particular points.

15. All expenses for telegrams, cables, radiograms or other communications sent in connection with or pursuant to this Agreement, including communications relating to reservations and cancellations of reservations, shall be borne by the sender.

16. (a) In transferring shipments of interline baggage, accompanied or unaccompanied, and cargo, from Pan American or any of its affiliated carriers to Avianca, or [fol. 2265] vice versa, pursuant to this Agreement, it shall be the responsibility of the party from whose lines the shipment is transferred, but without incurring any liability for loss of revenue in cases of missed connections, to deliver

such baggage or cargo to the other party at such location and hours as shall be agreed upon in writing by the parties.

(b) Whenever baggage or cargo is to be transferred for onward transportation hereunder and completion of such transportation necessitates compliance with the laws and regulations pertaining to importation and transit or exportation and transit of the country of the point of transfer, it shall be the responsibility of the transferring party to comply with such laws and regulations and to deliver, where necessary, to the onward-carrying party prior to or simultaneously with the transfer, proper evidence of compliance with that country's laws and regulations pertaining to such importation and transit, or exportation and transit; provided, however, that in any case where compliance with such laws and regulations can be made only by the onward-carrying party, it shall be the onward-carrying party's responsibility to comply therewith.

17. In the event that Pan American shall have made or shall make arrangements with any other carrier (hereinafter referred to as "Interline Agreement"), pursuant to which Pan American and its affiliated carriers are or will be authorized to sell transportation over the lines of such other carrier and such other carrior is or will be authorized to sell transportation over the lines of Pan American and its affiliated carriers, it is understood that Avianca, unless provision to the contrary is made therein, is an affiliated carrier of Pan American for the purposes of any such Interline Agreement and Avianca is hereby authorized to sell transportation, and agrees to honor transportation sold, pursuant to any such Interline Agreement, subject to all the terms and conditions thereof. The basis of compensation and the other principal features of all Interline Agreements in effect at the time will be set forth in the appropriate instructions, tariffs, rules and regulations currently furnished to Avianca by Pan American and copies of such agreements will be furnished to Avianca upon request.

[fol. 2266] It is further understood that, with respect to any transportation sold in accordance with an Interline Agreement:

(a) Settlement will be effected between Pan American and Avianca in the same manner as settlement is effected with respect to transportation sold pursuant to this Agreement, or in such other manner as may be mutually agreed upon;

(b) Avianca shall have all of the rights and obligations, and only the rights and obligations, provided under such Interline Agreement with respect to affiliated carriers of Pan American;

(c) Except as otherwise provided for in Paragraphs 5(a)(i), 5(a)(ii), 11(a)(i) and 11(a)(ii) hereof, no commission or other compensation or payment (including reimbursement of commissions or payment to sales agents or others) will be paid to or by Avianca except to such extent as may be provided in the Interline Agreement;

(d) Avianca agrees to indemnify and hold harmless Pan American from and against all claims, including costs and expenses, and to reimburse Pan American for all amounts paid by Pan American pursuant to the Interline Agreement or otherwise by reason of any act or omission of Avianca in violation of the Interline Agreement or by reason of any loss, damage, injury or delay which shall have been caused by Avianca;

(e) In case Pan American shall take action of any kind in connection with the sale by Avianca of transportation over the lines of a carrier with which Pan American has an interline agreement, or the sale by any such carrier of transportation over the lines of Avianca, Pan American shall be deemed to be acting only as agent for the carrier over whose lines such transportation is to be carried out and shall be under no liability to Avianca in connection therewith, including, but without limitation, liability for payment of commissions or other payment unless collected by Pan American on behalf of Avianca, except that Pan American shall be liable for any loss or damage resulting from its own negligence or wilful misconduct.

[fol. 2267] 18. Each party shall be liable for, and shall reimburse, defend and hold harmless the other, from and against all loss, including costs and expenses relating thereto, arising out of any action taken by such party contrary to or omitted to be taken by such party in accordance with this Agreement. Without limiting the generality of the foregoing, it shall cover loss resulting from fines, penalties or detention expenses imposed by any government or governmental agency (or which any government or governmental agency attempts to impose) provided, however, that when such loss is incurred in any case involving the following circumstances, it shall be charged as follows:

(a) When the fines, penalty or detention expense involves a passenger who is ticketed for a stopover at the point of transfer from lines of one party to the other, the loss involved shall be for the account of the onward carrying party.

(b) When the fine, penalty or detention expense results from facts not apparent upon reasonable examination at the time the passenger was processed for travel at the original point of departure or stopover point referred to in subparagraph (a) above, as the case may be, his qualifications for entry into the country imposing such fine, penalty or detention expense having appeared to be proper and complete (including, but not limited to, cases involving errors on the part of consular officials and changes of law or regulations while the passenger was en route), such loss shall be prorated between Avianca, Pan American and its affiliated carriers in proportion to the revenue which each shall receive from the carriage of the passenger.

The party against which any fine, penalty or detention expenses is imposed (even though the loss resulting therefrom is, by the terms of this Agreement, subject to reimbursement in whole or in part by another party) shall be responsible for the defense thereof, it being understood that all reasonable efforts shall be taken by such party to obtain the remission of such fine, penalty or detention expense. Each interested party will cooperate and assist the defending party to

[fol. 2268] the extent reasonably requested of it, furnishing all data and information related to such fine, penalty or detention expense in its possession or available to it.

19. Amounts paid by Pan American or its affiliated carriers or Avianca in settlement of claims for concealed loss or damage (i.e., loss or damage not observed or detected and recorded prior to delivery to the passenger or consignee) to cargo or baggage transported over the lines of Avianca and of Pan American or its affiliated carriers, as the case may be, shall, after crediting any amounts received from other carriers, not affiliated carriers of Pan American, in respect of such loss or damage, be prorated between Pan American and Avianca on the basis of the ratio of the miles of carriage performed by Avianca, on the one hand, and Pan American and its affiliated carriers on the other, with respect of such cargo or baggage.

20. Any claim or controversy arising out of or relating to this Agreement or to the manner of performance of breach thereof shall be referred to, and settled by, arbitration in the manner hereinafter provided.

The party requesting arbitration shall notify the other party naming its arbitrator in the notice. The other party shall appoint an arbitrator within ten (10) days after the receipt of such notice. Within ten (10) days after such appointment, the two arbitrators shall appoint a third arbitrator and the decision or the award of any two of such three arbitrators shall be final, binding and conclusive upon the parties. If either party fails to appoint the arbitrator to be appointed by such party, or if the arbitrators appointed by or for the respective parties shall fail to appoint such third arbitrator, then and in either such event such then unappointed arbitrator shall be appointed by the Inter American Commercial Arbitrator Commission. Any such arbitration shall be conducted in accordance with the law of the State of New York and held in New York City, New York, unless the parties shall otherwise agree in writing.

[fol. 2269] 21. The term "affiliated carriers" whenever used in this Agreement shall, for the purpose hereof, be

deemed to mean such companies, other than Avianca, engaged in the transportation of passengers, mail, express or cargo by air, in which Pan American or any company owning a majority of the capital stock of Pan American, owns a stock interest and which Pan American may from time to time designate in writing to Avianca; provided however, that Pan American-Grace Airways, Inc. shall be excluded from the term "affiliated carriers" as used in Paragraphs 1, 2, 5(a)(i) and 5(a)(ii) hereof.

22. This Agreement cancels and supersedes all existing arrangements between the parties relating to the same subject matter.

23. Neither party may assign this Agreement or any obligation imposed on such party hereunder; provided, however, that nothing herein contained shall prevent Pan American from carrying out its obligations hereunder in all or any portion of its General Agency Territory through a general sales agent.

24. The provisions of this Agreement shall be subject to any applicable rule or resolution, including but not limited to rules or resolutions relating to commissions, of the International Air Transport Association or the Air Traffic Conference of America or any similar body or organization, or any branch, committee or conference thereof which is binding upon either party to this Agreement, or to any applicable agreement made by either party to this Agreement and approved by the International Air Transport Association, the Air Traffic Conference of America, or any such similar organization which is binding upon either party to this Agreement, and said provisions shall be deemed to be amended by any such rule, resolution or agreement. Information applicable to this Agreement regarding such rules, resolutions and agreements which are not directly available to either party hereto as a member of the organization which adopted or approved the same, will be furnished to the other party within a reasonable time after the effective date thereof.

25. Any notice required or permitted to be given pursuant to this Agreement shall be duly given if sent by mail

or delivered by hand, in the case of notice to Pan American, to the Vice President-Traffic and Sales, Pan American [fol. 2270] Airways, Inc., 135 East 42nd Street, New York 17, New York, United States of America, or to such other person or such other address as Pan American may from time to time designate for that purpose, and in the case of notice to Avianca, to the Traffic Manager, Aerovias Nacionales de Colombia, S.A. Carrera 9, Calle 12, Bogota, Colombia, or such other person or such other address as Avianca may from time to time designate for that purpose.

26. This Agreement shall become effective on November 1, 1949, and shall continue in effect until December 31, 1950, and shall continue in effect from year to year thereafter provided, however, that either party may, after that date, terminate this Agreement by giving six (6) months' written notice of termination to the other party. Termination of this Agreement shall not relieve either party from any obligation or liability on its part arising from or connected with tickets, exchange orders, airwaybills or other contracts for transportation issued or effected prior to such termination nor shall it relieve either party from any liability on its part based upon any state of facts existing prior to such termination.

IN WITNESS WHEREOF, Pan American and Avianca have caused this Agreement to be executed in their corporate names by their respective officers thereunto duly authorized.

PAN AMERICAN WORLD AIRWAYS EXHIBIT 53

I, Joseph J. Cantwell, hereby certify that I am Assistant Secretary of Pan American World Airways, Inc.; that the attached document(s) (are) true and complete copy (s) of the document(s) evidencing the following Agreement:

General Traffic and Sales Agency Agreement, dated December 3, 1954, between Pan American World Airways, Inc. and Aerovias Nacionales De Colombia, S.A., and a supplementary letter agreement with respect thereto of the same date.

JOSEPH J. CANTWELL
Assistant Secretary

Dated: December 8, 1954

[fol. 2272]

GENERAL TRAFFIC AND SALES AGENCY AGREEMENT

THIS AGREEMENT, made as of December 3, 1954, between PAN AMERICAN WORLD AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York, hereinafter referred to as "Pan American", and AEROVIAS NACIONALES DE COLOMBIA, S.A., a corporation organized and existing under the laws of Colombia, hereinafter referred to as the "Company",

WITNESSETH THAT:

WHEREAS, Pan American operates an extensive system of international air transportation services between the United States and various countries and colonies in Latin America, which services extend through Colombia; and

WHEREAS, the company operates air transportation services in Colombia, and between Colombia and the United States and Europe, and

WHEREAS, Pan American and the Company are parties to an Agreement dated as of November 1, 1949, under which

the Company acts as General Traffic and Sales Agent in Colombia for Pan American and its affiliated carriers, and Pan American and its affiliated carriers act as General Traffic and Sales Agent outside Colombia and Ecuador for the Company; and

WHEREAS, the parties desire to terminate said Agreement, and to enter into a new agreement upon the terms and conditions set forth herein:

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained, the parties hereby agree as follows:

1. Pan American and the Company agree to accept as general basis for their reciprocal relations for the sale and/or handling of passengers, express and cargo transportation over their respective lines, the conditions and stipulations contained in the INTERNATIONAL AIR TRANSPORT ASSOCIATION (IATA) INTERLINE TRAFFIC, BAGGAGE AND CARGO HANDLING AGREEMENTS (hereinafter sometimes referred to as the [fol. 2273] "IATA Agreements"), except as otherwise specifically and mutually agreed upon herein. Pan American and the Company have heretofore become parties to the IATA Agreements by making written application to, and depositing executed counterparts of said IATA Agreements with, the Secretary of the Traffic Committee of IATA, but neither party has concurred in the participation with the other as a party to said IATA Agreements. Prior to December 15, 1954, the Company shall submit to the Secretary of the Traffic Committee of IATA, in writing, its concurrence in the participation with Pan American and its affiliated carriers as a party to the IATA Agreements, and shall promptly thereafter notify Pan American and its affiliated carriers in writing of the submission of such concurrence. Promptly after the receipt by Pan American of the notice referred to in the preceding sentence, Pan American shall submit, and arrange for its affiliated carriers to submit, to the Secretary of the Traffic Committee of IATA, in writing, their concurrence in the participation with the Company as a party to the IATA Agreements. Notwithstanding the

provisions of the IATA Agreements relating to the time at which said IATA Agreements shall become binding between any of the parties thereto, said IATA Agreements shall be deemed effective as between the parties hereto, including affiliated carriers of Pan American, as of the effective date of this Agreement.

2. Pan American and its affiliated carriers, on the one hand, and the Company, on the other, agree, in accordance with the general and basic conditions established hereunder, to render for each other such additional services as are listed in the ANNEXES to this Agreement, which services are not covered by the IATA Agreements.

3. Pan American hereby appoints the Company, and the Company agrees to act as, General Traffic and Sales Agent in Colombia (except in the territories, regions, and cities specifically excluded by Annex No. 1), for Pan American and its affiliated carriers. As such General Traffic and [fol. 2274] Sales Agent, the Company agrees that it will perform such services as may be appropriate to promote passenger, mail, express and cargo traffic over the lines of Pan American and its affiliated carriers and, in cooperation with Pan American, to arrange for transportation of passengers, baggage, mail, express, and cargo over such lines. In the event Pan American shall desire to establish its own sales offices in cities or regions in Colombia (other than those established prior to the effective date of this Agreement), Pan American shall be permitted to do so upon giving the Company not less than sixty (60) days' notice in writing of the establishment of such sales office.

4. The Company hereby appoints Pan American and its affiliated carriers, and Pan American agrees to act and make arrangements with its affiliated carriers under which they will act, as General Traffic and Sales Agent for the Company outside Colombia and Ecuador, except in those countries, regions and cities specifically excluded by Annex No. 1. As such General Traffic and Sales Agent, Pan American and its affiliated carriers agree that they will perform such services as may be appropriate to promote passenger, mail, express and cargo traffic over the lines of the Com-

pany and, in cooperation with the Company, to arrange for transportation of passengers, baggage, mail, express and cargo over such lines. In the event the Company shall desire to establish its own sales offices in cities or regions in the territory in which Pan American acts as General Traffic and Sales Agent hereunder (other than those established prior to the effective date of this Agreement), the Company shall be permitted to do so upon giving Pan American not less than sixty (60) days' notice in writing of the establishment of such sales office.

5. In view of the mutual appointments contained in paragraphs 3 and 4 above, each party acting as General Traffic and Sales Agent for the other accepts the following as the functions to be normally performed by each party for the other in the territory in which such party acts as General Traffic and Sales Agent for the other hereunder:

[fol. 2275] (a) Solicitation and sale of passenger, mail, express and cargo transportation;

(b) Making arrangements on behalf of such passengers for transportation to and from airport terminals at points of call of such other party and for hotel accommodations at such points and at other cities;

(c) Furnishing such advice and information as either party may from time to time request with respect to clearance, customs and immigration procedures at points where such party acts as General Traffic and Sales Agent;

(d) Making local arrangements for advertising and publicity, including the distribution of timetables, advertising materials and other information, as either party may from time to time request to the other party;

(e) Maintaining and operating centrally located sales offices for the sale of transportation for passengers, express and cargo at points served by said party, which offices will be staffed with competent traffic and sales personnel for the sale, and the sales promotion, of passenger, mail, express and cargo transportation over the lines of the other party and for the handling of all matters pertaining thereto pursuant to this Agreement;

(f) Performance of such acts and checking of such documents as may be required by applicable governmental laws or regulations for passengers, baggage, mail, express and cargo to be transported over the lines of the other party, including the making of arrangements for the presence of such government officials as may be required in connection therewith;

(g) Checking baggage of outgoing passengers and delivering baggage to incoming passengers if the other party so requests, collecting for the account of the other party any excess baggage charges payable with respect to any baggage checked by one party for transportation over the lines of the other party, receiving and forwarding by car- [fol. 2276] riers with which either party has forwarding arrangements, any trunks or other heavy baggage delivered to either party for the purpose by the other party or by passengers traveling or proposing to travel, over said lines, and collecting any charges payable therefor;

(h) Receiving from shippers outgoing express and cargo to be carried over the lines of the other party and delivering to consignees incoming express and cargo carried over said lines if either party so requests, collecting and forwarding by other transportation agencies any express or cargo delivered to either party for the purpose by the other party, and collecting any charges, including C.O.D. and Collect Charges, payable therefor in respect to any such express or cargo;

(i) Furnishing such catering service and other passenger service as either party may specifically request in connection with such party's operations;

(j) Making reservations for and facilitating transportation by the other party, its affiliated carriers and connecting carriers;

(k) Service all passenger and/or cargo sales agents of the other party; and, if and when required by the other party, obtain remittances of funds and pay them commissions for sales of transportation made by them over the lines of such other party, all in accordance with the policies,

practices, rules, regulations and instructions of such other party pertaining thereto.

(l) Subject to the conditions set forth in the Annexes, assisting in negotiations with Government agencies in countries in which one party acts as General Traffic and Sales Agent for the other, as such other party may specifically request.

6. All action taken by each party as General Traffic and Sales Agent, whether specifically referred to herein or otherwise, shall be in accordance with the instructions, rules, regulations, fares, rates and tariffs of the party or its affiliated carriers for whom such action is taken hereunder.

[fol. 2277] 7. Each party agrees to effect the appointment for the purposes of this Agreement, in the name and on behalf of the other party, of such agents in the territory in which said party acts as General Traffic and Sales Agent hereunder, as the other party may from time to time request, all in accordance with, and upon such terms and conditions as shall be set forth in, the instructions (including official published agency rules, regulations, policies and practices) and forms of agreement which said other party shall furnish to said party as its General Traffic and Sales Agent hereunder, and to cancel the appointment of any agent for the purpose of this Agreement, upon said other party's request.

8. (a) Subject to the provisions of paragraph 19 hereof, in consideration for the Company acting as General Traffic and Sales Agent for Pan American and its affiliated carriers hereunder, Pan American hereby agrees to pay to the Company for sales made in the territory in which the Company acts as General Traffic and Sales Agent for Pan American and its affiliated carriers, in addition to any commissions payable under the IATA Agreements:

(i) A commission equal to three (3%) percent of the total amount of the applicable fares for passenger transportation over the lines of Pan American and its affiliated

carriers, excluding excess baggage weight charges and valuation and insurance charges on baggage, collected by the Company either directly or by agents (including other carriers), or by Pan American, including passenger transportation sold by the Company and furnished under any Time Payment Plan tariff of Pan American, Universal Air Travel Cards acceptable to Pan American, and Government transportation requests or warrants presented by passengers of Pan American or its affiliated carriers.

(ii) A commission equal to two and one-half ($2\frac{1}{2}\%$) percent of the total amount of the applicable charges (not including insurance and C.O.D. charges) for air express and cargo transportation over the lines of Pan American or its affiliated carriers, collected by the Company either directly or by agents (including other carriers), or by [fol. 2278] Pan American, or provided for on collect charge shipments for which the Company issues the air waybill (excluding charges collected for shipments for which the Company does not issue the air waybill).

(b) Subject to the provisions of paragraph 19 hereof, in consideration for Pan American and its affiliated carriers acting as General Traffic and Sales Agent for the Company hereunder, the Company hereby agrees to pay to Pan American for sales made in the territory in which Pan American and its affiliated carriers act as General Traffic and Sales Agent for the Company, in addition to any commissions payable under the IATA Agreements:

(i) A commission equal to three (3%) percent of the total amount of the applicable fares for passenger transportation over the lines of the Company, excluding excess baggage weight charges and valuation and insurance charges on baggage, collected by Pan American or its affiliated carriers either directly or by agents (including other carriers), or by the Company, including passenger transportation sold by Pan American or its affiliated carriers and furnished under any Time Payment Plan, Universal Air Travel Cards acceptable to the Company and Government transportation requests or warrants presented by passengers of the Company.

(ii) A commission equal to two and one-half (2½%) percent of the total amount of the applicable charges (not including insurance and C.O.D. charges) for air express and cargo transportation over the lines of the Company, collected by Pan American or its affiliated carriers either directly or by agents (including other carriers), or by the Company, or provided for on collect charges shipments for which Pan American or any affiliated carrier of Pan American issues the air waybill (excluding charges collected for shipments for which Pan American or any affiliated carrier of Pan American does not issue the air waybill).

(c) No commission will be payable with respect to any [fol. 2279] fares or charges which shall be refunded, except as otherwise provided by the party over whose lines the transportation is or is to be carried out.

(d) Each party hereby agrees to pay or reimburse to the other party any out-of-pocket expenses specifically requested and approved by such party and incurred by the other, not chargeable to passengers or shippers (other than the cost of routine notices, distribution of time tables and sales promotion material, solicitation and salaries of personnel, office rental, telephone service and other expenses incurred in performing such services as are customarily performed by a General Traffic and Sales Agent) in carrying out special services (including such expenses for advertising and publicity and catering) requested under this Agreement.

9. (a) Each party agrees to indemnify the other and hold it harmless from and against all claims, for any loss, damage, injury or delay of any nature whatsoever, including costs and expenses, which shall occur in connection with the transportation services of said party or in connection with the carrying out or failure to carry out any obligation to third parties arising by reason of action taken on behalf of said party by said other party as General Traffic and Sales Agent pursuant to this Agreement unless such loss, damage, injury or delay shall be caused by the negligence or wilful misconduct of said other party. Pan American agrees to obtain a similar commitment from

each of its affiliated carriers with respect to its transportation services and obligations to third parties arising by reason of action taken on its behalf.

(b) Each party hereby releases the other from all liability to it for loss, damage, injury or delay, arising by reason of any action taken or omitted to be taken on behalf of said party by said other party as General Traffic and Sales Agent pursuant to this Agreement unless such loss, damage, injury or delay shall be caused by the negligence or wilful misconduct of said other party.

[fol. 2280] (c) It is expressly understood, without limiting the generality of the foregoing provisions of this paragraph 9, that expenses to either party arising from any fines, penalties or detention expenses imposed by any government or governmental agency (or which any government or governmental agency attempts to impose), as the result of negligence on the part of the other in performing the functions provided for in paragraph 5(f) of this Agreement, shall be for the account of said other party.

(d) The provisions of this paragraph 9 shall relate to matters dealt with in this Agreement other than matters dealt with in the IATA Agreements, and shall not be deemed to modify any of the provisions of said agreements. The provisions of this paragraph 9 shall be applicable to any functions provided to be performed by either party for the other by the terms of this Agreement, which functions may also be provided for by the terms of any ground handling agreement, ground servicing agreement or other agreement between the parties, notwithstanding any provision to the contrary, or inconsistent therewith, in said ground handling agreement, ground servicing agreement or other agreement.

10. Each party agrees to cooperate with the other in the operation of passenger, mail, express and cargo air services of the other and that it will, so long as this Agreement shall remain in force and effect, assist the other in the establishment and operation of such services.

11. All expenses for telegrams, cables, radiograms or other communications sent in connection with or pursuant

to this Agreement, including communications relating to reservations and cancellations of reservations, shall be borne by the sender.

12. Except as otherwise agreed upon between the parties in writing, settlement of all amounts payable hereunder, including all amounts collected on behalf of either party for transportation sold under the provisions of the IATA [fol. 2281] Agreements, shall be made in accordance with the applicable rules and regulations of the IATA Clearing House.

13. In the event that Pan American shall have arrangements (hereinafter referred to as an "Interline Agreement"), with any other carrier other than pursuant to an IATA Interline Traffic Agreement, pursuant to which Pan American and its affiliated carriers are authorized to sell transportation over the lines of such other carrier and such other carrier is authorized to sell transportation over the lines of Pan American and its affiliated carriers; it is understood that the Company is an affiliated carrier of Pan American for the purpose of the Interline Agreement and the Company is hereby authorized to sell transportation, and agrees to honor transportation sold, pursuant to the Interline Agreement, subject to all the terms and conditions thereof. The basis of compensation and the other principal features of all Interline Agreements in effect at the time will be set forth in the traffic rules and regulations currently furnished to the Company by Pan American and copies of such agreements will be furnished to the Company upon request. It is further understood that, with respect to any transportation sold in accordance with the Interline Agreement:

(a) Settlement will be effected between Pan American and the Company in the same manner as settlement is effected pursuant to this Agreement, or in such manner as shall be mutually agreed upon;

(b) The Company shall have all of the rights and obligations, and only the rights and obligations, provided under the Interline Agreement with respect to affiliated companies of Pan American;

(c) No commission or other compensation or payment (including reimbursement of commissions or payment to sub-agents or others) will be paid by or to the Company, except to such extent as may be provided in the Interline [fol. 2282] Agreement; and

(d) The Company agrees to indemnify and hold harmless Pan American from and against all claims, including costs and expenses, and to reimburse Pan American for all amounts paid by Pan American pursuant to the Interline Agreement or otherwise by reason of any action taken by the Company pursuant to this paragraph 13.

14. In case Pan American shall take action of any kind in connection with the sale by the Company of transportation over the lines of an affiliated carrier of Pan American, or the sale by an affiliated carrier of Pan American of transportation over the lines of the Company, or in connection with the sale by the Company of transportation over the lines of a carrier with which Pan American has an Interline Agreement, or the sale by any such carrier of transportation over the lines of the Company, Pan American shall be deemed to be acting only as Agent for the carrier over whose lines such transportation is to be carried out and shall be under no liability to the Company in connection therewith, including, but without limitation, liability for payment of commissions or other payments unless collected by Pan American on behalf of the Company, except for its own negligence or wilful misconduct.

15. It is agreed that the name "Pan American", "Pan American Airways System", and "Pan American World Airways", "Pan American World Airways System", and "Clipper" and the Pan American insignia and any other special or distinctive phrase, mark, name or slogan relating to Pan American and used on advertising material or otherwise by the Company, including all accompanying goodwill, are and are to remain the property of Pan American, and that the names "Aerovias Nacionales de Colombia", and "Avianca", and the Company's insignia and any other special or distinctive phrase, mark, or slogan relating [fol. 2283] to the Company and used on advertising mate-

rial or otherwise by Pan American, including all accompanying goodwill, are and are to remain the property of the Company, and Pan American and the Company agree to cooperate fully with each other in the protection of such names, insignia, phrases and marks.

16. Any controversy or claim arising out of or in any manner relating to this Agreement shall be referred to and finally settled by arbitration in accordance with the procedures set forth below, and if necessary, judgment on the award rendered may be entered in any court having jurisdiction thereof.

(i) If the parties agree to the appointment of a single arbitrator, the arbitral tribunal shall consist of him alone.

(ii) If they do not so agree the arbitral tribunal shall consist of three arbitrators. Each party shall appoint one of the three arbitrators, and the arbitrators so appointed shall appoint the third, who shall act as chairman. Should the arbitrators appointed by the parties fail to agree on the appointment of the third, or should either fail to appoint his arbitrator, any supplementary appointment required shall be made by the Director General of the International Air Transport Association (IATA).

(iii) The Director General may, at the request of either party, fix any time limit he finds appropriate within which the other party, or the two arbitrators appointed by the parties, shall constitute the arbitral tribunal. Upon the expiration of this time limit the [fol. 2284] Director General shall take the action prescribed in the preceding paragraph to constitute the tribunal.

(iv) When the arbitral tribunal consists of three arbitrators, its decision shall be given by majority vote.

(v) The arbitral tribunal shall settle its own procedures and if necessary shall decide the law to be applied. The award shall include a direction con-

cerning allocations of costs and expenses of and incidental to the arbitration (including arbitrator fees).

(vi) The award shall be final and conclusively binding upon the parties.

17. As used in this Agreement, the term "affiliated carriers" shall include all companies other than the Company engaged in the transportation of passengers, mail, express or cargo, by air, for hire, capital stock of which shall be owned by Pan American, which Pan American may designate by notice in writing to the Company.

18. (a) Unless otherwise provided for in the Annexes to this Agreement, this Agreement shall become effective as of December 3, 1954, and shall continue in effect until December 31, 1955 and thereafter until terminated by either party at any time after December 31, 1955 upon notice in writing given to the other not less than ninety (90) days in advance of the date of such termination. Termination of this Agreement shall not relieve either party from any obligation or liability on its part arising from or connected with tickets, exchange orders, airway-[fol. 2285] bills or other contracts for transportation issued or executed prior to such termination nor shall it relieve either party from any liability on its part based upon any state of facts existing prior to such termination.

(b) The general traffic and sales agency agreement between Pan American and the Company dated November 1, 1949, as amended, is hereby terminated as of the effective date of this Agreement.

19. The provisions of this Agreement shall be subject to all applicable rules and resolutions, including but not limited to those relating to commissions, of the International Air Transport Association (IATA), or any branch, committee, or conference thereof, which is binding upon either party to this Agreement or to any applicable agreement made by either party to this Agreement and approved by the IATA, and said provisions shall be deemed to be amended by any such rule, resolution or agreement to the extent that said provisions are in conflict with such rule, resolution or agreement.

20. Any notice required or permitted to be given pursuant to this Agreement shall be duly given if sent by mail addressed, in the case of notice to Pan American, to Vice President-Traffic and Sales, Pan American World Airways, Inc., 135 East 42nd Street, New York 17, N. Y., U. S. A., or to such other address as Pan American may from time to time designate for the purpose, and in the case of notice to the Company, to the President, Aerovias Nacionales de Colombia, S. A., Edif. San Tander, Carrera 7a #16-14, Bogota, Colombia, or to such other address as the Company may from time to time designate for the purpose.

21. This Agreement consists of paragraphs 1 through 21, together with Annex No. 1 and the same may hereafter [fol. 2286] be amended by mutual agreement in writing between the parties.

IN WITNESS WHEREOF, Pan American and the Company have caused this Agreement to be executed in the corporate names by their respective officers thereunto duly authorized.

GENERAL TRAFFIC AND SALES AGENCY AGREEMENT

ANNEX NO. 1

1. In accordance with the provisions of paragraph 2 of the GENERAL TRAFFIC AND SALES AGENCY AGREEMENT to which Pan American and the Company are parties;

   (a) Pan American, on one side, agrees to act as General Traffic and Sales Agent on behalf of the Company outside the countries of Colombia and Ecuador; and

   (b) The Company, on the other side, agrees, to act as General Traffic and Sales Agent on behalf of Pan American in the country of Colombia.

Pan American agrees to assist the Company in negotiations with government agencies in the countries in which Pan American acts as General Traffic and Sales Agent for the Company, to such an extent as shall be requested by the Company, and any out-of-pocket expenses incurred in furnishing such assistance will be reimbursed by the Company. The Company agrees to assist Pan American in negotiations with the government agencies in Colombia to such an extent as shall be requested by Pan American, and any out-of-pocket expenses incurred in furnishing such assistance will be reimbursed by Pan American.

[fol. 2288]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 54

December 3, 1954

Mr. Willis G. Lipscomb
Vice President—Traffic & Sales
Pan American World Airways, Inc.
135 East 42nd Street
New York 17, N. Y.

Dear Mr. Lipscomb:

Reference is made to the General Traffic and Sales Agency Agreement between our respective companies executed on this date, and to Paragraph 8 (d) thereof which provides that each party thereto pay or reimburse the other any out-of-pocket expenses specifically requested and approved by such party and incurred by the other.

This letter, when accepted by you, will evidence our further agreement with respect to the following matters in regard to the provisions of Paragraph 8(d) of said Agreement, in order to continue the existing arrangements between us with respect thereto:

1. We hereby request that, until further notice, the following materials and services be furnished by Pan American World Airways, Inc., on behalf of Aerovias Nacionales de Colombia, S.A., (AVIANCA) the expenses for which will be reimbursed to Pan American by AVIANCA in accordance with the terms hereinafter provided:

A. Production of System timetables and distribution to offices of Pan American, AVIANCA and of other System carriers, expenses for which include:

(a) Printer's charges, including but not limited to composition, correction, printing and paper;

(b) Charges for photographs, art work and design; and

(c) Expense of distribution to offices of Pan American, AVIANCA and other System carriers which share in such expense.

B. Production, filing and distribution of tariffs and schedules, including those filed with the United States Civil Aeronautics Board (CAB) and with agencies of other governments, expenses for which include:

(a) Printer's charges, including but not limited to composition, correction, printing, paper;

(b) Cost of binders; and

[fol. 2289] (c) Expense of transmitting to CAB and other governmental agencies and of distribution to offices of Pan American, AVIANCA and other System carriers which share in such expense.

C. Production and distribution of Traffic Manuals, expenses for which include:

(a) Printer's charges, including but not limited to composition, correction, printing and paper;

(b) Cost of binders; and

(c) Expense of distribution to offices of Pan American, AVIANCA and of other System carriers which share in such expenses.

D. Production and distribution of Universal Air Travel Plan and Pay Later Plan instructions, forms, cards and related documents, expenses for which include:

(a) Printer's charges, including but not limited to composition, correction, printing and paper; and

(b) Expense of distribution to offices of Pan American, AVIANCA and of other System carriers which share in such expense.

E. Publication of schedules, rates and related matter in the sections of the OFFICIAL GUIDES relating to Pan American World Airways System, at cost as billed by said publications.

2. AVIANCA agrees to pay to Pan American as its share of the expenses for the respective services above described an amount that bears the same ratio to the total expenses incurred for said services as AVIANCA's pas-

senger and cargo gross revenues, whichever shall be applicable as set forth below, for the calendar preceding the year in which said expenses are incurred bear to the total of such revenues for such preceding calendar year for all of the carriers in the Pan American World Airways System which share in such costs of such service; provided, that in no case shall AVIANCA's share of expenses relating to cargo traffic only exceed 10% of the total System cargo revenue. For the purpose of the preceding sentence, cargo and express revenues are to be used for determining the share of expenses with respect to services relating exclusively to cargo or express, and passenger revenues are to be used for determining the share of expenses with respect to all other services referred to herein. With respect to publication of schedules, rates and related matter in the separate AVIANCA section of the OFFICIAL GUIDES, AVIANCA will reimburse Pan American for costs as billed by said publications.

[fol. 2290] 3. The cost of distribution of the various documents referred to herein shall include only the cost of distribution to the offices of the various carriers in the Pan American World Airways System and shall not include cost of distribution of any of such documents or other advertising material by Pan American or any of such carriers to sub-agents or to prospective travelers or shippers, all of which when done by Pan American shall be considered a normal sales promotion activity as a general agent.

4. All of the documents referred to above and other traffic documents, such as tickets, ticket envelopes, exchange orders, airwaybills, sales agency agreements, baggage checks and similar documents, will be procured by AVIANCA in accordance with the terms of the letter agreement dated June 25, 1952 relating to purchasing and shipping services to be rendered to AVIANCA by Pan American.

If the foregoing correctly sets forth our agreement in regard to these matters, will you please indicate your

acceptance on the enclosed copy of this letter and return the same to us.

Very truly yours,

AEROVIAS NACIONALES DE COLOMBIA, S. A.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 55

December 3, 1954

Aerovias Nacionales de Colombia, S. A.,
Bogota, Colombia.

Attention: Mr. H. Max Healey, Commercial Vice President

Dear Sirs:

Enclosed herewith is a form of General Traffic and Sales Agency Agreement which we propose to supersede the existing agency agreement between us dated November 1, 1949. If the enclosed form of General Traffic and Sales Agency Agreement is satisfactory to you, will you kindly execute and return to us two copies thereof. We will then execute the same and return one executed copy for your files.

We hereby designate Compania Mexicana de Aviacion, S. A., Lineas Aereas Costarricenses, S. A., and Panair do Brasil, S. A., pursuant to paragraph 17 of the Agreement, as affiliated carriers of Pan American for the purposes thereof. We also designate Aeronaves de Mexico, S. A., pursuant to paragraph 17 of the Agreement, as an affili-

ated carrier of Pan American solely with respect to matters relating to participation in the IATA Interline Traffic, Baggage and Cargo Handling Agreements and Avianca acting as General Traffic and Sales Agent under the Agreement. Pan American-Grace Airways, Inc., is also designated, pursuant to paragraph 17 of the Agreement, as an affiliated carrier of Pan American solely with respect to matters relating to participation in the IATA Interline Traffic, Baggage and Cargo Handling Agreements and Pan American and its affiliated carriers acting as General Traffic and Sales Agent under the Agreement.

Very truly yours,

PAN AMERICAN WORLD AIRWAYS, INC.

By /s/ WILLIS G. LIPSCOMB
Vice President—Traffic & Sales

INTERLINE TRAFFIC AGREEMENT

(I.A.T.A. Form)

WHEREAS the parties hereto operate air transportation services and desire to enter into arrangements under which each may sell transportation over the routes of the others,

NOW THEREFORE, in consideration of the mutual covenants and agreements herein contained, the parties agree as follows:

I. *Definitions*

1. "Ticket" means the form issued to passenger(s) by a party hereto for transportation for hire of the passenger(s) and his (their) baggage over the routes of one or more such parties.

2. "Exchange Order" (which is equivalent to the term Exchange Voucher) means the form issued by a party hereto which provides for the issuance of ticket(s) in exchange for such exchange order.

3. "Consignment Note" (which is equivalent to the term Air Waybill) means the form completed by a party hereto which evidences the contract between a consignor and a carrying airline(s) for the transportation of cargo over the routes of one or more such parties.

4. "Issuing Airline" means a party hereto which issues a ticket or exchange order or completes a consignment note for transportation over the routes of another party(ies) to this agreement.

5. "Carrying Airline" means a party hereto over whose routes a passenger, baggage or cargo is transported or is to be transported pursuant to a ticket actually issued or to be issued in exchange for an exchange order or pursuant to a consignment note.

6. "Transferring Airline" means a Carrying Airline over whose routes a passenger, baggage or cargo is to be transported from the point of origin, or a stop-over or transfer point, to the point of transfer to the next carrying airline.

7. "Cargo" means any property transported for hire, other than mail, baggage, or property retained in the custody of a passenger.

[fol. 2293] 8. "Baggage" means the property of a passenger carried in connection with the trip for which the passenger has purchased a ticket and checked in accordance with applicable tariffs.

9. "Tariffs" means the fares, rates, charges, rules, regulations, conditions of carriage and instructions pertaining to transportation duly published by any of the parties hereto.

10. "Sale" means the issuance of a ticket or exchange order or the completion of a consignment note or other transportation document as authorized herein.

11. "IATA" means International Air Transport Association.

II. *Issuance of Tickets and Exchange Orders and Completion of Consignment Notes*

1. Each party hereto is hereby authorized to issue or complete:

(a) tickets, or exchange orders exchangeable for tickets, for transportation of passengers, provided that, unless otherwise agreed as between any of the parties, baggage shall be checked by each carrying airline only for its respective portion of the transportation.

(b) consignment notes for transportation of goods over the routes of each other party hereto, and

(c) all other documents necessary or appropriate for such transportation;

all in the form approved by, and in accordance with the tariffs and the terms, provisions, and conditions of the tickets, consignment notes, and other documents of the party over whose routes the passenger, baggage, or cargo is to be carried. No ticket, exchange order or consignment note will be issued or completed providing for space on a particular flight unless an advance reservation (booking) shall have been made for the transportation, and the issuing airline shall have received payment of the total charges payable therefor in accordance with such tariffs or shall have made arrangements

satisfactory to the carrying airline for the collection of such charges. The issuing airline will not, directly or indirectly, or through any agent or broker, or otherwise, rebate or remit any portion of the charges specified in said tariffs.

2. Each party agrees to accept each such ticket, consignment note, or other transportation document [fol. 2294] and to honour each exchange order issued by any other party hereto and to transport passengers, baggage or cargo as specified therein subject to its applicable tariffs. Such consignment note may provide for turning over to other transportation agencies for onward carriage by them of goods destined beyond points served by the carrying airlines, and in such event it is agreed that the carrying airline will act in accordance with the terms of such provision.

3. Each party shall furnish to each other party the tariffs and other information necessary to the sale, as contemplated hereunder, of the transportation services currently being offered by it. In case any schedule, tariff, form of ticket or exchange order or consignment note of any party hereto relating to transportation over its lines, shall be modified or amended at any time, or in case any service of any such party shall be suspended, modified or cancelled, such party will notify each other party as far in advance as practicable, of the effective date of any such modification, amendment, suspension or cancellation.

III. *Claims and Indemnities*

1. The carrying airline, as principal, indemnified the issuing airline, including its officers, employees, agents and servants, as agent, against all claims, demands, costs, expenses, and liability arising from the issue, completion or acceptance of any ticket, exchange voucher or consignment note or from the carriage effected in pursuance thereof; provided

that such indemnification shall not cover claims caused solely by the negligence or wilful misconduct of the issuing airline; and provided further, that, in respect to claims resulting from tickets, exchange orders or consignment notes improperly issued, completed or delivered by an issuing airline, such issuing airline indemnified the carrying airline, including its officers, employees, agents and servants.

2. Upon the transfer of baggage and/or cargo hereunder, the transferring or onward-carrying airline indemnifies the onward-carrying or transferring airline, including its officers, employees, agents and servants, respectively, against all claims, demands, and liability arising from such transferring or onward-carrying airline(s) failure to discharge its obligation or responsibility as provided hereinafter in Article V, Paragraph 7.

3. In the event that any claim is made or suit is commenced against a party hereto, indemnified as above, such party shall give prompt written notice to the appropriate other party hereto and shall furnish as requested all available communications, [fol. 2295] legal processes, data, papers, records and other information, material to the resistance or defence of such claim or suit.

4. Each party agrees to hold harmless and indemnify all other parties hereto from all claims, demands, costs, expenses and liability arising from or in connection with the death or injury to passengers, or loss, damage or delay of baggage or cargo incurred while such passengers, baggage or cargo are, pursuant to this agreement, under the control or in the custody of, or being transported by, such party.

5. Amounts paid in settlement for loss or damage to baggage or cargo not detected and recorded at the time of transfer between the carriers shall be prorated between all carrying airlines concerned

on the basis of transportation fares and charges received by each from such transportation.

IV. *Commissions*

1. No commission shall be paid by one party to the other for any sale made pursuant to this agreement except such commissions as may be currently authorized by applicable resolution of IATA, or, if no applicable resolution of IATA is in effect, only such commissions as the parties hereto may otherwise agree to.

2. If the carrying airline, the passenger or consignor (or purchaser of a ticket, or exchange order) for any reason cancels any booking or does not use all or any portion of the transportation specified, neither the issuing airline nor its agent shall claim or withhold any commission for the sale of transportation so cancelled or unused.

3. No commission or other compensation shall be payable to the issuing airline in respect of sums not actually collected and paid over by it to the carrying airline, as evidenced by exchange orders, tickets, consignment notes or other authorized transportation documents issued by the issuing airline, or with respect to sums which shall be refunded, except as otherwise specifically authorized by the carrying airline.

V. *General*

1. In issuing or completing tickets, exchange orders and consignment notes for transportation over the routes of other parties hereto, the issuing airline shall be deemed to act only as an agent of the carrying airline(s).

[fol. 2296] 2. Any act which a party is authorized or permitted by this agreement to take may be taken through an agent of that party; provided, however, that whenever transportation is sold by

any party through an agent, such party, if so required by the carrying airline, will notify the carrying airline(s) concerned of the name and location of the agent and will pay commissions to the agent only in accordance with applicable resolutions of IATA, or if there are no such resolutions, in accordance with directions of the carrying airline(s).

3. Each party hereto agrees not to make any representations with regard to the tickets, exchange orders, consignment notes, or other transportation documents of any other party hereto, or of the flight or journey for which the same shall be sold or issued, except those representations specifically authorized by such other party.

4. Nothing herein contained shall be deemed to require any party hereto to initiate or maintain service between any particular points.

5. Whenever a sale by an issuing airline is made in the territory of a General Agent or General Sales Agent of a carrying airline, the reservation and sale shall be handled in accordance with arrangements made between the parties hereto. Each party will advise each other party from time to time of the names and addresses of all General Agents or General Sales Agents of such party located in the area where such other party has an office(s) for the sale of transportation and of the territory for which each General Agent or General Sales Agent holds the General Agency/General Sales Agency.

6. In transferring interline baggage, accompanied or unaccompanied, and cargo, it shall be the responsibility of the transferring airline, but without incurring any liability for loss of revenue in cases of missed connections, to deliver such baggage or cargo to the next carrying airline, at such location and hours to be agreed upon in writing by the parties concerned.

7. Whenever baggage or cargo is to be transferred for onward transportation hereunder and completion of such transportation necessitates compliance with the laws and regulations pertaining to importation and transit or exportation and transit of the country of point of transfer, it shall be the responsibility of the transferring airline to comply with such laws and regulations and to deliver, where necessary, to the onward-carrying airline, prior to or simultaneously with the transfer, proper evidence of compliance with that country's laws [fol. 2297] and regulations pertaining to such importation and transit or exportation and transit; provided, however, that in any case where compliance with such laws and regulations can be made only by the onward-carrying airline, it shall be the onward-carrying airline's responsibility to comply therewith, and provided further that any two or more parties hereto may, by separate written agreement, alter such responsibilities as between themselves.

VI. *Interline Settlement*

1. Each issuing airline agrees to pay to each carrying airline the transportation charges applicable to the transportation performed by such carrying airline and any additional transportation or non-transportation charges collected by the issuing airline for the payment of which the carrying airline is responsible.

2. a) Settlements of amounts payable pursuant to this agreement between parties that are members of the IATA Clearing House shall be in accordance with applicable rules and regulations of the IATA Clearing House.

   b) Settlements of amounts payable pursuant to this agreement involving one or more parties that are not members of the IATA Clearing House shall be made monthly or at such shorter

intervals and in such manner and by such means as may be mutually agreed upon by the respective parties hereto. Statements of account covering all such amounts will be exchanged as promptly as practicable after the end of each month and balances will be settled promptly after such statements are exchanged by a cash payment in the currency designated from time to time by the carrying airline to which such payment is due.

VII. *Arbitration*

1. Any dispute concerning the scope, meaning, construction or effect of this agreement or arising therefrom shall be referred to and finally settled by arbitration.

2. If the parties concerned agree to the appointment of a single arbitrator the arbitral tribunal shall consist of him alone.

3. If they do not so agree, the arbitral tribunal shall consist of one arbitrator for each party and one or two other arbitrators, as may be required to provide an odd number. Each party concerned shall appoint one of the arbitrators, and the arbitrators so appointed shall appoint the other(s), [fol. 2298] one of whom shall be designated as chairman. Should the arbitrators appointed by the parties fail to agree on appointment of the other(s) or designation of a chairman, or should any party fail to appoint his arbitrator, any such appointment required shall be made by the Director General of IATA.

4. The Director General may, at the request of any party concerned, fix any time limit he finds appropriate within which the parties, or the arbitrators appointed by the parties, shall constitute the arbitral tribunal. Upon expiration of this time limit the Director General shall take the action pre-

scribed in the preceding paragraph to constitute the tribunal.

5. When the arbitral tribunal consists of more than one arbitrator, its decision shall be given by majority vote.

6. The arbitral tribunal shall settle its own procedure, and if necessary shall decide the law to be applied. The award shall include a direction concerning allocation of costs and expenses of and incidental to the arbitration (including arbitrator fees).

7. The award shall be final and conclusively binding upon the parties.

VIII. *Termination of Prior Agreements*

This agreement supersedes all previous interline traffic agreements pertaining to international transportation of passengers, baggage and or cargo between and among the parties hereto which are in conflict herewith.

IX. *Application to become a Party*

Any airline desiring to become a party to this agreement shall make written application to the Secretary of the Traffic Committee of IATA. Upon receiving such application, the Secretary shall mail to each of the parties hereto a notice of such application. Each party shall then in writing to the Secretary either concur in or dissent from such application. Upon execution of a counterpart hereof by the applicant, the Secretary shall, sixty days after notice of such application, mail to each of the parties and to the applicant, a second notice stating which parties have concurred in such application. Thirty days after the date of mailing of such latter notice, this agreement shall become binding between the applicant and all of the parties who have concurred in such application.

[fol. 2299] X. *Withdrawal from Agreement*

A party hereto may withdraw from this agreement, either with respect to all the parties or with respect to a designated party, by giving thirty days written notice of such withdrawal to the Secretary of the Traffic Committee of IATA and to all the parties hereto; in the latter alternative the agreement shall continue in force between the party giving such notice and all parties hereto except such designated party. Such withdrawal does not relieve any of the parties from obligations or liabilities incurred hereunder before the date of effectiveness of such withdrawal.

XI. *Execution Hereof*

This agreement may be executed in any number of counterparts, all of which shall be taken to constitute one original instrument. Such counterparts shall be deposited with the Secretary of the Traffic Committee of IATA.

PAN AMERICAN-WORLD AIRWAYS, INC. EXHIBIT 57

AMENDMENT NO. 1

THIS AMENDATORY AGREEMENT, made as of June 18th, 1957, between PAN AMERICAN WORLD AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York, hereinafter referred to as "Pan American", and AEROVIAS NACIONALES DE COLOMBIA, S.A., a corporation organized and existing under the laws of Colombia, hereinafter referred to as the "Company",

WITNESSETH THAT:

WHEREAS, Pan American and the Company have entered into a General Traffic and Sales Agency Agreement dated December 3, 1954, whereby the Company acts as general traffic and sales agent for Pan American and its affiliated carriers in the country of Colombia, and whereby Pan American and its affiliated carriers act as general traffic and sales agent outside the countries of Colombia and Ecuador; and

WHEREAS, Pan American and the Company desire to amend the General Traffic and Sales Agency Agreement to exclude the country of Peru from the territory in which Pan American and its affiliated carriers act as general traffic and sales agent for the Company;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained the parties hereby agree as follows:

The General Traffic and Sales Agency Agreement is hereby amended as follows, effective as of June 18th, 1957:

1. The first sentence in paragraph 4 is hereby revised to read as follows:

[fol. 2301] "The Company hereby appoints Pan American and its affiliated carriers, and Pan American agrees to act and make arrangements with its affiliated carriers under which they will act, as General

Traffic and Sales Agent for the Company outside Colombia, Ecuador and Peru, except in those countries, regions and cities specifically excluded by Annex No. 1."

2. Paragraph 1 (a) of Annex No. 1 is hereby revised to read as follows:

"(a) Pan American, on one side, agrees to act as General Traffic and Sales Agent on behalf of the Company outside the countries of Colombia, Ecuador and Peru; and".

II. Except as herein specifically amended, all of the terms and conditions of the General Traffic and Sales Agency Agreement shall remain in full force and effect.

IN WITNESS WHEREOF, Pan American and the Company have caused this Amendatory Agreement to be executed in their corporate names by their respective officers thereunto duly authorized as of the day and year first above written.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 58

AMENDMENT NO. 2

THIS AMENDATORY AGREEMENT, made as of January 30, 1958 between PAN AMERICAN WORLD AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York, hereinafter referred to as "Pan American", and AEROVIAS NACIONALES DE COLOMBIA, S. A., a corporation organized and existing under the laws of Colombia, hereinafter referred to as the "Company".

WITNESSETH THAT:

WHEREAS, Pan American and the Company have entered into a General Traffic and Sales Agency dated December 3, 1954, as amended by Amendment No. 1 dated June 18, 1957, whereby the Company acts as general traffic and sales agent for Pan American and its affiliated carriers in the country of Colombia, and whereby Pan American and its affiliated carriers act as general traffic and sales agents outside the countries of Colombia, Ecuador and Peru; and

WHEREAS, Pan American and the Company desire to further amend the General Traffic and Sales Agency Agreement;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained the parties hereby agree as follows:

1. The General Traffic and Sales Agency Agreement is hereby amended as follows, effective as of August 1, 1958:

1. The first sentence in paragraph 4 is hereby revised to read as follows:

"The Company hereby appoints Pan American and its affiliated carriers, and Pan American agrees to act and make arrangements with its affiliated carriers under which they will act, as General Traffic and Sales Agent

for the Company, outside Canada, Colombia, Ecuador, Peru, Chile and the continental United States, except in those countries, regions and cities specifically excluded by Annex No. 1".

[fol. 2303] 2. Subparagraphs (c) and (d) of paragraph 8 are hereby redesignated as subparagraphs (d) and (e), and the following is hereby inserted as a new subparagraph (c) of said paragraph 8:

"(c) Each party hereto shall submit to the other a written report, promptly after the end of each month of all sales of passenger, express and cargo transportation over its lines made during such month by other carriers in the territory in which such other party acts as General Traffic and Sales Agent hereunder, which report shall set forth the total amount of the applicable fares and charges as referred to above with respect to each such sale".

3. Paragraph 1 of Annex No. 1 is hereby revised to read as follows:

"(a) Pan American, on one side, agrees to act as General Traffic and Sales Agent on behalf of the Company outside the countries of Canada, Colombia, Ecuador, Peru, Chile and the continental United States, and".

4. Paragraph 1 (b) of Annex No. 1 is hereby revised to read as follows:

"(b) The Company, on the other side, agrees to act as General Traffic and Sales Agent on behalf of Pan American in the country of Colombia except in the cities of Bogota and Barranquilla".

II. Except as herein specifically amended, all of the terms and conditions of the General Traffic and Sales Agency Agreement shall remain in full force and effect.

IN WITNESS WHEREOF, Pan American and the Company have caused this Amendatory Agreement to be executed in their corporate names by their respective officers

thereunto duly authorized as of the day and year first above written.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 61

STANDARD FORM OF AGREEMENT FOR GROUND SERVICES AND USE OF GROUND FACILITIES BY SCHEDULED OPERATORS

THIS AGREEMENT, made this 27th day of April, 1948, between PAN AMERICAN AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York (Hereinafter called "Pan American"), and BRANIFF AIRWAYS, INC., a corporation organized and existing under the laws of the State of Oklahoma (hereinafter called "Braniff").

WITNESSETH THAT:

WHEREAS, Pan American operates an extensive system of international air transportation services and in

connection therewith maintains a ground organization and ground facilities at various locations, including certain such organization and facilities at each of the locations at which services are to be rendered pursuant to this Agreement; and

WHEREAS, Braniff proposes to operate air transportation services between Houston-Havana-Panama, and in connection therewith requires ground services and facilities at certain locations as hereinafter more fully set forth; and

WHEREAS, Braniff desires to have Pan American furnish certain of such ground facilities and services to it, and Pan American is willing to furnish such facilities and services, upon the terms and conditions hereinafter set forth;

NOW THEREFORE, in consideration of the mutual covenants and agreements herein set forth, the parties hereby agree as follows:

1. Attached hereto and made a part hereof, is a schedule relating to each location at which services are to be performed or facilities made available pursuant to this Agreement, setting forth the services so to be performed and the facilities so to be made available at such location said schedule being designated SCHEDULE I, (Havana). Pan American hereby agree, to the extent that Pan American has such facilities and services available, having regard to the requirements of its own operations, to permit Braniff to utilize those ground facilities and to furnish to Braniff those services at the location shown in the SCHEDULE which are listed in said schedule relating to such location.

2. Pan American agrees to use its best efforts to follow reasonable instructions from Braniff regarding the standards, practices and procedures to be followed in furnishing services pursuant to the Agreement. In the absence of such instructions, services will be furnished in accordance with the standards, practices and procedures followed [fol. 2309] by Pan American in connection with its own operations. Braniff agrees to be bound by such reasonable rules and regulations as Pan American shall establish in connection with use of such facilities and receipt of such

services. The facilities and services listed in Part A of the SCHEDULE will be made available without further request for all scheduled flights made by Braniff between the points referred to in the Second Recital to this Agreement, in accordance with schedules furnished by Pan American. Such services and facilities will also be made available upon request for other flights of Braniff between said points, provided the request is received by Pan American a reasonable time prior to the intended use of the facilities and services. The facilities and services listed in Part B of the SCHEDULE will be made available only upon request by the pilot commanding the flight or by other authorized representative of Braniff, who will sign an appropriate receipt therefor. It is understood and agreed that any officer of Braniff, or any employee, agent or representative of Braniff acting in a supervisory capacity at, or in respect of, the location concerned, or any person otherwise authorized by Braniff, shall be authorized to give instructions on behalf of Braniff regarding the services to be rendered and to request services on behalf of Braniff hereunder.

3. Braniff will pay Pan American for the services and facilities listed in Part A of the SCHEDULE at the rate of $124.00 per landing for each scheduled landing and for each extra section or non-scheduled landing made by Braniff at Rancho Boyeros Airport. This rate was determined on the basis of a minimum of two DC-6 round trips schedules and one DC-4 round trip schedule weekly transiting Havana. The charges become effective on the date of the first survey flight and monthly charges thereafter to Braniff will not be less than the minimum schedules used in determining the rate as indicated above. Braniff will pay Pan American for the services and facilities listed in Part B of the SCHEDULE at the rates shown with respect thereto in the SCHEDULE. The foregoing charges have been arrived at on the basis of current costs and the utilization of Pan American facilities and services at the locations covered by this Agreement now being made or comitted for. The parties will review these charges at six months' intervals from the date of this Agreement and at such other times as either party shall request. In the event that it is found on such review that there has been a change in costs or in utilization of the facilities and services, an appropriate adjustment will be made in the charges. Such

adjustment will become effective as of the first of the month following the date when the review is requested, pursuant hereto, or, in the case of a periodic review pro- [fol. 2310] vided for herein, as of the first of the month following the date provided for such review.

4. Payments will be made by Braniff in United States currency in the United States to Pan American promptly after the end of each month upon submission of statements for the amount due.

5. Except as otherwise provided herein, all arrangements for use of third party facilities by Braniff or for services from third parties to Braniff will be made by Braniff, and all payments therefor will be made directly by Braniff and not through Pan American.

6. (a) Braniff agrees to maintain in effect the following described insurance covering its operations through and its activities in and about the location referred to in the SCHEDULE, in the respective amounts stated below and with insurers satisfactory to Pan American; to furnish Pan American prior to the effective date of this Agreement with certificates of insurance certifying that such insurance is in full force and effect and that all rights of subrogation against Pan American have been waived by the insurers; and to modify Pan American in the event any such insurance is cancelled or changed:

Description	*Limits of Liability (U. S. Currency)*
Aircraft Public Liability	$ 100,000 any one person 1,000,000 any one accident
Aircraft Property Damage	200,000 any one accident
Airport or Premises Property Damage	50,000 any one accident
Airport or Premises Public Liability	100,000 any one person 300,000 any one accident
Employers Liability	50,000 any one person 300,000 any one accident

(b) Braniff further agrees to indemnify and hold harmless Pan American from and against all liabilities, damages, losses and judgments, including costs and expenses incident thereto, which may (i) be suffered by, accrue against, be charged to, or recoverable from Pan American by reason of loss of or damage to property, or by reason of injury to or death of any person, other than officers, agents and employees of Pan American, arising out of or in any way connected with the use of facilities or the furnishing of services pursuant to this Agreement, unless caused by the sole negligence of Pan American or by the joint negligence of Pan American and any person, firm or corporation [fol. 2311] other than Braniff, its officers, agents, or employees, or (ii) be suffered by, accrue against, be charged to or recoverable from Pan American by reason of injury to or death of any officer, agent or employee of Pan American caused by negligence on the part of Braniff, its officers, agents or employees, in connection with any matter dealt with in this Agreement.

(c) It is understood and agreed that this Agreement and the rights granted to Braniff to use the facilities of, and to receive services from Pan American as herein provided do not impose upon Pan American any liability to Braniff for loss, injury, damage or delay of any nature whatsoever, and Braniff hereby releases Pan American from all liability to it for loss, injury, damage, or delay, regardless of how caused, arising out of or in any way connected with any matter dealt with in this Agreement or any action taken or omitted to be taken pursuant hereto, except any such liability which may exist by reason of Pan American's negligence in the operation of its own aircraft.

(d) Braniff hereby agrees to reimburse Pan American for any losses suffered by Pan American by reason of damage to or destruction of property owned or leased by Pan American, caused by negligence on the part of Braniff, its officers, agents or employees in connection with any matter dealt with in this Agreement, and, at the request of Pan American, to use its best efforts to repair or replace at Braniff's expense, any property so damaged or destroyed.

7. Nothing herein contained shall require Pan American to take any action contrary to law or to any order or regulation of any government or governmental body or officer having jurisdiction, or contrary to any permit or authorization granted to Pan American by any government or governmental body, or contrary to any arrangement pursuant to which Pan American operates or utilizes any of the facilities referred to herein. Pan American shall not be liable for failure to perform this Agreement if such failure is caused by act of God, fire, flood, strike, labor dispute, riot, insurrection, war, or any cause beyond the control of Pan American whether or not similar to the causes herein specifically mentioned.

8. This Agreement shall become effective immediately, shall supersede any existing arrangements between the parties covering the same subject matter, and shall continue in effect until cancelled by one party upon sixty days' written notice to the other. This Agreement may be cancelled immediately by either party if disapproved by the aeronautical authorities having supervisory jurisdiction over that party.

[fol. 2312] 9. Any notice required or permitted to be given pursuant to this agreement shall be duly given if sent by mail and addressed, in the case of notice to Pan American, to W. L. Morrison, Vice President, Pan American Airways, Inc., 1820 Delaware Parkway, Miami, Florida, and in the case of notice to Braniff, to the President, Braniff Airways, Love Field, Dallas (9), Texas.

10. This Agreement, regardless of where executed, shall be construed in accordance with, and performance shall be determined by the laws of the State of New York.

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed in their names and on their behalf by their respective officers thereunto duly authorized.

I. *Direct Charges*

1. Aircraft Fuel

*2. Aircraft Maintenance and repair

Skilled Labor	$3.50 per man hour regular time
	$5.25 per man hour overtime

Materials—current price

3. Preparation and transmission of weather reports from stations not covered in agreement $1.00 each.

4. Exclusive Terminal Space

Per square foot floor space	$1.50 per annum

* This charge to be made for major repair over and above services listed under Section 2, Part A.

[fol. 2314]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 62

September 27, 1948

Mr. R. C. Shrader
Vice President
Braniff Airways, Inc.
Love Field
Dallas 9, Texas

Dear Mr. Shrader:

Attached is an Amendatory Agreement to revise the rate for Braniff's use of Rancho Boyeros as stated in the original contract of April 27, 1948, from $124.00 to $139.00. This is due to the inclusion of the expense of the international express unit at the airport, which up to this time has been borne 100% by Pan American as well as the general rise in costs since the first of the year. As you will recall this matter was discussed at a meeting held in Havana last June with representatives of all airlines at which time it was recommended that this service be included as part of the cost of the proposed Air Terminal Company then seemingly in the process of formation. Now that it appears improbable that these plans will ever materialize, there is no alternative other than to include this expense and distribute the cost of all users of the airport.

You will recall that reductions in the rate have been made whenever it was possible in spite of the fact that Pan American has invested an additional $150,000 in airport facilities as a result of increased usage by the competitive airlines and forced wage increases by the labor union. In this connection the Cubana labor contract is again up for renewal and although every effort will be made to keep any upward adjustment to a minimum, the substantial increases ranging from 40% to 60% recently granted by the government to the omnibus and other public service workers has considerably weakened our bargaining position. In view of the foregoing, this will notify you that it may be necessary to again amend the rate when the results of the current negotiations are known.

Please be assured that Pan American will continue to keep the operation of this airport under surveillance for economic operation and if a reduction is possible at any time, it will be passed on to all scheduled carriers as in the past. After execution all copies of the amendment should be returned to the undersigned and appropriate copies will be forwarded to you for your files.

Very truly yours,

Original Signed by
W. L. MORRISON/R

AMENDMENT NO. 1

This Amendatory Agreement, made this 27th day of September 1948, between PAN AMERICAN AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York (hereinafter called "Pan American") and BRANIFF AIRWAYS, INCORPORATED, a corporation organized and existing under the laws of the State of Oklahoma (hereinafter called "Braniff"),

WITNESSETH THAT:

WHEREAS, Pan American and Braniff are parties to an agreement dated the 27th day of April, 1948, (hereinafter called the "Principal Agreement"), providing for certain ground facilities and services to be furnished to Braniff by Pan American; and

WHEREAS, the parties desire to amend the Principal Agreement so as to include the costs of handling international air express at Rancho Boyeros Airport, Havana, Cuba;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein set forth, the parties hereto agree that the Principal Agreement is hereby amended, effective as of October 1, 1948, as follows:

1. By changing the first sentence of Paragraph 3 to read as follows: Braniff will pay Pan American for the services and facilities listed in Part A of the SCHEDULE at the rate of $139.00 per landing for each scheduled landing and for each extra section or non-scheduled landing made by Braniff at Rancho Boyeros Airport.

2. By adding Paragraph 11 to read as follows: Any taxes payable by either party, other than U.S. income taxes payable by Pan American by reason of this agreement or the use of the services and facilities by Braniff pursuant hereto shall be borne by Braniff.

3. By amending SCHEDULE 1 in the form attached hereto and made a part hereof.

Except as herein modified, all terms and conditions of the Principal Agreement shall continue in full force and effect.

[fol. 2316] IN WITNESS WHEREOF, the parties have caused this Amendatory Agreement to be executed in their names and on their behalf by their respective officers thereunto duly authorized.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 63

AMENDMENT NO. II

This Amendatory Agreement, made this 31st day of October, 1949, between PAN AMERICAN AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York (hereinafter called "Pan American"), and BRANIFF AIRWAYS, INCORPORATED, a corporation organized and existing under the laws of the State of Oklahoma (hereinafter called "Braniff"),

WITNESSETH THAT:

WHEREAS, Pan American and Braniff are parties to an agreement dated the 27th day of April, 1948, as amended the 27th day of September, 1948, (hereinafter called the "Principal Agreement"), providing for certain ground facilities and services to be furnished to Braniff by Pan American; and

WHEREAS, the parties desire to amend the Principal Agreement so as to reflect the effect of increased frequencies operated by Braniff and transiting Rancho Boyeros Airport, Havana Cuba and to revise Paragraphs 6 (b), 6 (c) and 6 (d) to read as indicated below;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein set forth, the parties hereto agree that the Principal Agreement is hereby amended, effective as of October 1, 1949, as follows:

1. By changing the first and second sentences of Paragraph 3 to read as follows:

Braniff will pay Pan American for the services and facilities listed in Part A of the SCHEDULE at the rate of $131.00 per landing for each scheduled landing and for each extra section or non-scheduled landing made by Braniff at Rancho Boyeros Airport. This rate was determined on the basis of a minimum of two DC-6 round trip schedules and two DC-4 round trip schedules weekly transiting Havana.

2. By changing Paragraph 6 (b) to read as follows:

Braniff agrees to indemnify and hold harmless Pan American, its officers, agents and employees, and any other person, firm or corporation, and the officers, agents and employees of such person, firm or corporation, which may, pursuant to agreement with Pan American or otherwise, maintain or operate any of the facilities or provide any of the services to be made available to Braniff under this Agreement, (any such other person, firm or corpora- [fol. 2319] tion being hereinafter called "the Operator"), from and against all liabilities, damages, losses, and judgments, including costs and expenses incident thereto, which may (i) be suffered by, accrue against, be charged to, or recoverable from Pan American, its officers, agents or employees, or the Operator, its officers, agents or employees, by reason of or on account of loss of or damage to property, or by reason of or on account of injury to or death of any person other than the officers, agents and employees of Pan American and the Operator, arising out of or in any way connected with the use by Braniff of the facilities and services herein provided for, unless caused by the sole negligence of Pan American or the Operator or by the joint negligence of Pan American and the Operator or of Pan American or the Operator and any person, firm or corporation other than Braniff, its officers, agents or employees, or (ii) be suffered by, accrue against, be charged to, or recoverable from Pan American or the Operator by reason of injury to or death of any officer, agent or employee of Pan American or the Operator caused by negligence on the part of Braniff, its officers, agents or employees in connection with any matter dealt with in this Agreement.

3. By changing Paragraph 6 (c) to read as follows:

It is understood and agreed that the permission hereby granted Braniff to use the facilities and to receive services as herein provided does not impose upon Pan American or the Operator any liability for loss, injury, damage or delay of any nature whatsoever, and Braniff hereby releases Pan American and the Operator from all liability to it for

loss, injury, damage or delay, regardless of how caused, arising out of or connected with such use or any matter dealt with in this Agreement or any action taken or omitted to be taken pursuant hereto, except that Pan American or the Operator, as the case may be, is not hereby released from any such liability which may exist by reason of negligence in the operation of its own aircraft.

4. By changing Paragraph 6 (d) to read as follows:

Braniff hereby agrees to reimburse Pan American and the Operator for any losses suffered by Pan American or the Operator by reason of damage to or destruction of property owned or leased by Pan American or the Operator, caused by negligence on the part of Braniff, its officers, agents or employees in connection with any matter dealt with in this Agreement, and, at the request of Pan American, to use its best efforts to repair or replace, at Braniff's expense, any property so damaged or destroyed.

[fol. 2320] Except as herein modified, all terms and conditions of the Principal Agreement shall continue in full force and effect.

IN WITNESS WHEREOF, the parties have caused this Amendatory Agreement to be executed in their names on their behalf by their respective officers thereunto duly authorized.

AMENDMENT NO. III

This Amendatory Agreement, made this 7th day of December, 1949, between PAN AMERICAN AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York (hereinafter called "Pan American"), and BRANIFF AIRWAYS, INCORPORATED, a corporation organized and existing under the laws of the State of Oklahoma (hereinafter called "Braniff");

WITNESSETH THAT:

WHEREAS, Pan American and Braniff are parties to an Agreement dated the 27th day of April, 1948, as amended the 27th day of September, 1948, and the 31st day of October, 1949, (hereinafter called the "Principal Agreement"), providing for certain ground facilities and services to be furnished to Braniff by Pan American; and

WHEREAS, the parties desire to amend the Principal Agreement so as to eliminate the costs of handling international air express at Rancho Boyeros Airport, Havana, Cuba;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein set forth, the parties hereto agree that the Principal Agreement is hereby amended, effective as of December 1, 1949, as follows:

1. By changing the first sentence of Paragraph 3 to read as follows:

Braniff will pay Pan American for the services and facilities listed in Part A of the SCHEDULE at the rate of $115.00 per landing for each landing and for each extra section or non-scheduled landing made by Braniff at Rancho Boyeros Airport.

2. By amending SCHEDULE I in the form attached hereto and made a part hereof.

Except as herein modified, all terms and conditions of the Principal Agreement shall continue in full force and effect.

AMENDMENT NO. IV

This Amendatory Agreement, made this 20th day of July, 1950, between PAN AMERICAN WORLD AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York (hereinafter called "Pan American"), and BRANIFF AIRWAYS, INCORPORATED, a corporation organized and existing under the laws of the State of Oklahoma (hereinafter called "Braniff").

WITNESSETH THAT:

WHEREAS, Pan American and Braniff are parties to an Agreement dated the 27th day of April, 1948, as amended the 27th day of September, 1948, the 31st day of October, 1949, and the 1st day of December, 1949, (hereinafter called the "Principal Agreement"), providing for certain ground facilities and services to be furnished to Braniff by Pan American; and

WHEREAS, the parties desire to amend the Principal Agreement so as to include navigational and aerophare services at San Blas, Republic of Panama;

---

* This charge to be made for major repair over and above services listed under Section 2, Part A.

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein set forth, the parties hereto agree that the Principal Agreement is hereby amended, effective as of July 1, 1950, as follows:

1. By changing the first sentence of Paragraph 1 to read as follows:

Attached hereto and made a part hereof, is a schedule relating to each location at which services are to be performed or facilities made available pursuant to this Agreement, setting forth the services so to be performed and the facilities so to be made available at such location, said schedules being designated SCHEDULE I (Havana) and SCHEDULE II (San Blas) respectively, and being hereinafter sometimes referred to collectively as "the SCHEDULES".

2. By changing the first sentence of Paragraph 3 to read as follows:

Braniff will pay Pan American for the services and facilities listed in Part A of the SCHEDULE I at the rate of [fol. 2325] $115,00 per landing for each landing and for each extra section or non-scheduled landing made by Braniff at Rancho Boyeros Airport, in addition to a charge of $4.00 per flight for the use of the San Blas aerophare under Part A of SCHEDULE II.

Except as herein modified, all terms and conditions of the Principal Agreement shall continue in full force and effect.

IN WITNESS WHEREOF, the parties have caused this Amendatory Agreement to be executed in their names on their behalf by their respective officers thereunto duly authorized.

ASSIGNMENT

Assignment made this 30th day of April, 1952, and to be effective on and after the 16th day of May, 1952 by Pan American World Airways, Inc. (the corporate name of which was formerly Pan American Airways, Inc.,) hereinafter called the Assignor, to Aeropuertos Unidos, S. A., hereinafter called the Assignee.

For valuable consideration, receipt of which is hereby acknowledged, the Assignor hereby assigns to the Assignee so much of the contract and any amendments thereto for ground services and use of ground facilities as relates to Rancho Boyeros Airport, Havana, Cuba, and as more particularly specified in the Agreement between the Assignor and Braniff Airways, Inc., dated the 27th day of April, 1948, subject to all the covenants and conditions therein mentioned, together with all the right, title and interest of the Assignor in and to the aforesaid agreement as the same relates to Rancho Boyeros Airport.

The Assignee hereby agrees to assume so much of the said contract as relates to ground services and use of ground facilities at Rancho Boyeros Airport for the duration thereof and to faithfully perform all the covenants, stipulations and agreements contained therein.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement this 30th day of April, 1952.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 67

November 18, 1954

Mr. L. A. Person
Traffic Manager
Braniff Airways, Inc.
Love Field
Dallas 9, Texas

Dear Lou:

In connection with our conversations regarding the full party participation of Braniff Airways, Inc., in certain Pan American System tariffs, published by R. C. Lounsbury, Agent, I wish to confirm the proposition we have discussed. We understand that you are interested in participating in the Passenger Rules Tariff, PR-3, and the North and South America Passenger Fares Tariff, P- -3, as well as receiving sets of these and others of our international tariffs for use in your offices. For this full party participation and for these tariffs for the year October 1, 1954 through September 30, 1955, this is to confirm our concurrence in the following fees:

(1) For entry or withdrawal, the full cost of $45.00 per page to revise pages, not otherwise changed for full parties existent in the tariff, to include or delete Braniff

Airways, Inc., as the case may be; should other full parties entering or withdrawing from the tariff require changes on such pages, the $45.00 per page cost will be divided equally between such full parties simultaneously entering or withdrawing.

(2) A fee of $400 for up to 150 sets of these tariffs, and revisions thereto, to be delivered to Braniff Airways, Inc. in Dallas, Texas. For each additional 20 sets of these tariffs, an additional annual fee of $50 will be charged.

(3) A fee of $4,000 for the participation, publication of revisions and other attendant tariff printing costs involved in maintaining Braniff's participation in these tariffs.

(4) In the event Braniff Airways, Inc. wishes to withdraw its participation either in full or in part from any tariffs covered by this agreement prior to October 1, 1955, Braniff will give Agent R. C. Lounsbury at least 120 days written notice (or any lesser number of days written notice mutually agreeable to both parties) of its intention.

[fol. 2329]

(5) The amount in Items (1) and (2) above shall be payable within 30 days after the billing date which shall be as soon as practicable after the publication of the October 1, 1954 issues of these tariffs, and the fee mentioned in (3) above shall be divided in quarters and payable within 30 days after the billing date which shall be quarterly beginning on or about October 1, 1954, except that in the event of withdrawal pursuant to Paragraph (4) above the applicable fee shall be prorated according to the tariffs and the period of participation involved.

The above fees contemplate that Braniff will not require radical changes in these tariffs during the year period indicated and that Braniff will endeavor to permit revisions to be made once per month in conformance with the established publication deadlines of these tariffs. Should

it become necessary for Braniff to make emergency changes at any time, these changes will of course be made in Braniff's behalf at Braniff's direction. However, it is understood that either party to this agreement may request reopening of the agreement for reassessment of fees should such changes appear to be extensive.

As I have mentioned to you in our conversations, we here in the tariff's office and management of Pan American will be very pleased to have Braniff Airways, Inc. participating as a full party in our tariffs.

If you are in agreement with the understanding outlined above, please sign and return the attached copy of this letter to me.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 70

PAN AMERICAN AIRWAYS, INC.
Chrysler Building, New York City

RIO DE JANEIRO
November 1, 1943.

Panair do Brasil, S.A.
Rio de Janeiro
Brasil.

Dear Sirs:

Enclosed herewith are two execution copies of a proposed contract covering use of joint facilities and certain other matters. This contract has been executed by us and is intended to supersede the existing arrangements between us which cover the same general subject matter. If you find the contract in order, will you please execute it and return one executed copy for our files.

The enclosed contract is to become effective as of January 1, 1944 and the existing arrangements will continue in effect until that date, but it is understood that payments in respect of return on investment under said arrangements will, for the year 1943, be calculated on the average net book value of the properties in question rather than on the original cost and also that, commencing when the enclosed contract becomes effective, you will be charged with our depreciation and insurance expense on the buildings and installations owned by us at Santos Dumont airport. Our share of such expense will be determined pursuant to the enclosed contract except that the payments provided for in the last clause of the second paragraph of the letter agreement accompanying the Agency Agreement between us to become effective on January 1, 1944 will cover rental for the space in said buildings used exclusively by us.

It is further understood that you will continue to own and to carry for us such inventories consisting of spare parts, materials and supplies, including gasoline and oil, as may be turned over to you by us or acquired by you at our request for the purpose. In order to enable you to

carry such inventories without additional financial burden on you, it is understood that you will have a credit of $300,000 in the open account existing between us, on which no interest will be charged. The amount of such credit will be reviewed at such times as either of us may request, in order to insure that it approximates the cost to you of the inventories carried by you for us. It is further understood that, commencing as of January 1, 1944, any remaining balance in the open account between us, either in our [fol. 2335] favor or in your favor, after taking into consideration said interest free credit in your favor, shall bear interest at the rate of 4% per annum, such interest to be calculated on the balances shown on your books at the end of each calendar month. For this purpose any advances made to you pursuant to Paragraph 6 of Article II of the enclosed contract shall not be considered as being in the open account.

In order to enable you to carry out the enclosed contract and to carry on your other business, we agree to use our best efforts to engage for you such qualified American technical personnel as you may request. While we will use our best efforts to provide personnel who are properly trained and qualified, it is understood that we shall have no responsibility for their training or qualifications or for any action that they may take or fail to take while in your service. If you so request, such personnel, shall be carried on our payrolls, and in such event they shall continue to be our employees for all purposes, except that (i) they shall be under your control, (ii) you will be charged with their salary expense and all related items of expense including cost of transfer to Brasil and return and (iii) you shall be solely responsible to third parties for any action taken by them. You will also release us from all claims by you and indemnify us and hold us harmless from all claims by third parties arising out of any action taken by such personnel during the period they are in your service.

It is further understood that you will use your best efforts to provide, maintain and operate any special facilities not covered by the enclosed contract, such as the Natal Staff House, which we may request for our use from time

to time. Unless otherwise mutually agreed, the cost of providing, maintaining and operating any such facilities (including any remaining rentals payable under leases contracted in connection therewith and any winding up expense) will be for our account and we will indemnify you and hold you harmless from all claims in connection with the providing, maintaining and operating of such facilities.

During recent years we have reimbursed you for the cost of constructing and providing certain airports, seaplane bases and facilities in Brasil which have been constructed or provided at our request. Without in any way modifying the terms of the enclosed contract, it is expected that we will continue to reimburse you for certain capital expenses of this character until the present program of airport development is completed. It is further understood that in the event any airport, seaplane base or facility for the cost of which we shall have reimbursed you, shall be taken over by the Brasilian Government and as a result thereof you shall receive any payment pursuant to Article 4 of Decree-Law No. 3462, dated July 25, 1941, or otherwise, you [fol. 2336] will forthwith pay us an amount equal to such payment, after deducting any expenses incurred or damages suffered by you, in connection with the taking of such airport, seaplane base or facility.

It is further understood that all arrangements between us for operation of air transport services, made in connection with the sale to you of five Lockheed Lodestar aircraft during the latter part of 1941, and all rights and liabilities in connection therewith, are terminated except that the aircraft, spare engines and parts sold to you will be retained by you and the purchase price will continue to be carried in the open account between us. As we have previously advised you, we no longer request the operation of any of the services operated pursuant to those arrangements except to the extent that they are covered by the enclosed contract.

The arrangements herein set forth may be terminated at any time by either of us on sixty days' written notice to the other, except that your obligation to make payments to us pursuant to the sixth paragraph of this letter cannot

be terminated without our consent and provided that any termination shall not affect any rights or obligations theretofore accrued hereunder.

If the foregoing correctly states our understanding concerning the matters mentioned above, will you kindly sign and return to us the enclosed copy of this letter, which will thereupon constitute the agreement between us with reference thereto.

Very truly yours,

[fol. 2337]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 71

February 18, 1944

I, AMOS HIATT, hereby certify that I am Assistant Comptroller of Pan American Airways, Inc.; that the original executed copy of the Agreement referred to below is in my custody; that the attached document is a full, true and correct copy of the original of such Agreement:

Agency Agreement, dated January 1, 1944, between Pan American Airways, Inc. and Panair do Brasil. This agreement supersedes the agreement between the two companies dated October 30, 1935; also letter agreement, dated November 1, 1943, and accepted by Panair do Brasil on November 16, 1943.

.....
Assistant Comptroller

[fol. 2338] THIS AGREEMENT, made as of January 1, 1944, between PAN AMERICAN AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York, hereinafter referred to as "Pan American", and PANAIR DO BRASIL, S.A., a corporation organized and existing under the laws of Brasil, hereinafter referred to as "PANAIR",

WITNESSETH, that

WHEREAS, Pan American and Panair have for a number of years had arrangements, under which PANAIR is acting as General Traffic Agent in Brasil for Pan American and its affiliated companies, and Pan American and its affiliated companies are acting as General Traffic Agent outside of Brasil for Panair; and

WHEREAS, Pan American and Panair desire that such relationship continue but that the existing arrangements be replaced by a formal agreement;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained, Pan American and Panair hereby agree as follows:

1. Pan American hereby appoints Panair, and Panair agrees to act, as General Traffic Agent in Brasil, for Pan American and its affiliated carriers. As such General Traffic Agent, Panair agrees that it will perform such services as may be appropriate to promote passenger, mail and express traffic over the lines of Pan American and its affiliated carriers and to assist in making arrangements for travelling or shipping over such lines, including

(a) Solicitation of passenger mail and air express business with Brasil for Pan American and its affiliated carriers;

[fol. 2339] (b) Checking baggage of outgoing passengers, delivering baggage to incoming passengers, collecting any excess baggage charges payable in respect of such baggage, in accordance with the tariffs, rates, rules and regulations of Pan American, collecting and forwarding by carriers with which Pan Ameri-

can or PANAIR has forwarding arrangements, any trunks or other heavy baggage delivered to PANAIR for the purpose by Pan American or by passengers travelling, or proposing to travel, over such lines, and collecting any charges payable therefor, in accordance with the tariffs, rates, rules and regulations of Pan American;

(c) Collecting outgoing and delivering incoming express carried or to be carried over such lines, collecting and forwarding by carriers with which Pan American or PANAIR has forwarding arrangements, any express delivered to PANAIR for the purpose by Pan American, and collecting any charges payable therefor, in accordance with the tariffs, rates, rules and regulations of Pan American;

(d) Making arrangements on behalf of such passengers for transportation to and from airport terminals and for hotel accomodations at points of call of Pan American and at other cities, in accordance with the tariffs, rates, rules and regulations of Pan American;

(e) Furnishing such catering services and other passenger service as Pan American may request in accordance with its air transport services in Brasil;

(f) Making reservations for transportation by Pan American its affiliated carriers and connecting carriers;

(g) Furnishing such advice and information as Pan American may from time to time request with respect to clearance, customs and immigration procedure at points in Brasil;

(h) Making arrangements for such advertising and publicity as Pan American may from time to time request;

(i) Maintaining a centrally located traffic and sales office in Rio de Janeiro in addition to such other offices as PANAIR may from time to time maintain, which

traffic and sales office in Rio de Janeiro shall be, unless Pan American shall otherwise agree, at least as large and of the same general appearance as the office now being maintained by PANAIR at Graca Aranha and Almirante Barroso Avenues in Rio de Janeiro.

PANAIR agrees to designate as its agents for the purpose of this agreement all of its authorized traffic agents in [fol. 2340] Brasil and to appoint such additional agents as Pan American may from time to time request, all in accordance with, and upon such terms and conditions as shall be set forth in, the instructions (including published agency rules, regulations, policies and practices) given by Pan American.

2. Pan American and its affiliated carriers hereby authorize PANAIR to issue (a) tickets, or exchange orders exchangeable for tickets, for transportation of passengers and (b) airwaybills or other appropriate forms of contract for transportation of express, over the lines of Pan American and of its affiliated carriers and to execute and issue all other documents necessary or appropriate for such transportation, all in the form, and subject to and in accordance with the tariffs, rates, rules and regulations, prescribed from time to time by Pan American or its affiliated carriers, as the case may be, and furnished to PANAIR, it being understood that no such ticket, exchange order, airwaybill or contract will be issued unless PANAIR shall have received payment of the total charges therefor specified in such tariffs, rates, rules and regulations, or shall have made arrangements satisfactory to Pan American for the collection of such charges, and that PANAIR will not grant, or permit any agent or broker to grant, any rebate or discount on any such charges except in accordance with such tariffs, rates, rules and regulations. Pan American agrees to accept or to cause the appropriate affiliated carriers to accept each ticket, exchange order, airwaybill, or contract so issued by PANAIR. In issuing tickets, exchange orders, airwaybills and contracts for transportation over the lines of Pan American or its affiliated carriers, PANAIR shall be deemed to act only as agent of Pan

American, or its affiliated carrier, as the case may be. [fol. 2341] PANAIR shall not be liable, and Pan American agrees to indemnify PANAIR and hold it harmless from and against all claims, for any loss, damage, injury or delay of any nature whatsoever which shall occur in connection with the carrying out or failure to carry out any obligation to third parties arising by reason of action taken by PANAIR pursuant to this Agreement unless such loss, damage, injury or delay shall be caused by the negligence or wilful misconduct of PANAIR.

3. Pan American hereby agrees to pay or reimburse to PANAIR the following amounts:

(a) A commission equal to 10 per cent of the total amount of the fares for passenger transportation over the lines of Pan American and of its affiliated carriers, including charges for excess baggage, collected by PANAIR either directly or through agents, on behalf of Pan American or any of its affiliated carriers;

(b) A commission equal to 10 per cent of the total amount of the charges (not including valuation charges) for air express transportation over the lines of Pan American and of its affiliated carriers, collected by PANAIR, either directly or through agents, on behalf of Pan American or any of its affiliated carriers;

(c) An amount for each month which shall bear the same ratio to PANAIR'S expenses for such month at each airport where catering service or other passenger service is rendered to Pan American during such month, recorded in Account 663, as the number of scheduled landings during such month at such airport by passenger aircraft of Pan American multiplied by the standards gross weight thereof bears to the number of scheduled landings during such month at such airport by all aircraft receiving such services from PANAIR multiplied by the standard gross weight thereof; plus an amount which shall bear the same ratio to PANAIR'S expenses for such month recorded in Accounts 651, 661, 664, 665, 666, 667, 668, 670, 671, 672, 673, 685 and 686 as the portion of PANAIR'S

expenses for such month recorded in Account 663 payable by Pan American hereunder bears to PANAIR'S expenses for such month recorded in Accounts 651, 660, 661, and 663; plus an amount equal to all of PANAIR'S expenses recorded in accounts 682, 687, 688, 690, 691 and 692 which are incurred solely and directly in connection with services or supplies furnished to Pan American;

[fol. 2342] (d) An amount equal to 25% of PANAIR'S expenses recorded in Accounts 751 and 752 plus an amount equal to 25% of PANAIR'S expenses recorded in Accounts 773, 785 and 786 which are related to PANAIR'S expenses recorded in Accounts 751 and 752;

(e) One half of the cost, exclusive of salaries, but including rental, maintenance and all general running expenses, of maintaining the traffic and sales offices maintained by PANAIR in Rio de Janeiro in accordance with paragraph 1 (i) hereof;

(f) Any out-of-pocket expenses specifically requested and approved by Pan American and incurred by PANAIR in carrying out special services (including making arrangements for advertising or publicity) requested by Pan American under this agreement.

4. PANAIR agrees to cooperate with Pan American in the operation of Pan American's international mail, passenger and express air service and that, so long as this agreement shall remain in force and effect, it will use its best efforts generally to aid and assist Pan American in the establishment and operation of such international service through Brasil, and will not, without Pan American's consent, itself or through any affiliated company or through agents retained or employed on other than the customary flat commission basis, act as agent for, or solicit or sell transportation services of, any transport company or organization operating an air transport line in competition with the lines from time to time operated by Pan American. PANAIR further agrees that it will use its best efforts to cause all persons coming to its line or lines and desiring

transportation by air to a point reached by Pan American's international services to be routed over the route or routes operated by Pan American.

5. PANAIR hereby appoints Pan American, and Pan American agrees to act, as General Traffic Agent outside Brasil for PANAIR. PANAIR hereby authorizes Pan American and its subsidiaries and affiliated carriers to issue (a) tickets, or exchange order exchangeable for tickets, for transportation of passengers, and (b) airwaybills or other appropriate forms of contract for transportation of [fol. 2343] express, over the lines of PANAIR and to execute and issue all other documents necessary or appropriate for such transportation, all in the form, and subject to and in accordance with the tariffs, rates, rules and regulations, prescribed from time to time by PANAIR, it being understood that no such ticket, exchange order, airwaybill, or contract will be issued unless Pan American or one of its subsidiaries or affiliated carriers and shall have received payment of the total charges therefor or shall have made arrangements satisfactory to PANAIR for the collection of such charges. PANAIR agrees to accept each ticket, exchange order, airwaybill or contract so issued by Pan American or one of its subsidiaries or affiliated carriers in issuing tickets, exchange orders, airwaybills or contracts for transportation over the lines of PANAIR. Pan American and its subsidiaries and affiliated carriers shall be deemed to act only as agent for PANAIR. Neither Pan American nor any of its subsidiaries or affiliated carriers shall be liable, and PANAIR agrees to indemnify and hold harmless Pan American, its subsidiaries and affiliated carriers from and against all claims, for any loss, damage, injury or delay of any nature whatsoever which shall occur in connection with the carrying out or failure to carry out any obligation to third parties, arising by reason of action taken by Pan American or any of its subsidiaries or affiliated carriers pursuant to this agreement, unless such loss, damage, injury or delay shall be caused by the negligence or wilful misconduct of Pan American or one of its subsidiaries or affiliated carriers.

6. PANAIR hereby agrees to pay Pan American the following amounts:

(a) A commission equal to 10 percent of the total amount of the fares for passenger transportation over the lines of PANAIR, including charges for excess baggage, collected, either directly or through agents, by Pan American or one of its subsidiaries or affiliated carriers on behalf of PANAIR.

(b) A commission equal to 10 per cent of the total amount of the charges (not including valuation charges) for air express transportation over the lines of PANAIR, collected, either directly or through agents, by Pan American or one of its subsidiaries or affiliated carriers on behalf of Panair.

7. Nothing herein contained shall be deemed to require PANAIR, Pan American or any of its affiliated carriers to initiate or maintain service between any particular points.

8. All amounts payable hereunder, including all amount [fol. 2344] collected on behalf of either party for transportation sold, shall be paid by crediting PANAIR or Pan American, as the case may be, in open account, the amounts payable in respect of each month to be so credited as soon after the end of such month as is practicable.

9. As used in this agreement, the term "affiliated carriers" shall include (a) all companies engaged in the transportation of passengers, mail or cargo, by air, for hire, the majority of the outstanding capital stock of which shall be owned by Pan American or by any company which owns the majority of the outstanding capital stock of Pan American or of which Pan American owns a majority of the outstanding capital stock, and (b) any other company engaged in such transportation which Pan American may designate by notice in writing to PANAIR.

10. This agreement shall become effective on January 1, 1944. It shall continue in effect until December 31, 1948, and thereafter until terminated by either party at any time after December 31, 1948 upon notice in writing given by either party to the other not less than 60 days in advance of the date of such termination. In the event that there shall be any change in the ownership of capital stock of PANAIR

as such ownership exists at the date hereof, Pan American may at any time thereafter, at its election, terminate this agreement by notice in writing given to Panair at least 30 days in advance of the date of such termination.

IN WITNESS WHEREOF, Pan American and PANAIR have caused this agreement to be executed in their corporate [fol. 2345] names by their respective officers thereunto duly authorized.

[fol. 2348] June 22nd, 1944

Panair do Brasil, S.A.
Edificio City Bank, 11.
Avenida Rio Branco, 85
Rio de Janeiro

Dear Sirs:

The Agency Agreement between Pan American Airways, Inc., and Panair Do Brasil, S.A. dated January 1, 1944, together with our letter understanding of November 8, 1943, provides that Panair do Brasil shall be the General Traffic Agent for Pan American in Brasil and also that Panair shall clear our aircraft and represent Pan American in negotiations with the Government of Brasil, as and when requested. The Agency Agreement also appoints Pan American Airways to be the General Traffic Agent of Panair Do Brasil, outside of Brasil, and provides as compensation therefor commissions on passenger fares, excess baggage, and express charges collected by Pan American for transportation over the lines of Panair. These understandings did not reduce to writing the understanding which has been in effect for the past several years between the two Companies, in respect of additional services which Pan American Airways, Inc. has been rendering to Panair do Brasil, in connection with Panair's services to and from Asuncion, Paraguay. It is the purpose of this letter to confirm the existing understanding, which we consider to be as follows:

I In addition to acting as General Traffic Agent for Panair do Brasil, in Paraguay under the terms of the Agency Agreement dated January 1, 1944, Pan American Airways, Inc. will continue to render the following services, (now being performed) for Panair, at Asuncion, Paraguay:

A. As and when requested by Panair, Pan American will cause its Paraguayan agent or agents to represent Panair in negotiations and transactions with the Government of Paraguay.

B. Pan American will perform such acts and execute such documents as may be required for the clearance

at Asuncion, Paraguay of aircraft of Panair, and the passengers, crews, and cargo carried thereon, such clearance to include the providing of the personnel required to effect such clearance and the making of arrangements for the presence of such government officials as may be required in connection therewith.

C. The radio and weather facilities and personnel of Pan American at Asuncion shall be available to serve Panair do Brasil's needs as it may require in connection with its operations in Paraguay.

D. To the extent of the availability of its facilities, supplies, and personnel, Pan American shall perform such maintenance, mechanical, refueling, inspecting and other services as may be requested by Panair do Brasil, for the aircraft at Asuncion.

E. Pan American shall receive, and provide transportation for, passengers, baggage, express, mail, and other [fol. 2349] cargo of Panair to and from the airport, and Pan American's airport facilities shall be fully available to Panair passengers and crews.

II Panair shall compensate Pan American for performing the above items of service as follows:

A. Panair shall pay Pan American each month an amount which shall bear the same ratio to Pan American's total expense in operating and maintaining Asuncion airport and the equipment, structures, and facilities there, or used in connection therewith, as the number of scheduled landings by aircraft of Panair during such month multiplied by the standard gross weight thereof, shall bear to the total number of scheduled landings of aircraft of Pan American and Panair at the airport multiplied by the standard gross weight thereof.

1—It is recognized that due to the activities of the Airport Development Program of Pan American at the Asuncion Airport there are and will be extraordinary airport maintenance expense on the runways,

grounds and other facilities. Accordingly Panair shall share only the ordinary or normal maintenance expense borne by Pan American, a formula for the establishment of which will be reached by mutual agreement between Panair and Pan American, when experience and development of pleas for the maintenance enable such determination.

B. Panair shall pay to Pan American the full cost of all labor, material, and supplies expended by Pan American in maintaining and servicing aircraft of Panair at Asuncion plus the applicable burden expense.

C. Panair shall pay Pan American its out of pocket expenses incurred on behalf of Panair do Brasil in the clearance of Panair aircraft and the passengers, crews and cargo thereon, in the transportation of crews, passengers and cargo from the airport, in representing Panair in any negotiations with the Government, in the defense or settlement of any claims of litigation affecting Panair, and in performing any other special service for Panair in connection with its operations and business in Paraguay.

D. Panair shall pay Pan American a commission of 5% on all air mail revenue received by Panair (or by Pan American for Panair's account) from the Paraguayan Post Office. (This extraordinary commission is that which is and has been paid to Pan American's Agent in Asuncion, on Paraguayan air mail revenue of both Pan American and Panair, respectively.)

III It is understood and agreed that Pan American's duty to perform any of the foregoing obligations is subject to Pan American's ability to do so under all laws, rules and regulations, of any governmental authority. In performing any such obligations, Pan American harmless from any and all loss, claims or liability, arising out of the performance or non-performance of its duties to Panair hereunder except as the same may arise due to the failure of an official of Pan American to exercise due care in the selection of the employees or agents whose acts or omissions gave rise to such loss, claim or liability.

IV This understanding may be terminated by either party by giving to the other party 60 days written notice.

[fol. 2350] If the foregoing correctly states our understanding please evidence your approval by signing the enclosed copy of this letter and returning it to us.

Yours faithfully

Dear Sirs:

This letter, when accepted by you, will constitute the agreement between us amending the General Agency Agreement between us dated as of January 1, 1944, so as to give effect to the new System of Accounts installed by you as of January 1, 1947.

It is understood and agreed that subparagraphs (c) and (d) of paragraph 3 of said General Agency Agreement are amended as of January 1, 1947 to read as follows:

"(c) An amount for each month which shall bear the same ratio to Panair's expenses for such month at each airport where catering service or other passenger service is rendered to Pan American during such month, recorded in Account 6335, as the number of scheduled landings during such month at such airport

by passenger aircraft of Pan American multiplied by the standard gross weight thereof bears to the number of scheduled landings during such month at such airport by all aircraft receiving such services from Panair, multiplied by the standard gross weight thereof; plus an amount which shall bear the same ratio to Panair's expenses for such month recorded in Accounts 6321, 6322, 6329, 6335 (other than expenses in said Account referred to in the preceding clause), 6336, 6337, 6338, 6343 (freight, express and parcel post, only), 6344, 6350, 6353 (supplies for motorized vehicles, only) and 6367, as the portion of Panair's expenses for such month recorded in Account 6335 payable by Pan American pursuant to the first clause of this subparagraph (c) bears to Panair's expenses for such month recorded in Accounts 6321, 6322, 6324, 6328, 6329 and 6335; plus an amount equal to all of Panair's expenses recorded in Accounts 6343 (motor vehicle expense, only), 6351, 6352, 6363 and 6367 which are incurred solely and directly in connection with services and supplies furnished to Pan American;

[fol. 2353] "(d) An amount equal to 25% of Panair's expenses recorded in Accounts 6521 and 6522."

If the foregoing correctly stated our understanding, will you kindly sign and return to us the enclosed copy of this letter.

NEW YORK—U. S. A.

Dear Sirs:

Referring to the recent correspondence and discussions between representatives of our two companies concerning revision of the amount paid to us by you for providing personnel and office accommodations for you in Brasil, pursuant to the letter agreement which accompanied the General Agency Agreement between us dated as of January 1, 1944, this letter, when accepted by you, will constitute the agreement between us that the figure Cr$60,000.00, appearing in clause (c), of second full paragraph of said letter agreement, as amended by letter agreement dated December 12, 1946, is changed to Cr$63,500.00, effective as of December 1, 1946.

Very truly yours,

PANAIR DO BRASIL, S. A.

Gentlemen:

This letter, when accepted by you, will constitute our agreement to amend the General Agency Agreement, dated as of May 1, 1947, between us, so as to change the words and figure "10 per cent", appearing in clause (i) of Paragraph 4(b) and in clause (i) of Paragraph 8(b) thereof, to "7½ per cent", as of xxxxxxxxxxxxx. June 1st, 1962.

If the foregoing correctly states our understanding, will you kindly sign and return to us the enclosed copy of this letter.

Very truly yours,

PAN AMERICAN WORLD AIRWAYS, INC.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 77.

GENERAL TRAFFIC AND SALES AGENCY AGREEMENT

This AGREEMENT, made as of January 1, 1955, Between PAN AMERICAN WORLD AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York, hereinafter referred to as "Pan American", and PANAIR DO BRASIL, S.A., a corporation organized and existing under the laws of Brazil, hereinafter referred to as the "Company".

WITNESSETH THAT:

WHEREAS, Pan American operates an extensive system of international air transportation services, which services extend to and through Brazil and Latin America, to and through Europe, Africa and the Middle East, and to and from the United States of America; and

WHEREAS, the Company operates air transportation services in Brazil, and between Brazil and Argentina, Peru, Chile, Europe, Africa and the Middle East; and

WHEREAS, Pan American and the Company are parties to an agreement dated as of May 1, 1947 under which the

Company acts as General Traffic and Sales Agent in Brazil for Pan American and its affiliated carriers, and Pan American and its affiliated carriers act as General Traffic and Sales Agent outside Brazil for the Company; and

WHEREAS, the parties desire to terminate said Agreement, and to enter into a new agreement upon the terms and conditions set forth herein;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained, the parties hereby agree as follows:

1. Pan American and the Company agree to accept as general basis for their reciprocal relations for the sale and/or handling of passenger, express and cargo transportation over their respective lines, the conditions and stipulations contained in the INTERNATIONAL AIR TRANSPORT ASSOCIATION (IATA) INTERLINE TRAFFIC, BAGGAGE AND CARGO HANDLING [fol. 2358] AGREEMENT (hereinafter sometimes referred to as the "IATA Agreements"), except as otherwise specifically and mutually agreed upon herein. Pan American *and the Company have* heretofore become parties to the IATA Agreements by making written application to, and depositing executed counterparts of said IATA Agreements with, the Secretary of the Traffic Committee of IATA, but neither party has concurred in the participation with the other as a party to said IATA Agreements. Prior to April 15, 1955, the Company shall submit to the Traffic Director of IATA in writing, its concurrence in the participation with Pan American and its affiliated carriers as a party to the IATA Agreements, and shall promptly thereafter notify Pan American and its affiliated carriers in writing of the submission of such concurrence. Promptly after the receipt by Pan American of the notice referred to in the preceding sentence, Pan American shall submit, and arrange for its affiliated carriers to submit, to the Traffic Director of IATA, in writing, their concurrence in the participation with the Company as a party to the IATA Agreements. Notwithstanding the provisions of the IATA Agreements relating to the time at which said IATA Agree-

ments shall become binding between any of the parties thereto, said IATA Agreements shall be deemed effective as between the parties hereto, including affiliated carriers of Pan American, as of the effective date of this Agreement.

2. Pan American and its affiliated carriers, on the one hand, and the Company, on the other, agree, in accordance with the general and basic conditions established hereunder, to render for each other such additional services as may be listed in the ANNEXES to this Agreement, as the same may be amended from time to time, which services are not covered by the IATA Agreement.

[fol. 2359] 3. Pan American hereby appoints the Company, and the Company agrees to act as General Traffic and Sales Agent in Brazil (except in the states, territories, regions and cities specifically excluded by Annex no. 1) and in Paraguay, for Pan American and its affiliated carriers. As such General Traffic and Sales Agent, the Company agrees that it will perform such services as may be appropriate to promote passenger, mail, express and cargo traffic over the lines of Pan American and its affiliated carriers and, in cooperation with Pan American, to arrange for transportation of passengers, baggage, mail, express, and cargo over such lines. In the event Pan American shall desire to establish its own sales offices in cities or regions in Brazil (other than those established prior to the effective date of this Agreement), Pan American shall be permitted to do so upon giving the Company not less than sixty (60) days notice in writing of the establishment of such sales office.

4. The Company hereby appoints Pan American and its affiliated carriers, and Pan American agrees to act and make arrangements with its affiliated carriers under which they will act as General Traffic and Sales Agent for the Company outside Brazil and Paraguay, except in those countries, regions and cities specifically excluded by Annex no. 1. As such General Traffic and Sales Agent, Pan American and its affiliated carriers agree that they will perform such services as may be appropriate to promote passenger, mail, express and cargo traffic over the lines of the Company and, in cooperation with the Company, to arrange

for transportation of passengers, baggage, mail, express and cargo over such lines. In the event the Company shall desire to establish its own sales offices in cities or regions [fol. 2360] in the territory in which Pan American acts as General Traffic and Sales Agent hereunder (other than those established prior to the effective date of this Agreement), the Company shall be permitted to do so upon giving Pan American not less than sixty (60) days notice in writing of the establishment of such sales office.

5. In view of the mutual appointments contained in paragraphs 3 and 4 above, each party acting as General Traffic and Sales Agent for the other accepts the following as the functions to be normally performed by each party for the other in the territory in which such party acts as General Traffic and Sales Agent for the other hereunder:

(a) Solicitation and sale of passenger, mail, express and cargo transportation;

(b) Making arrangements on behalf of such passengers for transportation to and from airport terminals at points of call of such other party, and for hotel accommodation at such points and at other cities;

(c) Furnishing such advice and information as either party may from time to time request with respect to clearance, customs, and immigration procedures at points where such party acts as General Traffic and Sales Agent;

(d) Making local arrangements for advertising and publicity, including the distribution of time tables, advertising materials and other information, as either party may from time to time request to the other party;

(e) Maintaining and operating centrally located sales office for the sale of transportation for passengers, express and cargo at points served by said party, which offices will be staffed with competent traffic and sales personnel for the sale, and the sales promotion, of passenger, mail, express and cargo transportation over the lines of the [fol. 2361] other party and for the handling of all matters pertaining thereto pursuant to this Agreement;

(f) Performance of such acts and checking of such documents as may be required by applicable governmental laws

or regulations for passengers, baggage, mail, express and cargo to be transported over the lines of the other party, including the making of arrangements for the presence of such government officials as may be required in connection therewith;

(g) Checking baggage of outgoing passengers and delivering baggage to incoming passengers if either party so requests, collecting for the account of the other party any excess baggage charges payable with respect to any baggage checked by one party for transportation over the lines of the other party, receiving and forwarding by carriers with which either party has forwarding arrangements, any trunks or other heavy baggage delivered to either party for the purpose by the other party or by passengers traveling or proposing to travel, over said lines and collecting any charges payable therefor;

(h) Receiving from shippers outgoing express and cargo to be carried over the lines of the other party and delivering to consignees incoming express and cargo carried over said lines if either party so requests, collecting and forwarding by other transportation agencies any express or cargo delivered to either party for the purpose by the other party, and collecting any charges, including C.O.D. and Collect Charges, payable therefor in respect to any such express or cargo;

(i) Furnishing such catering service and other passenger service as either party may specifically request in connection with such party's operations.

[fol. 2362] (j) Making reservations for and facilitating transportation by the other party, its affiliated carriers and connecting carriers.

(k) Service all passenger and or cargo sales agents of the other party; and if and as required by the other party, obtain remittances of funds and pay them commissions for sales of transportation made by them over the lines of such other party, all in accordance with the policies, practices, rules, regulations and instructions of such other party pertaining thereto.

(l) Subject to the conditions set forth in the Annexes, assisting in negotiations with Government Agencies in countries in which one party acts as General Traffic and Sales Agent for the other, as such other party may specifically request.

6. All action taken by each party as General Traffic and Sales Agent, whether specifically referred to herein or otherwise, shall be in accordance with the instructions, rules, regulations, fares, rates and tariffs of the party or its affiliated carrier for whom such action is taken hereunder.

7. Each party agrees to effect the appointment for the purposes of this Agreement, in the name and on behalf of the other party, of such agents in the territory in which said party acts as General Traffic and Sales Agent hereunder, as the other party may from time to time request, all in accordance with, and upon such terms and conditions as shall be set forth in, the instructions (including official published agency rules, regulations, policies and practices) and forms of agreement which said other party shall furnish to said party as its General Traffic and Sales Agent hereunder, and to cancel the appointment of any agent for the purpose of this Agreement, upon said other party's request.

[fol. 2363] 8. (a) Subject to the provisions of paragraph 19 hereof, in consideration for the Company acting as General Traffic and Sales Agent for Pan American and its affiliated carriers hereunder, Pan American hereby agrees to pay to the Company for sales made in the territory in which the Company acts as General Traffic and Sales Agent for Pan American and its affiliated carriers, in addition to any commissions payable under the IATA Agreements:

(i) A commission equal to three (3%) percent of the total amount of the applicable fares for passenger transportation over the lines of Pan American and its affiliated carriers, excluding excess baggage weight charges and valuation and insurance charges on baggage, sold in such territory, including transportation sold by other carriers.

(ii) A commission equal to two and one-half (2½%) percent of the total amount of the applicable charges (not including insurance and C.O.D. charges) for air express and cargo transportation over the lines of Pan American or its affiliated carriers, sold in such territory, including transportation sold by other carriers, but excluding charges collected for shipments for which the air waybill is not issued in such territory.

(b) Subject to the provisions of paragraph 19 hereof, in consideration for Pan American and its affiliated carriers acting as General Traffic and Sales Agent for the Company hereunder, the Company hereby agrees to pay to Pan American for sales made in the territory in which Pan American and its affiliated carriers act as General Traffic and Sales Agent for the Company, in addition to any commissions payable under the IATA Agreements:

(i) A commission equal to three (3%) percent of the total amount of the applicable fares for passenger transportation over the lines of the Company, excluding excess baggage weight charges and valuation and insurance charges on baggage, sold in such territory, including transportation sold by other carriers.

[fol. 2364] (ii) A commission equal to two and one-half (2½%) percent of the total amount of the applicable charges (not including insurance and C.O.D. charges) for air express and cargo transportation over the lines of the Company, sold in such territory, including transportation sold by other carriers but excluding charges collected for shipments for which the air waybill is not issued in such territory.

(c) In addition to any other remedies which either party may have, no commission shall be payable with respect to any sales which are not made in accordance with the instructions, rules, regulations, rates and tariffs of said party as provided in paragraph 6 hereof.

(d) No commission will be payable with respect to any fares or charges which shall be refunded, except as otherwise provided by the party over whose lines the transportation is or is to be carried out.

(e) Each party hereby agrees to pay or reimburse to the other party any out-of-pocket expenses specifically requested and approved by such party and incurred by the other, not chargeable to passengers or shippers (other than the cost of routine notices, distribution of time tables and sales promotion material, solicitation and salaries of personnel, office rental, telephone service and other expenses incurred in performing such services as are customarily performed by a General Traffic and Sales Agent) in carrying out special services (including such expenses for advertising and publicity and catering) requested under this Agreement.

[fol. 2365] 9. (a) Each party agrees to indemnify the other and hold it harmless from and against all claims, for any loss, damage, injury or delay of any nature whatsoever, including costs and expenses, which shall occur in connection with the transportation services of said party or in connection with the carrying out or failure to carry out any obligation to third parties arising by reason of action taken on behalf of said party by said other party as General Traffic and Sales Agent pursuant to this Agreement unless such loss, damage, injury or delay shall be caused by the negligence or wilful misconduct of said other party. Pan American agrees to obtain a similar commitment from each of its affiliated carriers with respect to its transportation services and obligations to third parties arising by reason of action taken on its behalf.

(b) Each party hereby releases the other from all liability to it for loss, damage, injury or delay, arising by reason of any action taken or omitted to be taken on behalf of said party by said other party as General Traffic and Sales Agent pursuant to this Agreement unless such loss, damage, injury or delay shall be caused by the negligence or wilful misconduct of said other party.

(c) It is expressly understood, without limiting the generality of the foregoing provisions of this paragraph 9, that expenses to either party arising from any fines, penalties or detention expenses imposed by any government or governmental agency (or which any government or govern-

mental agency attempts to impose), as the result of negligence on the part of the other in performing the functions provided for in paragraph 5 (f) of this Agreement, shall be for the account of said other party.

[fol. 2366] (d) The provisions of this paragraph 9 shall relate to matters dealt with in this Agreement other than matters dealt with in the IATA Agreements, and shall not be deemed to modify any of the provisions of said agreements. The provisions of this paragraph 9 shall be applicable to any functions provided to be performed by either party for the other by the terms of this Agreement, in the territory in which such party acts as General Traffic and Sales Agent for the other, which functions may also be provided for by the terms of any ground handling agreement, ground servicing agreement or other agreement between the parties, notwithstanding any provision to the contrary, or inconsistent therewith, in said ground handling agreement, ground servicing agreement or other agreement.

10. Each party agrees to cooperate with the other in the operation of passenger, mail, express and cargo air services of the other and that, so long as this Agreement shall remain in force and effect, each party will use its best efforts generally to aid and assist the other in the establishment and operation of such services.

11. All expenses for telegrams, cables, radiograms or other communications sent in connection with or pursuant to this Agreement, including communications relating to reservations and cancellations of reservations, shall be borne by the sender.

12. Except as otherwise agreed upon between the parties in writing, settlement of all amounts payable hereunder, including all amounts collected on behalf of either party for transportation sold under the provisions of the IATA Agreements, shall be made in accordance with the applicable rules and regulations of the IATA Clearing House.

[fol. 2367] 13. In the event that Pan American shall have arrangements (hereinafter referred to as an "Interline Agreement") with any other carrier other than pursuant

to an IATA Interline Traffic Agreement, pursuant to which Pan American and its affiliated carriers are authorized to sell transportation over the lines of such other carrier and such other carrier is authorized to sell transportation over the lines of Pan American and its affiliated carriers, it is understood that the Company is an affiliated carrier of Pan American for the purposes of the Interline Agreement and the Company is hereby authorized to sell transportation, and agrees to honor transportation sold, pursuant to the Interline Agreement, subject to all the terms and conditions thereof. The basis of compensation and the other principal features of all Interline Agreements in effect at the time will be set forth in the traffic rules and regulations currently furnished to the Company by Pan American and copies of such agreements will be furnished to the Company upon request. It is further understood that, with respect to any transportation sold in accordance with the Interline Agreement:

(a) Settlement will be effected between Pan American and the Company in the same manner as settlement is effected pursuant to this Agreement, or in such manner as shall be mutually agreed upon;

(b) The Company shall have all of the rights and obligations, and only the rights and obligations, provided under the Interline Agreement with respect to affiliated carriers of Pan American;

(c) No commission or other compensation or payment (including reimbursement of commissions or payment to sub-agents or others) will be paid by or to the Company except to such extent as may be provided in the Interline Agreement; and

[fol. 2368] (d) The Company agrees to indemnify and hold harmless Pan American from and against all claims, including costs and expenses, and to reimburse Pan American for all amounts paid by Pan American pursuant to the Interline Agreement or otherwise by reason of any action taken by the Company pursuant to this paragraph 13.

14. In case Pan American shall take action of any kind in connection with the sale by the Company of transpor-

tation over the lines of an affiliated carrier of Pan American, or the sale by an affiliated carrier of Pan American of transportation over the lines of the Company, or in connection with the sale by the Company of transportation over the lines of a carrier with which Pan American has an Interline Agreement, or the sale by any such carrier of transportation over the lines of the Company, Pan American shall be deemed to be acting only as agent for the carrier over whose lines such transportation is to be carried out and shall be under no liability to the Company in connection therewith, including, but without limitation, liability for payment of commissions or other payments unless collected by Pan American on behalf of the Company, except for its own negligence or wilful misconduct.

15. It is agreed that the name "Pan American", "Panair", "Pan American Airways System", "Pan American World Airways", "Pan American World Airways System", and "Clipper" and the Pan American insignia and any other special or distinctive phrase, mark, name or slogan relating to Pan American and used on advertising material or otherwise by the Company, including all accompanying goodwill, are and are to remain the property of Pan American, and that the name "Panair do Brasil" and the Company's insignia and any other special or distinctive phrase, [fol. 2369] mark, name or slogan relating to the Company and used on advertising material or otherwise by Pan American, including all accompanying goodwill, are and are to remain the property of the Company, and Pan American and the Company agree to cooperate fully with each other in the protection of such names, insignia, phrases, slogans and marks. It is however agreed that the Company will be permitted to register in Brazil only the name "Panair" as their cable address for Brazil.

16. Any controversy or claim arising out of or in any manner relating to this Agreement shall be referred to and finally settled by arbitration in accordance with the procedures set forth below, and if necessary, judgment on the award rendered may be entered in any court having jurisdiction thereof.

(i) If the parties agree to the appointment of a single arbitrator, the arbitral tribunal shall consist of him alone.

(ii) If they do not so agree the arbitral tribunal shall consist of three arbitrators. Each party shall appoint one of the three arbitrators, and the arbitrators so appointed shall appoint the third, who shall act as chairman. Should the arbitrators appointed by the parties fail to agree on the appointment of the third, or should either fail to appoint his arbitrator, any supplementary appointment required shall be made by the Director General of the International Air Transport Association (IATA).

(iii) The Director General may, at the request of either party, fix any time limit he finds appropriate within which the other party, or the two arbitrators ap- [fol. 2370] pointed by the parties, shall constitute the arbitral tribunal. Upon the expiration of this time limit the Director General shall take the action prescribed in the preceding paragraph to constitute the tribunal.

(iv) When the arbitral tribunal consists of three arbitrators, its decision shall be given by majority vote.

(v) The arbitral tribunal shall settle its own procedures and if necessary shall decide the law to be applied. The award shall include a direction concerning allocations of costs and expenses of and incidental to the arbitration (including arbitrator fees).

(vi) The award shall be final and conclusively binding upon the parties.

17. As used in this Agreement, the term "affiliated carriers" shall include all companies other than the Company engaged in the transportation of passengers, mail, express or cargo, by air, for hire, capital stock of which shall be owned by Pan American, which Pan American may designate by notice in writing to the Company.

18. (a) Unless otherwise provided for in the Annexes to this Agreement, this Agreement shall become effective on January 1, 1955, and shall continue in effect until December 31, 1955 and thereafter until terminated by either party at any time after December 31, 1955 upon notice in writing given to the other not less than ninety (90) days in advance of the date of such termination. Termination of this Agreement shall not relieve either party from any obligation or liability on its part arising from or connected with [fol. 2371] tickets, exchange orders, airwaybill or other contracts for transportation issued or executed prior to such termination nor shall it relieve either party from any liability on its part based upon any state of facts existing prior to such termination.

(b) The general traffic and sales agency agreement between Pan American and the Company dated May 1, 1947 is hereby terminated as of the effective date of this Agreement.

19. The provisions of this Agreement shall be subject to all applicable rules and resolutions, including but not limited to those relating to commissions, of the International Air Transport Association (IATA), or any branch, committee, or conference thereof, which is binding upon either party to this Agreement or to any applicable agreement made by either party to this Agreement and approved by the IATA, and said provisions shall be deemed to be amended by any such rule, resolution or agreement to the extent that said provisions are in conflict with such rule, resolution or agreement. Notwithstanding the provisions of paragraph 9 hereof, expenses to either party arising from any fines or penalties imposed pursuant to any such rule or resolution of the IATA, as the result of any action taken or omitted to be taken by the other as General Traffic and Sales Agent hereunder, shall be for the account of said other party, provided that said other party shall not be required to take any action hereunder in violation of any such rules or resolutions.

20. Any notice required or permitted to be given pursuant to this Agreement shall be duly given if sent by mail

addressed, in the case of notice to Pan American, to Vice President—Traffic and Sales, Pan American World Airways, Inc., 135 East 42nd Street, New York, 17, N.Y., U.S.A., or to such other address as Pan American may from time [fol. 2372]to time designate for the purpose, and in the case of notice to the Company, to the president, Panair do Brasil, S.A., Rio de Janeiro, Brazil, or to such other address as the Company may from time to time designate for the purpose.

21. This Agreement consists of paragraphs 1 through 21, together wth Annexes Nos. 1, 2 and 3 as the same may hereafter be amended by mutual agreement in writing between the parties.

IN WITNESS WHEREOF, Pan American and the Company have caused this agreement to be executed in the corporate names by their respective officers thereunto duly authorized.

GENERAL TRAFFIC AND SALES AGENCY AGREEMENT

ANNEX No. 1

1. In accordance wth the provisions of paragraph 2 of the GENERAL TRAFFIC AND SALES AGENCY AGREEMENT to which Pan American and the Company are parties:

   (a) Pan American on one side, agrees to act as General Traffic and Sales Agent on behalf of the Company outside the countries of Brazil and Paraguay except in Argentina, Austria, the Azores, Bahrein, Belgium, Cyprus, Denmark, Egypt, England, France, French Morocco, French West Africa, Finland, Germany, Greece, Holland, Iceland, Iran, Iraq, Ireland, Israel, Italy, Jordan, Jugoslavia, Kuwait, Lebanon, Luxembourg, Norway, Portugal, Saudi Arabia, Scotland, Spain, Sweden, Switzerland, Syria and Turkey; and

   (b) The Company, on the other side, agrees to act as General Traffic and Sales Agent on behalf of Pan American in the country of Brazil (except in the territory of the Federal District and the State of Rio, and the State of São Paulo, or any other cities or regions in Brazil which may be excepted later as provided for in paragraph 3) and in the country of Paraguay.

Pan American agrees to assist the Company in negotiations with government agencies in the countries in which Pan American acts as General Traffic and Sales Agent for the Company, except Chile and Peru, to such an extent as shall be requested by the Company, and any out-of-pocket expenses incurred in furnishing such assistance will be reimbursed by the Company. The Company agrees to assist Pan American in negotiations with the government agencies in Brazil, to such an extent as shall be requested by Pan American, and any out-of-pocket expenses incurred in fur-

[fol. 2374] nishing such assistance will be reimbursed by Pan American.

2. The conditions established in this Annex No. 1 shall become effective as of January 1, 1955.

3. Pan American shall have the right to terminate the provisions of paragraph 1 (b) above with respect to the exception of the territory of the Federal District and the State of Rio and the State of São Paulo, upon notice in writing given to the Company not less than sixty (60) days in advance of the date of such termination, in which event there shall be appropriate modification of the provisions of Annex No. 2 (Federal District and State of Rio—Brazil) and/or Annex No. 3 (State of São Paulo).

[fol. 2375]

GENERAL TRAFFIC AND SALES AGENCY AGREEMENT

ANNEX No. 2

(Federal District and State of Rio—Brazil)

1. In accordance with the provisions of paragraph 2 of the GENERAL TRAFFIC AND SALES AGENCY AGREEMENT to which Pan American and the Company are parties, Pan American and the Company have mutually accepted the additional provisions, hereinafter described, and solely applicable to the territory of the Federal District and to the State of Rio in the country of Brazil, and which provisions are not contained in the IATA Agreements:

1.1 The Company agrees to act, on behalf of Pan American, as General Traffic and Sales Agent exclusively for the air express, air cargo, and mail business and perform this function, in accordance with the conditions set forth in the General Traffic and Sales Agency Agreement referred to above, and to the extent that such conditions are applicable to the air express, air cargo, and mail business.

1.2 In consideration of the international air express, air cargo, and mail traffic volume of Pan American in Rio, Pan American agrees to participate in the expenses to cover the operation and maintenance of the Company's air cargo offices to the extent of the monthly fixed amount of Cr$50,000. In computing this participation, among others, the following factors have been taken into account:

a) Average volume of the international air express and cargo discharged by Pan American in Rio as compared to the same volume of international air express and air cargo discharged by the Company; and

[fol. 2376] b) Average volume of "collect shipments" of Pan American and the related functions of the manipulations of shipping and clearance documents, the physical collections of the charges, and the preparation of the corresponding reports for accounting purposes.

1.3 The Company agrees to make available to Pan American one of the show windows of the Company's main Sales Office (Castelo), for the exhibition of Pan American's advertising and display material; provided, however, that the materials and labor required for the installation and/or decoration of these show windows will be for the account of Pan American.

2. It is understood that either party may at any time request a total or a partial revision of the computation of the amounts established in the foregoing provisions.

3. The conditions established in this Annex No. 2 shall become effective as of January 1, 1955.

[fol. 2377]

GENERAL TRAFFIC AND SALES AGENCY AGREEMENT

ANNEX No. 3

(State of São Paulo)

1. In accordance with the provisions of paragraph 2 of the GENERAL TRAFFIC AND SALES AGENCY AGREEMENT, to which Pan American and the Company are parties, Pan American and the Company have mutually accepted the additional provisions, hereinafter described, and solely applicable to the territory of the State of São Paulo in the country of Brazil, and which provisions are not contained in the IATA Agreements:

   1.1 The Company agrees to act, on behalf of Pan American, as General Traffic and Sales Agent exclusively for the air express, air cargo, and mail business and perform this function, in accordance with the conditions set forth in the General Traffic and Sales Agency Agreement referred to above, and to the extent that such conditions are applicable to the air express, air cargo, and mail business.

   1.2. In consideration of the international air express, air cargo, and mail traffic volume of Pan American in São Paulo, Pan American agrees to participate in the expenses to cover the operation and maintenance of the Company's air cargo offices to the extent of the monthly fixed amount of Cr$80,000. In computing this participation, among others, the following factors have been taken into account:

      a) Average volume of the international air express and cargo discharged by Pan American in São Paulo as compared to the same volume of international air express and air cargo discharged by the Company; and

      b) Average volume of "collect shipments" of Pan American and the related functions of the

manipulations of shipping and clearance docu-
[fol. 2378] ments, the physical collections of the charges, and the preparation of the corresponding reports for accounting purposes.

2. It is understood that either party may at any time request a total or a partial revision of the computation of the amounts established in the foregoing provisions.

3. The conditions established in this Annex no. 3 shall become effective as of January 1, 1955.

December 13, 1955

Panair do Brasil, S.A.
Rio de Janeiro, Brasil

Gentlemen:

Reference is made to the General Traffic and Sales Agency Agreement between our respective companies dated January 1, 1955. In accordance with the provisions of Paragraph 17 of said Agreement, Pan American hereby designates the following carriers as affiliated carriers of Pan American for the purposes thereof:

Aerovias Nacionales de Colombia, S.A.
Compania Mexicana de Aviones, S.A.
Lineas Aereas Costdesicenses, S.A.
Pan American Grace Airways, Inc.

Pan American also hereby designates Aeronaves de Mexico, S.A. pursuant to Paragraph IV of said Agreement, as an affiliated carrier of Pan American, solely with respect to matters relating to participation in the IATA Interline Traffic, Baggage and Cargo Handling Aggregate, and Pan-

air do Brasil, S.A., acting as General Traffic and Sales Agent under the Agreement.

Will you please indicate your acknowledgment of the receipt of this letter on the enclosed copy, and return the same to us.

Very truly yours,

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 79

AMENDMENT NO. 1

THIS AMENDATORY AGREEMENT, made as of July 1, 1957, between PAN AMERICAN WORLD AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York, hereinafter referred to as "Pan American", and PANAIR DO BRASIL, S.A., a corporation organized and existing under the laws of Brazil, hereinafter referred to as the "Company",

WITNESSETH THAT:

WHEREAS, Pan American and the Company have entered into a General Traffic and Sales Agency Agreement dated January 1, 1955, whereby the Company acts as general traffic and sales agent for Pan American and its affiliated carriers in the country of Brazil (except in the territory of the Federal District and the State of Rio and the State of Sao Paulo) and in the country of Paraguay, and whereby Pan American and its affiliated carriers act as general traffic and sales agent outside the countries of Brazil and Paraguay (except in certain countries, regions

and cities designated in paragraph 1 (a) of Annex No. 1 thereto); and

WHEREAS, Pan American and the Company desire to amend the General Traffic and Sales Agency Agreement to exclude the country of Uruguay from the territory in which Pan American and its affiliated carriers act as general traffic and sales agent for the Company;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained the parties hereby agree as follows:

1. Paragraph 1 (a) of Annex No. 1 to the General Traffic and Sales Agency Agreement is hereby amended, effective [fol. 2381] as of July 20, 1957, by the insertion of the name, "Uruguay" after the name "Turkey" appearing therein.

2. Except as herein specifically amended, all of the terms and conditions of the General Traffic and Sales Agency Agreement shall remain in full force and effect.

IN WITNESS WHEREOF, Pan American and the Company have caused this Amendatory Agreement to be executed in their corporate names by their respective officers thereunto duly authorized as of the day and year first above written.

AMENDMENT NO. 2

THIS AMENDATORY AGREEMENT, made as of Dec. 11, 1957, between PAN AMERICAN WORLD AIRWAYS, INC., a corporation organized and existing under the laws of the State of New York, hereinafter referred to as "Pan American", and PANAIR DO BRASIL, S.A., a corporation organized and existing under the laws of Brazil, hereinafter referred to as the "Company",

WITNESSETH THAT:

WHEREAS, Pan American and the Company have entered into a General Traffic and Sales Agency Agreement dated January 1, 1955, as amended by Amendment No. 1 thereto dated July 1, 1957, whereby the Company acts as general traffic and sales agent for Pan American and its affiliated carriers in the country of Brazil (except in the territory of the Federal District and the State of Rio and the State of Sao Paulo) and in the country of Paraguay, and whereby Pan American and its affiliated carriers act as general traffic and sales agent outside the countries of Brazil and Paraguay (except in certain countries, regions and cities designated in paragraph 1 (a) of Annex No. 1 thereto); and

WHEREAS, Pan American and the Company desire to amend the General Traffic and Sales Agency Agreement to delete the provisions set forth in Annex No. 2 thereto relating to the Federal District and State of Rio—Brazil;

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein contained the parties hereby agree as follows:

1. The provisions set forth in Annex No. 2 to the General Traffic and Sales Agency Agreement are hereby deleted in [fol. 2383] their entirety, effective as of Dec. 11, 1957.

2. Except as herein specifically amended, all of the terms and conditions of the General Traffic and Sales Agency

Agreement, as heretofore amended, shall remain in full force and effect.

IN WITNESS WHEREOF, Pan American and the Company have caused this Amendatory Agreement to be executed in their corporate names by their respective officers thereunto duly authorized as of the day and year first above written.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 81

New York, August 30th, 1927.

C. J. Bilwiller Esq.,
Nitrate Agencies Ltd.,
Iquique, Chile.

Dear Billwiller:—

Thank you very much indeed for your informal and interesting letter of August 5th.

Our expert has reported on a project for passenger service all the way down the Coast, also on a service from

Panama up to Callao and return and also on a service for mail only all the way down the Coast.

The Post Office Department has no appropriation available for carriage of the mail at a greater rate than 80¢ a pound which is too low to make even a mail service profitable.

The general idea is winning some converts here and when it has taken a little more definite form, I will write you more fully.

Very truly yours,

RHP.C

[fol. 2385]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 82

MEMORANDUM

Date August 31st, 1927.

To Mr. CARTER Dept.

From Mr. PATCHIN. Dept.

SUBJECT: *AVIATION*

Herewith estimate of capital and operating cost for weekly air mail service from Colon to Valparaiso which I hope you will find time to look over.

No estimate of revenue is included as it will all depend on what arrangements we can make with the Post Office Department. Some revenue can be derived from passengers as the plane specified would have accommodations for three or four passengers as well as two pilots. It is not advisable on air navigation over waters such as the West Coast to use a smaller plane.

My personal opinion is that we ought to use flying boats instead of amphibians, but no flying boats have yet been built in this country.

R. H. PATCHIN

[fol. 2386]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 83

December 23, 1927

Mr. Harold R. Harris
Huff, Daland Dusters, Inc.
Ouachita National Bank Building
Monrow, La.

Dear Harris:

In accordance with my night letter, under date of December 21st, I am forwarding you attached herewith suggested draft of proposed concession to be secured by Huff, Daland Dusters, Inc., or a new Peruvian National Company, to be created for that purpose, if local conditions make such a step desirable.

You will note that the accompanying draft of concession is designed to provide the Company with the necessary legal authority to conduct its business, in all its branches, both operating on schedule and auxiliary service of every kind, of a strictly commercial nature.

It will be noted that one paragraph reserves the right to enter into additional special contracts with the Government for future mail and other service. This provision is inserted so that in the event of a lump sum grant, by the Government, for development purposes is not acceptable to the Government, or is not sufficient in amount to provide the Company the necessary guarantee of earning power, additional supplementary contracts may be made.

You will note that the amounts of these proposed payments and periodic dates same are to be deposited to the credit of the Company, have been left blank, to be filled in by yourself and Mr. Wollman at a later date.

In general, I believe it would be unwise to contract for scheduled service operating less than two hours a day in air load factor, for the company's aircraft, including all the ships in the fleet, at a rate under $1.50 per ship mile—single engine ships of 700 to 900 pounds payload, in addition to pilot and fuel for five hours.

From our experience to date in Latin-America, I cannot too strongly stress the desirability of securing the services of a high-grade Peruvian Attorney. The man selected should be thoroughly grounded in his profession and, in addition, should have good standing with the Government Departments, and all those who may be concerned. I have heard very good reports concerning Dr. Ronero, Attorney for All American Gagles, whose name I suggest for your consideration. It would be wise, too, I believe, to arrange with the Attorney you finally select, for a flat fee, contingent upon securing an acceptable concession and in addition, pay only out-of-pocket expenses incurred.

You will further note that the concession has been drafted so that all dealings and contracts are made with the Departments "Fomento" or Public Works, rather than with the Post Office Department. Transportation in general in Peru comes under the Department of "Fomento". In view of the strong foreign influence now surrounding the Post Office Department (The British Marconi Company) it is believed that arrangements made with the Department of "Fomento" can be negotiated on a basis more favorable to the Company.

[fol. 2387] You will further note that no details as to frequency of service, intermediate stops, operating schedule, or weight of mails are provided for in the paragraph covering the service between Mollendo and Paita. These details are subject to the financial arrangements made between the Government and, in fact, on the final terms of the concession itself as approved by the Peruvian Legislature.

I would suggest that you have forwarded for comment, after local negotiations have commenced, at the earliest opportunity, proposed frequency, load guarantee, number of cities to be served, etc., etc.

Some specified in the concession are to be given the Company by the Government for development, research and Pioneer work, in general. The Company assumes no direct obligation of any kind because of the payment of such sums. The concession does not constitute an iron-clad monopoly

and the sums advanced do not constitute a subsidy, and therefore, the Government should be sold on the fact that it is not entitled to any ownership in the Company's property, or share in future revenue. The only obligation to be assumed by the Company are those distinctly stated in the concession.

The concession will not be valid and no money can be paid by the Government under this agreement, until it has been ratified by the Peruvian Congress. I would suggest it might be helpful to verify this fact locally and forward, at the earliest opportunity, the date when the session of Congress, at which the concession will come up for approval, will convene, in order that we may secure the maximum assistance from our State Department.

If the Peruvian Attorney thinks it unnecessary to include a special cause in the concession in order to make it transferable, paragraph 23 should be stricken out.

The local bank specified for a depository, you will note, is the National City Bank at Lima, Peru. Any responsible local American institution, however, would suffice, should this bank, for one reason or another, prove undesirable.

Much difficulty usually obtains in Latin-American countries in collecting sums due from local Governments. For this reason, particular care has been taken to provide that lump payments shall be made in advance through a depository as trustee.

The proposed concession would also permit the Company to sell its own stamps direct. This procedure need not necessarily be followed, and should the Government finances become absolutely stabilized, the Company would have the right to carry mail bearing Government mail stamps, the Company receiving payment for carrying same from the Government. On general principles, however, the method is unsatisfactory. The most desirable arrangements would be the ratification by the Peruvian Congress of the proposed concession, carrying with it lump payments in advance over one or two years, to cover the greater part of the capital investment required.

A supplementary contract, whereby the Government would guarantee a minimum load of airmail bearing the Company's stamps on mail at 50¢ per ounce, or fraction thereof, sufficient to guarantee a mail revenue of $1.50 per schedule mile, would be most desirable.

[fol. 2388] I trust this data may be of service to you and would appreciate your comments thereon, at an early date, so that we may have a chance to redraft certain points, if you deem it advisable, before you sail.

With best regards, I remain,

Yours sincerely,

J. T. Trippe

[fol. 2389]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 84

December 30, 1927.

Mr. Harold R. Harris,
Huff Daland Dusters, Inc.,
Monroe, La.

Dear Harold:

Thank you for your letter of December 20th, which I have delayed acknowledging, partly due to the large amount of work to be done before the Pan American Conference on the fifteenth. I was hoping it might be possible for you to attend, but appreciate the fact that the situation developing in Peru may probably make this impossible.

I also want to take this opportunity to thank you for passing along the information you picked up in Washington with reference to Nagle. Nagle is now doing some work for us, but chiefly in connection with accumulating statistics, having to do with the movement of passengers, mail and merchandise, clerks and collection items, through Central and South America, for the preparation of a detailed survey we expect to make on the Colon run, within the next two months.

Let me have your reaction to the drafts of the proposed concession which I forwarded you Christmas Day. I appreciate it is by no means in good shape yet, but feel that it may be of considerable value to you as a draft to commence negotiations on.

From information I have secured in Washington and elsewhere, I believe you are going to run into considerable difficulties and, in particular, opposition by local British and German interests. The two cable companies also will certainly offer no assistance. In fact, I feel confident that messages having to do with securing this concession may probably come before certain of their executives.

I am, therefore, forwarding you, under separate cover, copy of a small dictionary which you can use as a guide later on in the negotiations, if you particularly wish to get something through confidentially. It is quite possible you will never require it, but it may be well to have it along. I have a similar edition in my desk. The procedure is relatively simple. The figures 199 to 315 refer to pages. The figures one to 100, the definite word located on the page previously referred to. For instance, 216-75 would refer to the word "can"; 243-6 would refer to the word "fifty", etc., etc.

As stated above, I see no reason now why we should have need for this code, but we cannot foresee what will develop, and it may come to pass, for instance, that you would have us bring pressure along certain channels, through our State Department, and certainly you would not wish to put such a message over the cables in ordinary language.

Wishing you a Happy New Year and awaiting word from you with interest, I remain,

Yours very truly,

J. T. Trippe,
President.

[fol. 2390]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 85

[Letterhead of Huff Daland Dusters, Inc.,
Monroe, La.]

[Stamp—Received—Jan 6 1928]

January 3, 1928.

Mr. Juan Trippe, President,
Pan American Airways,
100 East 42nd Street,
New York City.

Dear Juan:

Your proposed Peruvian concession with its covering letter, and also your nice letter of the 30th both arrived today. The concession letter was very surprising to me as I thought that it was thoroughly understood between us that you were to send us a generalized Latin-American concession form and not worry about the Peruvian angle in particular. The only reason I cabled Woolman to delay activities was to get this form you were to make up, which we discussed in Washington. I feel that we are not justified in further delay in this matter and we are cabling Woolman to proceed with the negotiations along the lines with which he is already familiar; however, we will forward him a copy of your letter and draft for his information and such use as he may be able to make of them.

You well know that we have intimate knowledge of the situation in Peru and we feel that we have the very best of connections there. As you realize, negotiations will, no doubt, be very delicate and we cannot point out too strongly the advisability of having all inquiries, information and suggestions clear through one channel. If confidential inquiry is conducted, say through the National City Bank, it might prove embarrassing to us, not only in our work in Peru, but in the other countries south of the Canal, and we look to you to refrain from making any moves regarding these countries without first advising with us.

With further reference to a standard form of Latin-American concession draft we would appreciate very much your giving us the salient points in the concessions which you may now possess. The importance of being able to refer to a particular clause or clauses as being acceptable to some other Latin-American government might be the deciding fact in securing the acceptance of this clause in another country. We shall attempt to secure a monopoly [fol. 2391] concession in Peru, Ecuador and Chili and the best possible type of concession in Columbia. I seriously question whether a partial monopoly such as outlined in your draft is desirable, except as a last resort. A brief study of your proposed Peruvian concession has brought out a number of other points which seem undesirable or unnecessary. One, for instance, is the fact that no provision is made in this draft for operating between Peruvian ports and foreign ports. We see nothing desirable or necessary in the description of the type of equipment to be used. We see no reason for operating the entire route within six months of the approval of the government, but would rather guarantee to commence operations on a partial route within that time.

Your point that the income should be at least a dollar and a half per mile seems to be very important and I feel sure is based upon your previous experience. This is nearly three times as much as we had theoretically figured, and we would appreciate very much your data on this.

It was very thoughtful of you to send the dictionary, and the notation regarding the code may prove very important and beneficial. I feel with you that we may get some keen competition in this matter, which may have extensive ramifications.

Regarding use of the dictionary in private code in cables, I will appreciate very much your giving me your cable address in New York. Our address in Lima is Hudadus, which is also our address in Monroe. Possibly in sending numbers by cable we might use the A.B.C. Sixth Edition Code Book and simply take the code number, which is the left hand column on each page, and transmit the half code word corresponding to that number. An otherwise unintelligible

cable in the A.B.C. Sixth Edition would immediately become a dictionary code cable. This would be convenient for us since we use this code in our ordinary code cables.

Please drop me a line on the matters mentioned above, particularly the cost data, as soon as possible, since the date of the Pan American Conference is very close and I suppose you will be in Cuba at that time. Unfortunately I have not been able to set my sailing date, so do not know for sure if I will be able to meet you in Cuba.

Very truly yours,

HUFF DALAND DUSTERS, INC.,

/s/ HAROLD R. HARRIS
Vice President.

HRH:NRG.

[fol. 2392]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 86

[Handwritten notation—1928—file]

January 3, 1928

Memorandum of conversation with Dr. von Bauer

Dr. von Bauer began with the Scadta Company as Manager but in 1921 when they were in financial difficulties, he invested heavily in the Company and became its head. He is now the principal stockholder. Scadta is a Colombian Company. They have recently organized two other companies in connection with their new services.

The Company has a liberal concession in Colombia which while it does not give them any monopoly, does give them certain advantages in the way of exemption from export duty on planes, spare parts, supplies, etc. and the right to conduct what virtually amounts to a private mail service, the Company selling their own stamps and delivering their own letters at destination.

The Company, even on the small service which it is now running, has eleven planes, maintains an airport at Bar-

ranquilla which represents an investment of $200,000, and smaller airports at Girardot, Cartagena and Buenaventura. Dr. von Bauer explained that the land plant is quite as important as the flying machinery pointing out the difficulty of maintaining adequate repair shops, and the necessity of maintaining supplies of repair parts, etc. in order to make necessary repairs at a point so far distant from the factory. He stated that an engine costs $7,000. and the larger Dornier whale planes up to as much as $100,000. Scadta's practice is to write off the entire investment in a plane in twelve to eighteen months although ordinarily the plane is in use much longer than that, 1,000 running hours [fol. 2393] being estimated as the commercial life.

The Colombian service maintains reserve planes which are stationed at strategic points and proceed in search of any plane which does not pass within a certain period after schedule time. Insurance is carried on the planes although the rate is 20% to 25% though in Scadta I imagine the Company carries part of their own insurance as Dr. Von Bauer said they had an insurance reserve of $100,000. Insurance for the pilots is optional with them and paid for by deduction from their salaries. Dr. von Bauer stated that few of the pilots carry insurance as they prefer the cash.

Asked for his ideas regarding a West Coast of South America service, Dr. von Bauer stated that the matter would require very careful study in detail and that it was impossible to reach any conclusion without this study. The question of the best type of plane for the service would itself require very careful investigation. For example, for a part of the service hydroplanes would probably be desirable and for other sections, land planes. On account of the rains between the Canal and Guayaquil, all metal planes would probably be required here. Among the difficulties to be overcome which he mentioned, were the prevalent rains between the Canal and Guayaquil, the fogs from there to Lima and the possible heavy seas below that point, and all along the course, the difficulty of finding suitable landing places. As indicative of the probable cost of such a service, [fol. 2394] it may be noted that on a Florida Guatemala

Cuba triangular service, which Dr. von Bauer figured on some years ago, he estimated that an investment of $2,000,000 would be required.

[fol. 2395]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 87

January 13, 1928.

Mr. Harold R. Harris, Vice President,
Huff Daland Dusters, Inc.,
Ouachita National Bank Building,
Monroe, La.

Dear Harold:—

I acknowledge receipt of your letter, under date of January 3rd, relative to the proposed Peruvian concession.

I note therein that you have cabled Woolman to proceed with negotiations along the lines of the original plan, copy of which Ed Gott forwarded me, and that you also forwarded Woolman a copy of the proposed Peruvian concession prepared by Pan American Airways, Inc.

I am sorry it was impossible to delay matters in Peru until Woolman could have received from you the draft we sent you, for I believe that a concession along those lines is infinitely more desirable than a general contract, depending upon payments made by the Government, from time to time, for services rendered. In fact, I do not believe that an operation depending upon such revenue would fit in with the proposed operations of Pan American Airways, Inc., but, knowing the local situation as you do, you are probably in a better position to judge what type of concession would best fit the picture.

In your letter you raise the question as to whether a partial monopoly, such as outlined in our draft, is desirable, except as a last resort. In this connection, I would state that the concession developed by us is the strongest possible one that would be supported by our State Department.

In view of the pressure brought to bear by foreign Governments to secure concessions in Ecuador, Peru and Chile at the present time, I believe you will be lost unless you have the greatest possible backing in Washington.

You also refer to our draft as having no provision covering the operation between Peruvian ports and foreign ports. This is one of the most important points in question that [fol. 2396] will come up for discussion at the forthcoming Pan American Conference. Our delegates are of the opinion that it will be adopted that all member-countries will agree to regulations permitting International Transport Companies to land at certain Airports of Entry in their territory. Should this fail of enactment, it would be well to include the right to operate between Peruvian ports and foreign ports. I had in mind, however, that it was practically necessary to set up a National Company to hold this concession, and that in that case, of course, no such provision would be necessary.

With reference to operating costs, I would state that we have found that it costs at least 25% more to operate outside the United States on scheduled lines than it does in the States, and that it is unwise to figure on less than one dollar per ship mile for the type of equipment referred to in my letter of December 23rd, attached to the concession. The figure of one dollar will, of course, include proper reserves for full insurance, depreciation and amortization of investment, over a period of four years, which is a reasonable charge to include at this stage of Air Transport developments.

I am leaving in a few minutes for Cuba, and so am forwarding your letter of the 3rd instant, together with other correspondence having to do with this matter, to Mr. Robert W. Atkins, of Hayden, Stone & Co., this City, whom you met when last in New York. Mr. Atkins has said that he would take care of the matter until my return to New York, which I expect will be about January 23rd.

I sincerely hope it will be possible for you to attend the Conference. If so, you can reach me at the Pan American Airways, Inc., office, Sevilla-Biltmore Arcade, Havana, Cuba.

Wishing you the best of luck in Peru, and awaiting further news from you with a great deal of interest, I remain,

Yours very truly,

J. T. Trippe

[fol. 2397]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 88

February 21, 1928.

Mr. Edgar N. Gott, President,
Keystone Aircraft Corporation,
Bristol, Pa.

Dear Ed:—

Following the receipt by him of your wire of February 5th, Harold Harris cabled me at Havana on the 8th, advising that he and Mrs. Harris were coming over from New Orleans by boat to go over the Peruvian situation.

I spent sometime with him in Havana, describing our expansion plans. In particular, I stressed the hazard of depending, in Latin-American countries, upon Government contracts for revenue. Harris immediately got off a cable to Woolman in Peru, stressing the importance of incorporating in the concession a clause giving his Company the option to deal directly with the public in the sale of Air Mail stamps.

I asked our organization to cooperate with Harris while he was in Havana and requested that they answer any questions he might ask in connection with the operation of Pan American Airways, Inc. I also arranged to give him a pass on the line, in order that he might visit Key West and acquaint himself, at firsthand, with the formalities required to clear aircraft plying between any two countries.

When leaving Havana Harris asked me to forward him a copy of the Cuban contract, as well as other proposed contracts and concessions we have drafted for use in Central America. I have already forwarded him a copy of the Cuban contract, and will forward copies of the others as soon as they are available.

I hope that Harris's trip to Havana was worth while, and I am sure it will have been if he intends to go to Peru before the proposed contract there is concluded, for his visit to Havana and Key West will have clearly indicated the additional difficulties and incidental expenses incurred in operating an International Air Service.

Yours sincerely,

J. T. Trippe,
President.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 89

PAN AMERICAN AIRWAYS, INC.

General Offices

100 East 42nd Street, New York City

February 23, 1928.

Mr. Richard F. Hoyt,
25 Broad Street,
New York City.

Dear Dick:—

I attach herewith, for your files, copy of a letter addressed to Ed Gott, reporting on Harris's recent conference with me at Havana.

I believe I sold him on the falicy of depending upon contracts with South American Governments for mail revenue. We have as yet been unable to collect the money due us from the Cuban Government, but expect to have this in within the next few weeks, having made arrangements on my last trip to Havana to have certain other Post Office funds ear-marked in the future for this purpose.

This delay, however, sold Harris more effectively than any other argument that could have been brought up. He accordingly cabled Woolman, who is now in Peru, to attach a rider to the concession he is now attempting to secure, which would permit Huff Daland Dusters, Inc., to sell its service direct to the public.

From reports I received through the State department, Woolman is evidently handling a very delicate situation in Peru to good advantage. Personally, I do not think the first concession he may be able to obtain will be very valuable, but it will be an entering wedge, and, what is more important, will prevent foreign interests from obtaining a foothold in Peru.

Sincerely,

(Sgd.) JUAN TRIPPE

[fol. 2399]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 90

(Letterhead of Atlantic, Gulf & Caribbean Airways, Inc., New York City)

[Handwritten notation—File Copy]

April 10, 1928.

Mr. Edgar N. Gott, President,
Huff, Daland, Dusters, Inc.,
c/o Keystone Aircraft Corporation,
Bristol, Pa.

Dear Ed:

I am outlining herewith conversation between Harold Harris, Vice President of your Company and myself, under date of April 9, 1928, as follows:

I advised Mr. Harris of my conversation with Mr. R. F. Hoyt, the day prior to his recent departure for Colon, during which I developed the fact that the stock interest of Huff Daland Dusters, Inc., and Atlantic, Gulf & Caribbean Airways, Inc., were not identical. I told Mr. Hoyt that I did not see how Atlantic Gulf could properly assist Huff Daland Dusters, Inc., without recompense, in developing an air transport service along the west coast of South America. However, in view of the large stock interest he and his associates had in both Huff Daland Dusters, Inc. and Atlantic Gulf, and also in view of the fact of his expressed desire to include Huff Daland Dusters in the Holding Company—Atlantic Gulf—and especially because of the recent progress made by the Inter-Department Committee designated by the President to develop American Air Transport in the Southern field, I believe, from Atlantic Gulf's point of view, we can now assist Huff Daland Dusters, Inc., in developing the West Coast of South America, recompense for such assistance to be set [fol. 2400] by a representative of Atlantic, Gulf, duly nominated by the Board, and Mr. Hoyt representing the Dusters.

I believe such a plan would be most agreeable to Huff Daland Dusters and, therefore, pending confirmation of same by you, I have outlined to Mr. Harris, in detail, recent developments in Washington.

I told him that I believed the Inter-Department Committee would designate three, and possibly four, foreign transport routes. Furthermore, that the Post Office Department would advertise for air mail service over these routes, provided funds in the amount of approximately $2,000,000. were apportioned under the recently enacted Kelly-Moses Foreign Air Mail Bill. One of the routes being considered was that along the West Coast of South America from Colon South. The advertisement for bids on these routes might be expected any time within the next several weeks.

I told Mr. Harris that I believed at least one outside American interest was working on the West Coast route, and that if the advertisement for bids on this route were released along with the others, which I hoped would not be the case, that his Company should prepare to place itself immediately in the strongest possible position. I recommended for his consideration the following steps be taken at once:

1. That the advertisement on the West Coast route be delayed, if possible, until after the local concessions in Peru and Possibly Ecuador had been definitely secured.

2. That the name of his Company be changed to West Coast Airways, Inc., instead of Air Operations, Inc.

3. That a survey of the airway between Colon and Valparaiso be prepared. The information now available to [fol. 2401] Harris, as a result of his dusting operations in Peru, would provide most of the information required.

4. That a technical survey be made of this route, including the securing of meteorological information and other pertinent data.

5. That a traffic survey be undertaken to provide full information on the movement of mail, passengers and merchandise over this route.

6. That an economic survey be developed. Such a survey would provide fairly accurate estimated on the operat-

ing costs and revenues of a service installed on this route and of the expected financial returns to be obtained over a period of years.

7. The Peruvian concessions now being negotiated should, if possible, be brought to a conclusion before May 15th. Negotiations should be attempted in Ecuador. A summary of previous operating experience on the West Coast of South America and of concessions secured, should be forwarded immediately, following the results of advertisement for bids.

Much of the technical traffic and economic data required to develop the seven points itemized above, is already available in the Atlantic Gulf office. Mr. Harris can also provide much of the information required in the airway survey from his experience in conducting dusting operations in this territory.

Mr. Woolman will no doubt have his Peruvian concessions definitely tied up before the middle of May. Possibly he may have been able to do something in Ecuador.

If the arrangement outlined herein is agreeable to you, will you please so advise me, in order that Atlantic Gulf may continue to assist in the development of this west coast situation.

[fol. 2402] In the meantime, we will bend every effort to attempt to have the advertisement for this route deferred. From present indications, this would appear to be very difficult. I believe, therefore, that every effort should be made to develop the principle that the present Huff Daland Dusters, Inc., are entitled to this contract, not only because of their experience in this territory, but also because of the work done by them in preparing for actual service over this route.

I await your reply with interest.

With best regards, I remain,

Sincerely,

ATLANTIC, GULF & CARIBBEAN AIRWAYS, INC.,

J. T. Trippe,
President.

JTT:B

[fol. 2403]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 91

April 27, 1928.

INFORMAL MEMORANDUM REPORT.

On October 3, 1927, when Pan American Airways, Inc., and your Holding Company—Atlantic, Gulf & Caribbean Airways, Inc.,—was organized, your Companies had before them two major undertakings—first, carrying out the provisions of the mail contract between Key West and Havana, previously acquired, and secondly, extending service South to Central and South America.

The Key West—Havana contract required that the first flight over the route with the mails be made on October 19th—sixteen days later. An Airport had to be constructed out of a quagmire at Key West; hangars and passenger stations had to be planned, constructed for and erected; personnel had to be selected and assembled. The Company's Key West Airdrome had to be designated as an Airport of Entry, the first in the United States. Many clearance regulations had to be changed before any regular operation at all on a schedule was possible and, lastly, to build up the reputation of Pan American Airways, Inc., the line had to be operated with safety and regularity and, if possible, at a profit.

This has all been accomplished, and we might say that the first step in the development of your Company is behind us.

No permanent organization for this short route has been attempted. The line has been used to acquire experience in a new field, in operating an International Air Transport Service. Some of the positions in the local operation have been temporarily filled by men unqualified to perform the duties assigned, were it planned to maintain the present organization as such, on a permanent basis. Others have been temporarily assigned to local positions in the Accounting and Traffic Departments, and to acquire the experience necessary for the Company to expand its operations in the International field.

In fact, the entire local operation has been conducted as a laboratory, with the end in view of exploiting the Central and South American Air Transport field.

As soon as scheduled operations on the Key West—Havana Division had been established on a firm basis, my activities were directed to the Company's expansion program. This work was divided into five parts, as follows:

[fol. 2404] I Creating interest in an American Air Service to South America.

II Promoting the required subsidy legislation.

III Assisting the proper officials to designate the routes selected by this Company.

IV Securing the necessary appropriations.

V Negotiating remunerative contracts.

I will cover the work done to date, under these headings:

1. Creating interest on the part of our Federal Officials in having an American Company extend its service through Central and South America. —This question was discussed informally with the President's Secretary, members of the Cabinet, and other persons, resulting in the matter coming before the Cabinet last Fall at three successive meetings. The President appointed a Committee to consist of the proper representatives of the various interested Departments, to push this matter and cooperate with any American Company interested in this field.

2. "Promoting the required subsidiary legislation." Any Company contemplating extending service into the Central and South American Field would face competition from subsidized European interests. European Transport Companies can operate at a considerably lower cost than could any American Company employing American personnel and using American equipment produced under our high labor scale. Therefore, there was required legislation that would provide an American Company not only with subsidy in the form of mail contracts, but also a subsidy considerably higher than that enjoyed by the European Transport monopolies—The Latecoere System and Luft Hansa. More-

over, it seemed essential that contracts be made for a longer term than the maximum four-year period permitted under existing postal laws. Many of the foreign contracts extended for a period of ten years. Ten years seemed to be the minimum period possible over which an investment could be reasonably amortized. These facts were discussed with the proper officials.

A Bill was introduced during December by Congressman Clyde Kelly in the House, and Senator George Moses in the Senate. The Bill was not all that could be desired. [fol. 2405] It enabled the Postmaster General, however, to contract with an American Company, on attractive terms, without recourse to competitive bidding and interference, in the award by the Controller General.

Marine mail transportation precedent required that the contractor be paid by the mile or by the pound with a mileage limit. The fact that it was desired to eliminate the competitive bidding feature from the contract, was a difficult matter to contend with. Nevertheless, the Bill embodying this feature was introduced in both Houses, passed and approved by the President on March 8th last.

3. "With the legistration described, introduced, and apparently to be adopted, the question of what routes would be selected by the Government came up." Pan American Airways, Inc., had been advocating and working on the direct extension of this route to Colon via Yucatan. Interests affiliated with the Ford Motor Company, and supported by some of the transport interests in the United States, advocated an all-land route to Colon, via Mexico City and Guatemala. This Company successfully had approved, by the Inter-Departmental Committee, the routes advocated by it.

The Postmaster General has requested an appropriation of $2,000,000., which has been approved by the Bureau of the Budget. The route to Colon advocated by this Company has been definitely selected as the first route to be established.

The second route under consideration was a route to Mexico City. Our Government requested permission of the

Mexican Government to operate a service to Mexico City, via Tampico. The route proposed by this Company, together with the Mexican Aviation Company, an American owned Mexican Corporation, with whom we have been jointly developing the situation in Mexico, was selected by the United States Government as the logical route to Mexico City from the United States. The Airway would extend from Brownsville, Texas, and or Matamoras, Mexico, via Tampico, to Mexico City. The Mexican Company referred to has been successfully operating, at a profit, in this territory, without any mail contracts at all, for a period of years.

Pan American Airways, Inc., has also surveyed the West Coast of South America, from Colon South, to Valparaiso, and the North Coast route, from Colon to Trinidad, via Colombia and Venezuela. The Departments had in mind first developing the West Coast route. After studying the surveys developed by this Company, however, they are [fol. 2406] agreeable to first developing the North Coast route. This plan would best fit in with the Huff Daland Dusters, Inc., in which Mr. Hoyt is interested. Huff Daland Dusters, Inc., are attempting to acquire concessions in Peru and Ecuador. These have not as yet been secured and, therefore, Huff Daland Dusters, Inc. have requested us to assist them in having the United States Government delay action on this route.

Provided the schedules recommended by this Company are adopted, appropriations for the first year, of approximately a million and a half, will be required to pay a contractor, at a maximum rate of $2.00, for service over the three routes described above. The question of appropriation has been discussed with members of the Appropriations Committee, with officials of the Bureau of the Budget and with others. The result of these conferences would indicate that appropriations of at least one and three quarter million dollars will be authorized before May 15th of this year, and available July 1st, 1928.

4. The Post Office Department has recently advised that they do not believe it will be necessary to go through all the mechanics of advertising for bids on the foreign routes

over which service is desired: The Second Assistant Postmaster General, Mr. Glover, has also advised that he will be prepared to negotiate immediately for contracts with such Companies as he believes are best qualified to render efficient service over the routes designated. Informal conferences during the past three weeks have indicated to the Department that a payment of $2.00 per airplane mile would be considered reasonable, and that the amount of mail required to be carried at this rate would not exceed 1,000 pounds. The Department wishes to cooperate in every way possible.

The itinerary, the schedule, the starting date, and other similar factors, would be developed, by agreement, with the contractor. Moreover, the service could gradually extend over any given route, and payment on a mileage basis can be made for that part of the route actually flown. Furthermore, when peak loads occur, the Department has stated that it would reduce the load, if desired, by arbitrarily forwarding mail to whole countries by boat, or hold them over, or forward them by a second plane, which ever course would be most satisfactory. In short, the Government is most anxious to have the service commence at the earliest possible opportunity, and will cooperate to the utmost to this end with the contractor now best qualified to render the service.

[fol. 2407] Thus, four of the five steps set forth have been successfully carried out, viz.,

1—Creating interest in having air service to Central and South America.

2—Assisting in the development of the required Legislation.

3—Selecting the most attractive routes.

4—Insuring of an adequate appropriation.

The fifth—actual negotiation of a remunerative contract is yet to be carried out.

As indicated, the Company has developed four separate and distinct routes over which it is now practically possible,

I believe, to secure mail contracts, on a long term basis, at a rate which should insure a profit commensurate with the risks involved.

Repeating these four routes, they are, in order:

1—Key West and/or Miami to Havana.

2—Key West and/or Miami to Colon, via Yucatan.

3—Brownsville, via Tampico, to Mexico City.

4—The North Coast route from Colon, via Colombia and Venezuela, to Trinidad and the Guianas.

I will take up each separately and outline, informally, the separate Resolutions I will require to develop further this program—for consideration and action by this Board.

1. I would request authority to submit a bid for carrying United States mail on the Key West to Havana line, covering a period of five years. The contract, as advertised, provides that the first-class mail, up to a maximum of 1,500 pounds, must be carried. A provision also is included whereby the Northern Terminal may be moved, by mutual consent of the Government and the contractor, to Miami. The maximum rate that can be bid is $2.00 per airplane mile. I would propose to bid $2.00 per mile, but do not believe that I or any other officer authorized to bid, should be tied down to this limit, owing to unforeseen contingencies which might arise. The proposed Resolution, therefore, is not so restricted.

[fol. 2408] Daily Southbound mail revenue available on this route, while operated out of Key West, would be approximately $228.00, the actual mileage, from Airport to Airport over the route flown being approximately 114 land miles. Under our present contract, we would receive a similar sum for carrying approximately 600 pounds. We have been carrying in excess of 800 pounds, so there will be a loss involved under the new arrangement. Messrs. Glover and Gove, of the Post Office Department, have agreed, however, to throw out, after June 30th of this year, when the new contract goes into effect, all the package matter which we are now carrying as first class mail,

owing to the failure of the Parcel Post treaty with Cuba. The average load will then approximate 400 to 500 pounds, which will be all letter mail and we will have left over 1,000 pounds or more of pay load capacity for passengers and express matter.

Furthermore, under the contract as re-advertised, we will not be subject to competitive bidding on rates. We will have a five-year contract and we will have an opportunity of extending the service to Miami at the same mileage rate of $2.00 per mile. The risk of losing the contract through outside interests submitting a low bid, is negligible, and I believe that we are particularly fortunate in having the contract over this strategic route re-advertised under the new law, particularly so, inasmuch as the new appropriations have not yet been made available.

2. I would request authority to negotiate or to submit a bid for a contract in the name of Pan American Airways, Inc., to carry United States mail between Miami and/or Key West, Florida and Colon, which the Post Office Department wishes to have operated immediately, subject to appropriations being made available. I will outline the situation, with respect to this route. The preliminary work has been divided as follows:

A. Airway—An estimate to cover airway installation costs, including airports, hangars, passenger stations and radio communication facilities has been completed. This work has been done under the direction of Captain Whitbeck. The final estimates submitted by him aggregate $178,00. The time required is four and one-half months, following definite word to proceed.

B. The Concessions and contracts which would be most remunerative to the Company over a period of years, have been drafted, after careful study of concessions previously secured by other Central and South American Air Transport Companies—as well as the concessions developed to cover cable and radio communication systems. The secur- [fol. 2409] ing of these concessions in Latin America is being handled by Messrs. MacGregor and Bisgood, who have already made considerable progress in this direction.

C. The simplification of clearance procedure. Before any International Air Service could be operated through the seven or eight different countries which a route between the United States and Colon would have to operate over, adequate regulations to cover the clearance of aircraft, passengers and merchandise, must be provided in the United States, in Cuba and Mexico, and also in the various Republics of Central America. This work was started with the full cooperation of the Inter-Departmental Committee and the governing board of the Pan-American Union. The new regulations to cover International Air Clearance should be promulgated by the United States before the first of June. Temporary arrangements with the other Central American powers, it is believed, can be made during the summer months.

Mr. Nagle has been representing this Company, cooperating with the sub-Committee of the Commerce and Treasury Departments, designated by Messrs. MacCracken and Schoeneman. A report by Mr. Nagle can be examined after the meeting—together with the present forms required and the new and simple forms to be adopted.

D. Operating Costs and Revenues—Estimates of capital investment, operating costs and revenues, have been carefully made. I have had charge of this work, with the assistance of Messrs. Priester and Nagle. The detailed estimates are here, and are now available for inspection by the Board.

The work on this expansion has advanced to a point where it is believed the Company should be prepared to shortly commence actual negotiations with the Post Office Department on a contract. The Government is permitted to pay $2.00 per mile for transporting mail Southbound, to the Canal Zone. They are also permitted and are now prepared to pay for carrying American mails Northbound out of Colon over the same route, although, of course, the limited load to be carried would require that the rate paid would be considerably less than $2.00 maximum. This is the most important item, from the Company's point of view—for back-log mail revenue will be available in both directions.

In this connection, the Board should have in mind that the contract can be negotiated, and only an arrangement that should return a profit commensurate with the risk in- [fol. 2410] volved should be considered by Pan American Airways, Inc. If a contract on such a basis cannot be negotiated, then I would recommend that the Company restrict its operations to the present route, which we know will earn a profit, under the present investment.

The Resolution submitted for your consideration would permit of my commencing negotiations with the Government. Of course, no final steps would be taken without going over the matter in detail with the Board.

3. *The route between Texas and Mexico City.* For some months past, we have been investigating this route, with the cooperation of Mr. George Rihl, President of the Mexican Aviation Company. This Company has been operating successfully in Mexico for a number of years, Mr. Rihl having been able to show profits to date without mail contracts. Our Government formally requested permission of the Mexican Government to extend a service under the provisions of the recently enacted Foreign Mail Bill, from Brownsville, via Tampico, to Mexico City. Mr. Rihl took this matter up locally in Mexico City, and about two weeks ago the Mexican Government replied, granting formal permission to the United States to extend such a route.

Last Friday, Mr. Rihl met Mr. Glover in Brownsville, and took him up to Mexico City, where a conference was had with President Calles, Mr. Morrow, and other officials. Mr. Glover is expected to return to Washington tomorrow, when he will formulate the plans of the Department with respect to this route.

With the assistance of Mr. Rihl, we have developed estimates covering capital investments, operating costs and revenues over this route, based on a mileage rate of $2.00 by the United States Government. From these estimates, it would appear that the route would return a considerable profit on the investment.

The detailed estimates and maps are available for your inspection. The Resolution which I would request of the

Board, would permit me to commence negotiations with the Government. The plan developed for your consideration is: Pan American Airways, Inc., would acquire the outstanding stock of the Mexican Aviation Company, at its Actual present value; charter equipment to this Company, and enter into a contract on some plan, whereby the Mexican Company would operate the service on a guarantee of 6% profit by Pan American, Pan American securing in return the gross profits or losses, if any, from the operation. In this way, the equipment would be held in the name of [fol. 2411] Pan American Airways, Inc., an American company; the operation would be conducted by the Mexican Aviation Company, and the taxes to the Mexican Government reduced to a minimum. The Mexican Aviation Company could carry on, under Mexican law, cabitoge passenger, mail and express traffic between Mexico City and Tampico, and Tampico and Matamoros.

The Tampico section of the proposed route is now being operated by Mr. Rihl's Mexican Company, mail, under contract with the Mexican Government being carried in both directions. In addition, a considerable volume of passenger traffic has been developed.

I would recommend to the Board this this Company be in a position to negotiate for a contract over this route, with the United States Government if, upon Mr. Glover's return, the Department decides to extend service on this line. The Resolution submitted for your consideration would permit negotiations to be commenced.

4. *North Coast Route*. The Government is particularly anxious to have American Service extend into South America, and particularly so, in view of the impending competition by British, German, Dutch and French interests. This Company has surveyed both the West Coast routes and the route from Colon to Trinidad, along the North Coast.

The results of this work have been submitted to the various interested Departments. The Post Office Department has advised that they will most probably be willing to have

service extended along the North Coast to Trinidad and the Guiana, as far as Paramaribo, on a bi-weekly schedule.

A $2.00 a mile contract, with the limited U. S. mail load to be carried—from surveys made—would appear to be most attractive. Any such service, of course, would have to be contingent on securing adequate contracts with the Scadta Company, now operating in Colombia, the Colombian Government and the Venezuelan Government.

From previous conferences, it would appear that attractive arrangements could be made with the Scadta Company and the necessary concessions secured with the Two Governments concerned. Negotiations for such arrangements would, of course, require a long period of time, and any contract with the United States Government would have to be contingent on satisfactory arrangements being concluded with these parties.

I would request, therefore, for your consideration, au- [fol. 2412] thority to negotiate with the Government to develop this situation, particularly so, inasmuch as a $2.00 a mile contract on this route would be most attractive and probably could not be had in later years, when a service shall have been extended to Colon.

Were the Board to consider it advisable to negotiate a possible contract at this time, I would recommend that it be held in the name of another Subsidiary Company of your Holding Company—Atlantic Gulf & Caribbean Airways, Inc.

I have outlined herewith the three routes which I would recommend to this Board, the Company look into. I believe Pan American Airways, Inc., is now in a strategical position to tie up the entire Caribbean Sea, in a network of air lines. Many air transport executives have stated they believe such an operation would be attractive, including Mr. C. M. Keyes, Chairman of the Executive Committee of National Air Transport, Inc., Mr. Hanshue, President of the W. A. E., and others.

The financing required to install and operate the Colon route, the Mexico City Route, the projected Santiago Route

extension from Havana, and to develop the North Coast situation, can be made available through the sale of 320,000 shares of Atlantic, Gulf & Caribbean Airway, Inc. stock, at $6.00 per share. The total additional capital that would then be available for expansion will amount to $1,920,000.00 over and above our present capital.

Organizing a system of Air Lines around the Caribbean, with three distinct and separate operating divisions, would provide a most efficient operation. A substantial reduction in operating costs will be realized as soon as operations are conducted on such a large scale. The major maintenance base would be provided at one central point—probably Miami—where the major overhauls, at periodic intervals of 700 hours of flying, could be done. A substantial reduction in the spare airplanes and engines required by any one dividion would also be effected. Large transport airplanes cannot usually be obtained within a period of six months, except through payments of premiums. Airplanes purchased on short notice are not usually fitted up to suit the individual requirements of the airline operator. The time element required to obtain equipment, requires that operating companies provide themselves with additional equipment to meet emergencies over and above the requirements of daily operations.

[fol. 2413] When and if service to Colon is inaugurated, the Cuban Division could be maintained without spare airplanes; the reserve ships held for the longer route would be available on a few hours' notice at Key West or Havana.

In a large operation of the type now under consideration, or, in fact in the permanent operation of the Key West to Havana route, if carried on alone, will require proper organization. A lack of local executive supervision, unassigned responsibility, overlapping of authority and similar sources of trouble, are bound to develop in any airline, unless the permanent organization has been carefully planned to fit the requirements of the operation.

During the past month, I have devoted considerable time to studying the organization, not only of Air Transport Companies in Europe, where large scale operations are

under way, but also to model organizations in the United States, including Mitten Management, Inc., and General Motors Corp. From these studies, I have developed an organization chart, that would best meet the requirements of Pan American Airways, Inc. I will be very glad to go into this matter in detail with any of the Directors, particularly interested.

May 7th, 1928.

MEMORANDUM

Aviation Corporation of America, a Delaware Corporation, was incorporated in May, 1927.

FINANCIAL STRUCTURE

The authorized capital stock of the Company consists of twenty thousand (20,000) shares of non-voting Convertible 7% Preferred Stock of the par value of $100. per share, fully paid and non-assessable, convertible to Common Stock on or before December 31st, 1929, on the basis of two shares of Common Stock for each share of Preferred.

Sixty Thousand (60,000) shares of Common Stock, without nominal or par value. (40,000 shares reserved for the sole purpose of conversion into Preferred Stock).

One Thousand (1,000) shares of Management Stock.

The Management Stock is entitled to share equally, as a class, with the Common on any dividends applicable to the Common.

The Management Stock is also entitled to twenty (20) votes.

The Management Stock has been distributed amongst the eleven original incorporators, in lieu of salary or other

compensation; even legal expenses incidental to the organization and developing the Company having been paid in Management Stock.

PURPOSES OF THE CORPORATION.

1. To supply a proportion (or in some instances, all) of the capital required to finance or refinance any lines or operations the Corporation considers it advisable to develop.

2. To supply the management for the line or operation, taking in return a property equity in the Common Stock of each Company so set up or taken over, and, in addition, a percentage of the gross revenue as compensation for management supplied.

[fol. 2415] 3. To conduct surveys or studies into the Commercial Aviation Field, and submit reports thereon, for its own account and/or on contract for outside interests.

HISTORY TO DATE

While essentially a Holding and Investment Company, Aviation Corporation of America has already organized and set up two operations, for which a fee has been charged, as follows:

1. Chesapeake Aircraft Company—operating a fixed base service in Baltimore.

2. Atlantic, Gulf & Caribbean Airways, Inc.

In organizing the latter Company, a cash fee of $7,400.00 was earned, in addition to a bonus of 1,750 shares of stock of the total 80,000 shares outstanding.

The first and only investment of Aviation Corporation of America, was the purchase, at $5.70 per share, of 39,000 shares of the Capital Stock of this Company (Atlantic, Gulf & Caribbean Airways, Inc.), bringing its total holdings up to 40,750 shares.

Atlantic, Gulf & Caribbean Airways, Inc., owns the total authorized and outstanding stock of Pan American Airways, Inc. (2,000 shares).

Pan American Airways, Inc. has been operating, under contract with the United States and Cuban Governments, an Air Service between Key West, Florida and Havana, Cuba: A brief summary of operating results, by months, of the Key West—Havana Division, is as follows:

MAIL CARRIED

November	20,373 lbs.	
December	28,005 "	
January	25,076 "	
February	24,512 "	
March	30,982 "	
April	31,695 "	160,543 lbs.

[fol. 2416] PASSENGERS CARRIED

January	71*	
February	220	
March	148	
April	77	516**

Net income before interest, but after depreciation on Hangars, Passenger Stations, Automobiles, Trucks, Flying Equipment, Furniture and Fixture, and Shop Tools and Equipment, and after amortization of Airport, over a five-year period, and after full insurance reserves, by months, is as follows:

November	loss	$1,448.35
December	profit	472.92
January	"	797.05
February	"	4,056.75
March	"	6,027.40
April (figures not yet available)		

During April, the revenue from the transportation of mail and passengers has continued to increase, indicating

* Service was not inaugurated until January 16th.

** Does not include employees and passengers carried free.

a net profit for the month, after all proper charges, as set forth above, of approximately $7,100.00.

Working in close cooperation with the United States Government, this Company expects to materially extend the present section now in operation, the Northern Terminal also being moved from Key West to Miami, where a connection will be made with the United States Internal Air Mail Service.

Aviation Corporation of America is offering additional stock, up to $1,800,000. with which to finance these proposed extensions.

Already there has been paid in, or firmly subscribed, contingent to the securing of subscriptions in the amount of $1,000,000., the sum of $750,000.; $50,000. has been requested by Pittsburgh interests, who have been assisting the Company in its development program, leaving an unsubscribed amount of $1,000,000.

[fol. 2417] It is proposed to form a Syndicate of four or five individuals or banking houses, to subscribe or underwrite this remaining One Million Dollars, on a basis of one share of Preferred for cash, at par each subscriber to receive a bonus of one share of Common with each share of Preferred.—the basis on which the $750,000. described above has been subscribed.

As an inducement to the underwriters of this Million Dollars, it is proposed that the Company extend to them an option, for a period of eighteen months from date, to supply, on a similar basis, an additional million Dollars—if required.

Should this, or some similar plan, be carried out, the Company would, of course, increase its authorized capital to provide the additional stock required.

[fol. 2418]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 93

No. 71

Ministry of Government & Police

Lima, May 29, 1928

The Huff Daland Dusters, Inc.

On May 28 the following Supreme Resolution was issued.

In view of the petition presented by the Huff Daland Dusters Inc. which Company was incorporated in the State of Louisiana, United States of America, to establish an air service between Peru and the United States under the conditions it outlined; and in view of the reports issued and considering the proposal convenient, it is hereby resolved to grant permission for the establishment of said air service under the following conditions:

1. This service to include the air transportation of mail, cargo and passengers.
2. The service shall commence at the earliest possible date which shall not be later than one year from the date of this resolution.
3. The Company will have full freedom in the selection of its employees and pilots who will be subject to all of the obligations imposed by law for the residents of the Republic, and that the Company shall agree to use the largest possible number of employees of Peruvian nationality, bearing in mind the class of service which it is required to render in accordance with this Resolution.
4. The Company waives all rights to diplomatic intervention and all differences which may arise under this agreement shall be dealt with by the courts of the Republic.
5. Authorization is granted for the landing of the Company's aircraft at any airport of the State.

[fol. 2419]

6. The Company agrees to cover by insurance all risks in connection with the aircraft, mail, passengers and cargo.

7. The postal service shall be established by the Company in mutual agreement with the Post Office Department of Peru.

8. It is understood tariffs and other necessary conditions in connection with this service shall be approved by the Government, and that the official correspondence shall be carried free of charge, which mail will receive preferential treatment for transportation.

9. In the event of serious internal disturbances, epidemics, or any other public calamity, the aircraft supplies and personnel of the Company will be placed at the disposition of the Government free of charge.

10. In the event of internal war aircraft and supplies of the Company will become the property of the State.

11. The Company shall at an early date submit its articles of incorporation.

12. The Company is required to deposit with the "Caja de Depositos y Consignaciones" within ten days from this date, the sum of One Thousand Peruvian Pounds (1,000 Peruvian pounds) as a guarantee for the fulfullment of its obligations.

13. The Company in view of the nature of the services it is required to perform, will receive preference in clearances over land transportation companies, in the customs houses, post offices and immigration departments of the Republic.

14. Any conditions which may not be covered by this Resolution will be contemplated separately.

To be registered, communicated, and filed.
Seal of the President of the Republic.

AERIAL MAIL TRANSPORT
THE GENERAL ADMINISTRATION OF
POSTS AND TELEGRAPHS OF PERU

—and—

THE HUFF DALAND DUSTERS, INC.

In Lima, on the twenty-seventh day of the month of June, in the year nineteen hundred and twenty-eight, in the presence of myself, the Notary Public, and in the presence of the witnesses, Messrs. Francisco A. Esquerre V. and Pedro José Gonzales Cueva, the following parties did appear before me, to wit: of the one part, Mister Walter Frederick Ford, a national of Great Britain, and a resident at this Capital, who acts and proceeds in his official and legal capacity of General Administrator of Posts and Telegraphs of Peru and properly authorized therefor as vouched by the testimonials hereinto inserted; and of the other part, Mister Collet E. Woolman, a citizen of the United States of North America, married, and a resident in the State of Louisiana, United States of North America, and at the present a transient resident of this city, acting and proceeding in the name and on behalf of the Huff Daland Dusters, Inc.—a Stock Company incorporated in the territory and under the Laws of the State of Louisiana, United States of North America—acting in his legal capacity and official character as Vice-President of the aforesaid Company, in accordance with, and as shown in, the Power of Attorney and voucher of legal authority, both of which are also inserted hereinto; the two aforementioned parties appearing hereunder are of age, with the proper legal capacity to covenant, intelligent and conversant with the

Spanish language in testimony whereof I hereby give faith; and I moreover do vouch for the fact that both the aforementioned parties hereto have complied with and fulfilled the clauses set forth in Articles thirty-eight to forty-one, [fol. 2421] inclusive, of the Law appertaining to Public Notaryship, and, moreover, that they did hand me the first draft minute of the following with a view to having the contents thereof extended in the legal form of a Public Deed, the same which is hereunder set forth and contained and which is recorded in its respective file under No. 680 and of which I have had the aforesaid contracting parties take cognizance of, also making the same known to the legal and executive witnesses hereof.

MINUTE: Mister Notary: Please extend in your register of Public Deeds, one for the transportation of aerial mail within, and outside the territorial boundaries of the Republic, entered into by, and covenanted between the General Administration of Posts and Telegraphs of Peru, represented by their General Administrator, Mister Walter Frederick Ford and the Huff Daland Dusters, Inc., a Stock Company of the State of Louisiana, United States of North America, and hereinafter to be referred as "Huff Daland", same being represented in this Deed by its Vice President, Mister C. E. Woolman—in the following terms:

FIRST:—The purpose and object of this Contract is the aerial transportation of mail and other postal matter, the same which shall be effected by the "Huff Daland" in their airplanes along the coastwise line of Peru and outside the boundaries of the national territory, under the terms and conditions hereinafter set forth.

SECOND:—The term of existence of this Contract shall be five years, said term to start from the date whereon the first mail flight shall be made along the aerial route operated and served by the aforesaid Company, it being well understood that the "Huff Daland" undertake to commence the regular service at the quickest possible date; the period of time to elapse previous to its initiation not to exceed one year, commencing from the twenty-eighth day of May, of the year nineteen hundred and twenty-eight. Always pro-

[fol. 2422] vided that the "Huff-Daland" shall have complied with the proper fulfillment of these obligations hereunder assumed, the General Administration of Posts and Telegraphs of Peru will acknowledge and recognize in favor of the aforesaid "Huff-Daland" the legal right to renew this Contract for a fresh term of equal duration (or, in other words, for an additional five years), it being sufficient for the accomplishment of said purpose, that the "Huff Daland", within the period of the seven months immediately preceding the date of expiration of the first period aforesaid, give due notice in writing to the General Administration of Posts and Telegraphs of its decision, in a notarial letter legally witnessed and registered.

THIRD:—The first aerial route to be operated and served by the "Huff Daland" is the Lima-Paita or Lima-Talara Line, including stop-overs along the route in the territories of the Departments of La Libertad and Lambayeque, by way of round trips affected weekly in such a manner and form as to enable the airplanes to catch up with the regular passenger steamers at the Ports of Paita and Talara, plying their traffic between the terminal ports of Callao and New York, and which vessels after sailing from Callao are proceeding en route bound for their port of destination. This said service is to be inaugurated and established within the term of the first year.

In the course of the second year the coastwise service—along the Peruvian maritime territory or seaboard shall be inaugurated and established between the ports of Callao and Mollendo, in such a way as to enable the airplanes to catch up with and reach the steamers of the regular lines at the port of Mollendo, Southern Peru, which said vessels, after having sailed from the port of Callao bound for ports located to the southward of Mollendo, will touch at en route, as per schedule properly arranged. The frequency of these aforesaid services and which is to be based on a minimum fixed and covenanted hereunder, will be left to the discretion [fol. 2423] and judgment of the "Huff Daland", but it is understood that as soon as the said schedule shall have been established in a permanent form, the aforesaid Huff Daland will constitute under the terms of this Contract,

ordinary services, subject to the conditions and terms hereunder to be determined.

FOURTH:—The services rendered by the "Huff-Daland" in accordance with the terms and conditions hereunder and hereinafter set-forth, shall be remunerated in the following manner, to wit: The aforesaid "Huff Daland" to receive as premium for the aerial mail and postal transportation the charge or rate-payment, same which has been proposed by the General Administration of Posts and Telegraphs of Peru, and which said rate or charge has been accepted and is hereunder accepted by the "Huff-Daland", to wit: Fifty cents of one Sol for every twenty grams (avoirdupois) of net weight of mail or postal matter. This toll shall rule, while the terms of the present Contract remain in force, but it is understood that, if in the course of any determined year the receipt of the aforesaid toll or rate should fail to cover the cost of the aforementioned aerial transportation (the said cost to comprise, not only the direct expenses incurred, but, moreover, the administration expenditures involved, as also the general expenses, miscellaneous and other indirect outlay), the General Administration of Posts and Telegraphs, shall undertake the revision of the aforesaid rate or tariff, prior to the examination and audit of the financial statements and balance sheet, accountancy vouchers and other proper testimonials which shall be submitted for the purpose thereof, to the General Administration of Posts and Telegraphs of Peru, in such a manner as be deemed proper and suitable, as to permit the new and revised tariff or toll to yield to the "Huff Daland" an annual amount sufficient to cover and reimburse the aforesaid costs, and, moreover, to enable a liquidation with a net gain or profit of not less than (10%) ten per cent on the [fol. 2424] capital in cash, which it has invested in the aerial mail and postal service of Peru. But it must be understood always, that the amount paid by the General Administration of Posts and Telegraphs of Peru to the "Huff Daland", for the aerial transportation of every twenty grams, of net weight of mail must be equal to the price charged to the public for the forwarding by aerial mail of a letter weighing twenty grams, net. If, on any of the occasions or at any

time whatever, whereon the tariff revision hereinabove stipulated should take place, and notwithstanding the readjustment effected, the "Huff Daland" should continue to lose money during six consecutive months—either on a determined route or service, or on all the aerial services or routes—the aforesaid Company will be entitled to rescind this Contract, be it either with regard to the route which causes the aforementioned loss, or in total, in case that the aforesaid losses should extend to all the aerial services or routes, the aforesaid "Huff Daland" to give notice of the said rescission six months in anticipation to the General Administration of Posts and Telegraphs of Peru, in writing and by addressing a notarial letter to the latter. In this latter case, on the expiration of the aforesaid notice, the aforesaid "Huff Daland" will be free of all liability or obligation derived herefrom and will furthermore be at liberty to remove all elements of work, installations and so forth of its property and ownership.

FIFTH:—The "Huff Daland" will be entitled to intervene in the verification of the weight of all mail or other postal matter to be transported by air and subject to its previous conformity the respective liquidation and payments will be effected, the same to take place monthly.

SIXTH:—It is understood that when the "Huff Daland", during the period wherein the terms of this Contract will be in force, shall implant and establish the aerial trans- [fol. 2425] portation services, with fixed schedules from and to the Republic with countries abroad, the General Administration of Posts and Telegraphs, shall use the said services, surrendering to the "Huff Daland" all the mail and postal matter to be transported by air and which same shall be available, and which it shall be practicable and feasible to forward over the aforesaid aerial routes.

The said service shall be subjected to the tariffs and tolls, which same shall have been fixed by common agreement between the General Administration of Posts and Telegraphs of Peru and the "Huff Daland".

SEVENTH:—The transportation of mail and other postal matter shall be effected in accordance with the dispositions,

rules and conventions actually in force, the "Huff Daland" to assume the full responsibility of the mail and other postal matter delivered to them for transportation and delivery. The "Huff Daland" undertakes to pay the indemnities which may arise or be derived, in accordance or compliance with the terms of the Universal Postal Convention.

EIGHTH: The General Administration of Posts and Telegraphs shall be entitled to forward by the airplanes of the "Huff Daland" the official mail, up to a maximum weight of two Kilos for each aerial trip, without constituting thereby any liability or obligation whatsoever on the part of, or on behalf of the State.

NINTH: The "Huff Daland" shall not transport, neither shall it be entitled to transport any mail or postal matter whatsoever, which shall not have been despatched or cleared by the General Post Office, with the exception of the "Huff Daland's" own official mail, which refers to matters of the service proper.

TENTH: Each and every shipment of Peruvian Mail to be effected by the "Huff Daland" per aerial mail transportation shall be accompanied by a way-bill or "bill of lading", stating the total weight of the mail delivered to the afore- [fol. 2426] said Company and also the amount payable to the aforesaid "Huff Daland", calculated in conformity with the terms set forth and stipulated in Article Four hereof. The amounts consigned in these way-bills shall be added monthly and the total sum thereof shall be paid immediately and at once to the "Huff Daland", in accordance with the terms set forth in Article Five hereinabove.

ELEVENTH: The "Huff Daland" pledges to undertake and effect each aerial trip between Lima and Paita, or between Lima and Talara with a duration of time not to exceed twelve hours, except in the cases provided in the following clause, hereinafter set forth.

TWELFTH:—The "Huff Daland" shall comply with and fulfill all the terms, periods of time, schedules and obligations whereof are defined hereunder, except in the case of unavoidable and fortuitous delays, properly and duly justi-

fied and explained; likewise cases and circumstances of "force majeure", strikes, lock-outs, acts of war, blockades, accident, etc., and each and every other cause whatsoever, outside the province of its control.

THIRTEENTH:—In order to ensure the compliance with, and for the purpose of obtaining all and the entire effects of the present Contract, the contracting parties indicate as their place of residence this Capital, it being understood that the "Huff Daland" pledge themselves to fulfill the stipulations set forth in Article Twenty-one, paragraph eleven of the Code of Commerce.

FOURTEENTH:—Any question which may arise between both contracting parties shall necessarily be submitted to the decision or rulings of judges, arbitrators, to be designated, one by each of the contracting parties, and the same to be duly authorized to designate a third arbitrator in case of non-agreement or controversy between them. The said designation shall be made by them after having taken the oath of office and previous to their assuming their functions, which said stipulation, together with the resignation of each and every judicial or extrajudicial proceeding or [fol. 2427] document or legal action against the agreed and approved Award of both the arbitrators or of the judge, shall be duly consigned in the Deed of Compromise which shall be extended, when occasion arises.

FIFTEENTH:—The Supreme Resolutions issued in the administrative proceedings taken by the "Huff Daland" in order to obtain the Government's authority for the establishment of this aerial mail service, form a part as a whole of the present Contract.

Mister Notary, you will please add the required clauses of law; and likewise insert the Suprem Resolutions whereto Clause Fifteen of the present Contract refers and you will kindly forward the respective testimonials and other legal documents to the Mercantile Register of this city.

Lima, on the fourteenth day of June, in the year nineteen hundred and twenty-eight.—W. F. Ford.—C. E. Woolman.

Note extracted from the Minute. No impost or tax will be

charged. Lima, twenty-seventh of June, nineteen hundred and twenty-eight.

For the Company charged with the Administration of Revenue, Stock Company.—T. Zapata B., Chief of the Department.—A seal is affixed.

Inserted—Supreme Resolution.—In Lima, on the twenty-eighth of May, in the year nineteen hundred and twenty-eight.

"Whereas, the application submitted by the Stock Company of the State of Louisiana, in the territory of the United States of North America, "The Huff Daland Dusters, Inc." requests authority for the establishment and operation of an aerial mail service between Peru and the United States of America under the terms and conditions therein set forth and specified; Taking into consideration the reports issued and judging the proposition suitable:

It is Resolved: To grant authorization for the establishment of the said aerial mail service, under the following conditions:

FIRST:—The said service shall comprise the aerial transportation of mail freight and passengers.

[fol. 2428] SECOND.—The aforesaid service shall commence at the shortest possible date, the period to elapse previous to its initiation not to exceed one year, starting from the date of this Resolution.

THIRD:—The Company shall be at liberty to select its employees and airmen, the latter to be subjected to all the obligations imposed by the Laws to the inhabitants of the Republic, the Company, however, undertaking to utilize the services of the great majority of its personnel composed of nationals of Peru, taking into consideration the kind of services which it pledges itself to render, in accordance with the terms of this Resolution.

FOURTH:—The Company resigns and foregoes the privilege or right to appeal to all and to any kind of diplomatic intervention or interference, and the controversies or dif-

ferences which might later arise to be settled in the Tribunals of the Republic.

FIFTH:—The Company is hereby authorized to have its airplanes land in any airfield whatsoever of the State.

SIXTH:—The Company pledges itself to undertake the service of Life Insurance and Insurance against accidents, by taking out policies of Insurance covering every and all risks to which are subject the airplanes, the mail, passengers and freight.

SEVENTH:—The aerial mail and postal service shall be established by the Company, the latter to proceed in common agreement with the General Administration of Posts and Telegraphs and Radio of Peru.

EIGHTH:—It is hereby understood that the tariffs or rates and other conditions necessary for the carrying out of the aforesaid service will require the Government's approval, it being furthermore understood hereunder, that all official mail and postal matter will be transported and delivered, free of all charge, and moreover that the Company at all times, and under all and any circumstance or circumstances whatever, undertakes to grant to the latter [fol. 2429] full priority and preference with regard to the transportation and delivery thereof.

NINTH:—In the case of serious public and domestic disturbances or disorders, or in the case of any other national calamity whatever, the airplanes, elements, accessories of the Company's property, likewise the Company's personnel or employees, shall be placed entirely at the Government's disposal, free of charge.

TENTH:—In the case of international war, the airplanes and all other material of the Company's property, shall be taken over by the State, and considered as the latter's property.

ELEVENTH:—The Company does hereby pledge itself to present or submit from time to time as required, or whenever required, the Deed of its legal constitution or of its mercantile incorporation as a Company.

TWELFTH:- The Company hereby agrees and does pledge itself to deposit in the Caja de Depósitos y Consignaciones, within the term of ten days, commencing from this present date, a sum of Lp.1,000.—(One Thousand Peruvian pounds) in cash, as a pledge or guarantee for the fulfillment of all its obligations or liabilities assumed hereunder.

THIRTEENTH:—The Company, by merit of its character and by reason of the nature of those services whereof it undertakes to render to the State and public, will enjoy full priority and preference over every and all other Companies of land transportation, with regard to clearance by the Custom House, Postal and Public Health Departments of the Republic.

FOURTEENTH:- The conditions which are not comprised within the terms of the present Resolution, shall be contemplated separately. Let the above be registered and duly make known and recorded in the official archives.—Initialed by the President of the Republic. Signed: Rubio. Further.—*Supreme Resolution.* Lima, on the fourth of June; in the year nineteen hundred and twenty-eight:

[fol. 2430] Following the reading and consideration of the Contract covenanted between the General Administration of Posts and Telegraphs of the Republic and the Huff Daland Dusters, Inc., for the aerial transportation of mail and other postal matter, by merit or the authority granted in provisos seven and eight contained in the Supreme Resolution issued on the twenty-eighth day of last May, whereby the service of aerial transportation of mail passengers and freight established between Peru and the United States of North America, and having been duly set forth and contemplated in the aforesaid Contract the precise needs required for the safe and secure transportation of the mails and other postal matter.—It is resolved:

To approve the Contract covenanted between the General Administration of Posts and Telegraphs of Peru and the Huff Daland Dusters, Inc., for the aerial transportation of the mails and postal matter, consisting of fifteen clauses, the text whereof shall be added to the present Resolution.

as soon as the Contract referred to shall have been extended and recorded in the form of a Public Deed.—Let the above be registered. Initialed by the President of the Republic.—Signed: Rubio.

Power of Attorney.—Authorized translation.—Let it be known unto all by these presents, that the undersigned, the Huff Daland Dusters, Inc., which is a Corporation organized and carrying on business in accordance with, and under the Laws of the State of Delaware, United States of North America, and having their principal place of business or head office located in Monroe, State of Louisiana, United States of North America, does make, constitute and appoint Collet E. Woolman really and entirely their legal representative, in order that the aforesaid representative may, on their behalf and in their name, and likewise for their account and in their own representation covenant a [fol. 2431] contract with the Republic of Peru, or with the citizens thereof, or with any person or persons, firm or firms, association or corporation, residing, located or duly qualified in the aforesaid Republic of Peru, for the sale of, and in connection with the sale of airplanes, spare parts, accessories and aerial equipment, concessions for aerial mail transportation (both with regard to the transport of passengers and express or freight, and also dusting by airplanes, subject to the approval by the Head Office of the Huff Daland Dusters, Inc.

In Testimony Whereof, the undersigned did execute and seal this testimonial of Power of Attorney on this, the thirteenth day of February, of the year nineteen hundred and twenty-eight.

Huff Daland Dusters, Inc., per p.Edgard N. Gott, President; witnessed by L. W. Townend, Treasurer.—Signatures. The corporate seal of the Company.

State of Pennsylvania, Bucks County.

On the thirteenth day of February, in the year nineteen hundred and twenty-eight of our Lord, in my presence, the undersigned Notary Public, properly commissioned by the State of Pennsylvania, residing in Bristol in Bucks County,

Pennsylvania, did appear Edgard N. Gott, President of the Huff Daland Dusters, Inc., and having been duly sworn, he did state and declare that the seal fixed on the attached document is the official seal or the corporate seal of the aforesaid Corporation and that the said seal was properly affixed thereto, and also stated that the aforesaid document was handed in by Edgard N. Gott, the President of the aforementioned Corporation, in the character of, and actually being an act of the said Corporation, and also that the names of Edgard N. Gott, President, and of L. W. Townsend, the Treasurer, both of whom signed the said document, in testimony of its proper execution and consequent delivery, are really and truly of their respective hand and writing. Edgard N. Gott, President.—Signature.

[fol. 2432] Sworn and signed by me on the day and in the year aforementioned. M. Adelia Wright. Notary Public, his signature and notarial seal. State of Pennsylvania.—Bucks County.—Signature and seal.

I, the undersigned, William R. Yardley, Proto Notary of the County of Bucks, and also Secretary of the Court for the aforesaid County, the said Court being a Court of Registry, the decrees and laws of which are attested to by a seal,—hereby declare and certify that M. Adelia Wright, in whose presence the foregoing testimony was taken and heard, and who signs his name in the certificate of proof or testimonial, in acknowledgment of the attached instrument's legality, is really and truly a Notary Public duly authorized to act in the, and on behalf of, the aforementioned County, and who resides therein; I do, moreover, state and certify that the aforesaid Notary has been duly and properly commissioned and sworn by the Laws of the said State of Pennsylvania, in order to enable him to take, receive and certify the legality of affidavits and also the acknowledgment and legal recognition of testimonies, proofs and deeds appertaining to Contracts or Covenants, transfers or legacies, legal bequests and other legal instruments which have to be registered and filed in the aforesaid State, and I furthermore say and declare that I am properly convinced that the handwriting therein contained is really and truly that of the aforementioned Notary Public and

that I really believe that the signature affixed at the foot of the referred certificate of proof and testimony or acknowledgment, is genuine.

In testimony whereof, I herein sign with my own handwriting and do stamp same with the official seal in Doylestown, Bucks County, State of Pennsylvania, on this twentieth day of February, in the year of our Lord, Nineteen hundred and twenty-eight.

William R. Yardley, Secretary of the County Court.

Signature of the undersigned and County seal.

Consulate of Peru in Philadelphia.—The undersigned Con-[fol. 2433] sul of Peru hereby certifies: That Mister William E. Yardley, who authorizes the attached document, did legally exercise on the date therein set forth, the functions and duties of Proto-Notary of Doylestown, Bucks County, State of Pennsylvania, and did in the aforesaid capacity authorize the said Power issued by Messrs. Huff Daland Dusters, Incorporated, of Bristol, in favour of Mr. Collet E. Woolman, of Monroe, in order that the latter may represent them in Peru, and I moreover certify that the signature and the seal which appear in the aforesaid document as their own, are really and truly those that they accustom to use in their official acts and deeds.

In testimony whereof, the undersigned Consul of Peru extends the present certification, under the Consular Seal of the Peruvian Republic, in the City of Philadelphia, on this first day of March, in the year of our Lord, nineteen hundred and twenty-eight. Signed: Enrique Marniott.—Consul General to Peru. The Consular Seal.

Order Number, one hundred and eighty; Tariff Number, forty-nine; taxes and fees charged, two dollars, U. S. cy. A Peruvian stamp of the Consular service, of the value of two sols, duly cancelled with the Seal of the Consulate General.

The foregoing is a true and faithful translation of its original text. Lima, March twenty-third of the year nineteen hundred and twenty-eight.—Signed: Carlos Solari.—Interpreter of the State.—Authorized translation.

On a printed form-blank of those used by the "West Coast Cables Company of America". Office of Origin being Bristol, Penn.—Number of words: forty-one.—Date: Twenty-third.—Weekly cable letter. Forwarded and addressed to Hudadus.—Lima.—We hereby confirm that we authorize you to sign in our name and behalf in conformity with the Power of representation extended on the thirteenth day of February, the Contract for aerial mail with Marconi and rights for dusting to be covenanted with the Govern- [fol. 2434] ment of Peru.—Huff Daland Duster.—Gott, President.—Auerbach, Secretary.—The foregoing is a faithful translation. Lima, twenty-fifth of June, in the year nineteen hundred and twenty-eight.—Carlos Solari.—Interpreter of the State.

An official seal of Translations.

CONCLUSION.—Following the legalization of the foregoing instrument, I instructed the makers of the deed of its object and purpose by reading to them and in their presence the whole of the text therein set forth, and with the full attendance of all the aforesaid witnesses, following upon which they, one and all, did ratify the contents thereof, of which I give faith, and the aforesaid witnesses and makers of the deed, did sign, as follows:—W. F. Ford.—C. E. Woolman.—F. A. Esquerre V.—Agustin Rivero, Notary.

Marginal Observation.

A first testimony was extended and issued on the twenty-eighth of June of nineteen hundred and twenty-eight, upon request of the interested parties.

ANOTHER MARGINAL OBSERVATION.

A second testimony was extended and issued on the thirtieth of June of nineteen hundred and twenty-eight, by request of interested parties.

A FURTHER MARGINAL OBSERVATION.

A third testimony was extended and issued on the second day of July of nineteen hundred and twenty-eight, by request of an interested party.

This fourth testimony is in full accord and agreement with the original Deed to which it bears reference and which is contained on folio four thousand three hundred and eleven overleaf, of my current Register of Public Deeds, corresponding to the present two-year period of nineteen hundred and twenty-seven and nineteen hundred and twenty-eight. And upon request of an interested party, I extend and issue [fol. 2435] same, the text whereof is set forth on seventeen useful leaves, the same which, previously and properly confronted and corrected in conformity with the decrees of Law, I initial, sign, mark and seal in Lima, on the twenty-ninth day of the month of September, in the year of our Lord nineteen hundred and twenty-eight. Taxes: One Sol the first sheet and forty cents of a Sol for each of the following sheets.

Between lines: Postal-signed.

Agustin Rivero.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 95

ADVERTISEMENT FOR FOREIGN AIR MAIL SERVICE

POST OFFICE DEPARTMENT

Washington, D.C., May 31, 1928.

Sealed proposals will be received at the Office of the Second Assistant Postmaster General until 12:00 o'clock noon July 2, 1928, for carrying United States mail by air for a term of ten years to begin not later than six months after

award of contract on the following described route by a schedule satisfactory to the Postmaster General of not less than eighty miles per hour in safe and suitable aircraft:

> From Key West, Florida, (or such other point in the United States as may be designated by the Post Office Department) by Havana, Cuba, Merida, Mexico, Belizo, British Honduras, Tegucigalpa, Republic of Honduras, Managua, Nicaragua, San Jose, Costa Rica, (or such other points in these countries as may be acceptable to their Governments) to Cristobal, Canal Zone, and from Cristobal, Canal Zone, to Key West, Florida, (or such other point as may be designated) 7 times a week. On the return trip from the Canal Zone payment will be based on the direct distance from Cristobal to Key West or such other point in the United States as may be designated. The Postmaster General reserves the right to include Guatemala and Salvador in this route if it should be desired at a later date, stops to be made at such cities in these countries as may be acceptable to their Governments.

The Post Office Department may require three-motored planes or such other requirement as may be necessary on this route. The maximum mail load required shall not exceed 800 pounds per trip.

The Department also reserves the right to increase or decrease the number of intermediate stops, or the number of trips per week, and to change the termini of the route, to despatch mail on any plane of the contractor flown over the route, and to modify or change the schedule as the needs of the service require. Approximate mileage subject to correction, 1,640 miles. Bond required with bid $25,000.00.

Service on this route may be extended at the option of the Post Office Department from Cristobal, Canal Zone, by Cartagena, Colombia, Maracaibo, Venezuela, Curacao, D. W. I., La Guaira (Puerto Caracas), Venezuela, Port of Spain, Trinidad, Georgetown, British Guiana, to Paramaribo, Dutch Guiana (Surinam), 3 times a week, one way.

INSTRUCTIONS AND INFORMATION FOR BIDDERS.

Proposals submitted in response to this advertisement will be subject to the Postal Laws and Regulations and to the conditions and requirements set forth in the instructions to bidders, copies of which, together with blank forms of proposal and accompanying bond, can be obtained from the Second Assistant Postmaster General, Division of Foreign [fol. 2437] Mails, Washington, D. C., or from the Postmaster at the office where this circular is posted.

The Act of March 8, 1928, under which authority this advertisement is issued, states the rate to be paid for this service shall not exceed two dollars ($2.00) per mile. No bid, therefore, will be accepted at a sum greater than this maximum rate established by law.

Decision as to award of contract will be made as soon as practicable after July 2, 1928, and the accepted bidder will be required to execute the formal contract prescribed by the Department covering service advertised with good and sufficient sureties acceptable to the Postmaster General, and file such contract within thirty days from date of acceptance of the proposal. The Postmaster General reserves the right to reject any and all bids.

The contractor will be required to receive and deliver mails at each post office on the route.

The contract may be terminated by Congress, or by the Postmaster General whenever, in his judgment, the interests of the Postal Service shall so require, in which latter event the contractor shall be allowed as full indemnity one month's extra pay, provided such termination is not due to delinquency on part of contractor or his agents.

Bidders should state the number of planes it is proposed to provide for carrying the mails on the route (including the number in reserve for each plane in the air); description of planes, showing speed, cruising radius, number of motors and horse-power thereof.

Bidders and their sureties are urged to acquaint themselves fully with the laws of Congress relating to contracts for carrying the mails (the more important provisions of

which are cited herein) and to familiarize themselves with requirements set forth in this advertisement and with the service to be performed, before they assume any liability as bidders or sureties, so as to prevent misapprehension or cause of complaint thereafter.

Bidders on this route should be familiar with the flying over such a course and be prepared, if award of contract is made, to handle such type of service.

The contractor must make his own arrangements for landing fields, lighthouses, radio stations and such other aids to navigation as may be necessary for the proper performance of the service.

The number of trips per day or week may be increased or decreased, if the needs of the service demand.

All proposals must be in the form prescribed by the Department and accompanied by a bond, in the sum above stated, with two or more individual sureties approved by a postmaster of the first, second or third class, which bond must be acceptable to the Postmaster General, such sureties to be shown to be owners of real estate valued above all encumbrances at an amount double the amount of the bond required; or a surety company which has complied with the provisions of the acts approved August 13, 1894, and March 23, 1910. A list of such surety companies may be found on Page 55 of the Official Postal Guide for July, 1927, a copy of which is furnished each postmaster.

[fol. 2438] If the accepted bidder fails to file a properly executed formal contract for the service in the Department within thirty days from the date of acceptance of the bid, or having executed the contract fails to provide the service required, he may be declared a failing bidder or contractor and proceedings taken according to law.

Mail compartments in all planes to be made fireproof to the satisfaction of the Post Office Department.

The contract for the service shall contain the following covenant:

The contractor expressly warrants that he has employed no third person to solicit or obtain this contract in his behalf, or to cause or to procure the same to be obtained upon compensation in any way contingent, in whole or in part, upon such procurement; and that he has not paid, or promised or agreed to pay to any third person, on consideration of such procurement, or in compensation for services in connection therewith, any brokerage, commission or percentage; and that all money payable to him hereunder is free from obligation to any other person for services rendered, or supposed to have been rendered, in the procurement of this contract. He further agrees that any breach of this warranty shall constitute adequate cause for the annulment of this contract by the United States, and that the United States may retain to its own use from any sums due or to become due thereunder an amount equal to any brokerage, commission or percentage so paid, or agreed to be paid.

No compensation will be allowed for trips not performed. However, pro rata pay will be allowed for the airline distance between stated points on the route traversed in a partially completed trip, if no delay in the mails over train or boat service has resulted.

Deductions from pay will be made for suffering the mails to become wet, injured or destroyed; or when a grade of service is rendered inferior to that stipulated in the contract; and for the loss of or depredation upon the mails in the custody of the contractor or his agent, provided the loss is occasioned by their fault.

The Postmaster General may annul the contract or impose forfeitures, in his discretion, for repeated failures or for failure to perform service according to contract; for violating the Postal Laws and Regulations; for disobeying instructions of the Post Office Department; for subletting service without the consent of the Postmaster General, or assigning or transferring the contract; for combining to prevent others from bidding for the performance of postal service, and such annulment shall not impair the right of the Department to claim damages from the contractor and his sureties.

Assignments of contracts or of interests in contracts are forbidden by law, and consequently cannot be allowed. Neither can bids nor interest in bids be transferred or assigned to other parties. Bidders will therefore take notice that they will be expected to provide the service awarded to them through the whole contract term.

Contractors under this advertisement may be permitted to sublet service to acceptable persons, by permission of the Postmaster General, at not less than the contract rate of pay.

When a bid is signed by an incorporated company, it should be accompanied by evidence of the authority of the person signing the bid so to sign on behalf of the company. Such evidence may be a certified copy of the proceedings pursuant to which the person was elected or appointed an officer or agent of the company and that part of the by-laws showing his authority as such officer or agent to sign the [fol. 2439] bid; or a certified copy of a resolution of the board of directors or stockholders conferring such authority upon him.

Bids should be for service as stated in the advertisement.

A proposal altered in any of its essential terms cannot be considered in competition with bids submitted in proper form.

Bids should be forwarded in time to reach the officer of the Second Assistant Postmaster General not later than 12 o'clock noon, July 2, 1928. Bids received after that time will not be considered in competition with bids received within the prescribed time.

Bids should be sent in *sealed envelopes, superscribed "Inplane Proposal"* and addressed to the "Second Assistant Postmaster General, Post Office Department, Washington, D. C."

HARRY S. NEW,
Postmaster General.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 96

(COPY)

Lima, Peru,
June 7th, 1928.

Dear H. & L.:—

Well as I wrote you last week we got the permit signed and tried to get Ford of Marconi to sign a provisional contract previously to the signature being affixed but were not successful in this so drew up a contract which we presented as soon as the permit was signed. This was accepted by him as we had already worked out the details of it. He submitted it to their attorneys and then drew it up as a supreme resolution which went to the Minister to be presented for the signature of the President. We had limited the free gov. mail to one Kilo but the Min. held out for two Klos. We then had to redraw it but had it back in the Minister's hands Friday and asked that it be sent at once to the Pres. You see the Ger. and Fawcetts permits were to be signed Monday so speed was necessary.

The Pres. had several functions Sat. so it could not be sent but last night we went to see the Min. and had his promise that it (the contract) would be signed at the acquerdo Monday night and that he would call me and tell me when it was done. Well I sat by the phone and about 10 P.M. I got the call and they had not had the Acquerdo with the Pres. but that it should be signed today. Well maybe it will be.

If we succeed in getting the contract signed at this meeting we will be closed with Marconi on the same day that the Ger. and Fawcett get their permission to contract if they can. But as the contract is drawn there is little left to contract and we have the right to take over any line they present at the same figure they offer or under the same conditions. This refers to lines other than the coast wise lines mentioned in our contract. Unless the Pres. balks at this we will have virtually the exclusive air mail of Peru.

I wrote you that the Germans were in Equador, and also sent you a wire to this effect. I hope you have taken the proper steps to have our State Dept. to request them to hold up until we can make them a proposition. This was the intent of the wire. If the contract is signed today we will have to put up at once 1000 LP as guarantee on the contract. However, will wire you.

Except for the fact that I've been promised so many things, I'd think the contract is closed. As it is, I'll believe it when the ink dries on the last signature.

If signed ahead of the others we should open up the guns on Colombia AT ONCE and should hit Equador without delay.

.....

8:30 P.M.

The Minister was not able to hold the aquerdo this A.M. but is expecting to meet the Pres. tonight and will inform me by phone as soon as the meeting is over, what has transpired.

[fol. 2441] PHONE JUST RANG AND THE MINISTER STATES THAT THE CONTRACT WITH MARCONI HAS BEEN SIGNED, SEALED AND DELIVERED. WILL FORWARD A COPY WITH THIS LETTER AND AM STARTING TO TOWN NOW TO SEND THE ENCLOSED CABLE.

The permit simply gave us the right to fly and to contract for the carrying of mail but this gives us what is exclusive mail rights in Peru.

At 11 P.M. I went to a reception for the new Ambassador Moore and of course told Acting Amb. Hanna and the other officials about the closing of the contract. A shout went up and we all repaired to the punch bowl. It's been a tight fight and they have all been mighty interested in the outcome.

By the way, after the permit was granted, news of same evidently got to Washington, for a couple of days later the papers carried a two-column headline that the 2nd Post

master at Washington stated that Hüff Daland had no contract for carrying mail to the U.S. This was great stuff for the opposition and believe me they used it. Mr. Fulger of the United Press cabled N.Y. to interview Hoyt and get a statement that PanAm had such a contract and that we were related companies. Well, the story came back that Pres. Gott of Keyplanes had been interviewed and that they were interested in a way, but that it was for some distant date in the future. WELL, this wasn't much help so we killed the story, and got the information regarding our connections to the Minister and Pres. and let the public think what they pleased. The Marconi Co. were also informed, but the story came out, just when we were trying to close with Marconi, and one of the chief arguments with them that we used was that only we and not the Germans could get into the Canal Zone and that *we* were going on into the States. I think the Postmaster ought to be burned up on such a bonehcaded statement, as it might have raised hell with us, and the State Dept. was certainly informed of the connection. To date no statement clarifying the situation has appeared.

Must get this off, and a wire for the Lp. 1000, which we must post as a guarantee for the Permit. This must be posted within 10 days of the granting of the permit, which was granted on the 28th of May. I did not want to post this amt. until I saw the contract with the Marconi closed.

Must stop for now.

Sincerely,

C.E.

IN REPLY REFER TO A-2933

June 19, 1928

Mr. Robert Atkins,
c/o Hayden, Stone & Co.,
25 Broad Street,
New York, N. Y.

Dear Bobby:

We enclose herewith copy of letter received on even date from Mr. Woolman, at Lima, dated June 5th, for your information.

You will note, from reading this over, that it is Woolman's judgment that the operations of the line be started as soon as possible.

Yours very truly,

/s/ Edgar N. Gott
Edgar N. Gott,
President.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 97

[Handwritten notation—File—Huff Daland—P.A.A.]

June 26th, 1928.

MEMORANDUM

To: Mr. J. T. Trippe From: P.E.D. Nagle

Subject

General Concession and Special Air Mail Contract—Peru.

We have never received a complete copy of the concession secured from the Peruvian Government by Woolman. Reports through the State Department and the press indicate that he got a long time concession with freedom from duties and taxes, and the right to condemn land for fields, and in general, carry on a passenger, express, and other air service business.

So far as the right to sell stamps or carry mails was concerned, he was given no authority in the concession, except that he might make such arrangements with the Post Office as could be agreed upon.

Woolman made a contract with the Marconi Company, which operates the Posts and Telegraphs and Radio of Peru, and got this signed hurriedly in order to shot off the German Company from getting any mail contract. The present contract gives him the exclusive right to carry International mails and a preferential right to carry any and all other mails. He is to be informed of any proposal made to the Post Office by any competitor, and then has six months in which to decide whether he will render the service on the same terms. I think this blocks completely any competition if the Huff Daland wishes to do so.

From a financial standpoint, I feel that the present contract, as written, offers very little to the Huff Daland. In the first year he would get only one load and that is between Lima and Paita, although, since he is to call at two intermediate

points, the business might be worked up to provide a return load and some local business.

[fol. 2444] The second year he is to operate from Lima to Mollendo, covering in this way the entire Coast of Peru.

The restrictive feature that he accepted, and that I think he did through not understanding the concession form we sent him, was to agree not to carry any mail except what the Post Office gave him, and to permit the Post Office to charge the Public the same rate they paid him.

The W. R. Grace and Company have very large interests in Peru, not only in the way of steamship transportation, but as general merchandising agents and as operators of sugar and cotton plantations and factories. In view of the interest they have already shown in aviation in South America, it might be possible to bring them into the picture in some way in Peru.

Pan American World Airways, Inc. Exhibit 98

AIR MAIL ROUTE PROPOSAL, BOND AND OATH

[Handwritten notation—7/2/28]

I, the undersigned Pan American Airways, Inc., of New York City, State of New York, propose to carry all mail offered, as covered in the advertisement, by airplane (or seaplane) subject to the Postal Laws and Regulations and the Instructions to bidders, for a term of ten years to begin not later than six months after the award of contract, on the route from Key West, Florida, (or such other point in the United States as may be designated by the Post Office Department) by Havana, Cuba, Merida, Mexico, Belize, British Honduras, Tegucigalpa, Republic of Honduras, Managua, Nicaragua, San Jose, Costa Rica, (or such other points in these countries as may be acceptable to their

Governments) to Cristobal, Canal Zone, and from Cristobal, Canal Zone, to Key West, Florida, (or such other point as may be designated) 7 times a week, as described in the advertisement of the Postmaster General dated May 31, 1928, on a schedule satisfactory to the Postmaster General.

For the term of the proposed contract, at Two dollars per mile.

I propose to furnish the equipment specified below: Number of planes at least 10, of which number six will be in use on the trips contemplated by the contract to be executed pursuant to this proposal and at least four held in reserve. Type of plane Cabin Transport built in U.S.; Construction (American or foreign) American. Horsepower 1650, 1240 or 800; speed 130 or more miles per hour; cruising radius at least 600 miles; number of motors three.

SEAL

This proposal is made in my own interest, and not by me as the representative of another person or company, and with full knowledge of the distance over the route, the weight of the mail to be carried, and all other particulars in reference to the route and service, and, also, after careful examination of the forms and instructions attached to said advertisement, and if accepted; I will enter into contract,

with sureties to be approved by the Postmaster General, within thirty days after date of acceptance, and will give my personal supervision to the performance of the service.

[fol. 2446] And I do swear that I have the ability pecuniarily, to fulfill my obligation as such bidder; that this bid is made in good faith and with the intention to enter into contract; and perform the service in case said bid shall be accepted.

And we Pan American Airways, Inc., as bidder and principal, are held and firmly bound unto the United States of America in the just and full sum of twenty-five thousand dollars ($25,000) lawful money of the United States, to be paid to the United States of America or its duly appointed or authorized officer or officers; to the payment of which, well and truly to be made and done, we bind ourselves, our heirs, executors, and administrators, successors and assigns, jointly and severally, firmly by these presents.

Whereas, by an act of Congress approved June 23, 1874, entitled "An Act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1875, and for other purposes," it is provided: "That every proposal for carrying the mail shall be accompanied by the bond of the bidder, with sureties approved by a postmaster," in pursuance whereof and in compliance with the provisions of said law, this bond is made and executed, subject to all the terms, conditions and remedies thereon, in the said act provided and prescribed, to accompany the foregoing proposal of the said bidder.

Air Mail Proposal, Bond and Oath Page 2.

Now, the Condition of the Said Obligation Is Such, that if the said bidder, as aforesaid, shall within thirty days of the date of acceptance of said bid, enter into a contract with the United States of America, with good and sufficient sureties to be approved by the Postmaster General, to perform the service proposed in his said bid, and further shall perform said service according to his contract, then this obligation shall be void; otherwise to be in full force and obligation in law.

In lieu of surety bond we hand you attached herewith twenty-five thousand ($25,000.00) United States 4th Liberty Loan of the following serial numbers with October 15th and subsequent coupons attached:

No. K 00091960	$10,000.00
D 00002934	$10,000.00
K 00029920	$ 5,000.00

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 99

MEMORANDUM

DATE July 11, 1928.

TO MR. Iglehart DEPT.

FROM MR. Patchin DEPT.

Subject: AIR MAIL CONTRACTS

The Pan-American Airways has received a contract from the United States Government to carry air mail from Key West, Florida via Mexico, Havana and Central America to Colon.

The West India Air Express ^ ~~has received a contract~~ has bid on another contract ^ as well as Pan-American Airways to carry the air mail from Havana eastward to Santo Domingo and other West Indian points. The route has not yet been awarded.

Mr. Hoyt has told me that the West India Co. will ^ probably combine with the Pan American, and, therefore, the Pan-American will control all the airmail service in the Caribbean and receive $2.00 per mile for a period of ten years. The revenue will exceed $1,000,000 per annum. The capital of the Pan-American Airways will be somewhat, but not largely increased.

Mr. Hoyt told me about a week ago that within two weeks he would probably be approaching us to discuss operations south of Colon. He ~~evidently~~ proposes to move promptly in the matter.

[fol. 2450]

PAN AMERICAN-WORLD AIRWAYS, INC. EXHIBIT 100

CONTRACT FOR FOREIGN AIR MAIL SERVICE

Route No. F. A. M. 5

This contract, made this 13th day of July, 1928, by and between the United States of America (by the Postmaster General) and the Pan American Airways, Inc., a corporation organized and existing under the laws of the State of New York:

WITNESSETH, That whereas the said Pan American Airways, Inc., has been accepted as contractor on Route No. F. A. M. 5 in conformity with the advertisement inviting proposals for the service specified herein, issued by the Postmaster General under date of May 31, 1928.

NOW THEREFORE, The said contractor undertakes, covenants and agrees with the United States of America:

1. To carry all United States mails (including foreign closed mails in transit through the United States) offered, not to exceed eight hundred (800) pounds a single trip, in safe and suitable aircraft, seven (7) times a week, on a schedule satisfactory to the Postmaster General from Landing Point (n.o.) at Key West, Florida (or such other point in the United States as may be designated by the Post Office Department) by Havana, Cuba, Merida, Mexico, Belize, British Honduras, Tegucigalpa, Republic of Honduras, Managua, Nicaragua, San Jose, Costa Rica, (or such other points in these countries as may be acceptable to their Governments and designated by the Post Office Department) to Cristobal, Canal Zone, and from Cristobal, Canal Zone to Key West, Florida (or such other point as may be designated) and to perform the services and undertakings in connection therewith specified in this contract for and during the term of ten (10) years commencing with the date of inauguration of service which shall not be more than six-
[fol. 2451] months from the date of the acceptance of the proposal (July 13, 1928).

2. To take the mail and every part of it from all United States Post Offices and deliver it and every part of it into all post offices on the route covered by this contract, unless other provision is made. The contractor also undertakes, covenants, and agrees with the United States and binds itself to be answerable in damages to the United States for the proper care and transportation of the mails, and to be accountable for any loss or damage resulting to any such mail or to any part thereof by reason of the failure to exercise due care on the part of any of the contractor's officers, agents or employees in the custody, handling or transportation thereof.

For the service herein specified, when performed in accordance with the provision of this contract and evidence thereof shall have been filed with the Postmaster General, the United States agrees to pay to the said Pan American Airways, Inc., compensation at the rate of two dollars ($2.00) per statute mile flown based on the shortest practicable airway distance between points on the route as determined by the Postmaster General, compensation for the return trip from the Canal Zone to be based on the direct distance, by the most practicable route, from Cristobal to Key West or such other point in the United States as may be designated. Payments to be made monthly as soon after the close of each month as accounts can be adjusted and settled; said pay to be subject, however, to be reduced or discontinued by the Postmaster General as hereinafter stipulated, or to be suspended in case of delinquency.

It is further stipulated and agreed by the contractor:

[fol. 2452] 1. That in case of failure from any cause to perform any service required by this contract a pro-rata deduction shall be made from the compensation of the contractor on account of such omitted service, except that pro-rata pay will be allowed for the airway distance flown between stated points on the route traversed on a partially completed trip if no delay in the mails over the ordinary means of transportation has resulted.

2. That deductions from the pay may be made for allowing the mails to become wet, damaged or destroyed; or

when a grade of service is rendered inferior to that stipulated in the contract; and for the loss of or depredation upon the mails in the custody of the contractor or his agents, when such loss is due to the negligence or fault of the contractor or his agents.

It is further stipulated and agreed that the Postmaster General may annul this contract or impose fines or penalties, in his discretion, for repeated failures; for subletting the service without his permission or assigning or transferring the contract; for combining to prevent others from bidding for the performance of postal service; for failure to provide and operate safe and suitable aircraft in accordance with the requirements of the advertisement and this contract; for violating the postal laws and regulations applicable to service under this contract or for failure to perform service according to this contract. Such annulment shall not impair the right of the United States to claim damages from the contractor.

That no member of or delegate to Congress or resident commissioner shall be admitted to any share or part of this contract or agreement or to any benefit to arise therefrom.

[fol. 2453] The contractor expressly warrants that it has employed no third person to solicit or obtain this contract in its behalf; or to cause or procure the same to be obtained upon compensation in any way contingent, in whole or in part, upon such procurement, and that it has not paid, or promised or agreed to pay, to any third person, in consideration of such procurement, or in compensation for services in connection therewith, any brokerage, commission, or percentage upon the amount receivable by it hereunder; and that it has not, in estimating the contract price demanded by it, included any sum by reason of any such brokerage, commission, or percentage; and that all money payable to it hereunder is free from obligation to any person or persons for services rendered, or supposed to have been rendered, in the procurement of this contract. It further agrees that any breach of this warranty shall constitute adequate cause for the annulment

of this contract by the United States, and that the United States may retain to its own use from any sums due or to become due thereunder, an amount equal to any brokerage, commission, or percentage so paid or agreed to be paid.

It is further stipulated and agreed that this contract may be terminated by Congress, or by the Postmaster General whenever, in his judgment, the interest of the postal service shall so require, in which latter event the contractor shall be allowed as full indemnity one month's extra pay (based on the average monthly pay), provided such termination is not due to delinquency on the part of the contractor or his agents.

It is further stipulated and agreed:

1. That during the continuance of this contract, if the Postal interests shall so require, by mutual agreement between the contractor and the Postmaster General, the [fol. 2454] contract rate of pay hereunder may be changed, but shall never exceed the rate herein provided.

2. That the Postmaster General may, as the needs of the service require, increase or decrease the number of intermediate stops, the number of trips per week, change the termini of the route, dispatch mail on any plane of the contractor flown over the route and change or modify the schedule.

3. That the Postmaster General may, with the consent of the contractor, include Guatemala and Salvador in this route and extend this route from Cristobal, Canal Zone by Cartagena, Colombia, Maracaibo, Venezuela, Port of Spain, Trinidad, Curacao, Dutch West Indies, La Guaira (Puerto Caracas), Venezuela, Georgetown, British Guiana, to Paramaribo, Dutch Guiana.

4. That this contract is also subject to all the provisions of the advertisement (though not all specifically stated herein) and to the provisions of the Postal Laws and Regulations applicable to this service.

IN WITNESS WHEREOF, The parties hereto have executed this contract.

August 1st, 1928

MEMORANDUM

To Mr. J. T. Trippe From Robert G. Thach

SUBJECT: Regarding Proposed Peruvian Corporation.

PAN AMERICAN AIRWAYS CO. OF PERU

Authorized capitalization: 25,000 Peruvian pounds divided into 2500 shares of 10 Peruvian pounds each.

Issued: 250 shares of 10 Peruvian pounds each (approximately $10,000).

Note: The organization tax for the above capitalization will be one-half of one per cent of such stock as is now issued or issued in the future.

Directors: 7 directors, 4 in New York, Mr. Harris in Lima and two others in Lima from the office of our attorney there.

Directors meetings may be held either in New York or Lima, upon the call of the President for three directors, and three will constitute a quorum.

Stockholders may remove directors at any time.

Stockholders: 247 shares of the original issue will be in the name of A.C.A. or in the name of some individual endorsed in blank and delivered to A.C.A., as will likewise be the three incorporated shares.

Stockholders meetings will be held in either Lima or New York, if law permits.

Officers:

President—J. T. Trippe

Vice President and General Manager—H. J. Harris, Lima

Vice President—J. A. Hambleton

Secretary—R. G. Thach

Treasurer—J. R. Dillon

Assistant Secretary and Assistant Treasurer in Lima.

The Vice President in Peru shall have the full powers of the President and is to represent the Corporation in Peru unless the President is there.

Corporate Records: On account of the probability of numerous directors meetings both in Lima and New York,

it will be provided that duplicate original minutes of every meeting held in either place will be forwarded and kept in the corporate records at the other place, and a duplicate seal will be kept in both places.

Proposed Initial Transactions: A.C.A. is to advance up to $15,000 to Huff Daland as a loan for purchasing a Fairchild airplane and transporting it to Peru under the agreement that upon Huff Daland turning over the ship to the Peruvian Corporation, A.C.A. will cancel the loan.

[fol. 2459] Upon payment by A.C.A. into the Peruvian Corporation of $10,000 the Peruvian Corporation will repay A.C.A. $4,000 in consideration of acquisition of option from Huff Daland formerly held by Caribbean.

A.C.A. will make $25,000 on demand six per cent loan to Peruvian Corporation.

Peruvian Corporation will acquire of Huff Daland concessions and contracts having to do with commercial operations of aircraft (excluding dusting), with necessary governmental consents to the transfers of such concessions, including specifically (but without limitation):

1. Basic concession in Peru
2. Peruvian mail contract
3. Mail contract with British Marconi
4. All other concessions to be negotiated in Peru and Ecuador

In consideration of such concessions the Peruvian Corporation will agree to pay Huff Daland the proper and fair amounts actually disbursed acquiring concessions in Peru and Ecuador, not to exceed $15,000 for expenses disbursed prior to July 1st, 1928. The exact amount is to be fixed by Messrs. Hoyt, Trippe and Gott as arbitrators on or before November 1st, 1928, together with allowance for a reasonable profit if, in the opinion of such arbitrators, it is justifiable and proper.

The Peruvian Corporation will make an agreement with Huff Daland covering the charter by the Peruvian Corpora-

tion of one dusting airplane to be used as spare equipment, the cost of such charter not to exceed $750. per month, including depreciation, insurance and reasonable wear and tear. This charter would be by the month, with a minimum of three months, with the right of the Peruvian Corporation to extend for six months longer, at its option, on a month to month basis. The Peruvian Corporation is to supply pilots and fuel.

Dear Patchin,

I am passing on to Mr. Carter your memorandum of August 2nd about Panama American Airways Inc.

As you said to me, this is a very sketchy prospectus. I notice in the last paragraph of Harris' letter to Trippe that he says that in addition to being a Vice-President of the Pan American Airways Inc. of Peru, he should be a Vice-President of the Pan American Airways Inc. in order to negotiate any changes in the Peruvian or other South American concessions. This would seem to indicate that the Peruvian and Ecuadorian concessions are owned by this company.

As I think over this whole matter, I lean very much to the idea of concentrating on mail and express packages and leaving aside the matter of passengers for the present, and I think I would be rather inclined to insist a bit on this point.

[fol. 2461]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 104

(COPY)

MR. TRIPPE
HRH

Quito, Ecuador, August 6, 1928.

Dear H. & R. :—

I've had my first conference with the Minister of War and learned that the Cabinet would not grant the contract or concession as I had presented it. That they have ceased granting exclusive concessions, and are not favorably inclined to granting exclusion or exemption from taxation. I have another round with the Min. of War and the Min. of Education & mails this afternoon and will see what can be done.

There is quite a feeling of resentment here toward the U.S. and the Germans are not helping the matter any, stating that the U.S. is trying to get control of the air, trying to dominate S.A., etc., etc. I am inclined to think that if they ask too much and are willing to grant too little that we had better simply ask for permits to land along the coast and then when we are carrying the U.S. mail to Panama and the Panam is taking it on thru then we can have them come to us and we can dictate our own terms. If they get too independent I will state that while we would rather not that we can fly right on thru. Of course this would not be economic but since these long flights have been made they think that a thousand or fifteen hundred miles is nothing for a plane.

Would certainly like to know what is going on up in N.Y. Harry I got your wire stating that Panam didn't feel satisfied with the Peruvian contract. We have every advantage over the Germans with an exclusive contract for all foreign mails over our lines and unless we get busy Fawcett could connect up with the Germans either at Talara or Guayaquil and we would be left out. By the way, the Ger.s are stating that they have or will soon have permission to land just out of the canal Z. and that they will soon

be carrying mail to Colon. This should be headed off as we have stated that it is impossible for them to get in and have built our fight around the fact that without this connection that their lines are valueless to these countries.

The thing that will help the situation more than anything else is to get started in Peru and show them that we mean business. Incidentally someone should be in Peru pretty soon and there is no telling when I can get away from here, tho I am pushing them all possible. This is going to be a case, speaking of the whole line, where the early bird gets the advantage and all we need to do to hold this whole West coast is to start action.

There is no telling when this letter will reach you as it takes two full days to get to Guayaquil and then waits for a boat. In Peru Congress is now in session and I have wired Fernandez to keep after the Minister to have our exemptions from entry charges and taxation passed. Have told them that we are holding off until this is done. Must stop as I am sending this by a friend leaving for Guayaquil in a few minutes. Hope to get orders to go ahead.

Sincerely,

C. E.

PAN AMERICAN AIRWAYS, INC.

General Offices

100 East 42nd Street, New York City

August 14, 1928.

Mr. Richard F. Hoyt,
Hayden, Stone & Company,
25 Broad Street,
New York City.

Dear Dick:

I am attaching herewith copy of the draft memorandum handed to Mr. W. [illegible] Cogswell, of the Grace Company, yesterday.

I talked to Harris this afternoon just before he boarded the train for Monroe. He is planning to return to New York next Tuesday, August 21st. At that time he will be prepared to spend three days, calling on the larger American companies operating in Peru, to contract with them, individually, to carry part of their mail between Paita and Lima, following the inauguration of his service in October.

Mr. Cogswell is going into the matter further with some of his Directors today, and wants to see me tomorrow. As soon as we have a definite plan worked up, we will bring it in to you to check over.

Sincerely,

(Sgd.) JUAN TRIPPE.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 106

CERTIFICATE OF INCORPORATION

—of—

PERUVIAN AIRWAYS CORPORATION

FIRST: The name of the corporation is

PERUVIAN AIRWAYS CORPORATION

SECOND: The principal office of the corporation in the State of Delaware is located at No. 19 21 Dover Green, in the City of Dover, Kent County. The name and address of its resident agent is the United States Corporation Company, No. 19/21 Dover Green, Dover, Delaware.

THIRD: The nature of the business, or objects or purposes proposed to be transacted, promoted, or carried on, are:

(a) To carry, convey, transmit, or transport, as, when and where lawful, goods, freight, express, articles of merchandise of every nature and description, se-

curities, passengers, mails and intelligence by means of air craft.

(b) To design, manufacture, assemble, build, repair, maintain, operate, own, lease, let, purchase, sell and deal in air craft of every kind and description, by whatever power actuated and by whatever agency or method sustained or stabilized including (without limitation) balloons, dirigibles, aeroplanes, hydroplanes, hydro-aeroplanes and all kinds and types of vehicles, mechanisms and devices now known or which may hereafter be discovered or invented for navigating the air, for purposes of pleasure, commerce, warfare or otherwise.

(c) To build, acquire, maintain, own, operate, lease, sell and otherwise dispose of air navigation facilities of every nature and description, including (without limitation) terminal landing fields, emergency landing fields, aviation fields, hangars, land lighthouses, storage space, systems of radio, communications, air craft repair stations, mooring masts, landing buoys, air ports, either land or water, plants, works, stations, depots, and all equipment incidental to the proper maintenance thereof, and all other conveniences and appurtenances appropriate to any of its business.

(d) To design, manufacture, purchase, sell and trade in, and to install upon air craft, weapons and armor or other protective coverings, apparatus for measuring height and distance, determining location and direction, and for signalling or communicating in any way, and all apparatus, equipment and devices designed for use in connection with the navigation of the air.

[fol. 2464] (e) To conduct experiments on its own account and for others, to apply for, obtain, purchase, or otherwise acquire, patents, licenses, trade marks, trade names, processes, improvements, inventions, formulae, and the like, and to sell, mortgage, pledge, let, or otherwise dispose of, or deal in, and to use, exercise and develop, grant licenses and other rights and privileges in respect to, and to experiment upon, test or

develop any process, improvement, invention, patent, or patent right, or the like.

(f) To purchase, lease, hire, or otherwise acquire, hold, own, develop, operate, improve, sell, assign, transfer, exchange, mortgage, pledge or otherwise dispose of, or turn to account and convey, and to aid and subscribe toward the acquisition, development or improvement of, real and personal property and rights and privileges therein of every nature whatsoever, whether tangible or intangible, in the State of Delaware, and in all other states, territories, districts, colonies, and dependencies of the United States of America and in all foreign countries, including the good will of any corporations, copartnerships and/or individuals, suitable or convenient for any business of the corporation; and to acquire, take, hold, own, construct, erect, improve, manage, and operate, and to aid and subscribe toward the acquisition, construction or improvement of, buildings, mills, storehouses, warehouses, factories, machinery, apparatus, equipment, locomotives, cars, and other rolling stock, roads, bridges, docks, piers, wharves, ships, vessels, boats, dry and floating docks, marine railways, trucks, wagons, cars, and other vehicles, engines, motors, conveyances, rolling stock and other works, property or appliances which may appertain to, or be useful in, the conduct of any business of the corporation but only to the extent authorized by the laws of the State of Delaware.

(g) To acquire by purchase, subscription, or otherwise, and to hold, sell, assign, transfer, exchange, lease, mortgage, pledge, or otherwise dispose of, any shares of the capital stock of, or voting trust certificates for any shares of the capital stock of, or any bonds or other securities or evidences of indebtedness issued or created by, this corporation or any other corporation or association, organized under the laws of the State of Delaware or of any other state, territory, district, colony or dependency of the United States of America, or under the laws of any foreign country; to pay therefor in cash or property or to issue in exchange

therefor shares of the capital stock, bonds or other obligations of this corporation; and, while the owner or holder of any such shares of capital stock, voting trust certificates, bonds, or other obligations, to possess and exercise in respect thereof any and all rights, powers and privileges of individual holders, including the right to vote on any shares of stock so held or owned (provided, however, that this corporation shall not use its funds or property for the purchase of shares of its own capital stock when such use would cause any impairment of its capital, and provided further that shares of its own capital stock belonging to this corporation shall not be voted upon directly or indirectly;) [fol. 2465] and upon a distribution of the assets or a division of the profits of this corporation, to distribute any such shares of capital stock, voting trust certificates, bonds, or other obligations, or the proceeds thereof, among the stockholders of this corporation.

(h) To organize subsidiary corporations and to convey and assign all or any part of its assets to any such subsidiary corporation or corporations in exchange for shares of the capital stock or other securities of such subsidiary corporation or corporations.

(i) To acquire from time to time, in exchange for shares of the capital stock of this corporation as herein fixed or as may hereafter be increased, such property or shares of the capital stock of any other corporation or corporations, as the Board of Directors shall deem of advantage to this corporation, at such valuation of the property or shares so acquired as in the judgment of said Board of Directors shall be fair and just.

(j) To purchase, lease or otherwise acquire, in whole or in part, the business, good will, rights, franchises, and property of every kind, and to undertake the whole or any part of the assets or liabilities of any person, firm or association or corporation, engaged in or authorized to conduct any business authorized to be conducted by this corporation, or owning property necessary or suitable for its purposes, and to pay there-

for in cash or in stock or bonds, or any other evidences of indebtedness of this Corporation or otherwise; to hold or in any manner dispose of the whole or any part of the business, good will, rights, franchises, or property so acquired and to exercise all the powers necessary or incidental to the conduct of such business.

(k) To borrow or raise moneys for any of the purposes of this Corporation, issue bonds, debentures, notes or other obligations of any nature, or in any manner, for moneys so borrowed, and to secure the payment thereof and of the interest thereon, by mortgage upon, or pledge or conveyance or assignment in trust of, the whole or any part of the property of this Corporation, real or personal, including contract rights, whether at the time owned or thereafter acquired, and to sell or pledge such bonds or notes or other obligations of this Corporation for its corporate purposes.

(l) To aid, in any manner, any corporation or association any of whose shares of stock, bonds, or other evidences of indebtedness are held by or for this Corporation, or in which, or in the welfare of which, this Corporation shall have any interest, and to do any acts or things designed to protect, preserve, improve or enhance the value of, any such shares of stock, bonds or evidences of indebtedness, or the property of this Corporation.

(m) To guarantee the payment of dividends upon any shares of the capital stock of, or the performance of any contract by, any other corporation or association in which, or in the welfare of which, this Corporation has an interest, and to endorse or otherwise [fol. 2466] guarantee the payment of the principal and interest, or either, of any bonds, debentures, notes, securities, or other evidences of indebtedness created or issued by any such other corporation or association.

(n) To carry out all or any part of the foregoing objects as principal, factor, agent, contractor, or otherwise, either alone or in conjunction with any person, firm, association or other corporation, and in any part

of the world; and in carrying on its business, and for the purpose of attaining or furthering any of its objects, to make and perform such contracts of any kind and description, to do such acts and things, and to exercise any and all such powers, as a natural person could lawfully make, perform, do or exercise.

(o) To remunerate, in cash, shares of stock, bonds, or other securities or evidences of indebtedness or otherwise, any person, firm, syndicate, association, or corporation, for services rendered, directly or indirectly, in selling, placing or guaranteeing the selling or placing of any shares of the capital stock, bonds, debentures, or other securities or evidences of indebtedness, issued, owned, or controlled by this Corporation or by any other corporation in which this Corporation is interested, or in connection with the formation, promotion, or operation of this Corporation, or of any other corporation in which this Corporation is interested, or in connection with the conduct of the business or affairs or the protection of the property and interests of this corporation.

(p) To conduct its business in all its branches at one or more offices in the State of Delaware and in any or all other states, territories, districts, colonies, and dependencies of the United States of America and in any or all foreign countries.

It is the intention that the objects and purposes specified in the foregoing clauses of this Article THIRD, shall, except where otherwise expressed in this Article, be in no wise limited or restricted by reference to, or, inference from, the terms of any other clause of this or any other article in this certificate, but that the objects and purposes specified in each of the clauses of this Article shall be regarded as independent objects and purposes.

It is also the intention that said clauses be construed as powers as well as objects and purposes; and, generally, that the Corporation shall be authorized to exercise and enjoy all other powers, rights, and privileges granted by the General Corporation Law, being Chapter 65 of the

[fol. 2467] Revised Statutes, of the State of Delaware, to corporations of this character, as well as all the powers conferred or which may be conferred upon such corporations by the then existing laws of the State of Delaware, so far as not in conflict therewith, or by all laws and acts heretofore or hereafter amendatory of, or supplementary to, said General Corporation Law, or of any or all of said laws or supplements thereto, but the enumeration of certain powers as herein specified is not intended as exclusive of, or as a waiver of, any of the powers, rights, or privileges granted or conferred by said General Corporation Law or the laws of said State now or hereafter in force; provided, however, that this Corporation shall not have the power to carry on the business of constructing, maintaining or operating railroads or railways within the State of Delaware; nor shall it possess the right of taking and condemning lands in the State of Delaware. This Corporation shall not carry on any business, or exercise any powers, in any state, territory, or country which a similar corporation organized under the laws of such state, territory or country could not carry on or exercise, except to the extent permitted or authorized by the laws of such State, territory or country.

FOURTH: The total authorized capital stock of this Corporation is Fifty Thousand Dollars ($50,000), divided into five hundred (500) shares of the par value of One Hundred Dollars ($100.) each.

FIFTH: The amount of capital stock with which this Corporation will commence business is ONE THOUSAND DOLLARS ($1,000.).

SIXTH: The names and places of residence of the original subscribers to the capital stock and the number of shares subscribed for by each, are as follows:

[fol. 2468]

NAME	RESIDENCE	NO. OF SHARES
E. V. Hall	Dover, Delaware	4
J. M. Townsend	Dover, Delaware	3
M. S. Cook	Dover, Delaware	3

SEVENTH: The existence of this Corporation is to be perpetual.

EIGHTH: The private property of the stockholders of this Corporation shall not be subject to payment of corporate debts to any extent whatever. No transaction entered into by the Corporation shall be affected by the fact that the Directors of the Corporation, or any of them, were personally interested in it; and every Director of the Corporation is hereby relieved from any disability that might otherwise prevent his contracting with the Corporation for the benefit of himself, or of any firm, association, or corporation in which he may be in any wise interested.

NINTH: In furtherance, and not in limitation of the powers conferred by statute, and without prejudice to the right hereby conferred on the corporation to vest additional powers in the Board of Directors and its By-laws, the Board of Directors of the corporation are expressly authorized, except as otherwise expressly provided by law:

1. To exercise all corporate powers, including the sale, mortgage, hypothecation and pledge of the whole or any part of the corporate property, except as otherwise expressly provided by law.

2. To make, alter, amend and repeal By-Laws of the Corporation, and to increase and reduce (but not to less than three (3)) the number of the members of the Board of Directors, and from time to time to make and change rules and regulations, not inconsistent with the By-Laws for the management of the Corporation's business and affairs.

3. To purchase or otherwise acquire for the corporation, any property, rights, or privileges which the Corporation is authorized to acquire, at such price or consideration, and generally on such terms and conditions as they may see fit, and at their discretion, to pay for any property or rights acquired by the corporation, either wholly or partly in money, stock, bonds, debentures or other securities of the corporation.

[fol. 2469] 4. To create, make and issue mortgages, bonds, notes, debentures, deeds of trust, trust agreements and negotiable or transferable instruments and securities of all kinds secured by mortgages or otherwise, and to do every other act and thing necessary to effectuate the same.

5. To sell or dispose of any real or personal estate, property, rights, franchises or privileges belonging to the Company, whenever in their opinion its interests would be thereby promoted, on such terms as they may see fit, and to sell, assign, transfer or otherwise dispose of the whole property of the Company; to appoint any person or corporation to accept and hold in trust for the corporation, any property belonging to the corporation, or in which it is interested, or for any other purposes, and to execute and do all such acts and things as may be requisite in relation to any such trust.

6. To delegate, during the intervals between meetings of the Board, all or any of the powers of the Board to an Executive Committee, of not less than two of its members, or to any officer or agent, and to delegate the duties of any officer or agent to any other officer or agent; to appoint subordinate officers, agents, employees and delegates to have such powers (including the power to choose, remove or suspend subordinate officers, agents, employees or servants, and to sub-delegate) upon such terms as they may see fit; and at their discretion to remove the same with or without cause, and to so remove any executive officer, except the President.

7. To provide for and to pay to Directors rendering unusual or exceptional services to the Corporation, such special compensation appropriate to the value of such services as they may in their discretion see fit.

8. To declare dividends out of the profits of the Company at such times and in such amounts as they may from time to time determine and before payment of any dividend or dividends, to set aside out

of the net profits of the Company, such amount or amounts as they may in their absolute discretion think proper as reserve to meet contingencies, or for equalizing dividends, or for repairing or maintaining any property of the Corporation, or for any such other purposes as the Directors may deem beneficial to the interests of the Corporation, to apply the surplus earnings or accumulated profits of the Corporation, otherwise by law to be reserved, to the purchase or acquisition of property to such an extent and in such manner and upon such terms as the Board may determine.

9. To determine, subject to the laws of the State of Delaware, and if allowed, when and under what conditions and regulations the records and books of the Corporation, or any of them, shall be open to the inspection of the stockholders, and the stockholders' rights in this respect are and shall be restricted and limited accordingly.

[fol. 2470] TENTH: Both stockholders and directors shall have power, if the By-laws so provide, to hold their meetings either within or without the State of Delaware, and to have one or more offices within or without the State of Delaware, in addition to the principal office in Delaware, and to keep the books and records of the Corporation (subject to the provisions of the statute) outside the State of Delaware, at such places as may be from time to time designated by the directors or officers.

ELEVENTH: The corporation reserves the right to amend, alter, change or repeal any provisions contained in this Certificate of Incorporation, in the manner now or hereafter prescribed by statute, and all rights conferred on officers, directors and stockholders herein are granted, subject to this reservation.

WE, THE UNDERSIGNED, being each of the original subscribers to the capital stock hereinbefore named for the purpose of forming a corporation to do business both within and without the State of Delaware, and in pursuance of the General Corporation Law of the State of Delaware,

being Chapter 65 of the Revised Code of Delaware, and the acts amendatory thereof and supplemental thereto, do make and file this certificate, hereby declaring and certifying that the facts herein stated are true, and do respectively agree to take the number of shares of stock hereinbefore set forth, and accordingly have hereunto set our hands and seals this 4th day of September, A. D. 1928.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 107

Minutes of the First Meeting the Board of Directors of Peruvian Airways Corporation, held at No. 25 Broad Street, New York, on the 6th day of September, 1928 at 10:30 o'clock in the forenoon.

Present:

Messrs. J. T. Trippe
Richard F. Hoyt
R. H. Patchin
William F. Cogswell

Absent:

None.

* * * *

The Chairman stated that W. R. Grace & Co. and the Aviation Corporation of the Americas had each offered to purchase at par one-half of the authorized capital stock of Peruvian Airways Corporation, if, as and when issued, and that each of the said corporations had deposited with him its check for Twenty Five Thousand Dollars ($25,000).

On motion duly made and seconded, the following resolutions were unanimously adopted:

RESOLVED, that the offers of W. R. Grace & Co. and the Aviation Corporation of the Americas to purchase one-half each of the capital stock of this Corporation at par of One Hundred Dollars ($100) per share be, and they hereby are, accepted, and that the Chairman of this meeting be, and he hereby is, directed to deliver the checks for Fifty Thousand Dollars ($50,000) now held by him in payment for said shares to the Treasurer of the Corporation for deposit with the funds of the Corporation.

RESOLVED, that the officers of this Corporation be, and they hereby are, authorized and directed to issue Two Hundred and Fifty (250) shares of the capital

stock of this Corporation to W. R. Grace & Co. and Two Hundred and Fifty (250) shares of the capital stock of this Corporation to the Aviation Corporation of the Americas, and to deliver to the same duly executed certificates for the said shares.

On motion duly made and seconded, the following preamble and resolution were unanimously adopted:

[fol. 2473] WHEREAS, Aviation Corporation of the Americas, a Delaware corporation, heretofore loaned to Huff-Daland Dusters, Inc. the sum of $11,800 for the purpose of enabling said Huff-Daland Dusters, Inc. to purchase one F-C-2 Type of Fairchild Cabin Monoplane upon the understanding that said Huff-Daland Dusters, Inc. would, if requested by said Aviation Corporation of the Americas, transfer said plane to a corporation proposed to be organized to undertake certain aviation operations in Peru, whereupon such loan from Aviation Corporation of the Americas to Huff-Daland Dusters, Inc. would be cancelled and deemed repaid; and

WHEREAS, Peruvian Airways Corporation has been organized for the purpose of conducting such aviation activities in Peru and has made an agreement with Aviation Corporation of the Americas whereby Aviation Corporation of the Americas will request said Huff-Daland Dusters, Inc. to transfer said plane to this corporation, upon the agreement by this corporation with Aviation Corporation of the Americas to pay Aviation Corporation of the Americas the said sum of Eleven Thousand Eight Hundred Dollars ($11,800);

RESOLVED, that the proper officers of this corporation be, and they hereby are, authorized and directed to pay to Aviation Corporation of the Americas the sum of Eleven Thousand Eight Hundred Dollars ($11,800) upon delivery of the possession of said airplane to this corporation and the execution and delivery by said Huff-Daland Dusters, Inc. of a bill of sale to this Corporation covering said airplane.

On motion duly made and seconded, the following resolutions were unanimously adopted:

RESOLVED, that the President and the Secretary of this Corporation be, and they hereby are, authorized to issue a special power of attorney in favor of HAROLD R. HARRIS, as manager of the Corporation in the Republic of Peru, conferring upon him all the powers and authority necessary or proper for the effective performance of his duties in that capacity.

RESOLVED, that such power of attorney shall contain an authorization to sign in the name of the Corporation checks and drafts on the funds of the Corporation deposited in any bank in the Republic of Peru, and to sign agreements in the name of the Corporation in the Republic of Peru, without the signature of an additional officer of the Corporation, provided that no agreement or contract under the terms of which there would become payable by the Corporation more than the sum of Five Thousand Dollars ($5,000) shall be signed, executed or delivered without the prior cabled approval of the Board of Directors of this Corporation.

[fol. 2474]

* * * * *

Nominations for officers of the Company for the ensuing year were then called for, and nominations having been made, and ballot having been duly had, the following persons were unanimously elected to the offices set before their respective names:

President	J. T. Trippe
Vice-President	Harold R. Harris
Vice-President	R. H. Patchin
Treasurer	C. G. Bush
Secretary	William F. Cogswell

There being no further business, the meeting adjourned.

[fol. 2475]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 108

September 10, 1928.

MEMORANDUM

To Mr. John D. MacGregor From J. T. Trippe

Confirming our conversation of this morning, and until further notice, all Company negotiations with local Governments in the countries of Central America and in Colombia, Venezuela and Ecuador, S. A., will be handled by yourself. Included in this assignment will be negotiations for concessions and the execution of same.

General Agents, representing the Company in these countries, will report to you, with respect to all matters involving contractual relations between the Company and the respective Governments concerned.

General Powers of Attorney in your favor, have already been issued to you in Guatemala, Salvador, Nicaragua and Honduras. Additional Powers will be issued to you covering Panama, Colombia, Venezuela and Ecuador.

In Costa Rica, because of the time element involved, a general Power has been issued to Mr. Frank Whiting, in order to permit him immediately to negotiate for concessions in this country. When practical, this Power will be recalled, and a general Power issued in your favor.

The General Agents to be designated in these various countries should be delegated Powers by you. This also applies to Powers that will be required by Captain J. E. Whitbeck, in connection with the airway construction work in the various Central American countries. This general plan contemplates having but one general Power in each country and all other Powers issued are to be released under same.

The Company's expansion program contemplates extension of service to Colon on or about June 1st of next year. You will have the responsibility, therefore, of securing and

having ratified, before that date, general Form B Concessions in Honduras, Nicaragua, Costa Rica, Panama and, if possible, Guatemala and Salvador. Where the Form B Concession is unobtainable, Form C Concession, along the lines we discussed this morning, should be negotiated. This does not apply to either Guatemala or Salvador.

Draft of the Form C Concession you would propose, should be prepared by you this week, for us to go over.

In Colombia, further conferences with Colonel Bane and Mr. Wilcox, also with Mr. Kuehl of the SCADTA, should be carried on by you, with the end in view of securing a Colombian operating right and general concession, as cheaply as possible. In this connection, you will be interested to know that the SCADTA apparently believes that their monopoly internal business will permit them to operate coastal air services in their area, cheaper than could Pan American Airways, Inc., operating only coastal service under present mail contracts.

It would, therefore, seem vital that Pan American take over either the SCADTA or some other national Company, having internal operating rights.

Further confirming our conversation of this morning, you should arrange for a secretary to handle your correspon- [fol. 2476] dence in the New York office. Your Secretary would, therefore, be in a position to expedite your work when you will be in the field. Such times as she is not engaged in your particular work, she should be available for general office work.

In our conversation of this morning, we did not refer to extension of service in the West Indies, and South from the Canal Zone. All operations in Mexico will be carried on by a separate Company.

In the West Indies, Mr. Nagle is handling negotiations in Haiti and Santo Domingo. Some assistance may be required from you in the latter country during the month of October and before your departure for Honduras, which I understand will be around the first of November. Word

from Mr. Nagle will be received before the 20th of September, should your presence be required in Santo Domingo during October.

Extensions from the Zone South can be instituted independently of the service from Miami to the Canal Zone. For your information, I would summarize the Company's position in this territory.

Aviation Corporation of the Americas has jointly organized with W. R. Grace & Company, the Peruvian Airways Corporation, a Delaware company, with a paid in capitalization of $50,000. The officers of the Company are:

President	— J. T. Trippe, 100 East 42nd Street
Vice Pres. & Gen. Manager	— Harold R. Harris, Peruvian Airways Corporation, Lima, Peru.
Vice President	— Robert H. Patchen, The Grace Line, 10 Hanover Square
Secretary	— William R. Cogswell, The Grace Line, 10 Hanover Square
Treasurer	— Charles C. Bush, The Grace Line, 10 Hanover Square

This Company is taking over the General Air Mail Concession negotiated by Huff-Daland Dusters, Inc.; also the specific Air Mail Contract between the British Marconi Company and Huff-Daland Dusters, Inc.

Mr. Harris left Saturday, September 8th, 1928, for Lima, Peru, to install mail service between Lima (Callao) and Talara, on the Northern Boundary.

The Company owns one Fairchild cabin monoplane, and will lease other equipment locally. As soon as service has been installed, Mr. Harris will institute a technical and traffic survey with the end in view of the later installation of a through service between Cristobal and Valparaiso.

The plan, however, is contingent, of course, on securing the United States Mail Contract, advertisement for which will not be requested until a further study has been made.

Flying boats and/or amphibians would be used in that section between the Zone and Lima, Peru.

[fol. 2477] We propose to delegate to Mr. Harris, the supervision of flight operations over this route.

Contingent on the securing of a United States mail contract during October or November of this year and the amending of the present Kelly Foreign Mail Act, we should be ready to install service to Lima and to Curacao within a period of fourteen to sixteen months. You should map out your program, securing concessions in these countries with this date in mind.

Pan American Airways, Inc., because of our Government contracts, has been identified in Central America, I fear, as a semi-national Company and, as such, unless we prepare carefully, and long in advance, our concessions are apt to be difficult and costly to secure.

This rough draft should serve as an outline of our present position. Will you study it over and prepare, for me, and for my signature, a detailed memorandum to be addressed to you, covering the various matters touched upon, with the addition of any other points which you believe should be included, in particular, the procedure to be followed with respect to correspondence between myself and yourself when in the field, and the method of handling matters assigned to you in your absence, should be covered.

For your information, I am attaching herewith copy of instructions issued to Mr. Harris, covering West Coast activities.

J. T. Trippe,
President.

JTT:B

[fol. 2478]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 109

[Handwritten notation—Copy—JAH—File]

September 10, 1928.

Mr. John D. MacGregor, Vice President,
Pan American Airways, Inc.,
100 East 42nd Street,
New York City.

Dear Mr. MacGregor:

This morning Dipl. Ing. Hermann Kuehl, representing the SCADTA, called at this office, in company with Dr. Von Bauer's secretary, who I understand is in charge of their interests in New York City.

In the course of the conversation, Mr. Kuehl stated that SCADTA were no longer interested, at this time, in negotiating with Pan American Airways, Inc., and would not be, until Panama was open to commercial aircraft. He limited this statement, however, by advising me that the SCADTA would be willing to negotiate an agreement with Pan American Airways, Inc., whereby the sphere of operations of each line were limited, so as not to directly compete with each other.

Pan American Airways, Inc., would, under such a plan, recognize as SCADTA territory, the seacoast from the Canal Zone to Curacao on the North Coast, and from the Zone to Guayaquil, on the West Coast.

I advised him we could not entertain such a proposal, and that my only interest would be in continuing negotiations along the lines proposed last year by Dr. Von Bauer, namely, the outright purchase, by our Holding Company, of SCADTA stock. Mr. Kuehl again reiterated they were not interested in any further discussions along these lines.

He frankly stated that their position was daily becoming more secure in Colombia, Ecuador and Venezuela, and that we could not estimate or value their position at this time.

In part, he advised that the SCADTA was ready, on twenty-four hours notice, to commence service to the Canal Zone and to Curacao, but that he knew the United States Government would not permit them to land in Panama or the Zone until we were ready to extend service. I told [fol. 2479] him I did not know anything about this, but that, in all probability, we would not be ready to operate to the Zone much before the middle of next summer.

He left with me his card and room number at the Pennsylvania (Room No. 216), suggesting we talk again before he leaves for Germany about the 20th of September.

Inasmuch as he stated that the SCADTA or Dr. Von Bauer personally would not entertain further negotiations at this time, we are free and clear of any obligations, moral, or otherwise, to negotiate further with Dr. Von Bauer. In fact, Mr. Kuehl was quite independent in his attitude, stressing the fact that his call was purely one of courtesy and that in no event did he wish to discuss intercorporate relations, except as set forth above.

I questioned him about possible competition from Wilcox's Company. He treated this whole matter as a joke, and stated that SCADTA feared no competition in the territory it claimed for itself.

I would suggest we arrange another meeting with Mr. Kuehl, when you can be present.

Yours very truly,

J. T. Trippe,
President.

Mr. Richard F. Hoyt,
25 Broad Street,
New York City.

Dear Dick:

Yesterday, Dipl. Ing. Hermann Kuehl, representing SCADTA and Dr. Von Bauer, together with Dr. Von Bauer's personal secretary called, to suggest an arrangement whereby Pan American Airways, Inc., would agree not to operate between the Canal Zone and Curacao, and the Canal Zone and Guayaquil, Ecuador, respectively.

I advised him that any such proposition could not be considered, owing to our United States Mail Contract situation.

Mr. Kuehl was unwilling to consider any other methods of cooperating in South America at this time. I told him of our desire to reach a mutually attractive agreement with SCADTA, if in any way possible. He appreciated our motives, but stated nothing could be done at this time, or within the next six to twelve months.

We discussed technical operating problems for several hours.

I plan to see him again before he leaves for Berlin next week.

I consider this conference relieves us of any moral obligation to attempt further to cooperate with Dr. Von Bauer, in preference to making any other arrangements for concessions in his territory, and have so advised Mr. Grosvenor, as per the attached copy of my letter to him of yesterday, which I am sending for your files.

Sincerely,

JTT:B

Mr. R. B. Bevier,
54 Franklin Street,
New York City.

Dear Dick:

I am attaching, herewith, for your information, copy of a letter of instructions handed to Mr. Harold Harris, before he left for Lima last Saturday.

We attempted to hold a Board Meeting last Thursday afternoon, to formally consider and act upon a proposition to jointly develop with the Grace interests, Air Service on the West Coast. Inasmuch as you were in Cleveland, we were unable to secure a quorum, and the matter will have to be considered and confirmed at our next meeting.

Mr. Priester hired Walter White as Field Manager for Havana or Camaguey, last week. Before he left, he came into my office and told me of some difficulties he was having, which I would like very much to talk over with you. Needless to say, I could offer him no encouragement in any of his personal troubles.

I tried to reach you on the telephone this morning, and am awaiting with much interest to hear news of your Cleveland trip.

With kind personal regards, I remain,

Sincerely,

AVIATION CORPORATION OF THE AMERICAS

100 East 42nd Street—New York

September 20, 1928.

Mr. William P. Cogswell,
W. R. Grace & Company,
10 Hanover Square,
New York City.

Dear Mr. Cogswell:

Following our telephone conversation this afternoon, I would suggest that a cable be dispatched to Harris, via your Lima Office, as follows:

"DISPATCHES INDICATE HUFF DALAND INAUGURATED SERVICE. CONFIRM PREVIOUS INSTRUCTIONS ANY SUCH OPERATIONS HUFF DALAND ACCOUNT. UNDERTAKE NO OPERATIONS PERUVIAN AIRWAY ACCOUNT UNTIL CONCESSIONS TRANSFERRED. DELIVERY FAIRCHILD BEING HELD PENDING AVIATION CORPORATION INSTRUCTIONS PERUVIAN AIRWAYS. TRIPPE."

For your information, I am also attaching copy of my letter to Mr. Patchen, under even date.

We have not yet received the information from the Radio Corporation relative to transmitting stations on the West Coast. I have followed this matter up and expect to receive same tomorrow.

As stated over the telephone yesterday, copy of Major Dargue's report to W. R. Grace & Company, relative to the proposed West Coast Service, would be of interest, in completing the estimates now under way.

Very truly yours,

POST OFFICE DEPARTMENT

Second Assistant Postmaster General

Personal & Confidential — Minneapolis, Minn.

October 4, 1928.

Dear Mr. Trippe:

The enclosed article cut from the New York Tribune, has been sent to me, from Washington. The issue was Oct. 3. The Post Office Department is getting dam sick and tired of the endless publicity, that is being thrown out, telling of all the wonderful things being done for Air Mail contracts and operators, by other government departments, with no mention of the Post Office Dept: and this last one is a joke. If it was not for the above department there would be no Aviation Corporation of America, or Pan American Airways either: This is not only true of the aviators end, as far as Mail contracts are concerned, but it is true of mail contracts on American ships sailing the seven seas. If any one has stood for progress of these two forms of contracts it has been my chief, the Postmaster General.

Now to have an article come out such as this, plainly evident carefully prepared, it gets under our skin. Please do not think I object to its omission of my name. I can get all the publicity necessary for me, but the lower marked paragraph is a *joke*.

When I see you, will give you some more. No wonder the Big chief gets sore. Who in hell has the money for these contracts. You know as well as I do.

Yours very truly,

(Signed) W. IRVING GLOVER

November 23, 1928.

Richard F. Hoyt Esq.,
c/o Hayden, Stone & Co.,
25 Broad Street,
New York City.

Dear Mr. Hoyt:—

I had a very pleasant talk with Mr. Struthmann who is willing to do everything he can in the matter of seeking the concession from the Argentine Government. He seems to think it is a matter for an effective lawyer and had one of your own people in mind.

Since talking to him I learned from one of our South American officials that Mr. Vincente Lopez, who recently retired from the position of Procurador General of Argentine and who is a very eminent lawyer whom we have employed in the past, is available (by reason of his retirement from the Government) to undertake such a task. He has served under and is personally friendly with the last three Presidents of Argentine, including the new president, Senor Irogoyen.

I know Mr. Lopez personally and he is certainly a live wire and has great influence not only on his own account but also because his grandfather was one of the great Argentine patriots. I think he, with the assistance and co-operation of your people would probably be very effective and Mr. Struthmann thinks we ought to try to get the support of Carlos Thornquist, who is, of course, splendidly situated to help if he desires.

Very truly yours,

R. H. PATCHIN

VIA AIR MAIL

Mr. C. V. Whitney,
Hotel St. Regis,
Mexico City, Mexico.

Dear Sonny:

I was sorry not to have been able to return to your office last Friday in time to reach you before you left for New Orleans.

No doubt Francis gave you a summary of developments and advised that I was mailing a preliminary report of developments to you at Mexico City, via Air Mail.

We are having some difficulty with Grace in persuading them to push the West Coast extension operations and request an immediate advertisement, which I feel should be our procedure, in view of competition both in the Argentine and, perhaps, in the States. We expect to meet again today for the final decision.

You no doubt have seen the releases covering the christening ceremonies in Washington last week. We ran into some hard luck, but, on the whole, I believe the results were satisfactory.

As you know, the F-10 to be christened was damaged on the manufacturer's test flight, and it was not until about fourteen hours before the ceremony was actually to take place that we knew the ship would not be available.

We took up with the Pan-American Union and Officials of the Government, the question of whether or not it would be best to cancel everything or go ahead with a substitute ship. They were all unanimous in the opinion that we should go ahead.

We had an all-night session getting the substitute ship, pilot and crew, down in time, but succeeded and the exercises at the Field went off very smoothly indeed.

I am enclosing herewith additional data which I have been able to secure covering Air Mail developments in Mexico, as follows:

1. Confidential reports from the Agent of the Ward Line, dated October 19th and November 6th, respectively.
2. Memorandum covering the general situation in regard to Air Transportation Concessions and Air Mail in Mexico.

Be sure to advise us fully relative to your negotiations with Rihl and a general summary of conditions, in order that we may have same as soon as he reaches New York, which should be December 6th.

With best regards,

Sincerely,

JTT/s

[fol. 2487]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 117

W. R. GRACE & CO.
NEW YORK

November 27, 1928.

Memorandum for Mr. Hout:

I have been working on the Pan American Airways estimate of capital investment and operating expenses of Colon-Valparaiso air transport service. The Pan-American Airways estimate is based on three round trips a week, total capital investment $1,689,000., annual operating costs $1,971,000., operating cost per mile $1.69 and estimated mail revenue from three trips weekly $1,060,000., leaving approximately $900,000. annually to be made up from passengers and mail pay from South American countries. In our opinion this or anything like it is impossible of accomplishment on the West Coast of South America.

We have approached the question from seeing how inexpensive a service of one trip per week could be established as a beginning.

Mr. W. L. Jacob who is a pilot and was a squadron commander in the late war and who spent five years on the West Coast as a mining engineer and mine operator and is familiar with cost of skilled and unskilled labor, building construction, etc., there, has prepared the attached estimate based on flight equipment with ample spare planes and spare engines and a minimum of ground organization.

The idea underlying this estimate is that the route should be divided into three divisions, each of which should be in charge of a manager responsible for that division and that the considerable resources of W. R. Grace & Co. and the mining, industrial, engineering and shipping companies should be drawn upon for mechanics except for two chief mechanics to be sent from here.

[fol. 2488] This contemplates part time employment of resident mechanics who would otherwise have to be transported from the United States with no certainty of their

efficiency or permanency after arrival. The Peruvian and Chilean armies and navies and the flying force at the Canal have considerable mechanical force. As you know, the industrial operations of American companies in Peru and Chile are highly developed and internal combustion engines are an old story to them. For instance International Petroleum Co. has extensive shops at Talara and have offered to give us repair facilities. W. R. Grace & Co. have considerable engineering and mechanical staffs all along the Coast. Clerical assistance, business management, book keeping, etc., can be arranged with Grace on a part time basis thus giving the service of staff already in the country and sure to remain there. This saves transportation expense and salary account.

The net result of this estimate is that we see a possibility of providing a weekly service for a capital investment of $200,000. (in addition to the capital already invested in the Peruvian Airways Corp) total annual operating costs including depreciation, obsolescence, and interest, of $202,000., or roughly 80¢ a mile. We are working up an estimate based on multi-motored planes.

Annual revenue from U. S. postal contract on one trip a week is estimated at $7,000. per outward voyage or $364,000. a year so that even with an increase of operating costs over the figures given here, such service could be made to pay on the mail contract alone, leaving fair profit out of passenger and local mails. Two months operations Peruvian Airways shows costs of 58¢ a mile, revenue 43¢.

I send this estimate for your information and comment as a preliminary to further discussion.

Letter #31

Lima,

December 5th, 1928.

Peruvian Airways Corporation.
NEW YORK.

Dear Sirs:—

Mr. Hoover spent a half hour with me here together with Ambassador Moore and Capt. Crow on the question of U.S. air mail operation from the Canal Zone south. His idea is that airways should be operated by the various Governments concerned and in his speech last night he recommended that a conference of the various countries along the route should be arranged in order to assure the installation of the proper air ports and air way facilities at the expense of the various Governments concerned.

He believes that the operation of the line, however, should be in the hands of private individuals such as ourselves. Considerable discussion brought out the fact that he favours night flying along such portions of the route as are safe for that type of operation because of the necessity for additional speed in their transportation of mails and passengers.

He was very pleased with the operating schedule which I showed, which is schedule C of my report to Trippe dated August 5th entitled "Details of airline on West Coast of South America."

Various local conditions on the route from the Canal to Guayaquil were discussed with him and although he seemed to favour land machines for this operation at first, upon being informed on the physical situation and operating conditions as well as the fact that the Pacific Ocean is never rough enough to endanger amphibians or sea planes [fol. 2492] he seems to agree that some type of water machine would be more desirable.

He requested information as to the possibility of local traffic and the likelihood of the line being self supporting. He was assured that local traffic would not pay but he assured me that the U. S. Government would liberally subsidize our air mail operation.

His ideas were that we should secure nonexclusive concessions for the operation in foreign countries concerned with U.S. Government assistance and by means of allocation to us of U.S. air mail contract securing sufficient income to assure us of actual exclusive operation since the larger part of the cost would be born by the U.S. air mail contract.

He asked what I believed to be the ways in which the U.S. Government could help us at the present time and I gave him the following:

1. Keep all foreign countries out of the Panama Canal.

2. Assist us in the foreign countries concerned, with the securing of our concessions.

3. Advertise a Canal to Valparaiso air mail contract in the near future.

4. After the contract is advertised and let, then let the Senate confirm the Havana Aviation Committee.

5. By diplomatic arrangements see that time and expense of clearing border stations on international boundaries be minimized.

Mr. Hoover is anxious that the line go from the Canal to Buenos Aires and seemed to be satisfied that the W. Coast was the only logical route.

He spent some time questioning me on the feasibility of the Santiago, Buenos Aires operation which I assured him [fol. 2493] was perfectly feasible and that I believed that the Latacoere had some sort of contract with the Chilean Government with regard to this line.

Mr. Hoover closed with the congratulatory statement that he had no idea that the line had been so thoroughly worked out and believed had laid the fundamentary ground work which was a great step in advance towards the completion of the air mail line.

As soon as possible I plan to go to Ecuador and attempt the initiation of a concession but believe no time should be lost in purchasing at least one and better two additional planes with a higher cruising speed than the Fairchild that we now possess and a greater cabin capacity and in addition it would be necessary to secure floats for our present Fairchild if it is to be used for the Guayaquil shuttle service.

At the present time we are skating on extremely thin ice in attempting an operation of the character we are now carrying out with only one airplane since the entire operation is likely to suffer a severe set back if the airplane for any reason is damaged.

Yours very truly,

PERUVIAN AIRWAYS CORPORATION

H. R. HARRIS (Signed)
Vice President and General Manager

[fol. 2494]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 119

December 22nd, 1928.

OPERATING HISTORY OF PAN AMERICAN AIRWAYS, INC.

Pan American Airways, Inc., was incorporated under the Laws of the State of New York on March 14th, 1927.

On July 19th, 1927, the Company entered into a contract with the U. S. Post Office Department to transport, by Airplane, all first-class mail between Key West, Florida, and Havana, Cuba. This was the first, and for the next year the only air mail contract to a foreign country.

On September 8th, 1927, a contract was secured from the Government of Cuba, to transport Cuban mail to the United States.

A first-class Airport was constructed at Key West, which was designated as the first Airport of Entry in the United States.

On October 28th, 1927, daily service was inaugurated between Key West, Florida, and Havana, Cuba.

Tri-motor Fokker, cabin monoplanes, equipped with Wright "Whirlwind" motors were used as regular equipment.

Until September 15th, 1928, when the service was extended from Key West to Miami, all the United States mail to Cuba was handled with 100% regularity. On the Northbound service, two flights were not completed; in one case the ship returning to Havana because of weather conditions, and in the second case, although equipped with radio, the ship missed Key West and was forced to land in the water fifty miles off Tampa—with the loss of one passenger. This accident was entirely due to lack of radio facilities at Key West, the installation of which, under the Department of Commerce, had been somewhat delayed—for reasons beyond their control.

In July, 1928, Pan American Airways, Inc., was awarded additional U. S. Mail Contracts to Porto Rico, with options to extend to Trinidad; and to the Canal Zone, and with further options to extend along the coast of South America, via Colombia, Venezuela and Trinidad, to Brazil.

[fol. 2495] In October, 1928, the Company was awarded mail contracts to Nassau, Bahamas.

The United States terminus for these contract routes was made Miami, Florida, at which point the Company has constructed a large, modern airport, with complete facilities. It is believed that this Airport, now practically completed, is the most modern in existence at this time.

The Service to Nassau will be inaugurated on January 2nd, 1929; to Porto Rico, January 9th, and to the Canal Zone on January 11th.

For your information, I am attaching herewith photographs and views of the Company's Passenger Terminal, hangars, and other structures.

In January, 1929, the Company's fleet of aircraft will include:

6 Tri-Motor Fokker F-10-As, with 400 h.p. Wasp Motors.

1 Ford large wing Tri-motor, with 400 h.p. Wasp motors.

2 Tri-motor Fokker F-8s, with 200 h.p. "Whirlwind" motors.

2 Twin-engined Sikorsky Amphibians, equipped with Wasp motors

3 Loening Amphibians, equipped with 500 h.p. Cyclone motors.

1 Keystone tri-motor, equipped with 200 h.p. "Whirlwind" motors.

During the past year, the work preparatory to placing these routes in operation, has been sub-divided under the following headings:

(a) Securing the necessary operating rights and legal standing in the several countries over which service will be maintained. In the absence of any general Aviation Convention, contracts between the Company itself and the various governments have had to be negotiated, executed, and ratified.

It was essential that such contracts be as broad as possible, permitting absolute freedom of action, on the one [fol. 2496] hand, in fixing rates and tariffs, and providing freedom from taxation, import duties, and similar restrictions, on the other hand.

License to erect and maintain necessary radio apparatus for ground communications and air navigation, without interference from existing concessions or laws, was also essential.

The Form "B" concession, attached herewith, was drafted after long and careful study, to cover these requirements.

A proposal has not yet been submitted to Panama, at the request of the State Department, owing to the extremely delicate local situation.

In British Honduras the Form B cannot be had, owing to conflict with certain British Imperial Treaties and laws. The situation is described hereafter.

For your information, I am attaching copy of the general form of concession used.

(b) Simplification of Clearance Procedure.

The Inter-Departmental Committee, under the Chairmanship of Assistant Secretary of State, Francis White, has been closely cooperating with the Company in extending service to Central and South America for the past year.

A sub-Committee of the Inter-Departmental Committee has been working for the past seven months with representatives of the Company in formulating adequate regulations to cover the clearance of aircraft in international service.

A year ago, thirteen different forms were required to be executed before an aircraft could clear for a foreign port. Actual direct fees varied from $34.00 on a week-day to approximately $71.00 on a holiday.

The new regulations, which are being released this week by the four Departments concerned at Washington, will reduce the thirteen forms to but three, and entirely doing away with fees. The new American regulations are being used as a model by the other Republics in Central and South America.

We expect very shortly that suitable regulations will be enforced in all the countries North of the Zone, and in addition, in Venezuela, Perú and Chile. The few remain- [fol. 2497] ing countries have also indicated that they will follow along very shortly.

International Air Commerce between more than two or three countries would have been impossible until this important change, removing aircraft from marine clearance regulations had been completed, following a year's patient missionary work by Pan American Airways, Inc.

(c) Installation of International Airway:

In the United States the Department of Commerce, under the provisions of the Air Navigation Act, constructs and maintains the Airway, as well as all aids to Air Navigation. In the foreign field, Pan American has had to construct its own airway. This important work has been proceeding over a year, under the direction of Mr. J. E. Whitbeck, the Company's Airways Engineer. I attempted to cover the difficult problems connected with the establishment of an International Airway in a paper which I was asked to read before the International Civil Aviation Conference in Washington last week. I am attaching a copy of this paper, for your information.

(d) Radio communications are essential to the proper control and guidance of aircraft, especially so when flying over sparsely settled routes in Central and South America.

Pan American, many months ago, entered into a joint agreement with the Radio Corporation of America to de-

velop adequate ground and aircraft apparatus. It is believed that the apparatus which has been developed during the past nine months is equal, if not superior, to any in service on the large European lines. This equipment, completely developed, is now available to the whole United States Air Transport industry.

The Pan American organization has been laid out to permit of the adding of additional Operating Divisions as the system expands.

Division Headquarters for routes radiating from Miami to Nassau, to Havana, to Panama and to Porto Rico, are maintained at Miami.

For some months past, the Company has been making arrangements for service in Mexico, through the medium of the Mexican Aviation Company, which Company now operates a regular service between Tampico and Mexico City, and between Tampico and Merida, Yucatan—a stop on the Canal Zone.

[fol. 2498] The Bill now pending before Congress, which would amend the March 8th Act, under which all existing Pan American contracts have been let, would permit of American mail being handled in Mexico over this route.

In his annual message to the President, Postmaster General New has favorably mentioned the Bill, and from present indications, it will be given every consideration at the current short session of Congress.

Pan American, early last summer, undertook jointly with W. R. Grace & Company, to extend its service on the West Coast of South America to Valparaiso and Buenos Aires. This arrangement was made to insure receiving for the Transport Company the full benefit of the local Grace Houses scattered along the West Coast.

Other routes in South America, along the North and East Coast, together with possible extensions to the interior of Brazil, Venezuela and Colombia, are being handled by Pan American alone.

For nearly a year, a thorough technical and economic air survey of South America has been carried on. Contracts covering the transportation of Northbound mail, as well as full operating privileges, are pending at many points.

Actual service in Peru, between Lima and Talara—a distance of 680 miles—has been under way since September 15th. It is expected that the service will be extended to Guayaquil, Ecuador, and Valparaiso, Chile, within the next six weeks.

To date, no operating rights for Colombia have been available, owing to the existing difficulties between that Government and the United States, resulting from the Canal Zone authorities having refused, for three years, the request of the German Colombian Company to operate through Panama and land at the Zone.

As soon as a solution to the Colombian impasse has been reached, either by the ratification of the Pan American Aviation Convention by that country, or an exchange of privileges between Pan American and the SCADTA, it will be possible to link up the present service on the West Coast to the Pan American system at the Zone, thereby insuring through service between Miami and Mollendo, Peru, or Valparaiso, Chile.

To properly connect the Pan American system with the domestic transportation system in the United States, the Eastern Atlantic Coast Line and the Florida East Coast Railroads have changed train schedules. Both of these roads are substantial stockholders in Aviation Corporation of the Americas, the Holding Company for Pan American Airways, Inc.

Through International air rail tickets to Nassau, Cuba and the West Indies will be on sale January 2nd, 1929, at all points on these lines and on their six affiliated rail roads, which include the huge Pennsylvania System.

Pitcairn Aviation, Inc., the domestic connector for the routes between New York and Miami, will inaugurate first

section—that between Atlanta, Georgia and Miami, Florida, in operation January 1st, 1929, thereby linking the Pan American System with the domestic Air Mail System in the United States.

December 24th, 1928.

Col. Henry Breckinridge,
455 East 57th Street,
New York City.

Dear Colonel Breckinridge:

Supplementing my memorandum to you of yesterday afternoon, I would submit the following information which, I believe, was not adequately covered in that memorandum:

Pan American Airways, Inc., holds the following mail contracts with the United States Government:

Contract No. 4, which expires July 1st, 1933, to carry United States Mail from Miami, Florida, to Havana, Cuba.

Contract No. 5, to carry United States Mail from Miami, Florida, via Cuba, Yucatan, and Central America, to the Canal Zone, *in both directions*, with options to extend from the Zone along the North Coast of South America as far as Brazil.

Contract No. 6, from Miami, Florida, via Cuba, Haiti, Santo Domingo, to San Juan, Porto Rico, *in both directions*, with option to extend along the Windward Islands to meet the other extension of Contract No. 5 at Trinidad.

Contract No. 7, from Miami, Florida, to Nassau, Bahamas.

The three major contracts—Nos. 5, 6 and 7, run for a period of ten years. Payment is at the rate of $2.00 per

airplane mile over the practical airway route selected by the contractor.

The mail load to be carried is limited to 800 pounds, thereby providing substantial payload capacity for passengers, express, and other cargo.

Last week the Department accepted the Company's proposal to carry Air Mail at a high surtax, rather than first [fol. 250] class mail over these routes. The surtax on mail to the Zone will be 25c per ½ ounce, which will net approximately $5,000,000 when the load reaches 500 pounds, or $2.00 per airplane mile for the 2,500 mile airway flight to the Zone. In this way, we expect the Government would get back, after a reasonable period of educating the public, the full $2.00 per mile it pays Pan American.

The system would not then be dependent on what practically amounts to a Government subsidy, but rather it will pay its own way.

Additional appropriations to cover the large number of feeder lines the Company plans to establish and operate in South America, should then be easily available.

The payments which will be received from the United States Government alone, under all the existing contracts with the Company, should aggregate Six Million Dollars per year. This amount will serve as a substantial "Backlog" to cover operating costs.

The Company will receive the following additional mail revenue:

(a) From all International Air Mail Traffic between the various countries served by our routes.

(b) All revenue from mail consigned to the United States, including transit mail to Canada and Europe.

With respect to item "b" above, the Post Office Department has agreed not to negotiate with South American countries for carrying their mail between the Canal Zone and the United States. This might be done, for Pan American is under contract to carry up to 800 pounds of

mail from the Canal Zone North, on a daily schedule, and our Government might well negotiate with the South American Governments to carry their mail from the Zone to Florida up to the 800 pound limit.

The Company can and has taken the position of submitting proposals to large South American countries to carry mail all the way to the United States. Our Company's counsel, Mr. Elihu Root, Jr., feels that there is some doubt under the existing act of May 8th, as to the authority of the Department in contracting for return mail from the Canal Zone and Porto Rico.

[fol. 2502] On the other hand, the Post Office Department officials feel that the chances of the Comptroller not passing our vouchers for this service, in his estimation are very slight indeed. Nevertheless, it is a hazard and I feel you should be fully informed of this situation.

To remedy the loose language of the existing Act, a new Bill, which was drafted by the Post Office Department after conferences with the Company, has been introduced as an administrative measure. We have been informed that it has every chance of passage at the current short session. I am attaching copy of the existing Act and the proposed Bill.

The most serious difficulties confronting the Company in extending its service throughout South America is the possibility of losing the Northbound contracts from Chile, Argentine and Uruguay.

Beyond the Canal Zone, United States Mail Contracts can be had only on a one-way haul basis. Were the Luft Hansa or the Aero Postale to secure the Northbound contract on a long term basis, as they have already secured the Eastbound mail to Europe, the situation would indeed be grave.

The Company, assisted by the State Department, is making every effort to get these contracts which are the economic key to the South American situation.

We expect favorable action to our proposed concession now pending in Chile within thirty days.

The arrangements we are proposing, for your consideration, would also be of inestimable value in speedily securing operating rights in Colombia, and the Northbound Argentine and Uruguayan Mail Contracts.

As soon as these two single matters are cleared up, I feel the Company, in cooperation with Grace, can immediately extend the type of American Air Transport Service to all South America, which our plans contemplated.

The service that would then become immediately available is exactly what the Administration desired a year ago, when the Pan American program was adopted.

In closing, I would advise you that much time has been spent in attempting to clear up the highly competitive and delicate situation which has existed in Colombia for some time past.

[illegible] personally went to Berlin in October to see the Directors of the SCADTA and there attempted to purchase the control of this Company, offering substantially more than what the Company was worth as a going business. For political reasons, however, nothing came of these negotiations, and we must plan through Colombia in the face of competition from this well entrenched German Colombia.

The terms of the Versailles Air Convention of 1919, to which Great Britain is a party, precludes an American plane from flying through and over British Honduras—a Crown Colony. Here, also, after many negotiations in London and Washington, not only formally through the State Department, but informally with the Colonial Office, the Air Ministry, and Post Office, we have been able to arrive at a solution of the difficulty by persuading the British Government to construe the clause "... temporary permission ..." to mean not a single flight, as heretofore was the case, but "permission to operate for a period up to five years, with renewal for similar periods subject to the consent of the British Government."

I am sorry I did not include the additional data in my memorandum sent you yesterday afternoon. However, I am

sending this to your office, for your confidential information by messenger, and hope it will reach you in time to be of service.

Sincerely,

JTT/s

PAN AMERICAN AIRWAYS, INC.
General Offices
100 East 42nd Street—New York City

January 5, 1929.

Mr. H. Case Willcox,
25 Broadway,
New York City.

Dear Sir:

This will confirm our verbal conversation concerning the retention of your services in our interest as follows:

You are to proceed to the Republic of Colombia and to use your best efforts in our interests to secure and to put into execution the program of air service which we have discussed to be introduced in the Republic of Colombia. You are to especially use your best efforts along the following lines:

(1) To conclude all preliminary transfers, contracts, options, etc. in New York City and also such as are required in the Republic of Colombia, to place the Aviation Corporation of the Americas, Inc. in a position to own or control 100% of the capital stock of the Colombian Aviation Corporation at Bogota and on such portion of stock as is optioned to arrange that we may,

if desired, exercise these options completely at any time up to January 1st, 1930.

(2) Upon the conclusion of the foregoing, you will at once endeavor in Colombia to place the Colombian American Aviation Corporation in the field as an active aviation company. Additional funds over and above the $10,000.00 originally contemplated to be expended, which shall be required from time to time by the Colombian American Aviation Corporation, may be advanced by A. C. A. through loans against interest bearing demand notes. You will at all times keep in mind that to all outward appearances the Colombian American Aviation Corporation is to function as a separate Colombian Aviation Company supported by strong American aviation interests.

In other words, neither the A. C. A. nor the Pan American Airways, Inc. are to be thrust forward or injected into the foreground until you are instructed to do so by myself or another executive officer of the Pan American Airways, Inc.

(3)(a) You will arrange to secure such legal permits and formalities that are required for the Colombian American Aviation Company to operate between some point to be designated on either the Panamanian-Colombian frontier or on the north coast of Colombia, and proceeding southerly to the Colombian Equadorian frontier. It is desired that you clearly understand that this service may be supplemented on both ends by foreign air service furnished by other of our subsidiary companies.

~~[fol. 2505] (b) As soon as you inform our New York office by cable that the necessary franchises or permits have been secured for the Pacific Coast Service, I will cable to the point where we will arrange to have a seaplane, pilot, and mechanic in waiting to be sent to the Colonel an entry point in accordance with the plan between us, which will be formulated in a separate letter.~~

J.T.T.

(c) We will make arrangements with the heads of the Colombian Steamship Service and also with Captain W. J. Flannagan, President of the Andian National Corporation of Toronto, with a view that they may offer you such facilities to assist you in the projection of our program.

(d) Formal notification will be made through the State Department to the American Minister, resident in Bogota, that you are a properly accredited representative of an affiliated or subsidiary aviation company of the Pan American Airways, Inc.

(e) You will endeavor to secure an air mail contract from the Colombian Government at $2.00 per flying mile (or the relative value in flying kilometers) over the route known as the Magdalena River Service.

(f) Unless instructed to the contrary by us you will endeavor to secure an air mail contract for a service with right to carry passengers, etc. over a route which we have previously mentioned as the Interior City Circular Land Plane Route, provided no commitment be contained in said contract as to the date of commencement of regular scheduled service other than that of an obligation on the company's part to push the preliminary technical surveys of this route.

(g) To secure an air mail and passenger service along the North Coast of Colombia between the Panamanian and Venezuelian frontiers when authorized to proceed upon this negotiation by us.

4. In brief, you will endeavor to place the Colombian American Aviation Corporation in such a position in Colombia that it will be practically the major mail contractor to the Colombian Government.

******

All letter communications to you will be contained in sealed envelope addressed to you and contained in a larger

sealed plain envelope which is addressed to Mr. Samuel Haskell, General Manager of the Texas Corporation, Apartado Aereo 3622, Bogota, Colombia. All important mail to you will be addressed in this manner and will be stamped with Scadta air mail stamps which we understand we can purchase at the Interamerican Aerotravel and Supplies, Inc., 11 Broadway, New York City. Mail or letters of minor importance and on which it is not necessary that there be such great speed, we will enclose and send to the same party but with the following change in address: Samuel Haskell, General Manager, Texas Corporation, Apartado Postal 877, Bogota, Colombia. On this latter mail we will place the ordinary U.S. postage stamps which are required for mail to Colombia.

[fol. 2506] In communicating with us by cable you will address us as PANAIR, NEW YORK. In communicating with you by cable we will address you HECAWOX—BOGOTA. All cables to you from us will be signed by the relative secret code five letter combination of the sender. Until further notice Bentley's Complete Phrase Code will be used with a private supplementary code which will be handed to you as enclosure in this letter.

All air mail sent to you will be duplicated by copies sent by ordinary mail once per week and you will follow the same procedure in communicating with us.

You will address all of your mail communications in a sealed envelope addressed to us but contained in a plain white envelope addressed to Mr. R. G. Thatch, Room 2440, Graybar Building, New York City. All letters of yours which require speed will be covered by the existing air mail postage of Colombia.

Four hundred dollars ($400.00) of your monthly retaining fee will be deposited to your account in the Chase National Bank, 25 Broadway, New York City, on the first of each month, and the first payment will be made on February 1st, 1929.

You will be supplied with the sum of Thirty Five Hundred Dollars ($3500.00) prior to your sailing on January

ork for Colombia. From this amount you will deduct the additional Six Hundred Dollars ($600.00) per month of your retaining fee, and also disburse such necessary traveling and living expenses and such other incidental expenses as you may incur in the carrying out of our plans. The Pan American Airways, Inc. standard form for rendering fourteen day expense accounts will be supplied to you prior to your departure. You will regularly compile and mail by ordinary mail such fourteen day expense account statements promptly. We will arrange to cable you through the National City Bank of New York such additional sums of money as you notify us you will require to replenish and afford a revolving credit to you of at least $5,000.00, after you have accounted for the expended amounts to date upon the standard expense forms furnished by us. We have arranged that you be supplied with the Collect Card of the All America Cables Inc. which will entitle you to send collect cablegrams from any of the offices of this company abroad. Nevertheless you will submit an accurate account every fourteen days of your cables sent so that this office may check all statements of the All America Cables Inc. before payment. When necessary you will of course have to use the cable or radio services of other cable companies and payment will have to be made by you and charged on your expense account.

Before making any disbursements greater than $500.00 you will notify us and receive our consent unless such disbursement is in your judgment absolutely necessary in the safeguarding of some of our interests or in the projection of our program.

You will in all cases before taking any step or move of major importance communicate with us and receive our approval unless you find that it is absolutely necessary to act at once to safeguard our interests.

For the purpose of brevity in correspondence it will be mutually understood that the following abbreviations may be used in correspondence.

PANAIR : Pan American Airways, Inc.

SCADTA : Sociedad Colombo Alemana Transportes de Aereos.

[fol. 2507] A. C. A. : Aviation Corporation of the Americas, Inc.

Colombian American : Colombian American Aviation Corporation

We remain,

Very truly yours,

PAN AMERICAN AIRWAYS INC.

By (sgd) J. T. TRIPPE

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 422

MEMORANDUM

Date January 12, 1929.

To Mr. VALVERDE Dept.

From Mr. PATCHIN Dept.

SUBJECT:

Mr. Harris, General Manager of the Peruvian Airways Corporation cables us that he is in a position to go to Ecuador but he does not state *when* and for this reason have not yet replied to Guayaquil's cable.

I hope you will not think it necessary to instruct Von Linde not to go to Quito under any condition; such is the effect of the cable you propose as attached. If you should instruct Von Linde not to go to Quito under any condition, it seems to me that he will not be in a position to exert the Grace influence at all and that the whole burden would be thrown upon Harris who would probable find it very difficult to be absent from the operations of the Peruvian Airways for an indefinite period.

In other words, I should think the matter ought to be left somewhat to Von Lunde's judgment as we know he wont leave Guayaquil for any length of time.

As I wont be here on Monday I have asked Mr. Cogswell to discuss the matter with you.

R. H. P.

Other expenses	1,870.90	.057	5,408.70	.034
	$3,303.00	.178	25,040.32	.000

The following figures comprise an estimate of traffic expenses for west coast of South America service. This estimate was made in collaboration with Mr. Shine, Accountant for Pan American Airways.

Miles flown annually ____ 1,150,000.

ACTUAL

Item	Amount	Cost per Mile
Traffic Manager	$ 7,500.	$ .0 6
Asst. " " (2)	12,000.	.010
10 Division Agents	40,000.	.03 3
10 Intermediate Agents (½ time)	9,000.	.00 8
Total Management	$68,500.	.060

[fol. 2522]

ANNUAL

Item	Amount	Cost per Mile
(Brought Forward) . . .	$ 68,500.	.000
Outside Agencies	2,500.	.-
Clerical Salaries	5,000.	.04
Traveling expenses	10,000.	.0[illegible]
Publicity	15,000.	.01
Automotive Service	5,000.	.0[illegible]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 125

PAN AMERICAN AIRWAYS INC.
MEMORANDUM

Date January 25, 1929.

To. J. T. Trippe From Walter Phelps Jacob

Subject Estimates attached.

The attached estimate considers the proposed airway service on the west coast of South America from two angles:

First: Based on multi-motored equipment utilizing Sikorsky Amphibians between Colon, C.Z. and Callao, Peru, and tri-motor Fokkers between Callao, Peru and Santiago/Valparaiso, Chile, as set forth in pages 3 and 4, with corresponding operating costs on pages 6 and 7.

Second: Utilizing the same equipment, or Sikorsky Amphibians between Colon, C. Z. and Callao/Lima, Peru, substituting on the run between Callao/Lima, Peru and Santiago/Valparaiso, Chile single-motored land planes for the tri-motored Fokkers. On this latter service it is proposed to use Fairchild 7 place cabin monoplanes with Wasp motors on the schedule of either one or two trips per week. In the case of three trips per week, the third trip will be equipped with Mil-wing planes with Wright motors which will be restricted solely to the transportation of mail, carrying absolutely no passengers. The capital estimated for this service is shown on page 5 and the corresponding operating costs are set forth on pages 8 and 9.

Under capital expenditures the allowances for airports is detailed as follows:

Hangars	$10,000/$5,000.
Trucks, etc.	2,000.
Gas-pumps & tanks	2,000.
Tools, fire extinguishers, etc.	2,000.
Freight	1,000.
Contingencies	3,000.
Total	$20,000.

January 28th, 1929.

Pan American Airways, Inc.,
122 East 42nd Street,
New York City.

Dear Sirs:

Subject to your Company acquiring the necessary operating rights in Colombia, and our Company acquiring such privileges, on a reciprocal basis, in the Canal Zone, we hereby agree, in consideration of the sum of One Dollar ($1.00), receipt of which is hereby acknowledged, during the next eight months, to give you exclusive landing privileges at our Airports at:

Buenaventura and
Tumaco, Colombia.
Esmeralda and
Caraquez,
Guayaquil, Ecuador.

Compensation for the use of such facilities will be the usual fee commensurate for services rendered under similar conditions elsewhere.

We would request you, during this period, not to appoint our Agents to represent you in this territory.

In addition, of course, in the event of emergency, we will extend to you the courtesy of all our facilities, which we understand you in turn will extend to us.

Yours very truly,

Seadta.

ADVERTISEMENTS FOR FOREIGN AIR MAIL SERVICE

POST OFFICE DEPARTMENT

Washington, D.C., January 31, 1929

Sealed proposals will be received at the Office of the Second Assistant Postmaster General until 12 o'clock noon February 28, 1929, for carrying mails by air for a term of ten years from April 1, 1929, or such subsequent date as may be ordered by the Postmaster General, on the following described route, by a schedule satisfactory to the Postmaster General in safe and suitable aircraft.

From Cristobal, Canal Zone, by Buenaventura and Tumaco, Colombia, Esmeraldas and Guayaquil, Ecuador, Talara, Trajillo, Lima, Lomas and Mollendo, Peru, Arica, Iquique, Antofagasta, Caldera and Coquimbo, to Santiago, Chile, and return, three times a week.

(The contractor may be permitted to omit service south of Mollendo, Peru, for a reasonable time at the discretion of the Postmaster General, pending completion of operating arrangements.)

Service on this route may be extended at the option of the Post Office Department, from Santiago, Chile, by such intermediate points as the Postmaster General may determine, to Buenos Aires, Argentina, and Montevideo, Uruguay, and back, at not exceeding pro rata allowance of additional pay.

All bidders must submit with their bids evidence satisfactory to the Postmaster General that they are in a position to begin service within the time required and properly maintain it.

The specified load required at the mileage rate will not exceed 800 pounds a trip each way. Any excess mails shall be carried at rates per pound.

Bids must state rate per mile for the specified load of not exceeding 800 pounds, and a rate per pound per thousand miles for excess mails, such rate for excess mails to bear the ratio of 50 per cent of the rate per mile for the specified load; that is, if a bid is $2.00 a mile for the specified load the rate for excess mails must be $1.00 per pound per thousand miles or pro rata thereof for greater or less mileage, or if a bid is $1.50 a mile for the specified load the rate for excess mails must be $0.75 per pound per thousand miles or pro rata thereof for greater or less mileage, etc. No other bids will be considered.

Approximate mileage, subject to correction, 3,400 miles.
Bond required with bid, $25,000.

FURTHER PROVISIONS OF THE ADVERTISEMENT AND INSTRUCTIONS TO BIDDERS.

The Department reserves the right to increase or decrease the number of intermediate stops, or the number of trips per [fol. 2526] week, and to change the termini of the route, to dispatch mail on any plane of the contractor flown over the route, and to modify or change the schedule as the needs of the service require; also to extend or curtail the route, with pro rata allowance or deduction of pay.

The contractor will be required to receive and deliver mails at each post office on the route, unless other provision is made by the Department.

The contractor must make his own arrangements for landing fields, lighthouses, radio stations and such other aids to navigation as may be necessary for the proper performance of the service.

No compensation will be allowed for trips not performed. However, pro rata pay will be allowed for the airline distance between stated points on the route traversed in a partially completed trip, within the discretion of the Postmaster General.

Deductions from pay may be made for suffering the mails to become wet, injured or destroyed or when a grade of service is rendered inferior to that stipulated in the contract; and for the loss of or depredation upon the mails

in the custody of the contractor or his agent, provided the loss is occasioned by their fault, or for other delinquencies in the discretion of the Postmaster General.

The Postmaster General may annul the contract or impose forfeitures, in his discretion, for repeated failures or for failure to perform service according to contract; for violating the Postal Laws and Regulations; for disobeying instructions of the Post Office Department; for subletting service without the consent of the Postmaster General, or assigning or transferring the contract; for combining to prevent others from bidding for the performance of postal service, and such annulment shall not impair the right of the Department to claim damages from the contractor and his sureties.

If in the opinion of the Postmaster General, the development of aircraft should be such as to render the equipment used on the route obsolete, so that it no longer meets the needs of the Department, the Postmaster General may call upon the contractor to provide suitable equipment and in the event of his failure to do so within such reasonable time as shall be given him, may terminate the contract.

Assignments of contracts or of interest in contracts are forbidden by law, and consequently cannot be allowed. Neither can bids nor interest in bids be transferred or assigned to other parties. Bidders will therefore take notice that they will be expected to provide the service awarded to them through the whole contract term.

Contractors under this advertisement may be permitted to sublet service to acceptable persons, by permission of the Postmaster General, at not less than the contract rate of pay.

[fol. 2527] The contract for the service shall contain, among others, the following covenant:

The contractor warrants that he has not employed any person to solicit or secure this contract upon any agreement for a commission, percentage, brokerage, or contingent fee. Breach of this warranty shall give the Government the right to annul the contract, or, in its discretion, to deduct

from the contract price or consideration the amount of such commission, percentage, brokerage, or contingent fees. This warranty shall not apply to commissions payable by contractors upon contracts or sales secured or made through bona fide established commercial or selling agencies maintained by the contractor for the purpose of securing business.

PROPOSALS

Proposals submitted in response to this advertisement will be subject to the Postal Laws and Regulations and to the conditions and requirements set forth in the instructions to bidders, copies of which, together with blank forms of proposal and accompanying bond, can be obtained from the Second Assistant Postmaster General, Division of International Postal Service, Washington, D.C., or from the Postmaster at the office where this circular is posted.

All proposals must be in the form prescribed by the Department and accompanied by a bond in the sum above stated with two or more individual sureties approved by a postmaster of the first, second or third class, which bond must be acceptable to the Postmaster General, such sureties to be shown to be owners of real estate valued above all incumbrances at an amount double the amount of the bond required, or a surety company which has complied with the provisions of the acts approved August 13, 1894, and March 23, 1910. A list of such surety companies may be found on Page 60 of the Official Postal Guide for July, 1928, a copy of which is furnished each postmaster. In lieu of surety bonds, bidders may deposit U. S. bonds amounting to $25,000, in accordance with Department requirements.

Bidders and their sureties are urged to acquaint themselves fully with the laws of Congress relating to contracts for carrying the mails (the more important provisions relating to Air Mail Service of which are cited herein) and to familiarize themselves with requirements set forth in this advertisement and with the service to be performed before they assume any liability as bidders or sureties, so as to prevent misapprehension or cause of complaint thereafter.

Bids should be for service as stated in the advertisement.

Bidders should state the number of planes it is proposed to provide for carrying the mails on the route (including the number in reserve for each plane in the air); description of planes, showing number of motors, horsepower, speed, cruising radius. All planes operated on the route must be satisfactory to the Postmaster General.

[fol. 2528] Bids in response to this advertisement should not exceed $2.00 per mile for a maximum load of 800 pounds.

When a bid is signed by an incorporated company it should be accompanied by evidence of the authority of the person signing the bid so to sign on behalf of the company. Such evidence may be a certified copy of the proceedings pursuant to which the person was elected or appointed an officer or agent of the company and that part of the by-laws showing his authority as such officer or agent to sign the bid; or a certified copy of a resolution of the board of directors or stockholders conferring such authority upon him.

Decision as to award of contract will be made as soon as practicable after the date of expiration of the advertisement, and the accepted bidder will be required to execute the formal contract prescribed by the Department covering service advertised with good and sufficient sureties acceptable to the Postmaster General, and file such contract within thirty days from date of acceptance of the proposal. The Postmaster General reserves the right to reject any and all bids.

If the accepted bidder fails to file a properly executed formal contract for the service in the Department within thirty days from the date of acceptance of the bid, or having executed the contract fails to provide the service required, he may be declared a failing bidder or contractor and proceedings taken according to law.

A proposal altered, or incomplete, in any of its essential terms can not be considered in competition with bids submitted in proper form.

Bids should be forwarded in time to reach the Office of the Second Assistant Postmaster General not later than

the time stated in the advertisement. Bids received after that time will not be considered in competition with bids received within the prescribed time.

Bids should be sent in *sealed envelope, superscribed "Airplane Proposal"* and addressed to the "Second Assistant Postmaster General, Division of International Postal Service, Post Office Department, Washington, D.C."

HARRY S. NEW
Postmaster General.

[fol. 2529]

PAN AMERICAN WORLD AIRWAYS INC. EXHIBIT 128

PAN AMERICAN AIRWAYS INC.
MEMORANDUM

Date February 19, 1929.

To Mr. R. H. Patchin, Vice President.

W. R. Grace & Company From Walter P. Jacobs.

In reference to the tentative estimate of proposed airway between Cojon, C.Z., and Santiago, Chile, I have just had a conversation with Mr. Trippe regarding the attached estimate, and he has expressed the following opinion:

The estimate itself sets forth what he believes to be a minimum working proposition. He feels that the line could be established within these figures, but that from the experience of the Pan American Airways, Inc., the actual requirements will probably run into a much larger figure.

He reports a conversation which Colonel Lindbergh had with Mr. Hoover last week, in which Mr. Hoover stated very emphatically that he felt the Miami to Panama Airline, and any airlines developed south of Panama throughout South America should be developed not alone with a view to carrying mails, but also to establishing a safe and thoroughly equipped passenger service. In order to accomplish this, he said that not only should the flying equipment be

of the best possible, but also the ground equipment should be made of the highest type. He emphasized the probable necessity of properly equipped machine shops, and establishment of radio stations.

In referring to the foregoing, Mr. Trippe states that an allowance of $750.00 an airway mile should be considered as a possible necessity for carrying out these ideas. This, in the case of the Panama-Santiago, Chile, run, would make a total requirement of approximately $2,700,000.

Although in making a bid for the United States air mail contract between Panama and Santiago, Chile, multi-motored flying equipment, or its equivalent, will have to be stipulated, yet it is highly probable that such will not be required at the outset. It is conceivable that all multi-motored planes will not be required on a three-trip-a-week schedule at any time, unless the operating air company determines to do so through their own policy, but that for one or two of these trips single motored planes could be substituted.

These questions are highly problematical, and of course there is very little precedent to go on, but the experience of Pan American Airways, Inc., indicates that the Post Office Department will cooperate to the fullest extent and make every effort possible to assist the contractors in carrying out their obligations on the most economical basis possible.

PAN AMERICAN WORLD AIRWAYS, INC., EXHIBIT 129

DEPARTMENT OF STATE

FOR THE PRESS February 23, 1929

AIRCRAFT FACILITIES IN UNITED STATES, PANAMA CANAL ZONE, AND COLOMBIA

The Secretary of State, Mr. Frank B. Kellogg, and the Minister of Colombia, Dr. Enrique Olaya, today signed an

exchange of notes identic in effect. Following is the text of the note signed by the Secretary of State:

"February 23, 1929

"Dr. Enrique Olaya,
Minister of Colombia,
Washington, D. C.

Sir:

"With reference to the conversations which you have had recently with the Department of State regarding the facilities which aircraft of United States registry will enjoy in Colombia for commercial aviation service and, reciprocally, in the United States including the Panama Canal Zone aircraft of Colombian registry, I take pleasure in confirming, by means of the present note, the understanding at which we have arrived, to wit:

"Commercial aircraft of United States registry will have permission to fly along the Atlantic and Pacific Coasts of Colombia and over the territory immediately adjacent thereto, to land on land or water, fuel, make repairs, and ship and discharge passengers, mail and cargo, in the Atlantic and Pacific ports of Colombia where there are authorities charged with carrying out the pertinent regulations, subject to regulations and provisions equivalent to those established for commercial aircraft of Colombian registry in the enclosures to this note.

"Reciprocally, commercial aircraft of Colombian registry will have permission to land on land or water in the Atlantic and Pacific ports of the United States including those of the Panama Canal Zone, and to fly between the ports of the Canal Zone following the route designated by the Governor of the Panama Canal, fuel, make repairs and ship and discharge passengers, mail and cargo, subject to the regulations and provisions which are enclosed with the present note, as follows:

"For the continental United States, the Air Commerce Act of 1926 and the Regulations promulgated pursuant thereto; for the Panama Canal Zone, Executive Orders Nos.

4971 and 5047 of September 28, 1928, and February 18, 1929, respectively, and the Provisional Regulations of the Governor of the Panama Canal issued pursuant thereto.

"All aircraft must carry out the respective Governmental regulations of both countries.

"If either of the two Governments decides to terminate the permission to which this agreement refers or to modify the regulations or provisions, it will give ninety days' previous notice thereof to the other Government.

"It is understood that the two Governments agree and will endeavor to give the greatest possible facilities to aircraft in international commercial communication service in order that they may land on land or water, fuel, and carry out the other services above mentioned with all desirable [fol. 2531] speed and efficacy.

"Accept, Sir, the renewed assurance of my highest consideration.

(Signed) FRANK B. KELLOGG,
Secretary of State.

[Handwritten notation 2-26-29]

AIR MAIL PROPOSAL, BOND AND OATHS

The undersigned, Pan American Grace Airways, Inc. whose post office address is 122 East 42nd Street, New York, N.Y. hereby proposes to carry the mails in safe and suitable aircraft on the route from Cristobal, Canal Zone, by Buenaventura and Tumaco, Colombia, Esmeraldas and Guayaquil, Ecuador, Talara, Trujillo, Lima, Lomas, and Mollendo, Peru, Arica Iquique, Antofagasta, Caldera and Coquimbo to Santiago, Chile and back, 3 times a week, on a schedule satisfactory to the Postmaster General; for a term

of two years beginning April 1st 1929, or such subsequent date as the Postmaster General may order, in accordance with the advertisement of the Postmaster General dated January 31, 1929, for compensation at the rate of $1.80 per mile each way for the shortest mail of not exceeding 800 pounds each way, plus a rate per pound equal to 50 per cent of said mail rate ($1.80 per pound per thousand miles, or pro rata for less or greater mileage, for any excess required to be carried on the same aircraft.

I propose to furnish the equipment specified below, or equal Number of planes 12 of which number 6 will be in use on the lines over which the contract to be executed pursuant to this proposal and to hold in reserve. Type of plane Cabin monoplanes of American manufacture Horse-power 420, 480, 1200. Speed at least 120 miles per hour cruising radius at least 500 miles. Number of motors multi engined except that 4 planes hold in reserve will be single engined and that such planes may be used where technically applicable in connection with the said routes.

This proposal is made in my own interest and not by any, as the representative of another, undisclosed principal, and with full knowledge of the distances over the route, the weight of the mail to be carried and all other pertinent facts, and in response to the notice and terms and also after careful examination of the forms and instructions attached and advertisement, and if accepted, I will enter into contract, with sureties to be approved by the Post Master General within thirty days after due notification that I have been selected to perform the service, and will not employ any agent or solicitor upon commission in any way contingent upon such procurement.

BOND

KNOW ALL MEN BY THESE PRESENTS, That Pan American Grace Airways, Inc. of New York City, in the State of New York, principal, , as sureties, are held and firmly bound unto the United States of America in the just and full sum of Twenty five Thousand ($25,000) dollars, lawful money of the United States, to be paid to the said United States of America or its duly appointed or authorized officer or officers; to the payment of which, well and truly to be made and done, we bind ourselves, our heirs, executors, administrators, successors, and assigns, jointly and severally, firmly by these presents.

WHEREAS, by an act of Congress approved June 23, 1874, entitled "An act making appropriations for the service of the Post Office Department for the Fiscal year ending June thirtieth, eighteen hundred and seventy-five, and for other purposes," it is provided: "that every proposal for carrying the mail shall be accompanied by the bond of the bidder, with sureties approved by a postmaster," in pursuance whereof and in compliance with the provisions of said law, this bond is made and executed, subject to all the terms, con-

ditions, and remedies thereon, in the said act provided and prescribed, to accompany the aforegoing and annexed proposal of the said Pan American Grace Airways, Inc., bidder.

Now, the Condition of the Said Obligation Is Such, That if the said bidder, as aforesaid, shall, within thirty days from the date of acceptance of the bid, enter into a contract with the United States of America, with good and sufficient sureties to be approved by the Postmaster General, to perform the services proposed in his said bid, and further shall perform said service according to his contract, then this obligation shall be void; otherwise to be in full force and obligation in law.

In Witness Whereof, We have hereunto set our hands and seals this 26th day of February, 1929.

Certificate of Postmaster as to Bidder

(To be executed if the sole surety on the bond is a surety company)

I, the undersigned, postmaster at Washington, D.C. after the exercise of due diligence to inform myself concerning Pan American Grace Airways, Inc. bidder and principal in the aforegoing bond, do hereby certify that, in my belief, he is a responsible and trustworthy And has the pecuniary ability to perform the service contemplated by this proposal; that the amount of compensation was entered in the

proposal before the signing of this certificate; that he is over twenty-one years of age, and not a postmaster, assistant postmaster, clerk in a post office, or a member of the immediate family of a postmaster or an assistant postmaster.

W. M. Mooney
Postmaster

Dated, Feb. 28, 1929.

Note.—The last above certificate must not be signed until the proposal is completed (except the signing of the bond on behalf of the surety company).

A postmaster must not divulge the amount of any proposal certified by him.

Any alteration by erasure or interlineation, of a material part of the foregoing proposal or bond, may cause it to be rejected, unless it appears by a note or memorandum of all parties to the bond that the alteration was made before the bond was signed and sealed.

If individual sureties are given, there must be at least two.

[fol. 2536]

Pan American World Airways, Inc. Exhibit 131

March 1, 1929

The Honorable, The Postmaster General
Post Office Department
Washington, D. C.

Dear Sir:

With reference to our bid to provide air mail service from Panama to Santiago, Chile, we beg to call your attention to the fact that we are not presenting a project to create an entirely new air transport service in South America. We are already a going concern with service over 1400 miles in Ecuador and Peru. We are owned by Pan American Airways, Inc., the only American company with experience

in air transport to foreign countries, and by W. R. Grace & Company, the only American concern having transportation, commercial and industrial organizations throughout the west coast of South America.

Our existing operations have been tested by experience. We have concessions and permits authorizing prompt operation in all countries, and we have already testified our faith by substantial investments in our existing going lines, operated despite loss in order to hold open the door for American commercial aviation in South America.

Respectfully,

Pan American Grace Airways, Inc.

By

Vice President

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 132

IMMEDIATE RELEASE INFORMATION SERVICE
MARCH 2, 1929 POST OFFICE DEPARTMENT

[Handwritten notation "2565 re Contract No. 9—Initial illegible]

Postmaster General New today awarded to the Pan American Grace Airways, of New York City, the contract for carrying the air mail between Cristobal, Canal Zone, and Santiago, Chile, which route, when put into operation, will be the longest one in the world.

In awarding the contract, Postmaster General New made the following statement:

"It is directed that the proposal of the Pan American Grace Airways, Inc., of New York, N. Y., submitted in response to the advertisement of January 31, 1929, for air mail service on the route between Cristobal, Canal Zone, and Santiago, Chile, for service as stated in the advertisement be accepted at the rate of $1.80 per mile and $.90 per pound, as stated in their proposal.

"In making this award the matter of the financial ability of the leading bidders or the integrity of the competing companies is not considered. That may be conceded. The award of contracts is based on other but very material considerations.

"This is the most important air mail contract that has yet been awarded. Its importance goes not alone to the financial ability of the bidders but more directly and to a far greater degree to their proven and recognized capacity for performing the service contemplated.

"The Pan American Company has filed evidence of extensive preparation for the operation of an air mail route through the countries with which arrangements are necessary. It has had this particular service in view for the last two years and has for that length of time been conducting negotiations and perfecting arrangements for the carrying on of the service if in the fulness of time it should be [fol. 2538] awarded the contract for it. It has the required franchises under which to operate in the countries to be served and over which the line passes. It is indeed operating through subsidiary companies already in existence over a considerable portion of the route under consideration. In addition to this it will have the benefit of all the facilities of the Grace Line of steamers now operating a firmly established service by sea along the whole line of the proposed air mail route.

"The low bidder does not have these facilities. It has not the advantage of a functioning organization and of an operating personnel already in the field. According to the statement of its president, which is a part of the file in this case, the company has no flying equipment. A number of gentlemen of undoubted financial ability have subscribed to this company's stock but it is admitted by its president that these subscriptions are dependent upon the award of contract to the company. It is thus plainly apparent that it has not the important advantage of possessing a fixed and functioning organization equipped to enter upon the work. I am convinced that under the most favorable circumstances the low bidder could not possibly place itself

in position to perform this service without the lapse of much time.

"In awarding the contract to the Pan American Company I am also greatly influenced by information obtained direct from the United States Ambassador to Cuba, Honorable Noble B. Judah. The Ambassador has informed me that the president of the company appearing as low bidder has figured in one or more projected aeronautical enterprises in Cuba, where his experiences have been unfortunate, resulting in complete failure. On the other hand, the Ambassador states that the Pan American Company is now operating lines to and through Cuba in a conspicuously successful manner.

[fol. 2539] "I would repeat that the contract in question is for a route most difficult to serve but at the same time of very great and far-reaching importance not only to the public but to the whole future of transportation by air. Failure would be a serious blow to the prestige of American aeronautical enterprise.

"Because of the facts herein enumerated, I am firm in the opinion that the best interests of the service, the Government, and the public to be served require that the award be made to the company best equipped to perform the service and I therefore make the award to the Pan American Grace Airways, Inc., of New York."

[fol. 2540]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 134

CONTRACT FOR FOREIGN AIR MAIL SERVICE

Route No. F. A. M. 9.

This Contract, made this 2d day of March, 1929, by and between the United States of America (by the Postmaster General) and the Pan American-Grace Airways, Inc., a corporation organized and existing under the laws of the State of Delaware, Contractor:

WITNESSETH, that whereas the said Pan American-Grace Airways, Inc., has been accepted as contractor on route No. F. A. M. 9 in conformity with the advertisement inviting proposals for the service specified herein, issued by the Postmaster General under date of January 31, 1929:

NOW THEREFORE, The said contractor undertakes, covenants and agrees with the United States of America:—

1. To carry mails for the United States of the specified load of not exceeding 800 pounds a trip each way and any excess mails required to be carried in safe and suitable aircraft from Cristobal, Canal Zone, by Buenaventura and Tumaco, Colombia, Esmeraldas and Guayaquil, Ecuador,

Talara, Truxillo, Lima, Lamas and Mollendo, Peru, Arica, Iquiqui, Antofagasta, Caldera and Coquimbo to Santiago, Chile, and return, three times a week, by a schedule satisfactory to the Postmaster General, and to perform the services and undertakings in connection therewith as specified in this contract, for and during the term of ten (10) years beginning April 1, 1929. (The contractor may be permitted to omit service south of Mollendo, Peru, for a reasonable time at the discretion of the Postmaster General, pending completion of operating arrangements.)

2. To receive and deliver the mails at each post office on the route, unless other provision is made by the Department. The contractor also undertakes, covenants and agrees with the United States and binds itself, to be answerable [fol. 2542] in damages to the United States for the proper care and transportation of the mails, and to be accountable for any loss or damage resulting to any such mail or any part thereof by reason of the failure to exercise due care on the part of any of contractor's officers, agents or employees in the custody, handling or transportation thereof.

For the services herein specified when performed in accordance with the provisions of this contract and evidence thereof shall have been filed with the Postmaster General, the said contractor is to be paid by the United States at the rate of $1.80 per mile each way for the specified loan of not exceeding 800 pounds each way, plus the rate of 90 cents per pound per thousand miles or pro rata thereof for greater or less mileage for any excess mails required to be carried in the same aircraft, based on statute miles by the shortest practicable airway distance between points on the route as determined by the Postmaster General; payments to be made monthly and as soon after the close of each month as accounts can be adjusted and settled; said pay to be subject, however, to be reduced or discontinued by the Postmaster General as hereinafter stipulated, or to be suspended in case of delinquency.

It is further stipulated and agreed by the contractor:—

1. That in case of failure from any cause to perform any service required by this contract a pro rata deduction shall

be made from the compensation of the contractor on account of such omitted service, except that pro rata pay will be allowed for the airway distance flown between stated points on the route traversed on a partially completed trip if no delay in the mails over the ordinary means of transportation has resulted.

2. That deduction from pay may be made for suffering the mails to become wet, damaged or destroyed, or when a grade of service is rendered inferior to that stipulated in [fol. 2543] the contract, or for the loss of or depredation upon the mails in the custody of the contractor or its agent, provided the loss is occasioned by their fault, or for other delinquencies, in the discretion of the Postmaster General.

3. That the Postmaster General may annul the contract or impose forfeitures, in his discretion, for repeated failures or for failure to perform service according to contract; for violating the Postal Laws and Regulations; for disobeying instructions of the Post Office Department; for subletting service without the consent of the Postmaster General, or assigning or transferring the contract; for combining to prevent others from bidding for the performance of postal service, and such annulment shall not impair the right of the Department to claim damages from the contractor and its surety.

It is further stipulated and agreed

1. That if in the opinion of the Postmaster General the development of aircraft should be such as to render the equipment used on the route obsolete, so that it no longer meets the needs of the Department, the Postmaster General may call upon the contractor to provide suitable equipment and in the event of its failure to do so within such reasonable time as shall be given it, may terminate the contract.

2. That mail apartments in all planes shall be made fireproof to the satisfaction of the Post Office Department.

3. That the Department may increase or decrease the number of intermediate stops, or the number of trips per week, and change the termini of the route, dispatch mail

on any plane of the contractor flown over the route, and modify or change the schedule as the needs of the service require; and the Department may also extend or curtail the route, with pro rata allowance or reduction of pay.

4. That service on this route may be extended at the option of the Post Office Department from Santiago, Chile, [fol. 2544] by such intermediate points as the Postmaster General may determine, to Buenos Aires, Argentine, and Montevideo, Uruguay, at not exceeding pro rata allowance of additional pay.

5. That the contractor must make its own arrangements for landing fields, lighthouses, radio stations and such other aids to navigation as may be necessary for the proper performance of the service.

6. That this contract covers all mails to and from the United States or its possessions, including parcel post; provided that the contractor shall have the right to make arrangements with intermediate countries for the exchange of local mails between such countries.

7. That during the continuance of this contract, if the postal interests shall require, by mutual agreement between the contractor and the Postmaster General, the contract rate of pay herein may be changed, but shall never exceed the rate herein provided.

8. That the contractor may be permitted to sublet the service to acceptable persons, by permission of the Postmaster General, at not less than the contract rate of pay.

9. That no member of or Delegate to Congress or Resident Commissioner shall be admitted to any share or part of this contract or agreement or to any benefit to arise thereupon.

10. That the contractor shall use flying equipment on the route of United States manufacture, shall use other equipment if practicable of United States manufacture, and shall employ necessary pilots and flying crews of United States citizenship where practicable to do so.

The contractor warrants that it has not employed any person to solicit or secure this contract upon any agreement for a commission, percentage, brokerage, or contingent fee. Breach of this warranty shall give the Government the right [fol. 2545] to annul the contract, or, in its discretion, to deduct from the contract price or consideration the amount of such commission, percentage, brokerage, or contingent fees. This warranty shall not apply to commissions payable by contractors upon contracts or sales secured or made through bona fide established commercial or selling agencies maintained by the contractor for the purpose of securing business.

This contract is also subject to all the provisions of the advertisement (though not all specifically stated herein) and to the provisions of the Postal Laws and Regulations applicable to this service.

IN WITNESS WHEREOF, The parties hereto have executed this contract.

Before the Honorable the Postmaster General

IN THE MATTER OF THE PROTEST AGAINST THE AWARD OF FOREIGN AIR MAIL CONTRACT NO. 9

MEMORANDUM ON BEHALF OF PAN AMERICAN-GRACE AIRWAYS, INC.

Elihu Root, Jr.
R. Walton Moore
Counsel for

[fol. 2549]

March 26, 1929.

THE HONORABLE THE POSTMASTER GENERAL,
Post Office Department,
Washington, D. C.

Sir:

This memorandum is submitted in behalf of Pan American Grace Airways, Inc. It relates to the controversy regarding the award of Foreign Air Mail Contract for Route No. 9.

On January 31, 1929, Postmaster General New advertised for bids for the carriage of foreign air mails on Route No. 9, bids to be filed prior to noon on February 28, 1929. The following bids were received:

Name of Bidder	Rate Per Mile for each lb. Load	Rate Per lb. for Each Mile
1. Fred D. Arnold, Washington, D. C.	$1.98	$1.00
2. Consolidated Aircraft Corporation, Buffalo, N. Y.	1.98	.99
3. Trimotor Safety Airways, Inc., New York, N. Y.	1.95	.975
4. Pan American Grace Airways, Inc., New York, N. Y.	1.80	.90
5. American International Airways, Inc., New York, N. Y.	1.44	.72

On March 2, 1929, an award was made to Pan American Grace Airways, Inc., and on March 4, 1929 a contract for the carriage of air mails on Route No. 9 was formally entered into between the United States and that Company. The Company at once embarked on the acquisition of additional equipment for use on the proposed route and the enlargement of its personnel.

[fol. 2550] On March 6th, 1929, American International Airways, Inc., protested against the award and the execution of this contract.

The grounds of the protest have been expressed in a letter of protest, in a first brief used at the hearing before the Postmaster General on March 13th, and in a second and more elaborate brief. We will restrict our comment to the grounds of protest finally expressed in this second brief:

I.

First Ground of Protest.

"* * * it was the duty of the Postmaster General to award the contract to the lowest bidder financially able to meet the terms of the proposal and who posted the required bond to guarantee such performance." (Protestant's Brief, p. 6).

and

that the Postmaster General abused his discretion "because he based his action upon matters outside the scope of the advertisement for bids" (Protestant's Brief, p. 28).

ANSWER TO FIRST GROUND OF PROTEST.

We deal with this ground of protest first because it involves a fundamental misconception which keeps appearing over and over again in the protestant's brief. The Act of March 2, 1929, under which the contract was awarded, does not provide that the award shall be made to "the lowest bidder financially able to meet the terms of the proposal and who posts the required bond to guarantee such performance". The Act sets up quite a different standard.

fol. 2551 The protestant seems to feel that if it complied with the requirements of the advertisement it was entitled to receive the award, and that if the Postmaster General "based his action on matters outside the scope of the advertisement" he was doing an illegal act. Of course, that position is absurd. Compliance with the terms of the advertisement entitles a bidder to have his bid considered. It does not give him a right to receive the award. This protestant could have its bid rejected if the Postmaster General had rejected the protesting Company's bid and excluded

it from consideration on the ground of non-compliance with the terms of the "proposal" or advertisement, there might have been something to argue about under this ground of protest. No such thing occurred. The Postmaster General, without regard to any deficiency in compliance with the requirements of the advertisement, chose to consider the protestant's bid, and after considering it, exercised the discretion vested in him by the Act of March 2, 1929.

[NOTE: We shall show later under Point VI of this brief that the protestant did not comply with the requirements of the advertisement in that it did not file the required bond until after the closing of bids and the award of the contract, and that if the award had been made to the protestant we would ourselves have had a valid ground of protest.]

II.

Second Ground of Protest.

"* * * there was an abuse of discretion in that a sound and reasonable discretion was not exercised by Postmaster General New because his action was not founded on facts * * *" (Protestant's Brief, p. 28).

[fol. 2552] —4—

ANSWER TO SECOND GROUND OF PROTEST.

A. *The Postmaster General exercised his discretion properly and wisely.*

The record before the Postmaster General revealed the following facts in regard to the two companies:

PAN AMERICAN-GRACE AIRWAYS, INC.	AMERICAN INTERNATIONAL AIRWAYS, INC.
ORGANIZATION	
Formed in January, 1929, by W. R Grace & Co., owner of the greatest, most successful and most efficiently operated transportation system between the United States	Formed about one week prior to date of opening bids.

and South America; and Aviation Corporation of the Americas, owner of Pan American Airways, Inc., and of Compania Mexicana de Aviacione, S. A.; Pan American Grace Airways, Inc., being itself owner of Peruvian Airways Corporation and Chilean Airways Corporation.	

CAPITALIZATION

One million dollars, fully paid.	Subscribed capital of one million dollars, none of which had been paid.

[fol. 2553]

CASH RESOURCES

One million dollars.	None.

EQUIPMENT ACTUALLY OWNED

Four Fairchild cabin monoplanes actually on west coast of South America; one Fairchild cabin monoplane and one Loening amphibian in transit south.	None.

EQUIPMENT UNDER OPTION

Pan American Airways, Inc., had under option three multi-motor Sikorsky amphibians (since contracted for), for use on this line.	None. Had letter from manufacturer stating manufacturer had "available for prompt delivery, five Fairchild airplanes . . ."

CONCESSIONS

Through Pan American Airways, Inc., had operating	None. Operating rights in Colombia could be obt

rights in Canal Zone, Panama and Ecuador; through Peruvian Airways Corporation had operating rights in Ecuador and Peru. Under diplomatic exchange of notes and by having made $25,000 deposit, through Pan American Airways, Inc., had operating rights in Colombia. Through Chilean Airways Corporation had assurance of flying rights in Chile.

[For detailed evidence supporting this analysis see Record of Hearing, March 13, 1929, pp. 67-76, Department Exhibits Nos. 7, 8, 8-B, 9, 9-A, 9-B, 10, and 12.]

tained under diplomatic exchange of notes by making deposit of $25,000 or otherwise complying with governmental regulations.)

[fol. 2554] —6—

LANDING FACILITIES

Pan American Airways, Inc., actually operating in Panama. Through Peruvian Airways Corporation actually operating in Ecuador and Peru. Pan American Airways, Inc., had eight months' exclusive contract for use of facilities of Scadta Company on coast of Colombia and in Ecuador. Through Chilean Airways Corporation had assurance of landing fields in Chile.

[For detailed evidence supporting this analysis see the references cited on page

"Working arrangement" with Scadta Company in Colombia and Ecuador, subject to prior exclusive eight months' contract of Pan American-Grace Airways, Inc., for use of Scadta airports.

5, and, in regard to the contract with Scadta, R., pp. 69-79, Dept. Ex. No. 8-A, reprinted as Exhibit A to this Memorandum, p. 32.]

Offices	
American owned offices of W. R. Grace & Co., and of the Grace Line of steamships, at all points on the route and all other important cities on the west coast.	Use of offices of foreign owned Ultramares Corporation in seven cities.
Air Mail Contracts With South American Countries	
Peruvian Airways Corporation had exclusive international air mail contract with Peru. Harold R. Harris, Vice President and General Manager of Peruvian Airways Corporation, had non-exclusive contract, transferable to Pan American-Grace Airways, Inc., or Ecuadorian Airways Corporation, [fol. 2555] with Government of Ecuador for transportation of mail, parcel post, passengers and cargo between points in Ecuador and between Ecuador and other countries of South America. See copy of cablegram from American Minister of Quito to Secretary of State, dated February 23, 1929, filed with	None.

Post Office Department with letter of Pan American-Grace Airways, Inc., dated February 28, 1929, reprinted as Exhibit B to this memorandum, p. 33.]

EXPERIENCE IN CARRYING AIR MAIL

Pan American Airways, Inc., had operated a highly efficient air mail service:

None.

(1) From Miami to Havana since October 19, 1927.

(2) From Miami to Nassau since January 7, 1929.

(3) From Miami to Havana, Camaguey and Santiago, Cuba; Port au Prince, Haiti; Santo Domingo, Dominican Republic; and San Juan, Porto Rico, since January 9, 1929.

(4) From Miami to Cristobal, Canal Zone, on a limited schedule of two sailings a month since February 4, 1929.

[For proof of performance and outstanding efficiency of Pan American Airways, Inc., reference is made to the Post Office Department's record of completed trips.]

[fol. 2556]

Compania Mexicana de Aviacione, also owned by

—8—

Aviation Corporation of the Americas, had carried air mail for over a year for the Mexican Government (and, through sublease from Pan American Airways, Inc., *now* carries the United States air mail on the route Brownsville-Mexico City).

Peruvian Airways Corporation, owned by Pan American-Grace Airways, Inc., had been engaged in the actual carriage of Peruvian air mails from Lima, Peru, through Casma, Trujillo and intermediate points in Peru to Talara, Peru, since September 13, 1928; on January 25, 1929, extended the service northward to Guayaquil, Ecuador; and on February 24, 1929, extended the service southward to Mollendo, Peru, so that it was actually operating 62% of the entire distance from Cristobal to Mollendo.

EXECUTIVES

Benefit of executives of largest and most successful American transportation company serving west coast of South America, and of Pan American Airways, Inc., with 18 months of experience in transporting air mail to Latin America.

No executives with record of success in transportation of any kind. The president had been engaged in a prior independent venture in Cuba which had resulted in failure. [Statement of Ambassador Judah; compare also page 21 and Exhibit F, containing evidence as to the failure.]

[fol. 2557] —9—

OPERATING AND TECHNICAL PERSONNEL

Benefit of functioning organization headed by Colonel Charles A. Lindbergh.

No showing of anything more than paper organization.

The proposed route was the longest foreign air mail route ever let. It was a most important and difficult service. It involved the skirting of dangerous coast lines, long stretches of which are unsettled and without landing places, and ultimately the passage of the Andes. Speed in the establishment of the service was important to prevent the preemption of the territory by foreign subsidized companies. The safety of the mails was to be entrusted to the new venture, the lives of pilots and passengers, and, in a peculiar degree, the prestige and repute of our country. If one of us had to commit his life, or his good repute, to one of these two groups of bidders, would he hesitate for an instant between Lindbergh, the Grace Company and Pan American on the one hand, and this other group, barely formed, without a dollar of capital paid in, without an organization, without a plane actually owned: without experience, untested, untried, except for a record of trouble and failure on the part of its chief executive? and if we would not hesitate, can we say that the Postmaster General was wrong when he made his choice?

—10—

[fol. 2558] B. *The action of the Postmaster General under the Act of March 3, 1929, in awarding the contract for Foreign Air Mail Route No. 9 to Pan American-Grace Airways, Inc., was conclusive and irrevocable.*

(1) The law vests in the Postmaster General wide discretion to determine facts and make awards of air mail contracts.

The Courts have always accorded to the Postmaster General a wide discretion in regard to the award of contracts.

In *The Mail Service Cases*, 251 U. S. 326 (1920), Mr. Justice Holmes said:

> "The texts to be discussed begin with an Act of 1873, but it should be observed as furnishing a background for that and the following statutes that from the beginning of the Government the Postmaster General, as the head of a great business enterprise, always has been entrusted, as he must be, with a wide discretion concerning what contracts he should make, with whom and upon what terms."

But in the case now under consideration we do not have to rely on the general rule of law.

The Act of March 2, 1907, provided, in regard to foreign ship mail contracts, that

> "the Postmaster General is hereby authorized to award such contracts to the bidder *that he shall find* to be the lowest responsible bidder that can satisfactorily perform the service required to the best advantage of the Government." (Italics ours.)

The Act also provided:

> "That in the award and interpretation of the contracts herein authorized the decision of the Post [illegible] Postmaster General shall be final and not subject to review by any officer or tribunal of the United States except by the President and the Federal Courts."

Here we have a clear and specific grant of discretion and final discretion to determine which bidder was satisfactorily performing the services required to the best advantage of the Government, and to make awards accordingly. In exercising that discretion the Postmaster General is entitled to act, as the head of any great business would act, on all the material available to him. He is entitled to give weight to anything which he deems helpful to him. [illegible] submitted by the bidders, no matter objected to by many trade bidders, no matter presented by his

agents from other sources, and to his own experience of the world and knowledge of business probabilities.

(2) The Postmaster General's determination of the facts in connection with the exercise of discretion in awarding contracts is conclusive.

The Postmaster General exercised the discretion vested in him under the statute, and, by order No. 8260, dated March 2, 1929, formally awarded the contract for Foreign Air Mail Route No. 9 to Pan American-Grace Airways, Inc. He supplemented the formal award by a statement of his reasons, dated March 2, 1929. It is implicit in the award, and clear from the express terms of the statement, that the Postmaster General considered the available evidence and determined that Pan American-Grace Airways, Inc. was the lowest responsible bidder *that could satisfactorily perform the service required to the best advantage of the Government.* That determination of fact is, not only under the specific provision of the Act of March 2,

—13—

[fol. 2560] 1929, but under the general rule of the common law, conclusive in the absence of bad faith, and no claim of bad faith is made by the protestant. The protestant has formally, in open hearing, rejected the idea of any such claim [R., p. 164].

In *Martin* v. *Mott*, 12 Wheat. 19, 31 (1827), Mr. Justice Story said:

> "Whenever a statute gives a discretionary power to any person, to be exercised by him, upon his own opinion of certain facts, it is a sound rule of construction that the statute constitutes him the sole and exclusive judge of the existence of those facts."

In *Bates & Guild Co.* v. *Payne*, 194 U. S. 106 (1904), the United States Supreme Court, speaking of an administrative act of the Postmaster General, said:

> "The rule upon this subject may be summarized as follows: That where the decision of questions of fact is committed by Congress to the judgment and discre-

tion of the head of a department, *his decision thereon is conclusive*." (Italics ours.)

To the same effect:

Diaz[illegible] v. Walker, 12 How. 389 (1851);
Foley v. Harrison, 15 How. 433, 447 448 (1853);
United States v. Wright, 11 Wall. 648 (1870);
French v. Fyan, 93 U. S. 169, 172 (1876);
Quinby v. Conlan, 104 U. S. 420, 425 (1881);
Steel v. Smelting Co., 106 U. S. 447, 456 (1882);
Nishimura Ekiu v. United States, 142 U. S. 651 (1892);

—13—

[fol. 2561] *Hadden v. Merritt*, 115 U. S. 25 (1885);
United States v. California Land Co., 148 U. S. 31, 43-44 (1893);
Johnson v. Drew, 171 U. S. 93, 99 (1898);
National Life Insurance Company v. National Life Insurance Co., 209 U. S. 317 (1908);
Central Trust Co. v. Central Trust Co., 216 U. S. 251 (1910);
United States v. Wilbeat, 244 U. S. 111 (1917);
United States v. Atchison, T. & S. F. Ry. Co., 249 U. S. 451 (1919);
Houston v. St. Louis Packing Co., 249 U. S. 479, 484 485 (1919);
Brougham v. Blanton Manufacturing Co., 249 U. S. 495, 500-501 (1919);
Dakota Central Telephone Co. v. South Dakota, 250 U. S. 163, 184 (1919);
Silberschein v. United States, 266 U. S. 221 (1924);
Ma-King Co. v. Blair, 271 U. S. 479 (1926);
Williamsport Wire Rope Co. v. United States, 277 U. S. 551 (1928).

There are, of course, some exceptions to the rule, as in the case of taxation where the determination of value by the taxing officers is reviewable, and as in the case of the Interstate Commerce Commission whose determination of facts has the same weight as the verdict of a jury and

is reviewable, but only in case there is no evidence whatever in the record to support it. The general rule, however, applies with full force to determinations of fact by the heads of executive departments in the letting of contracts. See, in addition to the decisions of the Supreme

—14—

[fol. 2562] Court of the United States abstracted under the next point, the following:

Thompson v. *United States*, 9 Ct. Cls. 185 (1873);
United States Wood Preserving Co. v. *Sundmaker*, 186 Fed. 678 (C. C. A. 6th, 1911);
Opinion of Attorney-General Cushing, 6 Ops. Atty. Gen. 226 (1853);
Opinion of Acting Attorney-General Whitney, 21 Ops. Atty. Gen. 56 (1894);
Theit v. *Burbie*, 34 Cal. App. 226, 167 Pac. 166 (1917);
City of Denver v. *Dumars*, 33 Colo. 94, 80 Pac. 114 (1904);
People ex rel. Assyrian Asphalt Co. v. *Kent*, 160 Ill. 655, 43 N. E. 760 (1896);
Johnson v. *Sanitary District of Chicago*, 163 Ill. 285, 45 N. E. 213 (1896);
Stubbs v. *City of Aurora*, 160 Ill. App. 351 (1911);
Williams v. *City of Topeka*, 85 Kans. 857, 118 Pac. 864 (1911);
Kelling v. *Edwards*, 116 Minn. 484, 134 N. W. 221 (1912).

The general rule of law is a sound one. No business could be run effectively if its executives had to be subject to a judicial review on the soundness of their judgment and the correctness of their data whenever they let a contract. Any such rule would produce paralysis and inaction. It might be satisfactory to litigious bidders but it would be ruinous to the virility and effectiveness of the postal service.

—15—

[fol. 2563] 3) Not only is the determination of the Postmaster General conclusive but it is irrevocable by him or by his successors.

In *United States v. Speed*, 8 Wall. 77 (1868), one Simonds, acting under authority from the Commissary General, had entered into a contract without advertisement, on the ground that an exigency existed sufficient to justify dispensing with the statutory requirement in regard to advertising. Later the Government refused to perform the contract, alleging that no such exigency had actually existed. The Supreme Court held the contract irrevocable, saying:

> "It is too well settled to admit of dispute at this day that where there is a discretion of this kind conferred on an officer or board of officers, and a contract is made in which they have exercised that discretion, the validity of the contract cannot be made to depend on the degree of wisdom or skill which may have accompanied its exercise."

In *United States v. Purcell Envelope Co.*, 249 U. S. 313, (1919), Postmaster General Gary had awarded a contract for stamped envelopes and newspaper wrappers. Before the execution of the contract he was succeeded by Postmaster General Smith who refused to go forward and execute a contract on the ground that investigation threw doubt on the financial standing of the company to which the award had been made. The Court of Claims held that Postmaster General Smith had no right to refuse to go forward with the contract, saying (51 Ct. Cls. 211, 219):

> "Such contention by defendants we decide could only be considered prior to the awarding of the contract, and if found to be justifiable would be proper grounds for refusing to award the contract; but if an

> error was made in awarding the contract, neither Postmaster General Gary, who made it, nor his successor, Postmaster General Smith, who rescinded it, possessed the power under the law to arbitrarily annul it."

The decision of the Court of Claims was sustained by the United States Supreme Court, which said:

"Postmaster General Gary went out of office, and his successor, either by inducement or upon his own resolution, revoked the contract and entered into a contract with other companies.

"The record furnishes no justification of such action. There is no charge of default against the Envelope Company, no charge of inability to perform its contract, except in a particular which we shall hereafter mention. There is, it is true, a finding that Postmaster General Smith caused an investigation to be made of the financial standing of the Envelope Company and that the report thereunder was unfavorable to it. This is made a great deal of, and the fact that the contract was not signed nor the bond of the Envelope Company approved.

"It makes no difference that the contract was not formally signed or the bond formally approved, as counsel for the Government contends they should have been, both by the terms of the contract and by a statute of the United States (28 Stat. 279). Their formal execution, as we have seen, was not essential to the consummation of the contract. That was accomplished, as was decided in the *Garfielde Case*, by the acceptance of the bid of the Envelope Company and the entry of the order awarding the contract to it. * * * And we pass to the question of damages."

—17—

[fol. 2565] III.

Third Ground of Protest.

"The contract should be rescinded because its execution was induced by misrepresentations on the part of Pan American-Grace Airways, Inc., with respect to material facts" (Protestant's Brief, p. 21).

ANSWER TO THIRD GROUND OF PROTEST.

This ground is based on a lengthy and disingenuous web of partial quotation and misinterpretation contained in the protestant's brief. If it is to be dealt with at all it has to

be dealt with in detail by correcting all the omissions and disentangling all the misinterpretations. We are loath to break the orderly movement of the real arguments in the brief by such material. Therefore, we deal with this point out of text in the following prolonged footnote:

[NOTE: All the claims of misleading the Postmaster General by misrepresentation relate to the letter of February 28, 1929, filed by Pan American-Grace Airways, Inc. in support of its bid.

The *first* alleged misrepresentation is as follows:

"We have arranged for service between Cristobal, Canal Zone, and Guayaquil, Ecuador, through subcontract to Pan-American Airways, Inc." (Protestant's Brief, p. 8).

The statement is true. Such arrangements had been made [R., p. 58]. No one has shown or offered any evidence to show that they had not been made. If you will read the text of the protestant's brief under this charge you will see that in order to produce their effect, they first change the word "arranged" to "equipped" and then to show that equipment was not available, leave out of account the equipment on the west coast in the hands of Peruvian Airways, the equipment already owned and in transit south, and the splendid fleet of Sikorskys actually contracted for soon after the award of the contract. As a matter of fact, at the date of this writing Pan American has just made its initial reconnaissance flight over this link.

[fol. 2566] The *second* alleged misrepresentation is as follows:

"In Panama, Pan-American Airways, Inc., holds adequate operating rights. The Company already operates into David and Panama City, important points in the Republic. A long term exclusive mail contract is now pending and about to be executed" (Protestant's Brief, p. 8).

The statement is true. The fact that the permit had been recently acquired did not impair its adequacy, nor did the fact that the permit was temporary. All flying rights are subject to governmental termination, and a temporary permit is the normal initial step toward the working out of a standing arrangement. The statement regarding the pendency of the long-term mail contract is true. The protestant quotes it, apparently as a misrepresentation, but does not attack it in the text.

The *third* alleged misrepresentation is as follows:

"Also on the same page of said letter is the statement that efforts were directed by the Company to secure adequate operating rights and legal standing and where possible international mail contracts in all the South American countries

involved and that in carrying out this plan "we believe we have been entirely successful". Notwithstanding said statement we allege that said Company showed evidence of an international mail contract only in Peru and there is no evidence of an international mail contract held by the Pan American-Grace Airways, Inc., or any of its subsidiaries in any other country. No evidence of any operating rights in Ecuador was submitted nor was evidence submitted of operating rights in Chile" (Protestant's Brief, p. 9).

The protestant is trying to give the impression that we asserted that we had international mail contracts in countries other than Peru. If you will look at the text of our letter you will see that there is no representation that we had international mail contracts in any country outside of Peru. The allegation which the protestant refers to is followed by two pages of detailed explanation showing exactly what is meant by the general claim that we had been successful in our efforts, and showing with the utmost clearness that we did not claim to have a mail contract outside of Peru. As a matter of fact, Harold R. Harris, Vice-President and General Manager of Peruvian Airways Corporation, did have a non-exclusive contract with the Government of Ecuador for the transportation of mail, parcel post, passengers and cargo between points in Ecuador and between Ecuador and other countries of South America, transferable to Pan American-Grace Airways, Inc. or Ecuadorian Airways Corporation. [See copy of cablegram from American Minister at Quito to Secretary of State dated February 23, 1929, filed with Post Office Department, a copy of which is annexed hereto as Exhibit B, p. 33]. As to the possession of operating rights in Ecuador, Peruvian Airways Corporation, a wholly owned subsidiary of Pan American-Grace Airways, Inc., *was actually operating in Ecuador at the time of the award and the record showed this fact.* As to the claim of having been entirely successful in the attempt to procure operating rights and legal standing in Chile, it should be noted that our letter [R., p. 66] told exactly what was meant by this claim. The claim of success was fairly supported by a cablegram from the American Ambassador, stating that he had been advised by the Chilean Government that permission to use the Chilean airports would be formally granted to Chilean Airways Corporation in that week.

—19—

[fol. 2567] The *fourth* alleged misrepresentation is as follows:

"that Scadta is *German* controlled" (Protestant's Brief, p. 9).

The protestant claims [R., p. 128] that two-thirds of the stock of the Scadta Company is owned by Dr. P. P. Von Bauer and that Dr. Von Bauer is not a German but an Austrian. We have had long negotiations with the Scadta Company. Mr. Trippe, of the Pan American, has had occasion to go to Berlin for negotia-

tions with the Scadta Company. Business of that Company is conducted at Schoneberger Ufer 35, Berlin W. 35. Dr. Von Bauer, when in Europe, resides in Germany, not Austria. His clerks and office force are German speaking and appear to be Germans. We know that the pilots of the Company in Colombia are mostly German speaking and that the Company's equipment is of German manufacture. The name Scadta is a popular abbreviation of "Sociedad Colombo Alemana De Transportes Aereos", the word "Alemana" being Spanish for "German". We have not consulted Dr. Von Bauer's birth certificate. If he is in fact a German-Austrian instead of a German, then the statement in our letter is to that extent accurate. We think you will agree that the degree of inaccuracy is not one of importance. We assure you that it was unintentional.

The *fifth* alleged misrepresentation is as follows:

> "that Pan American Airways had an agreement with Scadta under which they enjoyed the exclusive use of Scadta's technical facilities on the coast of Colombia" (Protestant's Brief, p. 10).

That statement is true. Pan American Airways, Inc., held a written contract with the Scadta Company for eight months' exclusive use of its airports [the exact phrase is "exclusive landing privileges at our airports"] at Buenaventura and Tumaco, in Colombia, and also at Esmeralda, Caraquez and Guayaquil, in Ecuador. The contract was subject to the acquisition by Scadta and Pan American Airways, Inc., reciprocally of operating rights in the Canal Zone and in Colombia, but those rights had been acquired and the condition fulfilled by the diplomatic agreement in regard to the exchange of landing rights between the United States and Colombia, and Pan American-Grace Airways, Inc., had been notified of the taking effect of the exchange by the Department of State. [A photostatic copy of the original of the Pan American-Scadta contract is on file with the Post Office Department; a copy is annexed to this brief as Exhibit A, p. 32.]

Is there a claim that the Postmaster General was misled because the grant of "exclusive landing privileges at *our* airports" was paraphrased in our letter "exclusive use of Scadta technical facilities"? Certainly not, for the next sentence in our letter shows that the phrase refers to Scadta's physical facilities, in other words, precisely to the "*airports*".

The *sixth* alleged misrepresentation is as follows:

> "We have since demonstrated that the agreement with Scadta by Pan American Airways was for landing privileges only for a trial flight" (Protestant's Brief, p. 12).

That is an absolute, reckless falsehood. Reference to the contract shows that the exclusive grant for the use of airports was for the period of eight months.

[fol. 2568] The *seventh* alleged misrepresentation is as follows:

> "The same paragraph of their letter states that regular transport and airmail service is now maintained between Guayaquil, Ecuador, and Mollendo, Peru, a distance of 1,490 miles and over 62% of the entire distance between Cristobal and Mollendo. Careful inquiry has disclosed that service for the entire route between Guayaquil and Mollendo was not inaugurated until February 25th (three days before the opening of bids) and cabled information received March 18, 1929, from Lima, Peru, showed service was being conducted on a schedule of one trip each way weekly" (Protestant's Brief, pp. 12-13).

The protestant seeks to create the impression that service on the entire route between Guayaquil and Mollendo was not inaugurated until February 25, 1929. The facts are that the route from Lima to Talara, Peru, had been operated since September 13, 1928, and that the route from Talara to Guayaquil had been operated since January 25, 1929. It was only on the portion of the route between Lima and Mollendo that service was not begun until "three days before the opening of bids." The contention that the service was not "regular" because a part of it had been instituted only a short time before the writing of the letter, is unsound.

The *eighth* alleged misrepresentation is as follows:

> "The third paragraph of the summary states that Pan American-Grace Airways, Inc. and subsidiary operating companies is now operating at a heavy loss. We deny that Pan American-Grace Airways, Inc. is operating at all." (Protestant's Brief, p. 13.)

Pan American-Grace Airways, Inc., was, through its subsidiary company, Peruvian Airways Corporation, operating and operating at a heavy loss. The statement objected to is exactly true. We should be glad to submit the operating figures in detail if the Department desires them, but as the protestant's claim is entirely unsupported by any evidence we hardly think it is worth while to burden the record with detailed operating statements.

The *last* alleged misrepresentation occurs on page 14 of protestant's brief. It is as follows:

> "The statement is again made in said paragraph '3' of the summary that the Pan American-Grace Airways, Inc. is in actual operation, which we deny as totally untrue and not justified by the facts. The only operation being conducted is over the route followed by the Peruvian Airways Corporation on the scheduled stated above."

The first sentence challenges the truth and the second sentence admits the truth of the statement. Our letter dated February 28,

1929, sets forth on its first page that Peruvian Airways is a wholly owned subsidiary of Pan American-Grace Airways, Inc.

It is so clear that no misstatements were made that we refrain here from going into any further consideration of the numerous questions which would become important if there had been a misstatement, as, for instance, whether the misstatement was intentional, whether the Post Office Department was misled by the misstatement or was able to correct it from other or later material, whether the matter involved in the misstatement was controlling

--21--

[fol. 2569] in determining the action of the Postmaster General, and whether the procedure now being followed by the protesting Company is a proper and normal procedure for the rescission of contracts.]

Before leaving the matter of misrepresentations, we wish to call attention to the fact that the protesting Company has itself been guilty of an attempt to mislead the Postmaster General.

At the hearing of March 6th the protesting Company filed an affidavit by its president, Mr. Montgomery, a copy of which affidavit is annexed hereto as Exhibit C, page 33. The affidavit contains four erroneous statements:

(1) That Mr. Montgomery resigned from the Pan American Company because he considered its management unsatisfactory; the fact being that he was asked to resign because he had become *persona non grata* to the Cuban government and therefore useless to the Company as representative in Cuba. (Affidavit of J. T. Trippe filed herewith as Exhibit D, page 35, original submitted herewith.)

(2) That Mr. Montgomery negotiated the contract with the Cuban government for carrying air mail from Havana to Key West; the fact being that the contract was negotiated by Dr. Julio de la Torre with General C. M. de Rojas, Secretary of War and Marine. (Translation of letter from General de Rojas, Exhibit E, page 36; photostat of the Spanish original submitted herewith.)

(3) That the reason why Aviation Corporation of Cuba did not begin operations was that the Cuban government decided that the interests of aviation in Cuba at that time would best be served by limiting it to planes engaged only in transport of government mail and government service; the fact being that the Cuban government never undertook to limit in any way the kinds of service which might be offered by private aviation companies. (Letter of General de Rojas above cited.

(4) That Mr. Montgomery's company, Aviation Corporation of Cuba, resulted in neither gain nor loss to the stockholders. It is admitted that it did not result in gain to the stockholders, but we have had brought to our attention a case where it clearly did result in loss. Compare Exhibit F, page 37, containing letter from Mr. George T. Walker regarding his experience as a stockholder, letter

from Mr. Montgomery to Mr. Walker's representative requesting payment of subscription and representing company as ready to begin operations; check in payment of Mr. Walker's subscription; note from Mr. Rodgers, Mr. Walker's representative, to Mr. Walker, saying that he was instructed to pay subscription only when Montgomery stated that he was ready to commence operations; unanswered letters of inquiry from Mr. Walker to Mr. Montgomery.) It is also a fact that the company has not paid its debts (Affidavit of P. H. Caine, Exhibit H, page 44, original submitted herewith).

[fol. 2570] —22—

IV.

Fourth Ground of Protest.

"Contract is void because not advertised in accordance with law" (Protestant's Brief, p. 23).

ANSWER TO FOURTH GROUND OF PROTEST.

A. The protestant relies on Revised Statutes, §3941 which, as amended, provides:

> "The Postmaster General shall cause advertisements of all general mail lettings of each State and Territory to be conspicuously posted in each post office named in said advertisements for at least sixty days before the time of such general lettings, and no other advertisement of such lettings shall be required; *but this provision shall not apply to any other than general mail lettings.*" (Italics ours.)

The requirement of sixty days advertisement applies only to "general mail lettings of each State and Territory." *Air mail* contracts are not "general mail lettings." *Foreign* mail contracts are not "general mail lettings of each State and Territory." The provisions in regard to foreign mail contracts have always been kept entirely distinct and separate from §3944 of the Revised Statutes. A-fortiori *foreign air mail* contracts are not "general mail lettings." If §3941 of the Revised Statutes applied to such contracts, every one of the foreign air mail contracts now in effect would be void.

A contract for the transportation of mail from the *Canal Zone* to foreign countries cannot under any construction

—23—

[fol. 2571] of language be a "general mail letting *of a State or Territory.*" The Act of August 24, 1912, c. 390, 12, 37 Stat. 569, provides:

> "All laws relating to the rendition of fugitives from justice as between the several States and Territories of the United States, shall extend to and be considered in force in the Canal Zone, *and for such purposes and and such purposes only the Canal Zone shall be considered and treated as an organized Territory of the United States.*" (Italics ours.)

B. Although the protestant claims that the advertisement was invalid for the purpose of awarding a contract to us, it does not claim that the advertisement was invalid for the purpose of awarding a contract to it. It does not ask that all bids be thrown out and that there be a re-advertisement. On the contrary, it terminates its first brief with a specific prayer that "the award and contract based thereon should be set aside and a contract should be executed with American International Airways, Inc." (First brief of protestant, p. 10.) Moreover, it is to be noted that, in spite of the protesting Company's complaints, it did put in a bid within the time limit, and it asserted on the formal oath of its president, John K. Montgomery, that it was able to begin the service within the time set for performance. [Affidavit dated February 28, 1929, filed with bid, R., p. 13.] The bid submitted was defective in respect of the bond and power of attorney, but no one will seriously contend that a month was not an adequate period for a reasonably intelligent bidder to comply with the requirements in that respect.

C. There was in South America a situation calling for prompt action. The great European powers have foresight

—24—

[fol. 2572] enough to recognize the value to them of having in the hands of their nationals, as far as possible, the flying routes in other countries. They evidence belief in

the importance of that matter by the granting of substantial subsidies. The French subsidized company, Aeropostale, is already in operation in Brazil, Uruguay and the Argentine, has lines in organization in Chile and Paraguay, and contemplates extensions to the Guianas and the Peruvian border. [Prospectus and map of Compagnie Generale Aeropostale submitted herewith.] There are, in addition, we believe, plans for extension by Scadta, and there is always the possibility of attempts at local monopoly such as the attempt of Raffael Dillon in Ecuador recently noted in the press.

Mail service is generally contracted for with a single company in any given territory and mail contracts cover, as a rule, very substantial periods of time, so that the country whose nationals arrive first in a given territory are very apt to exclude permanently the participation of other enterprises. Our own Government recognized, therefore, the importance of pressing forward with its air mail developments in South America while there was still an opportunity for its nationals to participate in the return carriage of air mails and in general transportation. Every one active in aviation knew in advance of the advertisement that the mail service was to be extended to South America. The President and the President-elect had called attention to this in public speeches, and the Postmaster General had announced his plan in an official report. [See Exhibit H annexed, p. 45.] Any one interested in the proposed extension might have known that he should not leave the beginning of his preparation until the day of making his bid.

—25—

[fol. 2573] The extension of United States air mail service south of the Canal Zone was for a long time held up by the inability of the United States to procure for its nationals rights of landing and transit in Colombia. That obstacle was removed by the recent exchange of diplomatic notes between the two countries in question. As soon as it became clear that this obstacle would be removed, it was incumbent upon the Post Office to act, and it did act, with celerity.

Post Office contracts for the carriage of mail by water under the Merchant Marine Act are awarded on a period

of advertisement of three weeks with the express sanction of Congress. Act of May 22, 1928, c. 675, 49 U. S. Code, Title 46, § 891 j. Contracts for the carriage of domestic air mails have often been awarded on a period of advertisement of thirty one days, or less. Of the six previous foreign air mail contracts now in force, only one was advertised for a period in excess of 32 days and the average period of advertisement for the others was 26.6 days. [See Exhibit 1 annexed, pages 47-51, showing periods of advertisement of contracts under the Merchant Marine Act and for domestic and foreign air mail.] To assert that under the circumstances of urgency outlined above, it was not within the wide discretion of the Postmaster General to award this foreign air mail contract on a like period of advertisement is absurd.

V.

Fifth Ground of Protest.

"The contract is void because unauthorized by law at the time of advertisement and the opening of bids" (Protestant's Brief, p. 24.)

—26—

[fol. 2574] ANSWER TO FIFTH GROUND OF PROTEST.

The protestant relies on cases decided under § 3732 of the Revised Statutes, which prohibits contracts or purchases on behalf of the United States, unless the same are authorized by law or are under an appropriation adequate to their fulfillment. Obviously these cases are irrelevant. Ample statutory authority for the present contract had been furnished before the award was made. There is nothing in § 3732, or in the cases cited by the protestant, which indicates in any way that the bidding as well as the award must be deferred until after the enabling statute has been passed.

Of course, as a matter of reason, the Postmaster General should be permitted to advertise in anticipation of a statute about to be enacted. Where there is a ground for haste and new legislation is needed, there is no consideration of good sense against allowing an advertisement to be made, bids to be received, and all preliminary matters to be cleared

out of the way so that there can be prompt action the minute the statute is passed. It is the universal custom of well-run business corporations, where a situation is urgent and action by stockholders is necessary, to go through all the preliminaries of negotiation, advertisement and contract prior and subject to stockholder consent so that the vote at the stockholders' meeting is the end and not the beginning of the process.

There is not much by way of authority on this matter, but what little there is clearly indicates that the advertisement can precede the passage of the act.

—27—

[fol. 2575] In 2 Dec. Compt. Gen. 739 (1923), the City Commissioners of Pawhuska, Oklahoma, had received bids for paving certain streets adjoining Indian lands. With the advertisement, notice was given that the city had authority to contract for paving only half the streets but that bids would be received for paving the whole of the streets. Representatives of the United States were present at the awarding of the contract. Later Congress made an appropriation for paving the half of the streets adjoining the Indian lands. The question was whether the Government could join in the contracts already made, or whether there would have to be readvertisement as to the parts of the streets to be paved by the United States. The Comptroller General held that if the advertisements satisfied the requirements of Rev. Stat., §3709, there need be no readvertisement.

In *Swenson* v. *Village of Bird Island*, 93 Minn. 336, 101 N. W. 495 (1904), defendant village entered into a contract with plaintiff for the construction of a public well. The contract was let after public bidding in accordance with the statute. It appeared, however, that the village was without authority to make the contract except after a special election and that only nine days' public notice of the election instead of ten, as required by the statute, had been given. After the completion of the well a suit was brought to restrain payment on the ground that the election was void. This suit was successful. Thereupon another election was duly called *but the contract was not readvertised*. The

Court held that the second election ratified the contract and that plaintiff was entitled to payment.

—28—

[fol. 2576]

VI.

American International Airways, Inc., did not comply with the requirements of the advertisement.

The advertisement on page 1 recited "Bond required with bid, $25,000." On page 3 the advertisement recited that "In lieu of surety bonds bidders may deposit U. S. Bonds amounting to $25,000, *in accordance with Department requirements*". (Italics ours.) In addition to this, the first paragraph on page 3 of the advertisement specially called the attention of bidders to the manner in which the exact terms of the requirements could be procured.

American International Airways, Inc., filed no bond with its bid. It did file with its bid $25,000 in United States Liberty Bonds, but did not file them "in accordance with Department requirements." It filed the bonds without any document of any sort indicating the terms on which they were to be held by the Department, or giving the Department power to deal with them under any of the contingencies which might arise, although the regular practice and the "Department requirements" demanded that the Liberty Bonds should be accompanied by a Power of Attorney and Penal Bond in the form prescribed by Treasury Department Circular No. 154 of 1926, pages 9 and 10, copies of which Circular were regularly furnished to bidders making inquiry in regard to the Department requirements referred to in the first and third paragraphs on page 3 of the advertisement. Any one with a grain of business sense would have realized that the mere handing of Liberty Bonds to a Departmental officer with no specification of the rights of the

—29—

[fol. 2577] Department in regard to them was a futile and incomplete performance.

Noting this deficiency in the bid of the protesting company, the officers of the Post Office Department, instead of rejecting the bid entirely from consideration as they had a right to do, voluntarily went out of their way to call to the

attention of the protesting Company the defect in its bid. Nevertheless, the defect was not cured prior to the making of the award, nor even prior to the execution of the contract with the successful bidder. The bond required was finally furnished by the protesting Company on the 5th day of March. The protesting Company undertakes to excuse its failure by asserting an oral statement by one of the officers of the Department to the effect that it should get its bond in by March 4th (the day of the execution of the contract). The protestant did not even comply with the terms of this alleged dispensation. It filed the bond, not on March 4th, but on March 5th, after the contract had been executed, and attempts to excuse its failure by asserting that March 4th was a local holiday in the District of Columbia, and therefore presumably a day on which official actions were impossible, an absurd proposition in view of the fact that Congress was in session and the whole inaugural and departmental machinery in operation.

Not only was the Postmaster General entitled to reject the bid of the protestant on this ground, but he was under an obligation to reject it.

The advertisement provided on page 4 as follows:

> "A proposal altered, or incomplete, in any of its essential terms cannot be considered in competition with bids submitted in proper form."

—30—

[fol. 2578] It is apparently the law that such a provision should be strictly enforced.

In 1871 the Attorney General rendered an opinion to the Secretary of War in which he said:

> "The authority to invite proposals implies an authority to prescribe reasonable terms and conditions. To announce under this authority that no bid will be considered which does not comply with certain directions, and afterward to consider and accept a bid not complying with such directions, is unjust to the complying bidders" (13 Ops. Atty. Gen. 510).

In 1926 the Comptroller General had under consideration the question of the validity of certain payments made by

an officer in the Finance Department of the army covering purchases made from the Bogart Paper Company in Brooklyn. It appeared that the instructions to bidders had required that duplicate samples properly labeled, must be submitted on all items bid on, and that such samples must be forwarded to the Purchasing Office in time for receipt prior to the hour of opening the bids. Another company submitted a bid which was fifty per cent. lower than that of the Bogart Paper Company, but failed to submit samples as required. The Comptroller General held that the bid of that company could, therefore, not have been considered, and that the Bogart Paper Company was the lowest bidder which had complied with the terms of the advertisement (5 Dec. Compt. Gen. 659).

—31—

[fol. 2579] *Conclusion.*

As the Supreme Court said in *The Mail Divisor Cases*, above quoted, "the Postmaster General, as the head of a great business enterprise, has always been entrusted, as he must be, with a wide discretion concerning what contracts he should make, with whom and on what terms." That power and discretion has just been confirmed to the Postmaster General by statute in the most sweeping and emphatic terms.

The Postmaster General, with all the facts before him, has exercised his discretion wisely and well and as any sensible man would have exercised it under the circumstances. His action is conclusive. It has resulted in the execution of a contract, the beginning of performance, and the creation of vested rights which neither can be nor should be divested.

Respectfully submitted,

PAN AMERICAN-GRACE AIRWAYS, INC.

ELIHU ROOT, JR.,
R. WORTH VAUGHAN,
HENRY J. FRIENDLY,
Of Counsel.

[fol. 2580] *Exhibit A.*

New York City, N. Y.,
January 28th, 1929.

Pan American Airways, Inc.,
122 East 42nd Street,
New York City.

Dear Sirs:

Subject to your Company acquiring the necessary operating rights in Colombia, and our Company acquiring such privileges, on a reciprocal basis, in the Canal Zone, we hereby agree, in consideration of the sum of One Dollar ($1.00), receipt of which is hereby acknowledged, during the next eight months, to give you exclusive landing privileges at our Airports at:

Buenaventura and
Tumaco, Colombia.
Esmeralda and
Caraquez,
Guayaquil, Ecuador.

Compensation for the use of such facilities will be the usual fee commensurate for services rendered under similar conditions elsewhere.

We would request you, during this period, not to appoint our Agents to represent you in this territory.

In addition, of course, in the event of emergency, we will extend to you the courtesy of all our facilities, which we understand you in turn will extend to us.

Yours very truly,

SCADTA.

Dr. P. P. VON BAUER.

Exhibit B.

QUITO
Dated February 23, 1929.
Recd. 3.15 P.M.

SECRETARY OF STATE
WASHINGTON
1. February 23, 1 a.m.

HARRIS, VICE PRESIDENT OF PERUVIAN AIRWAYS, SECURED PERSONAL BUT TRANSFERABLE CONTRACT FOR PAN-AMERICAN AIRWAYS SERVICE. COPY OF CONTRACT BY MAIL.

BADING.

Exhibit C.

DISTRICT OF COLUMBIA, ss.:

John K. Montgomery, being first duly sworn, on oath deposes and says:

That he is President of American International Airways, Inc., a corporation organized under the laws of the State of Delaware, which Company is the low bidder for the air mail contract between Cristobal, Canal Zone, and Santiago, Chile.

With reference to statement dated March 2, 1929, Postmaster General, deponent says that the only aeronautical enterprises in Cuba with which he has been connected are the following:

(a) Pan American Airways, Inc., of which he was one of the organizers and the Vice President, from which company he resigned in February, 1928, because of disagreement with the President of the Company

—34—

[fol. 2582] over questions of policy and what deponent considered unsatisfactory management. During his connection with said company, he negotiated the contract with the Cuban Government for carrying of air mail from Havana to Key West, and subsequently negotiated contract with the United States Govern

ment for carrying air mail from Key West to Havana which service he inaugurated.

(b) The Aviation Corporation of Cuba which was organized primarily for aerial mapping. Before said corporation began operations, the Cuban government decided that the interests of aviation in Cuba at tha time would best be served by limiting it to planes engaged only in transport of Government mail and Government service. For this reason the Company has never functioned and, therefore, resulted in neither gain nor loss to the stockholders.

(Signed) JOHN K. MONTGOMERY.

Subscribed and sworn to before me this 13th day of March, A. D. 1929.

SUZANNE L. GLYNN.

[SEAL.]

Exhibit D.

STATE OF NEW YORK }
COUNTY OF NEW YORK } ss.:

J. T. TRIPPE, being duly sworn, deposes and says:

I am the President of Pan American Airways, Inc.

Mr. John K. Montgomery resigned as Vice President and director of Pan American Airways, Inc., in October, 1927, just before flying operations were inaugurated. He was retained by the company as its representative in Cuba in charge of public relations. He was finally asked to resign from the service of the company because he had become *persona non grata* to the Cuban government and was therefore, in my estimation, useless to the company as its representative in Cuba.

J. T. TRIPPE.

Sworn to before me this 25th day of March, 1929.

HIRAM S. GANS
Notary Public, New York County

Private.

Havana, March 19, 1929.

Dr. Julio de la Torre,
Counsel for Pan American Airways, Inc.,
City.

Dear Friend:

In connection with the sworn declaration signed by Mr. John K. Montgomery, subscribed and sworn to March 13, 1929, before Suzanne L. Glynn, Notary Public of the District of Columbia, referring to his activities in Cuba, first as Vice-President of the Pan American Airways, Inc., and then as President of "The Aviation Corporation of Cuba", I wish to state the following:

That as appears from the Pan American Airways, Inc., files, which we have in the department under my charge, all the negotiations for obtaining from the Cuban Government the authorization for putting into effect the service of transportation of passengers and mail, were conducted directly by you, the activities of Mr. Montgomery being limited to signing the contract in his character of Vice-President of the Company, and that the Government of Cuba, having in mind the significance of commercial aviation in relation to the progress and development of these ways of communication, has had and now has the aim of encouraging the same without limiting in any way the kinds of services which may be offered.

—37—

[fol. 2585] Also, it is a pleasure for me to state to you that the department under my charge is satisfied as to the character and efficiency of the service which is regularly being furnished by Pan American Airways, Inc.

Very truly yours,

C. M. DE ROJAS.

MATANZAS SUGAR COMPANY, S. A.
Central Espana

Cable Address:
"Matsuco"

Asunto

Central Espana
Matanzas Prov.
Cuba

March 15, 1929.

Mr. Richard F. Hoyt,
Chairman of the Board,
Aviation Corporation of the Americas,
25 Broad Street, New York City.

Dear Mr. Hoyt:

You have asked me with regard to my business relations with Captain John K. Montgomery; here are the facts:

Captain Montgomery in the early part of 1928 asked me to join him in an enterprise for the formation of a small Aviation Company here in Cuba to do aerial mapping and photography. Being particularly interested in making it possible to have aerial mapping done on various sugar

—38—

[fol. 2586] plantations, I agreed to take stock in his company, and, in order to get the thing going, asked others to come in also, some of whom did.

Montgomery organized the Aviation Corporation of Cuba, but up to the time I went North last year, had not been able to obtain permission to use the landing field at Camp Columbia, and I specifically stated I would not subscribe to any stock until he had obtained a bona-fide agreement with the Cuban Government which would permit him to use the landing field, or had obtained a suitable landing field elsewhere.

I left instructions with our Mr. Rodgers to pay Montgomery $1,000.00 for my stock subscription when Mont-

gomery advised him that such arrangements had been made, and accordingly on July 28th, 1928, Rodgers sent the Aviation Corporation of Cuba a check of the Matanzas Sugar Company in payment of my stock subscription.

I enclose for your information Montgomery's letter of July 19th to Mr. Rodgers, check for $1,000.00 sent to the Aviation Corporation of Cuba, as well as my letter of September 13th, and my letter of January 3rd, 1929, to Montgomery, in care of Sherman Fairchild, where I had been told he could be reached in New York City. I also enclose memorandum from our Mr. Rodgers to me, dated March 14th, 1929, regarding this same subject.

When I met Montgomery in the United States last summer he told me he had obtained some $20,000.00 of stock subscriptions, and I was very much surprised to find on my return to Cuba in September, that nothing had been done so far in the way of getting the company going, nor had it been possible to obtain permission to use the Camp Columbia landing field, nor had he obtained the use of any other field.

—39—

[fol. 2587] Having this in mind, I wrote him on September 13th, as per copy enclosed, and finally again on January 3rd, the last mentioned letter having been written subsequent to my visit to the Chase National Bank in Havana requesting information as to the amount of money on deposit in the name of the Aviation Corporation, and having been told that this amount was in the neighborhood of $3,000.00 only. To neither of these letters have I received any reply.

I believe that I was named some sort of an officer or Director of the Aviation Corporation when formed, but I have never received any notice of any meeting, nor have I received any financial statement from the Company, nor have I received a certificate of the stock for which I subscribed.

Very truly yours,

GEO. T. WALKER.

Memorandum to Mr. Walker

March 14, 1929

I have little to add about the thousand dollars paid for your account to Montgomery.

You will recall that you instructed me verbally that this payment was to be made when Montgomery stated that he was ready to commence operations.

He spoke to me in July in Havana, saying that he was all set and I requested that he write a letter asking for the payment. He also said that he had just seen you in the North. Immediately upon receipt of his letter of July 19th, I forwarded the check for $1,000.00.

I saw both Montgomery and Mr. O'Keefe before you returned in August, and stated that we had not yet received the stock certificate but was assured by both that it would be forwarded immediately.

—42—

[fol. 2590] You will also recall that the day you arrived in Havana, I told you that this certificate had not been received, and that, that same afternoon you had a long talk with Montgomery as to the difficulties which he was having.

JAS. R.

Corporación de Aviación de Cuba,
Sevilla Biltmore Arcade,
Habana.

Attention Mr. Montgomery

Dear Sir:

I notice that on July 20th, Mr. Rodgers sent you check for $1,000.00 for my account as my stock subscription for the Aviation Company.

I cannot find any acknowledgment of receipt of this subscription nor have I been able to locate the stock certificate. Will you please look into this and see that I get something for my money.

Very truly yours,

G. T. Walker

January 3, 1929.

Captain John Montgomery,
c/o Sherman Fairchild,
Fairchild Aviation Company,
270 West 38th Street,
New York City.

Dear Montgomery:

In July, while I was away, Rodgers sent you a check for one thousand dollars as my subscription in the Cuban Aviation Company, on your assurance that everything was all right and that you had definitely obtained permission to use the landing field at Camp Columbia.

In view of the fact that everything has blown up, and I know that you have returned money to other stockholders, I would appreciate it very much if you would ask the Chase National Bank to give me a thousand dollars out of the funds which the Company now has on deposit there.

I would be glad to hear from you and know what your plans are for the future.

Very truly yours,

G. T. Walker

P. H. CAINE being duly sworn deposes and says:

I am the Assistant Treasurer of Pan American Airways, Inc.

On March 1, 1928, Pan American Airways, Inc., entered into an agreement with J. K. Montgomery for the account of a Cuban company to be formed by him providing for

the purchase by such Cuban company within thirty days from Pan American Airways, Inc. of one Fairchild airplane for a price which, by supplemental agreement dated April 20, 1928, was fixed at $12,634.52, less depreciation.

Pan American Airways, Inc. has fully performed its part of said agreements but only $5,000.00 of said purchase price has been paid although numerous efforts have been made to collect the balance thereof amounting to approximately $6,000.

Notary Public, Kings County.
Certificate filed in New York County.

—45—

[fol. 2593] *Exhibit H.*

In a statement dated January 2, 1929, Postmaster General New said (The United States Daily, Jan. 3, 1929, pp. 1, 5):

"As the year 1928 was conspicuous, so far as the Post Office Department is concerned, in the widespread development of the air mail service in the United States, so will 1929 stand out, in my opinion, as a year marked by great strides in connecting our own efficient air service with foreign countries, principally in South and Central America.

"Already we have in daily operation a line connecting New York with our northern neighbor, Canada, at Montreal and the prospects are favorable for a material extension during the coming 12 months of the Canadian service to a number of important cities in that country.

"Within the first two weeks of the new year we will begin operation of three foreign routes, already under contract, two of which mark the beginning of what will ultimately become a web of the air, tying up in a close skein of communication the two continents of the Western Hemisphere.

"Emanating from Miami, Fla., where direct connection is made with the domestic air mail system, the three routes go, one to Nassau, in the Bahamas, one to Porto Rico, and the third to the Panama Canal Zone.

"The Porto Rican service begins as a tri weekly operation, to be increased to daily when conditions warrant. Stops are to be made at Havana, Cuba; and Santo Domingo, Dominican Republic, and later at Santa Clara, Camaguey and Santiago, Cuba; and Port au Prince, Haiti. The contractor is required, under the terms of the contract, to extend the service to Trinidad via the Leeward and Windward Islands at the option of the Postmaster General.

46.

fol. 2594 "The Canal Zone route will begin as a semi-monthly operation which stops at Merida, Mexico; Belize, British Honduras; Tegucigalpa, Republic of Honduras; Managua, Nicaragua, and San Jose, Costa Rica, and at other points to be designated. This route may also be extended via Cartagena, Colombia; Maracaibo, Venezuela; Curacao, Dutch West Indies; La Guaira, Venezuela; Port of Spain, Trinidad, Georgetown, British Guiana, to Paramaribo, Dutch Guiana. *Preliminary arrangements are under way for extension at the same time farther down the west coast of South America to Santiago, Chile and over the Andes to Buenos Aires, Argentina.*" (Italics ours.)

IMMEDIATE RELEASE
May 3, 1929.

POST OFFICE DEPARTMENT
INFORMATION SERVICE.

Postmaster General Brown was today advised by the Attorney General that he has found no infirmity in the contract awarded by Former Postmaster General New to the Pan American-Grace Airways, Inc., of New York for air mail service from Cristobal, Canal Zone, and Santiago, Chile, with an extension over the Andes Mountains to Buenos Aires, Argentina.

This contract was awarded by Mr. New on March 2, 1929, but protest was lodged against the action of the former Postmaster General by the American International Airways, Inc., of New York City which concern was the lowest bidder for the route.

After a hearing on the protest, Postmaster General Brown referred the legal questions involved to the Department of Justice.

The Postmaster General today notified the Pan American Airways to proceed immediately to carry out the terms of the contract, and it is expected that this route will be in operation within a few days.

[fol. 2602]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 138

PAN AMERICAN AIRWAYS, INC.
122 East 42nd Street—New York City

May 9th, 1929

Mr. R. F. Hoyt,
c/o Messrs. Hayden, Stone & Co.,
25 Broad Street,
New York, N. Y.

My dear Mr. Hoyt:—

I beg to hand you herewith copy of a report which I have prepared for the Directors of Pan American-Grace Airways, Inc., covering the proposed remuneration to be made to Pan American Airways, Inc. for operating supervision of the airway to be operated by Pan American-Grace Airways, together with two estimates, one entitled "Estimate of Additional Equipment required for Cristobal-Mollendo Service", and the other, "Cristobal-Mollendo Service".

Very truly yours,

J. D. MACGREGOR
J. D. MacGregor

JDM:S
enclosures

[fol. 2603]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 139

To the Directors of Pan American-Grace Airways, Inc.:

Gentlemen:

I have purposely delayed making a definite proposal as to remuneration which should be recognized to Pan American Airways, Inc. for operating supervision of the 3,500 mile airway now to be operated by Pan American-Grace Airways, Inc. until I had the opportunity of giving the matter exhaustive study and intensive thought.

It is evident that if the United States Post Office Department awarded the mail contract for ten years to Pan American-Grace Airways, Inc., due weight was given to the operating performance of Pan American Airways, Inc. in fulfillment of mail contracts awarded to them in 1928. This successful performance was only possible by the expenditure of large sums of money in building up and perfecting an adequate and expert operating organization. The United States Post Office Department will expect from Pan American-Grace Airways a similar performance and unless Pan American-Grace Airways is prepared to spend from the strictly limited funds at its disposal an amount sufficient to insure a like result, it will not be very long before the United States Post Office commences to draw the matter forcibly to our attention.

Sight must not be lost of the fact that in South America strenuous and possibly unprincipled competition has shown its head, and unless our performance is excellent and our facilities adequate, our opponents will lost no time in pointing out our delinquencies and in suggesting that the contract be given to a group willing to give a service equal to that actually demonstrated by foreign companies and promised by American competitors.

[fol. 2604] The successful operation of any airway is only made possible through the assistance of men who are experts in several lines of industries, some of them recently developed. Unless Pan American-Grace Airways takes full advantage of an organization already existing, it must be prepared to build up that organization for its own account.

My estimate of the additional employees necessary for the successful operation of a 3,500 mile airway, each of whom would have to have in all probability some assistants, would be as follows:—

Comptroller (difference in salary)	$ 5,000.
Purchasing Agent	5,000.
Traffic Manager	10,000.
Public Relations	5,000.
Chief Engineer	10,000.
Factory Inspection	5,000.
Communications Engineer	6,000.
Construction Engineer	7,500.
Advertising and Publicity Manager	7,500.
Meteorologist	5,000.
Grief	5,000.
	$71,000.

The item which I have listed as "Grief", $5,000., is based on my previous experience in securing the services of employees and thereafter finding them unsuitable, either in ability or compatibility, to the work for which they have been employed.

It will be understood that these men may find it necessary to secure one or more assistants, in order to enable them to successfully handle their departments.

[fol. 2605] Pan American-Grace Airways, therefore, in my opinion, unless it avails itself of the organization already founded and developed by Pan American Airways, will face the task of securing additional personnel as detailed above, at an estimated cost of $71,000., which I consider extremely conservative.

A statement has been prepared by Pan American Airways, Inc., demonstrating its overhead expense, without including the services of its Chief Executive and the Executive office. By means of this statement, Pan American Airways offers the use of its operating organization at a cost to us of 6¢ per mile, operating once per week from the

Canal Zone to Santiago, Chile, and of 5¢ per mile upon a three times a week schedule. The total amount for supervision, based on Pan American Airways figures, would be approximately $22,000. and $56,000. respectively.

I believe that Pan American Airways' figures could be shaded slightly as far as supervision of the construction of airports is concerned, and by eliminating sundry expenses, such as telephone, telegraph, stationery, etc., which facilities would be paid by Pan American-Grace Airways as used. But the offer made by Pan American Airways is so moderate as compared with the cost of building our own organization, that it is my recommendation we accept the proposal, thus gaining not only the supervision of the chief departmental heads, but also the assistance of the subordinate personnel, and that a definite agreement be drawn up and signed immediately. It is my opinion that such an agreement should be for a period of at least five years, because it would be manifestly unfair to Pan American Airways to secure supervision at a moderate rate only as long as it took us to acquire our own organization. If the contract is made for only a year, even were Pan American Airways willing to accept that period, we would, at the expiration of the time, be again faced with the necessity of ac- [fol. 2606] quiring an organization, and I consider that for five years to come the securing of adequate and expert operating personnel will grow increasingly difficult because airplane operations are becoming so extensive that the supply is practically exhausted at this moment, and until additional men are educated, the personnel situation will be acute.

The arrangement with Pan American Airways has the additional advantage that at the time we are operating on the reduced schedule of once a week, the supervisory charges based on a per mile unit are the more moderate figure. The establishment of our own organization would entail the large initial expense against the lesser income.

Yours respectfully,

J. D. MacGregor

ESTIMATE OF ADDITIONAL EQUIPMENT REQUIRED FOR CRISTOBAL-MOLLENDO SERVICE

[fol. 2612]

The enclosed estimate shows that if service is to be maintained from Cristobal to Mollendo using the Fairchilds now in Peru plus additional equipment for the run from the Canal Zone to Talara, the additional investment would be as follows:

	Once a week	Thrice a week
Sikorskies, plus spare engine and miscellaneous equipment	(1) $ 65,000.	(3) $ 195,000.
Sikorskies Reserve (with spares)	(1) 65,000.	(2) 130,000.
Loening, plus spare engine and miscellaneous equipment (for run Guayaquil Talara)	34,000.	-
Ramps, improvement of landing fields, refuelling stations and radio stations	100,000.	140,000.
	$ 264,000.	$ 465,000.

Should the Fairchilds be replaced by tri-motored Fords, the following additional inveatment would be required:

	Once a week	Thrice a week
Investment as above	$ 264,000.	$ 465,000.
Tri-motored Fords	(1) 60,000.	(3) 180,000.
Spare engines	(1) 7,000.	(3) 21,000.
Spares and miscellaneous equipment, incl. radio sets	5,000.	15,000.
	$ 336,000.	$ 681,000.

If the five Fairchilds now in Peru should be replaced by Fords, other fields of operation would have to be found for them, unless it is decided to replace them gradually as they become fully depreciated or are destroyed in accidents.

The Loening Amphibian at present running from Guayaquil to Talara might not be required if the Sikorskies fly down to Talara and back from the Canal Zone.

G V
N.Y. May 7/29

Above estimate of contemplated additional investments does not include cost of hangars at following points:

Cristobal
Guayaquil
Talara
Lima
Mollendo (or Arica)

[fol. 2613]

EQUIPMENT REQUIRED

		Once a week	Twice a week
Cristobal/Guayaquil (930 miles)			
Sikorskies	(1)	$ 53,000.	(3) $ 159,000.
Spare engines	(1)	7,000.	(3) 21,000.
Spares and miscellaneous equipment (including radio sets $2500)		5,000.	15,000.
Two reserve Sikorskies (with spares)	(1)	65,000.	(2) 130,000.
Guayaquil/Talara (180 miles)			
Loening Amphibian (approximate)	(1)	$ 25,000.	3 Sikorskies could reach down as far as Talara
Spare engine	(1)	7,000.	
Spares and miscellaneous equipment		2,000.	
		$ 164,000.	$ 325,000.
Talara/Mollendo (1100 miles)

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 140

August 20, 1929

ORDER

From October 12, 1929, extend service from Santiago, Chile, by Buenos Aires, Argentina, to Montevideo, Uruguay, and return, once a week, including such intermediate points as may be acceptable to the Governments of these countries and designated by the U. S. Post Office Department, the contractor to be allowed $1.80 per statute mile flown each way based on the shortest practicable airway distance between points on the route as determined by the Postmaster General for the specified load of not exceeding 800 pounds each way, plus 90 cents per pound per thousand miles or pro rata thereof for greater or less mileage for any excess mails required to be carried in the same aircraft.

W. Irving Glover

Second Assistant
Postmaster General

COPY

October 24, 1929.

Hon. Walter F. Brown,
Postmaster General
Post Office Department,
Washington, D. C.

RE: Route No. F. A. M. 5.

Dear Sir:

As you know this Company has been operating since February 4th, 1929, Foreign Air Mail Route No. 5. In accordance with your Department's instructions, we are now flying three trips per week, both ways, over the main section

of this route, i.e., from Miami, Florida, to Cristobal, Canal Zone. Although our contract contemplates daily service on this portion of Route No. 5, we have been informed by the Department that under the condition of the appropriation it is not practical to permit the performance of full service at the present time. We understand, however, that the Department hopes to increase the number of trips per week on this portion of Route No. 5 as soon as sufficient funds become available.

For some months past we have been giving much thought to the possibility of increasing the speed of our service on this portion of Route No. 5. In connection with this study, we have considered the possibility of flying between Miami and Cristobal, the termini on the main section of this route, by a more direct line than that now designated (i.e., via Havana, Cuba, Cozumel Island, Mexico (no office) Belize, [fol. 2616] British Honduras, Tela, Honduras, Managua, Nicaragua, and , Panama). Two such possibilities have been indicated by our Technical Staff. One line is via the Isle of Pines, Swan Island and Cape Gracias a Dios, Honduras; the other is via points in Cuba, and Kingston, Jamaica. It is estimated that, by use of either of these lines, the three day period now consumed in flying from Miami to Cristobal could be reduced to two days, and the time could ultimately be cut to even less.

Since the Miami-Cristobal section of Route No. 5 constitutes a link in the through service now in operation to Colombia, Ecuador, Peru, Chile and Argentine and also connects with the line serving the North Coast of South America, any reduction in the length of time taken to reach Cristobal from Miami would be reflected in the air mail schedules to South America. Furthermore, the cost to the Department of the additional flights per week contemplated in Contract No. 5 via either of the more direct flights suggested would be considerably less than via the intermediate points now designated along the West Coast of Central America.

While our Technical Staff has advised us that passenger and mail service to the Canal Zone, via Jamaica, or via Isle

of Pines—Swan Island—Cape Gracias a Dios, is entirely practicable, regular service would require the construction of large multi-engined flying boats or amphibians of a type which are not now available in the American market. How- [fol. 2617] ever, detailed engineering planes and specifications, including "Model Basin Runs," on four engined equipment suitable for this service, have been developed by two outstanding American Airplane Manufacturers during the past several months—in conjunction with Pan American Engineers.

The results obtained indicate that this type of equipment would render satisfactory service over either of the lines suggested. We will be unable to secure such equipment for approximately eighteen months; and even this could be done only by placing definite orders now with manufacturers.

In view of the very real advantages that might be obtained by the Department through our operating over one of the shorter lines mentioned, we have thought it proper to inquire whether, in the event that further appropriations for foreign air mail service are obtained (and the number of trips on the main section of Foreign Air Mail Route No. 5 increased), the Department would be willing to direct that certain of the additional trips on this Route be flown via one of the suggested lines. We understand, of course, that three flights per week as now required by the Department on Route No. 5, would have to be maintained via the Capitals and chief cities of the countries of Central America now designated.

If the Department would indicate its willingness, contingent upon additional appropriations being made available, to order certain of the additional flights per week con- [fol. 2618] templated in the contract for Route No. 5 to be operated within eighteen months via one of the more direct lines described above, we are prepared to let contracts for the required equipment. Not only would the through mail service to South America be expedited, but also a considerable saving will result to the Government in reduced costs of transporting the through mail to Cristobal.

Should the Department favorably consider this change in the intermediate stops on certain of the additional trips contemplated on Route No. 5, we are prepared to have our Technical Advisor make immediate survey flights over both lines mentioned and to report the results of these survey flights to the Department.

Yours very truly,

PAN AMERICAN AIRWAYS, INC.

By

J. T. Trippe, President

JTT:s

[fol. 2649]

PAN AMERICAN WORLD AIRWAYS, INC., EXHIBIT 142

POST OFFICE DEPARTMENT
SECOND ASSISTANT POSTMASTER GENERAL
WASHINGTON

October 28, 1929.

Pan American Airways, Inc.,
122 East 42nd Street,
New York, N. Y.

Gentlemen:

The Postmaster General has handed me your letter of October 24, 1929, in which you propose that as soon as appropriations are available for the increased frequency of service contemplated by the contract on F.A.M. Route 5, such additional trips be authorized from Miami to the Canal Zone, either by way of the Isle of Pines, Swan Island, and Cape Gracias a Dios, Honduras, or by points in Cuba and Kingston, Jamaica.

This Office appreciates the desirability of a more direct service between Miami and Cristobal in order to shorten the time to and from South America, and therefore agrees to your proposal, which would accomplish this purpose as

well as result in a material saving in the cost of the service due to the decreased distance involved.

Instructions have accordingly been issued to the Division of International Postal Service to authorize such increased frequency of trips as may be determined upon over one or the other of the proposed direct routes, when appropriations are available for the service.

Very truly yours,

(Sgd) W. Irving Glover

W. Irving Glover,
Second Assistant
Postmaster General.

PAA CONTRACT

TRAFFIC AGREEMENT

between

PAN AMERICAN AIRWAYS, INC.
PAN AMERICAN-GRACE AIRWAYS, INC.
SCADTA

February 28, 1930

[fol. 2621] AN AGREEMENT made this 28th day of February 1930, between PAN AMERICAN AIRWAYS, INC., (a New York corporation, hereinafter referred to as Pan American), PAN AMERICAN-GRACE AIRWAYS, INC., (a Delaware corporation, hereinafter referred to as Panagra), and SOCIEDAD COLOMBO-ALEMANA DE TRANSPORTES AEREOS (a Colombian corporation, hereinafter referred to as Scadta).

Pan American and Panagra are engaged in the general business of the transportation of passengers, property and

mail by air between the continental United States, Nassau, Cuba, Haiti, Santo Domingo, Porto Rico, the Virgin Islands, certain of the Windward and Leeward Islands, Trinidad, British and Dutch Guiana, Mexico, the countries of Central America, Colombia, Curacao, Ecuador, Peru, Chile, Argentina and Uruguay, the Canal Zone, and in the interior of certain of said countries. Scadta is engaged in the general business of the transportation of passengers, property and mail by air between Colombia, Ecuador, Panama and the Canal Zone, and in the interior of Colombia. The parties desire to cooperate for their mutual advantage, and to this end agree as follows:

[fol. 2622] FIRST: The parties agree to furnish each other with full and complete information in regard to their respective services.

SECOND: Scadta will use its best efforts to cause passengers or property (other than mail) coming over one of its lines and destined for transportation by air to points outside Colombia served by the lines of Pan American and or Panagra, and not served by its own lines, to be transported over the lines of Pan American and or Panagra, and to this end will furnish such passengers and the consignors of such property with such information as it shall have available in respect to the services of Pan American and or Panagra, and will direct them to an office of Pan American and or Panagra where they may make arrangements for transportation over the lines of such company.

THIRD: Pan American will use its best efforts to cause passengers or property (other than mail) coming over one of its lines and destined for transportation by air to points served by the lines of Scadta and not served by its own lines or by the lines of Panagra, to be transported over the lines of Scadta, and to this end will furnish such passengers and the consignors of such property with such information as it shall have available in respect to the ser- [fol. 2623] vices of Scadta, and will direct them to an office of Scadta where they may make arrangements for transportation over its lines.

FOURTH: Panagra will use its best efforts to cause passengers or property (other than mail) coming over one of its lines and destined for transportation by air to points served by the lines of Scadta and not served by its own lines or by the lines of Pan American, to be transported over the lines of Scadta, and to this end will furnish such passengers and the consignors of such property with such information as it shall have available in respect to the services of Scadta, and will direct them to an office of Scadta where they may make arrangements for transportation over its lines.

FIFTH: Nothing in the foregoing paragraphs, Second, Third and Fourth, contained shall be construed as requiring the parties to this agreement, or any of them, to deprive themselves or itself of the longest possible carriage of passengers or property over its own lines.

SIXTH: Pan American and Panagra agree to display at their executive and chief traffic offices signs of Scadta, and Scadta agrees to display at its executive and chief traffic offices signs of Pan American and Panagra. Such [fol. 2624] signs may state the relations between the parties. They shall be furnished at the cost of the party desiring the display of the same. In general, advertising matter issued by Pan American or Panagra which refers to the service of Scadta shall be submitted to and approved by Scadta before it is used, and advertising matter issued by Scadta which refers to the service of Pan American and/or Panagra shall be submitted to and approved by Pan American and/or Panagra before it is used.

SEVENTH: Pan American agrees to cooperate with Scadta in respect of radio communication, and to give to Scadta the benefit of its experience in the use of radio apparatus both on airplanes and at ground stations, so that Scadta may be able efficiently to direct and control the operation of its aircraft. Pan American will furnish Scadta with information relative to the securing of wave lengths for international service, and will assist Scadta in the drafting of the necessary papers in connection therewith. Pan American and Panagra will supply to Scadta,

and Scadta will supply to Pan American and Panagra, their respective traffic and meteorological codes and such further information as to wave lengths, operating hours, and types of radio equipment used, as may be necessary to enable Scadta to receive ordinary radio despatches of planes [fol. 2625] and ground stations of Pan American and Panagra, and to enable Pan American and Panagra to receive ordinary radio despatches of planes and ground stations of Scadta. Pan American will lease radio apparatus to Scadta, to the extent that it may be permitted to do so by agreements with the companies owning the basic radio patents, on such terms and conditions as may be agreed upon, such terms to be not less favorable than those accorded by Pan American to any other company (except to companies in which Aviation Corporation of the Americas, the parent company of Pan American, owns fifty per cent or more of the stock).

EIGHTH: Pan American and Panagra agree to cooperate with Scadta in the salvaging of planes of Scadta which may be damaged, destroyed or lost at or near the lines of Pan American and or Panagra, and Scadta agrees to cooperate with Pan American and or Panagra in the salvaging of planes of Pan American and or Panagra which may be damaged, destroyed or lost at or near the lines of Scadta.

NINTH: Planes of Pan American and Panagra shall be privileged to use the landing fields and airports located on the international lines of Scadta, and planes of Scadta shall be privileged to use the landing fields and airports located on the international lines of Pan American and Panagra, except in cases where such use will be inconsistent [fol. 2626] with the provisions or leases of other instruments regulating the tenancy of such landing fields and airports. A company availing itself of this privilege shall be chargeable with reasonable fees therefor. For six months from the date hereof, the fee payable for the use of an airport or landing field overnight, with servicing of plane and shelter, if available, but without the lodging of crew or passengers shall be $15 (U. S. currency).

TENTH: The accounts between Pan American and or Panagra and Scadta shall be made up in United States currency and balances struck not later than the fifteenth day of each month. Balances shall be payable ten days thereafter.

ELEVENTH: Any dispute arising under, out of, in connection with, or in relation to this contract shall be submitted to arbitration. Each of the parties to the dispute will appoint an arbitrator, and the two arbitrators so named will select a third arbitrator. This arbitration shall be effected in the City of Panama and in conformity with the laws of the Republic of the same name. The parties hereby bind themselves to abide by the decision of the arbitrators or of a majority thereof, and renounce all right to take legal measures, except to enforce the award.

[fol. 2627] TWELFTH: This agreement shall continue in force for a period of two years from the date hereof, provided that Pan American and Scadta, or Panagra and Scadta, by mutual consent, may terminate their respective rights and obligations at an earlier date. None of the parties shall have the right to assign the whole or any part of its interest in this agreement without the consent of the other parties given in writing.

IN WITNESS WHEREOF, the parties have caused these presents to be executed in their corporate names and on their behalf in New York, N. Y., this 28th day of February 1930.

[fol. 2028]

PAN AMERICAN WORLD AIRWAYS, INC., EXHIBIT 144

(Letterhead of Pan American Airways, Inc.
New York City)

May 2nd, 1930

Mr. J. T. Trippe,
c/o The National City Bank,
36 Bishopsgate,
London England.

Dear Juan:

You have been missed since your departure, but business, I am glad to say, has been moving along smoothly, and everything to date is well under control. There is nothing concerning us here, and I feel quite certain that you will find everything in order on your return.

I will try to give you a resume of the high spots as briefly as possible, just to keep you informed.

Confirmation has come through that the Argentine Post Office has cancelled the Tri Motor Sikorsky Airways contract between Argentine and Chile, due to lack of performance. Yesterday, in order to be on the picture of fast service between Buenos Aires and New York, New York, Rio and Buenos Aires Lines announced a six and one-half day passenger and mail service to Miami. How they will get the mail to New York is a question. They certainly cannot handle it through the Post Office, although they might turn it over to Eastern at Miami, sending it north as express. Certainly this would cost them at least $1.00 a pound, in which case they would cut their total mileage in half for the run. There are many angles to this situation, as you can readily appreciate, and just how Washington will view such competition is questionable. I have checked up and found that as yet no arrangements have been made with Eastern.

I am enclosing Exhibit 1, covering the withdrawal of the advertisements for domestic air mail contracts which were

issued under date of April 11th, and which have been withdrawn.

The Watres Bill has been signed by the President.

I am enclosing Exhibit 2 copy of a letter from Mr. Evan E. Young to Mr. Rihl, regarding the negotiations between Great Britain and the United States respecting reciprocal operating rights, which is interesting.

[fol. 2629] Exhibit 3. For your information, no doubt you will want to take up these matters with Mr. Woods Humphery while in England.

Exhibit 4. A clipping stating that Mr. A. C. Dickinson has been elected Chairman of the Board of Sikorsky, E. E. Wilson being made President.

Mr. Merkel called yesterday to advise us that cable communications from Friedrichsafen stated definitely that there would be no stop at Havana on the trip, and that the matter of delivering mail to the Zeppelin, therefore, was off. Consequently, we have discontinued interest in the matter.

I believe Mr. Rihl wired you regarding the indication that Washington is desirous of having us handle Northbound mail from Cuba on routes F. A. M. 5 and 6, rather than on number 4. However, Mr. Rihl went to Washington day, before yesterday on the matter, and I think Captain Nagle had perhaps overstressed the urgency of the situation, and while there is some thought in Washington that it may be necessary to make some rearrangement on the handling of mail on those routes, using F. A. M. 4 only one day a week for the Cuban mail, I do not believe that anything will be precipitated before you get back. Therefore, I would not be very much concerned except to turn the matter over in your mind.

Grayson advised Rihl that they were considering the matter, as Monfalvo had brought up the discussion, but while Grayson was in Cuba, he very carefully avoided it, as he wanted to talk the situation over with us first, which was very thoughtful.

Mr. Merkel has been in close touch with us, and I have supplied him with the "Lighter Than Air" Bills, which he has read with interest. His comment on them was that they seem practically the same as the Heavier Than Air Legislation, except regarding monetary considerations, contract bases and matters pertaining to insurance, and he said he would like to discuss these phases with you on your return.

General Festing has not yet arrived.

Atlantic City matters are progressing. Mr. Whitney and Mr. Thach report that it looks quite likely that a good arrangement will be made with the "New York Sun" for the handling of papers. I cannot give you definite information on this, as I only received this information late last evening. Facilities and publicity arrangements are being whipped into line, Bibl being, I am sure, of considerable help in eliminating difficulties.

[fol. 2630] We completed the impending transaction on May 1st with Abrasion. The amount, with which you are familiar, was transferred in the manner of the last transaction, Mr. Friendly checking with both Mr. Whitney and myself before completing the matter, and everything is in order. Certain data is due daily, as cable information establishes the date of mailing to us from the southern point.

As to the inauguration of the seven day service, it has been carried out with remarkable results. There have been no slip ups as far as actual operation is concerned. The mail is on time at every point. One remarkable incident for which Pan American Grace deserves a lot of credit is that the Northbound mail was blocked at Mendoza, due to a heavy blizzard in the Andes, and arrived in Santiago forty-one hours late. That gave us some concern. However, Pan-Grace took off their coats and went to work. They made up the forty-one hours, and the mail arrived at Cristobal ten minutes ahead of schedule. Not so bad. But it did require flying from Lima to Talara at night. Not so good as a general thing, but the spirit back of it is admirable.

Publicity regarding the flight has been excellent, I feel certain. I have been watching clippings from all points of the country, and we have had fine distribution. Many congratulatory messages have been received. I am attaching data pertaining to the Southbound flight, and one covering the Northbound up to the present time, which will be of interest. The log carried in the newspapers, and I hope reached the ship.

We are also planning a special release covering Venezuelan service, which opens next week. I will not go into details further, inasmuch as the satisfactory completion of that flight is all that you are concerned with.

A very unfortunate incident occurred in connection with it which gave us some concern, and that was that while Colonel Lindbergh was laying over at the Canal Zone, a report came up from a source not yet traced, that he had crashed at the Canal Zone while making a special flight to see the Governor. The anxiety was tense for some hours, but I cannot say that I was concerned because I felt we would be immediately notified should any such catastrophe occur, and this was later borne out by our Communications Department, who immediately checked up and advised that there was no truth to the statement. We were glad to be able to release the first authentic denial over the ticker and that Colonel Lindbergh had made a short flight across the Isthmus and had landed with perfect safety.

[fol. 2631] Have just received a message from Captain Nagle that the Appropriation Bill passed the joint Committee without any strings tied to it, which is good news. I want to talk with Mr. Patchin in confirmation of this, but have not as yet been able to reach him.

Mr. and Mrs. William F. Cogswell are celebrating the birth of a daughter. The event has involved a certain amount of expense, as far as we are concerned, for because of this event I have not been able to get Mr. Cogswell into the office to discuss payments on account of Pan American-Grace Airways, Inc.!

The Dinner Key matter is progressing as you desired, but it may be necessary for either George or myself to go to Miami, in company with either Mr. MacCracken or Mr.

O'Neill, to close the transaction with the City officials there as they have requested. I still believe that there will be no question if this transpired, that we will be able to hold out and have the proceedings go ahead, whereby we (the Florida Co.) finance the condemnation, and trade the 20% of the property to the City in lieu of taxes. This is what we want and should get.

It may be necessary to elect the two directors, in order to carry this out, as the City is pushing us now so that the Trustees cannot take any action which would delay proceedings. Should this be necessary, Mr. Rihl and Mr. Thach think it would be best to elect George and myself as Directors to carry out this work. These Directors can be changed upon your return if not satisfactory.

I think this covers things of importance. Many routine matters are being cleared through promptly. The organization is running smoothly. All are present and accounted for.

I hope matters are going satisfactorily with you and that you and Mrs. Trippe are having a most enjoyable relief, in spite of the work at hand. I shall look forward to seeing you on your return somewhat rested and refreshed.

With kindest regards to you both.

Sincerely,

/s/ E. E. W.

Panair Letter No. 26

PAN AMERICAN AIRWAYS INC.
Suite 4200 — 122 East 42nd St.
NEW YORK NY

Attention: Mr. George L. Rihl,
Vice President.

Dear Mr. Rihl:

This will acknowledge receipt of the memorandum of May 23rd on the subject of 'Nyrba Propaganda' together with the two copies of one of their booklets.

These people certainly are engaging in false propaganda. Taking that part of their booklet which deals with contracts and concessions which they hold, I will try to give you a resumé of the actual situation as regards these people and their claims.

Argentina.

Nyrba are right when they state that it takes the signature of the President to modify a decree which he has signed. However their situation does not come under this heading. Their decree has not been modified but has been clarified or interpreted by the Minister of Interior. This is perfectly legal and is the practice of this country as well as it is in the United States. Here the President signs a decree but the general law permits the Minister under whose department the decree is to be enforced, make the interpretation for administration purposes. In this regard I hope within a few days to have competent, legal, official written opinion to substantiate this fact. This opinion will naturally eliminate from the minds of any person the fact that Nyrba have any preferential rights for airmail other than 25% of the airmail which their decree specifies. This leaves us 75%.

As you know the Argentine government has suspended airmail services Via Nyrba from the Argentine to Santiago.

Chile. This suspension is still in force and according to conversations with the government authorities there is no immediate prospect for the suspension being lifted. I have already sent you this governments ruling with reference to monopolies of privileges for international airlines, which is distinctly against them.

Chile.

It is true Nyrba have a presidential decree authorizing the Chilean Postmaster to make a contract with Nyrba. Up until May 24th, the Chilean Postmaster had not made such contract, therefore Nyrba have nothing in Chile except the permission to enter and leave with passengers from Santiago to Mendoza.

[fol. 2637] URUGUAY.

The Uruguayan authorities have made the same interpretation of the Nyrba contract in that country as has the Argentine. Proof of that fact is that they have awarded PAN AMERICAN GRACE AIRWAYS INC. airmail services Via Pacifico without any mention of Nyrba preferential rights and have awarded PAN AMERICAN AIRWAYS INC. services to all countries in the Western hemisphere (in combination with PAN AMERICAN GRACE AIRWAYS INC.) Via Atlantico without any mention of preferential rights of either the Nyrba or the French.

With regard to the subsidy which Nyrba claims they have from Uruguay, of $150.00 U.S. daily, this is a plain misstatement. The situation in this regard is briefly as follows: In 19[illegible] an Italian by the name of Colombo obtained from the Uruguayan government a concession to operate an airline between Montevideo and Buenos Aires. The Uruguayan government granted him $150.00 U.S. per day for each round trip completed but not to exceed a total subsidy of $25,000.— U.S. He operated until the early part of 1929 at which time due to two disasters he went bankrupt. Nyrba then obtained permission from the Uruguayan authorities to continue in his stead. Under this arrangement they started services in August and received the subvention of

$150,000 U.S. per day from August until the end of December 1929, at which time the original appropriation $25,000,000 U.S. was exhausted. Since that time Nyrba have been operating the Buenos Aires–Montevideo service without any subvention from the Uruguayan government. In my conversations with officials of this republic they emphatically state that they will not grant any additional subsidy to international airmail companies, as they now have all the international airmail service which they require and without it costing them anything in the way of subsidy.

BRAZIL.

You are familiar with the situation in Brazil and are better able than I to point out the defects of their propaganda with respect to this country and you were there since I have been.

In connection with the affiliated lines which show the Chilean national lines and the Lloyd Boliviano services, I wish to call your attention to the fact that Nyrba are not at the present time connecting with the Bolivian airservices. Their recent petition to the Argentine government for an airmail contract to Bolivia in combination with the Bolivian airservices was refused with the statement by the government to Nyrba, that this government would not award Nyrba any further postal contracts until they comply satisfactorily with all the terms of the contract which they now hold. You have a copy of this bulletin.

I am now endeavoring to place before the American Embassy in Buenos Aires the true status of Nyrba contract in this country to the end that our Embassy here may forward this information to the State department in Washington. I shall endeavor to do the same thing in Uruguay.

fol. 2635 By the end of this week I hope to have the above mentioned official, legal written opinion covering the validity of the interpretation made by the Minister of interior in the presidential decree which Trimotor Safety Airways Inc. hold.

This letter is only meant to give you a brief synopsis of the situation with respect to Nyrba propaganda. I shall

amplify it with such written proof and government action as I can obtain within the next two weeks.

Kindest personal regards.

Sincerely

/s James D. Summers

(fol. 2640) Private Letter No. 78

SANTIAGO, Chile, 30th of May, 1939

Pan American Grace Airways Inc.
NEW YORK

Dear Sir:

By request of our General Manager, Mr. F. E. Metzner, we have pleasure in advising you of the following in connection with the operations of the "Nyrba" in Chile.

We have been confidentially informed that Mr. Bunge, who arrived from Buenos Aires last Saturday, arranged to be received by the President of the Republic in audience early this week, and the object of his visit was to convince H. E. that there was no reason whatever why the "Nyrba" should pay the Aviation Department of Chile the $500,000 C/cy which they themselves offered and agreed to pay.

The President of the Republic, in a very diplomatic way, answered him that he would be very glad to consider his wishes, but that he would transcribe this to the corresponding party, which in this case was the Sub Secretaria of Aviation. It appears that the President spoke to Merino, hereby Mr. Bunge went on Tuesday to request the former to receive him, but the Sub Secretary's answer was that he could not receive him until today at 5 o'clock. He was also advised to have everything prepared, as the Sub Secretary could not dispose of more than five minutes to attend to him.

We know that Merino is very annoyed about this, and is going to put the cards on the table, that is to say they will either pay the amount contemplated in the contract or have to abandon coming into Chile.

Yours very truly,
pp. Grace y Cia. (Chile) S.A.

June 18, 1930.

Honorable Walter F. Brown,
The Postmaster General,
Washington, D. C.

Dear Sir:

We refer to our several conversations in regard to the increase of service on route F.A.M. #9 to two trips per week.

The advertisement for contract F.A.M. No. 9 was issued on January 31, 1929. It provided that service should be on a basis of three times a week. We made our bid of $1.80 per mile on the basis of three trips per week. We were aware, of course, that under the advertisement the Department reserved the right to increase or decrease the number of trips per week. But it was the general understanding on both sides that the number of trips specified in the advertisement was the number which the Department expected to place in operation within some reasonable period after the commencement of service upon the route, and never until very recently has there been any suggestion to the contrary. We believe that the Department has also had this understanding. In a statement issued by the President shortly after the award of this contract, it was stated: "In its initial stages services will be three times a week." Again the Department wrote us under date of October 1, 1929, in response to our request that service upon the route be increased to the full number of trips specified in the contract, that:

> "'It is not practical at this time to permit the performance of *full service on this route* on account of the conditions of the appropriations."

thus indicating the Department's concurrence in the view that the contract was ultimately to be operated upon the

basis of three trips per week and explaining its inability so to operate the full service at the time *simply upon the ground that sufficient funds were not available.*

Therefore, it was our confident expectation that on July 1, 1930, when further funds were so made available the number of trips on route F.A.M. No. 9 would immediately be increased to two trips per week at the contract rate. Since our bid had been made in the expectation that we would operate three round trips per week at the contract rate, it appeared to us that such an increase would simply be giving us part of what our contract contemplated.

[fol. 2642] The question, however, is not merely one of contractual rights, but of financial necessities. The operation of route F.A.M. No. 9 on the basis of one trip per week has resulted in a very large deficit to date. As a result of a year's experience in operating on the west coast of South America, we say in all sincerity that under present conditions, even with the assistance of revenue from passengers and other sources, that mail income of $1.80 per mile and operation of at least two trips per week are essential to the operation of route F.A.M. No. 9.

Proof of this position is furnished by information which has been given us in confidence by the powerful French and German government subsidized companies with which we compete in South America. The Compagnie Generale Aeropostale operates down the east coast from Natal, Brazil to Buenos Aires, Argentina, and then over the Andes to Santiago, Chile. It is shortly to inaugurate service along the north and west coasts of South America and has recently negotiated a contract to carry Chile mails directly to the United States. It receives long term subsidies from the French Government of from $.30 to $.35 more per mile than Pan American Grace Airways receives under the United States postal contract. In addition it retains all revenues derived from the transportation of mails in both directions between Europe and South America and from countries in South America, whereas Pan American Grace Airways is obliged to carry all mails to or from the United States. Notwithstanding this great assistance the Aeropostale showed a loss from operations for the year 1929.

An official of the Aeropostale has stated that the cost of operating an international air transport service in South America with French equipment and under the supervision of French personnel could not be less than $2.50 per mile. Furthermore, an officer of the German Luft Hansa recently stated that the actual cost of the operations being conducted by its subsidiary Kondor do Brasil, on the east coast of South America using German equipment, cheaper also than equipment produced in the United States, was over $2.30 per ship mile. We have obtained confidentially data authenticating the above figures which we shall be glad to show the Department if desired.

Not only is the government subvention being received by the German and French companies in South America very much greater than that received by Pan American-Grace Airways, Inc., but also we wish to point out that the total cost to the United States of conducting equivalent service in the *Domestic* Field is higher than that rendered by ourselves at the rate of $1.80 per mile. In the Domestic Air Mail service the contractors are furnished their airways by the Government itself. Our contract requires us to provide our own arrangements covering airports, intermediate [fol. 2643] fields, lighthouses, radio stations and other aids to navigation.

Under the formula adopted by the Post Office Department under the terms of the Watres Act the direct cost to the Department would be as follows:

Base Rate	$.75
Terrain	.02
Fog	.02½
Two-way radio	.06
Passenger capacity—	
average 8 passengers	.03
Multi-motor operation	.13
	$1.01½

To this should be added the amounts contributed by other Departments of the Government and which are ear-marked

as direct appropriation covering the maintenance of airways and air navigation facilities supplied to the contractors carrying mails over domestic lines.

The appropriation for the fiscal year beginning July 1, 1930, to be expended by the Department of Commerce only on airways, amounts to $7,944,000. Of this amount $4,400,000 is to be used to maintain existing lighting, radio, and other aids to aerial navigation. At the present time approximately 30,000 miles of airways are being maintained. 5,500 miles are receiving teletype service; 10,500 miles receive radio service, and 13,500 miles are lighted.

Disregarding entirely the interest on invested capital, the annual costs of supplying each of these kinds of service per mile of airway is:

For Teletype service	$70.00 per mile
For lighting and other direct airway maintenance	125.00 " "
For maintenance of radio facilities	210.00 " "
Total	$405.00 per mile

Applying the above costs to an average mile of airway in the foreign field, and discounting entirely the additional costs of maintaining such facilities in the foreign field, the cost of all such facilities on a route operated only two round trips per week would exceed $1.94 per ship mile. Thus, if in the foreign field airways were to be supplied by the United States Government instead of by the contractor, as is required in Contract F.A.M. No. 9, at [illegible] using the rates [illegible] Fol. 2644 and formulae under the recently enacted Watres Act, the cost to the Government for tri-motor service would total $2.96½ per mile.

A factor must then be applied to cover other additional expenses incurred through operating in the foreign field. Among such expenses are: the cost incidental to obtaining concessions and operating rights; the costs of clearing aircraft and flying crews; foreign salary allowances; the higher costs of fuel and, finally, the absence of virtually free municipal airports which are usually available in the

United States, and the costs of transporting equipment and personnel to foreign countries.

All operating experience to date in the foreign field indicates that the additional cost incidental to such operation as stated above amounts to at least 40c per ship mile. Adding this to the previous figure, we arrive at a total cost per mile, using domestic operation as an index, of $3.36½. Even this figure fails to take into account that Route No. F.A.M. 9 is, for the present, to be operated only twice a week, whereas the domestic air mail routes, to which the Department's formula applies, are operated daily.

Even at $1.80 per mile it is obviously impossible to arrange for all aids to navigation which the Government deems necessary in the Domestic Service. Such facilities could only be provided over a long period of years with the gradual increase of outside revenue.

We therefore submit, both because of what was in the contemplation of the Department and ourselves at the time contract No. F.A.M. 9 was advertised, and because the route cannot be operated for less than $1.80 per mile or for fewer than two trips per week, the service should be increased to at least two trips per week without our being asked to accept any reduction in our pay.

Respectfully,

PAN AMERICAN-GRACE AIRWAYS, INC.,

By: _____

[fol. 2645]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 149

COPY

On July 22, 1930, Mr. Trippe and I called upon the Postmaster General about 9:40 A.M.

Mr. Trippe explained to him that the negotiations between the Aviation Corporation of the Americas and the New York Rio and Buenos Aires Lines, Inc. were progress-

ing satisfactorily, but that the attorneys for the Aviation Corporation of the Americas were very much concerned as to whether or not a sale by the New York Rio and Buenos Aires Lines, Inc. of all its assets to the Aviation Corporation of the Americas and its subsidiaries, would constitute a violation of either the Sherman Act or the Clayton Act. He also stated that counsel for the Aviation Corporation of the Americas, as well as counsel for the New York Rio and Buenos Aires Lines, had raised the question as to whether the transaction would also violate the postal laws prohibiting combinations or agreements in restraint of bidding on postal contracts.

Postmaster General Brown stated that, in his opinion, the proposed transaction would not be a violation of either the Sherman Act or the Clayton Act, and that as far as the postal statutes were concerned, he had stated to Mr. MacCracken prior to the time that Mr. Trippe and I had personally agreed upon the basis for a deal, that unless the deal was made he would not advertise the route from Paramaribo to Santos, or any East Coast route, because of the difficulties growing out of the difference between the rates charged by the Government contractor on northbound mail, and the rates charged by the New York Rio and Buenos Aires Lines. He said he had not told Mr. Trippe this before, because he did not want to put the New York Rio and Buenos Aires Line at any disadvantage in the negotiations, but now that he and I had agreed upon the terms of the trade, he saw no objection to restating the position of the Post Office Department in this regard to both of us.

He also stated that as far as the Sherman and Clayton Acts were concerned, we could not hope to continue competition unless both of us had a subsidy, and it was definitely the policy of the Post Office Department not to subsidize two companies in the South American field. He said he would discuss the matter with the Attorney General, telling him that he, the Postmaster General, had been very active in attempting to bring about an agreement between the two companies because he felt the best interests of the Government could be served thereby, and that he would suggest

to him that the Attorney General might write a letter to the Postmaster General stating whether or not by his activity in bringing about the contemplated agreement, he was putting the companies into a position which might later be grounds for attack by the Department of Justice or other Governmental officials, and he would let us know the outcome of this discussion. He stated that to his mind it was perfectly clear that it was to the best advantage of the Government, as well as the companies, that the transaction be carried out.

(Signed) J. P. MacCracken, Jr.

I have read the foregoing statement this twenty-second day of July, nineteen thirty, and it correctly states my recollection of what transpired at the interview that Mr. MacCracken and I had with the Postmaster General on this date.

(Signed) J. T. Trippe.

[fol. 2646]

Pan American World Airways, Inc. Exhibit 150

MEMORANDUM IN REGARD TO THE PROPOSED ACQUISITION BY AVIATION CORPORATION OF THE AMERICAS OF THE ASSETS OF NEW YORK, RIO & BUENOS AIRES LINE, INC.

Dated, July 28, 1930.

[fol. 2647]

MEMORANDUM IN REGARD TO THE PROPOSED ACQUISITION BY AVIATION CORPORATION OF THE AMERICAS OF THE ASSETS OF NEW YORK, RIO & BUENOS AIRES LINE, INC.

1. *Corporate Structure of the Companies and Outline of Proposed Acquisition.*

Aviation Corporation of the Americas is a Delaware corporation. It was organized on June 26, 1928. Its Authorized capital stock consists of 1,000,000 shares of a single class and without par value, of which, on June 30, 1930,

388,190 shares were issued and outstanding. A balance sheet of Aviation Corporation of the Americas as of June 30, 1930, and an income account for the six months ending June 30, 1930, are annexed hereto, marked Exhibit A.

Aviation Corporation of the Americas is exclusively a holding company and conducts no operations itself. It owns all the stock of Pan American Airways, Inc., a New York corporation, and Compania Mexicana de Aviacion, S. A., a Mexican corporation, and fifty per cent. of the stock of Pan American Grace Airways, Inc., a Delaware corporation, which are operating companies. In this memorandum, Aviation Corporation of the Americas is sometimes referred to as Aviation and the three operating companies [fol. 2548] above-mentioned are sometimes referred to as the Pan American Airways system.

New York, Rio and Buenos Aires Line, Inc. (hereinafter referred to as Nyrba), is a Delaware corporation. It was organized on April 17, 1929. Its authorized capital stock consists of 750,000 shares of a single class and without par value, of which, on May 31, 1930, 386,609 shares were issued and outstanding. A balance sheet of Nyrba as of May 31, 1930, and an income account for the five months ending May 31, 1930, are annexed hereto, marked Exhibit B.

Nyrba conducts certain of its operations itself and conducts other operations through its wholly owned subsidiaries, Trimotor Safety Airways, Inc., a Delaware corporation, which operates only in Argentina and Uruguay, and Nyrba do Brasil, S. A., a Brazilian corporation, which operates only in Brazil.

It is proposed that Aviation should purchase substantially all the assets of Nyrba, paying for such assets either wholly in stock of Aviation or partly in such stock and partly in cash. It has not been determined whether the stock of the subsidiaries of Nyrba or the assets thereof, or both, should be transferred. Any assets acquired, other than stock of the subsidiaries of Nyrba, would be trans- [fol. 2549] ferred to Pan American Airways, Inc., an existing wholly owned subsidiary of Aviation. If the stock of

any of the subsidiaries of Nyrba should be acquired, such stock would probably be held by Aviation Corporation of the Americas itself.

II. *Development of the United States Foreign Air Mail System and of the Air Mail Routes of the Pan American Airways System.*

Pan American Airways, Inc. shortly after its organization, entered into a contract with the United States for the transportation of United States mail from Florida to Cuba upon a poundage basis, and also entered into a contract with Cuba for the transportation of Cuban air mail to Florida. Operations between Key West and Havana were inaugurated on October 19, 1927.

On March 8, 1928, Congress enacted a statute authorizing the Postmaster General to contract for the transportation of United States mail by air to foreign countries and to pay the contractor upon a mileage basis. Shortly thereafter Aviation Corporation of the Americas was organized and acquired all the stock of Pan American Airways, Inc., and the stock of Aviation was widely distributed. In the course of the next year Pan American Airways, Inc. entered into the following contracts with the United States for the transportation of its air mail to Latin America:

[fol. 2650] (1) Contract No. 4, May 29, 1928, for five years, from Key West, Florida, (later changed to Miami, Florida) to Havana, Cuba. This contract superseded the contract above referred to).

(2) Contract No. 5, July 13, 1928, for ten years, from Miami, Florida via Havana, Cuba, Belize, British Honduras and points in Honduras, San Salvador, Nicaragua and Costa Rica to the Canal Zone, with an option to extend the service along the north coast of South America via Port of Spain, Trinidad, as far east as Paramaribo, Dutch Guiana.

(3) Contract No. 6, July 13, 1928, for ten years, from Miami, Florida, via Havana, Cuba, Port au Prince, Haiti and Santo Domingo, Dominican Republic, to San

Juan, Porto Rico, with an option to extend the service via the Windward and Leeward Islands to Port of Spain, Trinidad.

(4) Contract No. 7, October 24, 1928, for ten years, from Miami, Florida to Nassau, Bahamas Islands.

(5) Contract No. 8, February 16, 1929, for ten years, from Brownsville, Texas to Mexico City, Mexico or Vera Cruz, Mexico, with an option to extend the service southward into Central America.

The routes covered by these contracts are indicated on the map filed herewith. Operations are being conducted on all these routes.

While the Act of March 8, 1928 had authorized the making of contracts for the transportation of United States mails to foreign countries upon a mileage basis of not to exceed $2 per mile, it did not permit the Post Office Department to pay the contractor for transporting mails from foreign countries to the United States. In this respect the Act followed the general precedent in international mail service [fol. 2651] whereby each country makes arrangements for its own outgoing mails and has no concern with the arrangements for return mails from foreign countries. However, it soon developed that if American air transport lines were paid by the United States Government not in excess of $2 per mile for transportation of the mails outward bound and were forced to rely entirely on receipts from foreign countries for the return flights, their revenues would not be sufficient to permit the continuance of service. (See 70th Cong. 2d Sess., Senate Report No. 1599 and House Report No. 2330). If the air mail service was to be continued, the Government was therefore obliged either to raise the maximum mileage rate of $2 per mile set in the Act of March 8, 1928, or to authorize payment of the contractor for the return flight as well as for the outward flight. The latter alternative was chosen and, on March 2, 1929, Congress passed the so-called Kelly Act which amended the Act of March 8, 1928, so as to provide for round trip payment. The Foreign Air Mail Act, as it now stands, will be found in the United States Code, Title 39, Section 465-a.

Prior to the passage of the Act of March 2, 1929, the Post Office Department had issued an advertisement for bids for a contract to be awarded under the provisions of the amended statute, for service for a ten year period from the Canal Zone down the west coast of South America to Santiago, Chile, and return, with an option to extend the [fol. 2652] route over the Andes to Buenos Aires, Argentina, and Montevideo, Uruguay. To facilitate the operation of such a route, Aviation Corporation of the Americas joined with W. R. Grace & Co. in organizing Pan American-Grace Airways, Inc., each of the parent corporations owning 50% of the stock. On March 4, 1929, Contract No. 9, covering the route described in the advertisement, was awarded to Pan American-Grace Airways, Inc.

The Act of March 2, 1929 had been framed upon the theory that the Post Office Department would make arrangements with foreign countries whereby such countries would pay the Department for the transportation of their mails to the United States by the United States contractor. It developed, however, that by far the greater number of foreign countries were unwilling to make any such arrangements with the Post Office Department, preferring to make their arrangements directly with the contractor as in the case of other international mails. Since it was obviously advantageous that mails of foreign countries should be carried on these return flights, and since, equally obviously, the contractor, who was already being paid by the United States, could not be permitted to retain the revenue received [fol. 2653] from foreign countries for the transportation of their mails to the United States, the contractor and the Post Office Department agreed that the Department should make a deduction from the pay of the contractor on account of each pound of mail carried to the United States or its possessions or territories from foreign countries making payments directly to the contractor. This deduction was not to be on the basis of the amount actually received by the contractor from the foreign country, but on the basis of the rate fixed by the Post Office Department per pound for transportation of mails outward bound. Since the contractor cannot afford to charge a rate to foreign countries lower

than this Post Office rate, and since the agreements of the contractor with the Post Office Department provide that the contractor will not procure the fixing of a rate more than 25% in excess of the rate charged by the Post Office Department outward bound, the Post Office Department has practically complete control of the rates on return mail.

The Act of March 2, 1929 contained provisions empowering the Postmaster General to amend contracts let under the Act of March 8, 1928, so as to bring them under the broader powers conferred by the new statute. In pursuance of this authority and in compliance with the terms of the [fol. 2654] contracts, Contracts Nos. 5, 6 and 8 were extended and amended. As a result of these changes, Contract No. 5 extends to Paramaribo, Dutch Guiana (the Post Office Department, however, having ordered a suspension of service between Puerto Cabello, Venezuela and Port of Spain, Trinidad); Contract No. 6 extends to Port of Spain, Trinidad, where it connects with Contract No. 5; and Contract No. 8 extends to San Salvador, where it connects with Contract No. 5. Under all three contracts, the contractor is paid for transportation in both directions on the route but, in all cases where the contractor receives payment from foreign countries for the transportation of their mails to the United States, it is subject to a deduction from its pay at a rate per pound of such mail equal to the rate fixed by the Post Office Department for transportation outward bound. In order to speed up the service to the Canal Zone connecting with the service on Route No. 9, the Post Office Department has split Route No. 5 so that two trips per week connecting with the South American mail are performed by a direct flight from Havana to Puerto Cabezas, Nicaragua, and thence along the east coast of Central America to the Canal Zone, the remaining trips being performed over the route originally flown.

[fol. 2655] At the same time that the companies in the Pan American Airways System were entering into these United States air mail contracts, they were also making arrangements with foreign countries for the transportation of their mails. Appended hereto, marked Exhibit C, is a list of all such contracts, showing the names of the com-

panies holding the respective contracts, the respective dates on which they were secured, their respective dates of expiration, and the respective rates fixed for the transportation of air mail from such countries to the United States. All these contracts give the contractor right to carry international mails of the country concerned. In the case of countries which are marked with an asterisk, the contracts also permit the carrying of mail within such countries.

In addition to the routes of the Pan American Airways System operated under contract with the United States Government, Compania Mexicana de Aviacion operates a route from Vera Cruz, Mexico to Merida, Mexico, and since June 26, 1930, Pan American Airways has carried Brazilian mail from Rio de Janeiro, Brazil, to Paramaribo, Dutch Guiana, and intermediate points.

Mails of foreign countries destined to the United States are carried on all parts of the Pan American Airways System. Outgoing mails of the United States are carried on all parts of the system except the route between Vera Cruz and Merida, and south of Paramaribo. Passengers [fol. 2656] are carried on all parts of the system except on the direct service between Miami and the Canal Zone, and south of Mollendo, Peru, and Paramaribo, Dutch Guiana. No freight or express other than the baggage of passengers is carried on any of the lines of the Pan American Airways System.

III. *Development of the Lines of Nyrba.*

The pioneer work in the development of the Nyrba system was done by Trimotor Safety Airways, Inc., now a wholly owned subsidiary of Nyrba. This company on February 27, 1929, entered into a contract with the Government of Argentina for the transportation of its international air mail, for a term of ten years, and on May 16, 1929, entered into a contract with the Republic of Uruguay for the transportation of its international air mail for five years. Operations were begun between Montevideo, Uruguay, Buenos Aires, Argentina, and Santiago, Chile, in August, 1929. Service between Buenos Aires, Argentina, and Yacuiba, Bolivia, was begun in December, 1929. The line was gradually

pushed north along the east coast of South America through Rio de Janeiro, Brazil, up to Paramaribo, Dutch Guiana, and thence via the West Indies, Porto Rico and Cuba to Miami, Florida. Service to the United States was initiated in February, 1930. A list of all the contracts held by Nyrba and its subsidiaries with foreign governments for the transportation of their international mails, showing the names of [fol. 2657] the companies holding the respective contracts, the respective dates on which such contracts were secured, their respective dates of expiration, and the respective rates for the transportation of air mail from such country to the United States, is attached hereto, marked Exhibit D.

Nyrba does not carry any United States mail. It carries return mails to the United States only on its main line from Buenos Aires to Miami, which is shown on the map filed herewith. It carries passengers on all its lines. It also carries a negligible amount of express and freight.

IV. *Projected East Coast Mail Contract.*

For some time past business men have desired the establishment of an air mail service from the present terminus of the United States mail route at Paramaribo, Dutch Guiana, down the east coast of South America to Rio de Janeiro and Santos (or Rio Grande do Sul), Brazil. The establishment of such a line would round out this country's foreign air mail service in Latin America. Funds sufficient to permit contracting for such a service were approved at [fol. 2658] the last session of Congress. Immediately upon such appropriation being made, the Post Office Department undertook a study of the situation in regard to such a contract.

The rate charged by the Post Office Department for the transportation of air mail from the United States to Argentina and Uruguay via the west coast of South America is $22.50 per pound. The rates to other countries are in line with this scale, the rate to Chile being $20.00 per pound and the rate to Peru being $16.00 per pound. It was contemplated that this same scale of rates should be applied to return mails from the South American countries to the

United States. The Post Office Department arrived at this scale after a study of the operating costs and rates of the French and German air transport companies operating air mail service in South America. Officials of the Post Office Department have stated that they aimed to establish the rates on such a basis that, with the expected growth in the volume of air mail from South America to the United States, the amounts received from foreign countries would soon reach a figure sufficient to reimburse the Post Office Department for its mileage payments to the United States postal contractor on the return flight.

[fol. 2659] Nyrba, however, had entered into contracts with the Governments of Argentina and Uruguay to transport their airmails to the United States at the rate of approximately $10.00 per pound, and had also entered into a contract with the Government of Brazil to transport its air mail to the United States at the rate of approximately $8.80 per pound. If Nyrba should be awarded the proposed east coast contract, it would be difficult for the Post Office Department to make an explanation satisfactory to the Argentine Government why the west coast contractor (Pan American-Grace Airways) was required to charge at the rate of $22.50 per pound for transporting air mail to the United States, whereas the east coast contractor (Nyrba) charged only $10.00 per pound. It would likewise be difficult for the Post Office Department to make an explanation satisfactory to the Government of Peru why it was being charged at the rate of $16.00 per pound, whereas Brazil, situated at an approximately equal distance from the United States, was paying only approximately $8.80 [fol. 2660] per pound. If, on the other hand, the east coast contract should be awarded to Pan American Airways, the contractor would be subject to competition on the part of Nyrba, carrying northbound mail at lower rates. The Post Office Department would thus be deprived of part of the revenue which it would otherwise secure from air mail originating in countries along and beyond the proposed east coast route.

The Post Office Department was therefore faced with the problem of taking steps to protect its own interest in the

carriage of mails of South American countries to the United States. In order to protect this interest, the Postmaster General made known to representatives of Nyrba that he would not advertise for bids for the east coast contract unless arrangements were made for the union of the businesses of Nyrba and the Pan American Airways System, and he suggested to representatives of both Nyrba and Aviation that they should consolidate their lines. It was in accordance with this suggestion of the Postmaster General that representatives of Nyrba and Aviation reached an agreement as to the purchase by Aviation of the assets of Nyrba.

[fol. 2661] V. *Competition between the Pan American Airways System and Nyrba.*

Both Pan American Airways and Nyrba operate from Miami, Florida, via Havana, Cuba, San Juan, Porto Rico, and the West Indies to Paramaribo, Dutch Guiana. However, all of the outgoing mails along this line are and necessarily will be carried by Pan American Airways, Inc., by virtue of its contracts with the United States. The bulk of the return mail (including all the Cuban mail) is carried by Pan American Airways, only 112 pounds having been carried by Nyrba to the United States up to July 12, 1930. Pan American Airways carries no express or freight. Competition is thus practically confined to the carriage of passengers.

Except for the service between Miami and Havana, the passenger traffic between the United States and countries along the route from Miami to Paramaribo is not of moment. During the six months ending June 30, 1930, the number of passengers carried to and from the United States along this route and the revenue received by Pan American Airways from such transportation, were as follows:

[fol. 2662]

PAN AMERICAN AIRWAYS

Between	Number of Passengers carried	Amount Received (including receipts from excess baggage)
Miami and Havana	3,131	$141,565.37
Miami and all other points	129	20,066.32
Total	3,260	$161,631.69

The revenues from the Miami-Havana passenger traffic constituted 19% of the total passenger receipts and 4.5% of the gross revenues of the Pan American Airways System. The revenues from passenger traffic between Miami and other points on the route constituted 3% of the passenger revenues and 0.7% of the total revenues of the Pan American Airways System.

The number of passengers carried by Nyrba from the beginning of its service through July 12, 1930, between the United States and foreign countries on the route Miami-Paramaribo are as follows:

NYRBA

Between	Number of Passengers Carried
Miami and Havana	904
Miami and all other points	18
Total	922

Figures showing the proportion of this passenger traffic to the total passenger traffic and figures showing the passenger receipts from this traffic and the proportion which this bears to the total revenues of Nyrba are not available.

[fol. 2663] In this entire area, and particularly between Miami and Havana, Pan American Airways and Nyrba are subject to intense competition on the part of steamship lines. Attached hereto, marked Exhibit E, are figures

showing the number of sailings and the number of passengers carried between the United States and countries on the route Miami-Paramaribo in the calendar year 1929, compiled from Department of Commerce figures and data furnished by steamship lines, together with a list of the steamship lines reaching the various ports. It appears from this exhibit that the number of passengers traveling by air constitute only 4% of the total between the United States and Havana, and 0.5% of the total between the United States and other points in this area.*

The distance between Florida and Havana is so small that the service of the steamship lines is directly competitive with that of Pan American Airways and Nyrba. Since the fast trains from the north arrive at Miami in the early morning hours, no time is gained by departing from that point rather than Key West. The passenger traveling by air arrives at Havana at 11 A.M. and the passenger coming [fol. 2664] by boat at 4 P.M. On the return trip the boat traveler leaves in the morning and the airplane traveler in the afternoon, but both proceed north by the same train. The Peninsular & Occidental S.S. Co., operating between Key West and Havana, carries some 90,000 passengers per year, as compared to approximately 4035 in the first six months of 1930 (when the bulk of the traffic occurs) for Pan American Airways and Nyrba combined.

Nyrba serves the east coast of South America between Paramaribo, Dutch Guiana, and Rio de Janeiro, Brazil, carrying passengers, freight and local and northbound mail. On June 26, 1930, Pan American Airways secured a contract from the Brazilian Government for the carrying of local and international mail. Pan American Airways began the carrying of Brazilian mail north on June 26, 1930 and has made three trips since that time. The purpose of ob-

* This computation is made on the assumption that the number of passengers carried by the steamship lines in the first six months of 1930 was half the total for 1929. It is well known, however, that, especially in the case of Havana, much more than half of the traffic is in the first six months of the year.

taining this Brazilian mail contract was to enable Pan American to qualify for a United States mail contract to Brazil, and no passengers or freight are carried. This line is now being operated by Pan American Airways at a loss which it is estimated will exceed $40,000 per month. Nyrba's losses for its operations between Paramaribo and Rio de Janeiro exceed $30,000 per month. It is obvious, therefore, that unless a United States mail contract is secured, the lines between Paramaribo and Rio can be operated only at severe financial losses.

[fol. 2665] The Pan American Airways System conducts no operations between Rio de Janeiro, Brazil and Montevideo, Uruguay. In this area Nyrba carries passengers, freight, and northbound and local mails.

Both the Pan American Airways System (partly by means of Pan American-Grace Airways, Inc., fifty per cent. of the stock of which is owned by W. R. Grace & Co. and fifty per cent. by Aviation Corporation of the Americas) and Nyrba are engaged in transportation between Argentina and Uruguay and the United States, Nyrba operating up the east coast of South America and the Pan American Airways System operating over the Andes and thence up the west coast of South America. However, there is no competition as to passenger business since Pan American-Grace Airways does not carry passengers south of Mollendo, Peru. All of the outgoing United States mail is necessarily handled by the Pan American Airways System under its United States Government contracts. The only possible competition on this route, therefore, is as regards mail from Argentina and Uruguay to the United States. However, under its arrangements with the Post Office Department, Pan American-Grace Airways is obliged to credit the Post Office Department on account of all such mail carried by it to the United States. Thus Pan American-Grace Airways is in substance acting for the United States Government in carrying such mail, and the competition is really [fol. 2666] not between Nyrba and the Pan American Airways System, but between Nyrba and the United States Government. Since there is no competition for passenger

business between Argentina and Uruguay and the United States, and since the competition as to return mails is in substance between Nyrba and the United States Government, it is believed that the decision in *United States* v. *Southern Pacific Co.*, 259 U.S. 214, does not apply.

Pan American-Grace Airways and Nyrba operate between Buenos Aires, Argentina, and Santiago, Chile. However, since Nyrba's mail contract with Chile does not permit the carriage of Chilean air mail beyond Argentina, Nyrba does not compete with Pan American-Grace Airways for the transportation of Chilean mail to the United States. There is likewise no competition as to passenger business, since Pan American-Grace Airways does not carry passengers south of Mollendo, Peru.

The following table shows the sources of revenue of the Pan American Airways System for the six months ending June 30, 1930:

[fol. 2667]

	Pan American Airways	Compañia Mexicana de Aviación	Pan American-Grace Airways	Total or Average
United States Mail Revenue*	$1,479,170.00	$263,440.00	$416,921.40	$2,159,531.40
Amount retained from mail payments of foreign governments	35,351.37	74,270.47	18,088.67	127,710.51
Total mail revenue	$1,514,521.37	$337,710.47	$435,010.07	$2,287,241.91
Passenger revenue	450,216.42	209,443.13	58,170.59	717,830.14
All other revenue	63,427.01	34,823.00	22,922.86	121,172.87
Total revenue	$2,028,164.80	$581,976.60	$516,103.52	$3,126,244.92
Mail revenue per airplane mile**	$1.40	$.62	$1.20	$1.15
Total revenue per airplane mile	$1.87	$1.09	$1.43	$1.58
Per cent. mail to total revenue per airplane mile	75%	58%	84%	73%

* This figure is not the amount actually paid by the United States but the amount payable before deductions from the pay of the contractor on account of mails of foreign governments carried by it to the United States under arrangements whereby it receives payment from such governments.

** Airplane mile includes not only miles flown on revenue mail flights but also ferry flights, flights necessary for repairs, etc. The total airplane miles exceed the total miles flown on revenue mail flights by approximately 10%.

[fol. 2668] On Division I of the Pan American Airways System, of which the route Miami-Paramaribo forms a major part, operating costs amounted to $2.17 per airplane mile (as compared to approximately $2.50 per mile for the lines of the French Aeropostale and $2.30 per mile for the lines of the German Lufthansa in South America). In spite of mail revenue of $1.47 per airplane mile, operations were conducted at a loss of 21.2 cents per airplane mile. On the same route Nyrba's operating revenue was only $0.37 per airplane mile and its costs $2.34 per airplane mile, leaving a loss of $1.97 per airplane mile.

The income account of the Pan American Airways System shows an operating loss of nearly $600,000 in the first six months of 1930, in spite of receipts of $2,159,531.40 from United States Government contracts. It is expected that the loss for the second six months of 1930 will not be as large. Nyrba, which does not have any United States Government contract, is suffering an operating loss in excess of $100,000 per month. Even if the United States air mail contract between Paramaribo and Rio de Janeiro should be awarded to Nyrba, it would still be faced with the certainty of losses on much of its line. In the first place, the economic value of the contract to Nyrba would be greatly [fol. 2669] lessened by the fact that, in line with the policy pursued in the case of other foreign mail contracts, the Post Office Department would make a deduction on account of Argentine and Uruguay mail at its own rate of $22.50 per pound, although Nyrba received only $10 per pound from the foreign governments, and would make deductions on a similar scale in the case of Brazilian mail. Even if the situation created by the low rates fixed in Nyrba's contracts with Argentina and other South American countries could be corrected, Nyrba, as the United States postal contractor, would be required to turn over the South American mail at Paramaribo to the United States postal contractor from Miami to that point and would be subject to a deduction on account of mails carried from the West Indies to the United States in competition with the United States Post Office. Thus Nyrba would be attempting to operate the entire line from Miami to Buenos Aires although receiving

postal revenues only for the portion of its line between Paramaribo and Santos, which is less than half the total mileage. As already stated, Pan American Airways, although receiving mail revenue of approximately $1.47 per airplane mile on the portion of its route between Miami and Paramaribo, is suffering a loss of 21.2 cents per airplane mile. The continued operation of this route by Nyrba, re- [fol. 2670] lying exclusively on passenger revenues, would appear to be impossible.

Only 23.7% of the capital of the Pan American Airways System and only 34.5% of the capital of Nyrba is invested in the route between Miami and Paramaribo. The bulk of the capital of the Pan American Airways System is invested on the routes leading to Mexico, Central America and the Canal Zone. Sixty-five and a half per cent of the capital of Nyrba is invested in Brazil, Uruguay, Argentina, and Chile, where the investments of the Pan American Airways System are small.

It is believed that the union of Nyrba and the Pan American Airways System presents advantages not only to the Post Office Department but to other branches of the Government. England, France and Germany have each adopted the policy of giving all their support, diplomatic, financial and military, to a single aviation company operating in the international field. The French Aeropostale and the German Lufthansa (operating through a Brazilian company known as Kondor do Brasil) are already engaged in operations in South America in competition with the Pan American Airways System and with Nyrba. The State Department naturally desires to have its representatives give all possible aid to an American company against its foreign rivals. It would be able to assist more effectively if there were only a single American company in the field. The Department of Commerce is concerned lest American pres- [fol. 2671] tige in South America should be lowered by the failure of one of the two lines. The War Department and the Navy Department are greatly interested in the building up of a powerful American international air transport system with well trained crews and modern equipment.

It is believed that officials of the four departments above named, if asked by the Department of Justice, would state that, in their opinion, the proposed union of Nyrba and the Pan American Airways System would be in the public interest.

VI. *Summary.*

The situation here discussed is in many respects unique. The industry concerned is not an old established one but a new one which is still in an experimental stage. The Pan American Airways System and Nyrba are in competition only in regard to a comparatively insignificant amount of passenger traffic in an area which is abundantly served by steamship lines, and in regard to the transportation of certain foreign mails to the United States. Under the ordinary practice in international mail service, these mails would be carried wholly under contracts between the respective foreign governments and the private contractor, and the United States would have no concern with them. It is submitted that the anti-trust laws have no application to [fol. 2672] the business of transporting mails from a foreign nation into the United States, the foreign government being the only party really concerned. Moreover, the effect of the Act of March 2, 1929, was to place the United States itself in the business of transporting mails of foreign countries to the United States. Under the system which has been developed, whereby the United States Post Office Department benefits directly from foreign mails brought to the United States by its contractors, competition with such a contractor for the carriage of return mails is in substance competition with the United States itself.

Furthermore, it appears that, whether or not the proposed acquisition occurs, there is almost no possibility of continued competition between these two lines. The Pan American Airways System, even with revenue of $2,159,531.40 from United States Government mail contracts in the first six months of 1930, has not yet been able to earn an operating profit. Nyrba, which has established an excellent plant along the east coast of South America, is apparently faced with the prospect of exhausting its present

capital within a few months. Thus it appears that what little competition may now exist between the lines may shortly disappear, and that any potential competition which might otherwise be thought to exist is not likely to ma- [fol. 2673] terialize. It is submitted, that under these circumstances, there is nothing in the anti-trust laws which requires that the stockholders of Nyrba be forced to await the complete exhaustion of its capital before disposing of its assets to the only other party which is able to make effective utilization of them. As pointed out above, such immediate utilization will facilitate the objects of the Government in the development of the foreign air mail service.

July 28, 1930.

[Vol. 2674]

AVIATION CORPORATION OF THE AMERICAS

Profit and Loss*

January 1 to June 30, 1930.

Income from Operations January 1 to June 30, 1930	$2,616,841.47
Less - Operating Expenses, including Salaries, Maintenance, Depreciation and Taxes	3,089,439.34
Loss from Operations	472,198.87
Extension and Development	162,875.19
Surplus Adjustments	9,794.69
Deficit, January 1 to June 30, 1930	$ 645,368.95
Deficit January 1, 1930	513,041.56
Deficit June 30, 1930	$1,158,408.51

*Includes Pan American Airways, Inc. and Compania Mexicana de Aviacion, S.A., but does not include Pan American-Grace Airways, Inc. That company showed a deficit on January 1, 1930, of $125,800. Since January 1, 1930, it has incurred operating losses of $11,100. In addition to liabilities to W. R. Grace & Co. for use of the Grace agencies on the west coast of South America, and to Pan American Airways, Inc. for its share in Pan American's overhead. Payment of the latter liability would decrease the deficit shown above for Aviation Corporation of the Americas.

[fol. 2675]

EXHIBIT C.

SUMMARY OF INTERNATIONAL MAIL CONTRACTS OF THE PAN AMERICAN AIRWAYS SYSTEM WITH FOREIGN COUNTRIES.

Argentina

In name of: Pan American-Grace Airways, Inc., but contract provides that International mail may be transported by Pan American Airways, Inc., on establishing connection with Pan American-Grace Airways, Inc.

Contract Signed: October 12th, 1929.

Term: 10 years. May be renewed for 5 years more.

Rate to U. S.—$32.50 per Lb. net. (New rate quoted of $22.00 per Lb. gross not yet in effect.)

Brazil

In name of: Pan American Airways, Inc.

Contract Signed: June 26th, 1930 (Date of Official Gazette).

Term: One year. Application pending for long term contract which is expected to be granted shortly.

Rate to U. S.—$19.20 per Lb. net. (1.700 for each 5 gram unit, converted into U. S. Cy. at 8.500 to the dollar, on basis of 480 grams to Lb.)

Chile

In name of: Pan American-Grace Airways, Inc.

Contract Signed: August 24th, 1929, modified April 5th, 1930.

Term: 2 years, with right to renew for further period of 2 years.

Rate to U. S.—$20.00 per Lb. gross, paid directly to U. S. Post Office Department.

[fol. 2679]

Costa Rica

In name of: Pan American Airways, Inc.

Contract Signed: January 23rd, 1929.

Term: 10 years.

Rate to U. S.—$8.00 per Lb. gross.

Dominican Republic

In name of: Pan American Airways, Inc.

Contract Signed: June 18th, 1930.

Term: 15 years from April 16th, 1929, which is date of signature of general mail and operating contract.

Rate to U. S.—$4.00 per Lb. gross.

**Dutch Guiana*

In name of: Pan American Airways, Inc.

Contract Signed: March 1st, 1930.

Term: One year. May be renewed for one year more.

Rate to U. S.—$12.00 per Lb. gross.

**Ecuador*

In name of: Pan American-Grace Airways, Inc.

Contract Signed: August 24th, 1929, supplementary to contract dated February 22nd, 1929.

Term: 20 years, with right to renew for further periods of 10 years.

Rate to U. S.—Contract provides $17.50 per Lb. net, but actual receipts are approximately $12.00 per Lb. gross, which is to be rate under contract in process of negotiation.

[fol. 2680]

Guatemala

In name of: Pan American Airways, Inc.

Contract Signed: January 15th, 1930.

Term: One year from inauguration of service. (First flight was on December 25th, 1929, first mail carried was on January 1st, 1930.) May be renewed for one year.

Rate to U. S.—0.0265 quetzales per 2 gram unit, equivalent to $6.00 per Lb. gross.

Haiti

In name of: Pan American Airways, Inc.

Contract Signed: February 24th, 1930.

Term: 20 years. No renewal clause, but Art. 16 states that this contract "shall have the same duration as the contract of February 22nd, 1929" which is renewable.

Rate to U. S.—$4.00 per Lb. gross. ($8.80 per Kilo.)

Honduras

In name of: Pan American Airways, Inc.

Contract Signed: February 1st, 1930.

Term: 3 years.

Rate to U. S. $6.00 per Lb. gross.

Mexico

In name of: Compania Mexicana de Aviacion, S. A.

Contract Signed: A letter of July 1st, 1930, from Dr. G. Espinosa Mirales, attorney, of Mexico City, states that the contract has been put in operation since June 1st, 1930 and will be in effect until January 31st, 1932.

Term: 2 years (stated in contract). May be renewed for 2 years more.

Rate to U. S.—$2.00 per Lb. gross.

[fol. 2681]

Nicaragua

In name of: Pan American Airways, Inc.

Contract Signed: May 8th, 1929.

Term: 10 years. (From March 19th, 1929.) No renewal clause.

Rate to U. S.—$6.00 per Lb. gross.

Panama

In name of: Pan American Airways, Inc.

(Contract, as regards West Coast operation, transferred from Pan American Airways, Inc. to Pan American-Grace Airways, Inc., on December 6th, 1929, said transfer being approved by President of Panama on November 14th, 1929.)

Contract Signed: March 8th, 1929.

Contract (West Coast) Signed: May 29th, 1929.

Term: 25 years. (From date of first contract, the second being concurrent.) May be renewed for 25 years more.

Rate to U. S.—$8.00 per Lb. gross.

Peru

In name of: Pan American-Grace Airways, Inc.

Contract Signed: June 24th, 1928.

Term: 5 years, with right to renew for further period of 5 years.

Rate to U. S.—$16.00 per Lb. gross, paid directly to U. S. Post Office Department.

Salvador

In name of: Pan American Airways, Inc.

Contract Signed: November 6th, 1929.

[fol. 2682] Term: 2 years from inauguration of service. (First flight was on December 25th, 1929, first mail carried was on January 1st, 1930.) No renewal clause.

Rate to U. S.—$6.00 per Lb. gross. ($13.25 per Kilo.)

Uruguay

(1) In name of: Pan American-Grace Airways, Inc. (West Coast.)

Contract Signed: November 22nd, 1929.

Term: 4 years. May be renewed for like periods.

Rate to U. S.—$24.00 per Lb. gross.

(2) In name of: Pan American Airways, Inc. (East Coast.)

Contract Signed: May 20th, 1930.

Term: 4 years. May be renewed for "like periods".

Rate to U. S.—about $24.05 per Lb. gross (52.91 American gold per gross kilogram).

Venezuela

In name of: Pan American Airways, Inc.

Contract Signed: April 11th, 1930. (Approved May 8th, 1930.)

Term: 5 years from May 4th, 1930. May be renewed for 5 years more if certain construction work done, and also for an additional 5 year period.

Rate to U. S.—$12.00 per Lb. gross. (127 Bolivares per Kilo, the bolivar being equivalent to $0.193 U.S. Cy.)

[fol. 2683]

EXHIBIT D.

SUMMARY OF INTERNATIONAL MAIL CONTRACTS OF NYRBA WITH FOREIGN COUNTRIES.

Argentina

In name of: Trimotor Safety Airways, Inc.

Contract Signed: February 27th, 1929.

Term: 10 years.

Rate to U. S.—$10.00 per Lb.

Brazil

In name of: New York, Rio & Buenos Aires Line, Inc.

Contract Signed: February 7th, 1930.

Term: Indefinite.

Rate to U. S.—$8.80 per Lb.

Chile

In name of: Trimotor Safety Airways, Inc.

Contract Signed: September 1st, 1929.

Term: 10 years.

Rate to U. S.—Does not apply to U. S.

[fol. 2684]

Uruguay

In name of: Trimotor Safety Airways, Inc.

Contract Signed: May 16th, 1929, with supplemental contract signed August 1929.

Term: 5 years.

Rate to U. S.—$10.00 per Lb.

Venezuela

In name of: New York, Rio & Buenos Aires Line, Inc.

Contract Signed: October 1929.

Term: 5 years.

Rate to U. S.—$8.52 per Lb.

DEPARTMENT OF JUSTICE
Office of the Assistant to the Attorney General
WASHINGTON

August 1, 1930

Root, Clark, Buckner & Ballantine,
31 Nassau St.,
New York, N.Y.

Dear Sirs:

The Department has given careful consideration to the facts stated in your memorandum submitted with your letter of July 28, 1930, to the Attorney General with regard to the proposed acquisition by Aviation Corporation of the Americas of all the assets of New York, Rio & Buenos Aires Line, Inc., as well as to the oral statements made by officers of these companies at a conference with representatives of this Department on July 23, 1930.

Upon the basis of the information thus furnished the Department does not at the present time deem that any action by it would be warranted if the proposed acquisition should be effected. This, however, cannot under the law limit the full freedom of the Department to take such

later action as future developments, further information or a subsequent consideration of the questions involved may in its judgment warrant.

Yours very truly,

JOHN LORD O'BRIAN,
The Assistant to the Attorney General.

/s/ CHARLES H. WESTON
By CHARLES H. WESTON,
Special Assistant to the Attorney General,
Acting in Charge.

[Handwritten notations—F.A.M. 10—8/20/30]

ADVERTISEMENT FOR FOREIGN
AIR MAIL SERVICE

BETWEEN

PARAMARIBO AND SANTOS

[fol. 2689]

ADVERTISEMENT FOR FOREIGN
AIR MAIL SERVICE

POST OFFICE DEPARTMENT

Washington, D. C.,
August 20, 1930.

Proposals will be received at the Office of the Second Assistant Postmaster General until twelve o'clock noon September 11, 1930, for carrying the mails herein specified by aircraft during the term beginning at a date optional with the contractor, but not later than forty-five (45) days from the award of contract, and ending January 8, 1939, in accordance with the provisions of this advertisement, on the following described route:

Route No. 10.

From Paramaribo, Dutch Guiana, by Cayenne, French Guiana, (at option of the Postmaster General), Para (State of Para), Maranhao (State of Maranhao), Fortaleza (State of Ceara), Natal (State of Rio Grande do Norte), Pernambuco (State of Pernambuco), Bahia (State of Bahia), Victoria (State of Espirito Santo) and Rio de Janeiro (Federal District) to Santos (State of Sao Paulo), Brazil, and return by the same points.

(Approximate one way mileage; subject to correction, 3,275 miles.)

Provisions of the Advertisement

1. (a) The frequency of service each way shall be once a week, but the Postmaster General reserves the right to increase the frequency to twice a week or a greater number of flights; also the Postmaster General may extend the service to other points in South America or the West Indies, curtail the route to omit points, omit or embrace intermediate points, and reduce the number of flights. The route may be discontinued upon mutual agreement of the Postmaster General and the contractor.

(b) If the frequency of service is increased or the service extended, increased pay will be allowed at not exceeding the contract rates, and if the service is curtailed or otherwise reduced, reduction in pay will be made at the contract rates.

2. The service shall be performed by a schedule satisfactory to the Postmaster General. The flights shall leave Paramaribo and arrive at that place in close connection with flights on the existing U. S. air mail route between Miami and Paramaribo. The Postmaster General may change the schedule as the needs of the mail service may require.

[fol. 2690] 3. (a) The contractor shall carry for the U. S. Post Office Department on all authorized flights each way over the route (1) all mails offered of the United States and its possessions and territories, (2) all foreign mails in transit offered that may be forwarded from a post office

of the United States or its possessions or territory, (3) all mails offered of foreign countries destined to the United States or a possession or territory thereof, and (4) all mails offered of foreign countries for onward dispatch by any means from the United States proper or for onward dispatch by boat from the U. S. Virgin Islands, Porto Rico, or other U. S. possession or territory;

(b) The mails under provisions (3) and (4) of the next preceding paragraph shall include all of the mails enumerated therein of countries off or beyond the route as well as countries traversed by the route, regardless of the means by which they may be carried to a connecting point on this route;

(c) If the contractor operates aircraft between Paramaribo and Miami, or between any other points, including operation from Argentina and Uruguay, and carries any mail in competition with any U. S. air mail service, the contractor will be charged for such transportation at the rates fixed by the U. S. Post Office Department for the carriage of any such mail on its routes, and the amounts so charged may be deducted from the contractor's pay for service on the route herein advertised;

(d) The specified load of mails to be carried for the U. S. Post Office Department per flight each way over the route, to be paid for at the mileage rate, shall be eight hundred (800) pounds. Any of said mails in excess of eight hundred (800) pounds shall be carried at rates per pound. However, the contractor will be required to carry excess mails on any flight only in such amount as in the opinion of the pilot can be safely carried, with preference in loading to be given the mails to be carried for the U. S. Post Office Department over all other traffic (including passengers).

(e) If the contractor carries any mails specified in paragraph (a) of this section on any voluntary flights it may make in addition to the required flights, any of said mails so carried shall be credited to the required flights of the month in which any such voluntary flight started, and if the amount of said mail so credited involves an excess for

the month over the specified load on all required flights in the same direction, the contractor will be entitled to pay for the amount in excess of the specified loads at the pound rate for excess mails:

(f) If in any case the contractor for service under this advertisement is obligated under agreements which may have been or may be made with any country traversed by this route or country off or beyond the route to carry the mails of such country specified in paragraph (a) of this [fol. 2691] Section as mails to be carried for the U. S. Post Office Department, said Department will charge the said contractor for the transportation of such mails by this route and by all other U. S. air mail routes over which said mails may be carried. The charge will be based upon the rates per pound or per kilogram that may be fixed by the U. S. Post Office Department for carrying by its services of the mails for any such country to destination. Any amount so charged may be deducted from the pay of said contractor.

(g) If in any case under agreement between the contractor and a foreign country the contractor has authority to fix or consent to postage rates or air mail fees for mails to be carried, the contractor shall not fix or demand or attempt to procure the fixing of postage rates, including air mail fees, for any mails specified in paragraph (a) of this Section to be carried for the U. S. Post Office Department, more than 25 per cent in excess of the postage charged by the United States for mails to be carried in the reverse direction to any such country.

4. The contractor will be required to receive the mails for the southbound flights at Paramaribo from the contracting company (at the landing place of such company) that performs service on the U. S. air mail route between Miami and Paramaribo, and on the northbound flights to deliver all mails specified in paragraph (a) Section 3 hereof to be carried for the U. S. Post Office Department, to such contracting company at its landing place. If found necessary the contractor may also be required to carry mails between the landing point on this route and the post office

at Paramaribo. The contractor shall deliver and receive the mails at the post offices at all other points on the route. However, if the route be extended at any time to connect with any other U. S. air mail route, the contractor may be required to receive mails from and deliver them to the contractor on said other route at the connecting point.

5. (a) The contractor will be required at all times during the term of the contract to perform the service with safe and suitable aircraft of the most modern design and type and of suitable capacity and speed, with fireproof mail compartments, all to the satisfaction of the Postmaster General. Two-way radio operation and passenger accommodations will be required on all aircraft, in the discretion of the Postmaster General.

(b) If at any time the development of aircraft should be such that the equipment used on the route does not comply with these specifications, or if the class of equipment specified herein is not provided for any other reason, the Postmaster General may terminate the contract.

(c) Unless otherwise agreed to by the Postmaster General, all flying equipment used on the route shall be of United States manufacture, all other equipment and supplies necessary for performance of the service shall be of United States manufacture or United States products if practicable, and pilots, flying crews, and all other employees, shall be citizens of the United States as far as may be practicable.

(d) Aircraft before being operated in this service must have been inspected by the appropriate authorities of the United States or of a country traversed by the route and have received certificate of air-worthiness. The pilots must have received certificates of fitness from the appropriate department of the United States or be qualified under the requirements of a country traversed.

[fol. 2692] (e) The contractor must make its own arrangements at its own expense in securing concessions to operate in the countries traversed, for landing fields or rights to land the mails from the water, lighthouses, radio

stations, and such other aids to navigation and such other arrangements as may be necessary for the proper performance of the service.

6. (a) Payments for faithful performance of service will be made monthly and as soon after the close of each month as satisfactory evidence of performance shall be received and as the accounts can be adjusted and settled;

(b) The contractor shall furnish such evidence of the performance of service and in such form as may be prescribed by the Postmaster General;

(c) Payments will be based upon the shortest practicable airway distance between the points on the route as determined by the Postmaster General.

(d) No compensation will be allowed for flights not made. However, pro rata pay may be allowed for the distance between points on the route flown in a partially completed flight, in the discretion of the Postmaster General;

(e) Deductions from pay may be made for suffering the mails to become wet, damaged, lost or destroyed, or for other delinquencies in service, in the discretion of the Postmaster General; also the contractor shall be answerable in damages to the United States for the proper care, protection and transportation of the mails and be accountable for any loss or damage resulting to any of such mail or any part thereof by reason of failure on its part, or its officers, agents or employees, to exercise due care in the custody, handling or transportation thereof;

(f) The Postmaster General in his discretion may annul the contract and or impose a fine or fines or other penalties upon the contractor, for repeated failures in the performance of service; or for subletting the service or any part thereof without permission of the Postmaster General; or assigning or transferring the contract; or for combining to prevent others from bidding for the performance of postal service; or for failure to perform the service in the manner and by the means specified by the contract; or for violation by the contractor, its officers, agents, or employees, of the Postal Laws and Regulations applicable to

this service, or for any other failure or other default of the contractor to perform the service according to the contract; and any such annulment shall not impair the right of the United States to claim damages from the contractor and its sureties.

7. (a) Contracts or interests therein for mail service cannot be transferred or assigned. Service pursuant to this advertisement may be sublet only upon permission of the Postmaster General. Such permission will not be given except for reasons satisfactory to the Postmaster General and then only for subletting to a subcontractor that can qualify as to ability to perform the service and is otherwise satisfactory to the Postmaster General, and at rates not less than the contract rates of pay;

[fol. 2693] (b) The Department will not countenance the undue promotion of the sale of stock of a bidding or contracting corporation upon the representation or basis of securing or having this mail contract. If any such promotion or attempted promotion of sale of stock be unwarranted in the opinion of the Postmaster General, he may rescind the acceptance of a proposal or annul the contract;

(c) Bidders and contractors must be citizens of the United States. A corporation in order to be eligible as bidder or contractor must be organized under the laws of the United States, or a State, Territory, District or possession thereof; its president and managing directors must be citizens of the United States; title to at least 75 per cent of its stock must be vested in citizens of the United States free from any trust or fiduciary obligation in favor of any person or persons not citizens of the United States, and must be free from control by any means whatsoever by any person or persons not citizens of the United States or by other corporation controlled by a person or persons not citizens of the United States;

(d) The contract for the service shall contain the following covenant:

The Contractor warrants that it has not employed any person to solicit this contract upon any agreement for a

commission, percentage, brokerage, or contingent fee. Breach of this warranty shall give the Government the right to annul the contract, or, in its discretion, to deduct from the contract price or consideration the amount of such commission, percentage, brokerage, or contingent fee. This warranty shall not apply to commissions payable by contractors upon contracts or sales secured or made through bona fide established commercial or selling agencies maintained by the contractor for the purpose of securing business;

(e) The accepted bidder under this advertisement will be required to execute a formal contract in the form prescribed by the Postmaster General. Such formal contract with a bond of one thousand ($1,000) dollars in connection therewith shall be executed and filed in the Post Office Department within thirty days from the date of the acceptance of the proposal. If the accepted bidder fails to file a properly executed formal contract within the thirty days, it may be declared a failing bidder and proceedings taken accordingly.

(f) The contractor will be required to provide, without additional charge, transportation for representatives of the Post Office Department traveling on official business, upon special credentials issued by the Postmaster General.

8. (a) Proposals in response to this advertisement must be for service as advertised. Proposal forms may be obtained upon application to the Second Assistant Postmaster General, Washington, D. C.

(b) The proposals and the contract will also be subject to the provisions of the Postal Laws and Regulations applicable to this class of service.

(c) All proposals must be in the form prescribed by the Department and accompanied by a bond in the sum of twenty-five thousand ($25,000) dollars with two or more [fol. 2694] individual sureties approved by a postmaster of the first, second or third class, which bond must be acceptable to the Postmaster General, such sureties to be shown to be the owners of real estate valued above all encumbrances at an amount double that of the bond, or a surety

company that has been approved by the Secretary of the Treasury. A list of such surety companies may be found on page 61 of the Official Postal Guide for July, 1929, a copy of which may be seen upon application to any postmaster. In lieu of surety bonds, bidders may deposit and pledge U. S. bonds to the par value of twenty-five thousand dollars, in accordance with Department requirements;

(d) Bidders and their sureties are urged to acquaint themselves fully with the requirements set forth in this advertisement and with the service to be performed before they assume any liability as bidders or sureties;

(e) A proposal altered or incomplete in any of its essential terms can not be considered in connection with bids submitted in proper form, unless in case of alteration it be verified by initials or other memoranda of the parties;

(f) When a bid is signed by a corporation it should be accompanied by evidence of the authority of the person signing so to execute the bid on behalf of the company. Such evidence may be a certified copy of the proceedings pursuant to which the person was elected or appointed an officer or agent of the company and that part of the by-laws showing his authority as such officer or agent to sign the bid; or a certified copy of a resolution of the board of directors or stockholders conferring such authority upon him.

(g) The maximum rates authorized by law for this class of service is $2 dollars per mile for the specified load and $1 per pound per thousand miles or pro rata thereof for greater or less mileage for mails in excess of the specified load. Bids at a higher rate will not be considered.

(h) Bids must state rate per mile for the specified load of not exceeding eight hundred (800) pounds, and a rate per pound per thousand miles for excess mails, such rate for excess mails to bear the ratio of 50 per cent of the rate per mile for the specified load; that is, if a bid is $2 a mile for the specified load, the rate for excess mails must be $1 per pound per thousand miles or pro rata thereof for greater or less mileage, or if a bid is $1.50 a mile for the specified load the rate for excess mails must be $0.75 per

pound per thousand miles or pro rata thereof for greater or less mileage, etc.

(i) Bidders must file with their proposals evidence as follows:

(1) Of citizenship of the bidder. (See Section 7, par. (c))

(2) That the bidder is prepared or can be prepared to begin service within forty-five (45) days from the award of contract, including copies of concessions to operate in the countries traversed by the route, a sworn statement of the possession of the necessary flying equipment or the availability of such equipment and the means of procuring it, and similar evidence of the necessary operating organization.

[fol. 2695]

(3) Of the ability of the bidder to perform the service. This will include the last balance sheet and such other evidence of the bidder's financial ability as can be filed, as well as a full statement of the past experience of the bidder in aviation.

(j) No withdrawal of a proposal will be allowed unless notice of withdrawal is received at least twenty-four (24) hours previous to the expiration of the time fixed herein for receiving bids.

(k) Bids should be forwarded in time to reach the Office of the Second Assistant Postmaster General not later than the time stated in this advertisement for receiving bids. Bids received after that time will not be considered in competition with bids received within the prescribed time.

(l) Bids should be sent in sealed envelopes, superscribed "Air Mail Proposal, Paramaribo-Santos Route" and addressed to the Second Assistant Postmaster General, Post Office Department, Washington, D. C.

/s/ WALTER F. BROWN,
Walter F. Brown,
Postmaster General.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 153

CONTRACT FOR FOREIGN AIR MAIL SERVICE

Route No. 10

THIS CONTRACT, Made the 24th day of September, A. D. 1930, by the United States of America, represented by the Postmaster General, party of the first part, and the Pan American Airways, Inc., a corporation duly organized and existing under the laws of the State of New York, hereinafter referred to as the contractor, party of the second part;

WITNESSETH, That whereas under date of September 24, 1930, the Pan American Airways, Inc. was accepted as contractor for foreign air mail service on Route No. 10, in conformity with the advertisement inviting proposals for the service specified therein, issued by the Postmaster General under date of August 20, 1930, the said contractor, for the consideration hereinafter stated, undertakes, covenants and agrees with the United States of America, pursuant to said advertisement, as follows:

1. (a) To carry for the United States the mails specified in paragraph (c) hereof, in a safe and secure manner, free from wet or other injury, from Paramaribo, Dutch Guiana, by Cayenne, French Guiana, (at option of the Postmaster General), Para (State of Para), Maranhae (State of Maranhae), Fortaleza (State of Ceara), Natal (State of Rio Grande do Norte), Pernambuco (State of Pernambuco), Bahia (State of Bahia), Victoria (State of Espirito Santo) and Rio de Janeiro (Federal District) to Santos (State of Sao Paulo), Brazil, and return by the same points, once a week;

(b) To perform the service by a schedule satisfactory to the Postmaster General on flights to leave Paramaribo and arrive at that place in close connection with flights on the U. S. air mail route between Miami and Paramaribo, or

such other schedule as the Postmaster General may order to meet the needs of the mail service;

[fol. 2697] (c) To carry for the U. S. Post Office Department on all authorized flights each way over the route (1) all mails offered of the United States and its possessions and territories, (2) all foreign mails in transit offered that may be forwarded from a post office of the United States or its possessions or territories, (3) all mails offered of foreign countries destined to the United States or a possession or territory thereof, and (4) all mails offered of foreign countries for onward dispatch by any means from the United States proper or for onward dispatch by boat from the U.S. Virgin Islands, Porto Rico, or other U. S. possession or territory, the mails under provisions (3) and (4) hereof to include all of the mails enumerated therein of countries off or beyond the route as well as countries traversed by the route, regardless of the means by which they may be carried to a connecting point on this route;

(d) To carry as the specified load, mails enumerated in paragraph (c) hereof, per flight each way, eight hundred (800) pounds (or all of such mails offered of less amount), and as excess mails any of such mails that may be offered in excess of eight hundred (800) pounds; provided that excess mails on any flight shall be carried only of such amount as in the opinion of the pilot can be safely carried, with preference in loading given the mails to be carried for the U. S. Post Office Department over all other traffic (including passengers);

(e) To receive the mails for the southbound flights at Paramaribo from the contracting company (at the landing place of such company) that performs service on the U. S. air mail route between Miami and Paramaribo, and on the northbound flights to deliver all mails specified in paragraph (c) hereof to be carried for the U. S. Post Office Department, to such contracting company at its landing place, and if found necessary and required by the Postmaster General, to carry mails between the landing point on this route and the post office at Paramaribo; unless other provision is made, to deliver and receive the mails at the

post offices at all other points on the route, and if the route be extended at any time to connect with any other U. S. air mail route, to receive mails from and deliver them [fol. 2698] to the contractor on said other route at the connecting point if so required by the Postmaster General;

(f) To provide and operate in the performance of the service hereunder at all times during the term of this contract, safe and suitable aircraft of the most modern design and type according to reasonable standards for aircraft obsolescence as determined by the Postmaster General, and of suitable capacity and speed, with fireproof mail compartments as far as possible, all to the satisfaction of the Postmaster General; and, in the discretion of the Postmaster General, to provide (if not prohibited by local authorities) two-way radio operation and passenger accommodations on all aircraft used;

(g) To provide, without additional charge, transportation for representatives of the Post Office Department traveling on official business, upon special credentials issued by the Postmaster General;

(2) IN CONSIDERATION of the faithful performance of the services herein specified and upon receipt of satisfactory evidence thereof by the Postmaster General, the United States agrees to pay to the said contractor monthly, and as soon after the close of each month as accounts can be adjusted and settled, compensation based upon the shortest practicable airway distance between the points on the route as determined by the Postmaster General, at the rate of Two ($2.00) Dollars per mile each way for the specified load of not exceeding eight hundred (800) pounds each way, plus a rate of One ($1.00) Dollar per pound per thousand miles or pro rata thereof for greater or less mileage for any excess mails required to be carried in the same aircraft;

3. It is further understood and agreed

(a) That the Postmaster General may increase the frequency of service on this route to twice a week or a greater number of flights, and may extend the service to other points in South America or the West Indies, curtail the route to

omit points, omit or embrace intermediate points, and reduce the number of flights, but not in conflict with the provisions of paragraph (b), section 6 hereof;

[fol. 2699] (b) That where the service is increased or extended as provided in the preceding paragraph, the compensation of the contractor shall be increased at not exceeding the contract rate, and where the service is curtailed or reduced, the compensation shall be decreased at the said rate;

(c) That if the contractor operates aircraft between Paramaribo and Miami, or between any other points, including operation from Argentina and Uruguay, and carries any mail in competition with any U. S. air mail service, the contractor will be charged for such transportation at the rates fixed by the U. S. Post Office Department for the carriage of any such mail on its routes, and the amounts so charged may be deducted from the contractor's pay for service herein specified;

(d) That if the contractor carries any mails specified in paragraph (c), section 1, hereof, on any voluntary flights it may make on this route in addition to the required flights, any of said mails so carried shall be credited to the required flights of the month in which any such voluntary flight started, and if the amount of said mail so credited involved an excess for the month over the specified load on all required flights in the same direction, the contractor will be entitled to pay for the amount in excess of the specified loads at the pound rate for excess mails;

(e) That if in any case the contractor is obligated under agreements which may have been or may be made with any country traversed by this route or country off or beyond the route to carry the mails of such country specified in paragraph (c , section 1, hereof, as mails to be carried for the U. S. Post Office Department, said Department will charge the said contractor for the transportation of such mails by this route and by all other U. S. air mail routes over which said mails may be carried. The charge will be based upon the rates per pound or per kilogram that may be

fixed by the U. S. Post Office Department for carrying by its services of the mails for any such country to destination. Any amount so charged may be deducted from the pay of said contractor;

[fol. 2700] (f) That if in any case under agreement between the contractor and a foreign country the contractor has authority to fix or consent to postage rates or air mail fees for mails to be carried, the contractor shall not fix or demand or attempt to procure the fixing of postage rates, including air mail fees, for any mails specified in paragraph (c), section 1, hereof; to be carried for the U. S. Post Office Department, more than 25 per cent in excess of the postage charged by the United States for mails to be carried in the reverse direction to any such country;

(g) That if at any time the development of aircraft should be such that the equipment used on the route does not comply with the provisions of this contract, or if the class of equipment specified herein is not provided for any other reason, the Postmaster-General may terminate this contract;

(h) That unless otherwise agreed to by the Postmaster General, all flying equipment used on this route shall be of United States manufacture, all other equipment and supplies necessary for performance of the service shall be of United States manufacture or United States products if practicable; and pilots, flying crews, and all other employees, shall be citizens of the United States as far as may be practicable;

(i) That aircraft before being operated in service on this route must have been inspected by the appropriate authorities of the United States or of a country traversed by the route and have received certificate of airworthiness. The pilots must have received certificates of fitness from the appropriate department of the United States or be qualified under the requirements of a country traversed;

(j) That the contractor shall make its own arrangements at its own expense in securing concessions to operate in the countries traversed, for landing fields or rights to land

the mails from the water, lighthouses, radio stations, and such other aids to navigation and such other arrangements as may be necessary for the proper performance of the service hereunder;

[fol. 2701] 4. It is further understood and agreed

(a) That no compensation will be allowed for flights not made; provided that pro rata pay may be allowed for the distance between points on the route flown in a partially completed flight, in the discretion of the Postmaster General;

(b) That deductions from pay may be made for suffering the mails to become wet, damaged, lost or destroyed, or for other delinquencies in service, in the discretion of the Postmaster General; also that the contractor shall be answerable in damages to the United States for the proper care, protection and transportation of the mails and be accountable to the United States for any loss or damage resulting to any of such mail or any part thereof by reason of failure on its part, or its officers, agents or employees, to exercise due care in the custody, handling or transportation thereof;

(c) That for repeated failures in the performance of service for which provision is made herein; or for subletting the service or any part thereof without permission of the Postmaster General; or assigning or transferring the contract; or for combining to prevent others from bidding for the performance of postal service; or for failure to perform the service in the manner and by the means specified by the contract; or for violation by the contractor, its officers, agents, or employees, of the Postal Laws and Regulations applicable to the service specified herein, or for any other failure or other default of the contractor to perform the service specified herein, the Postmaster General, in his discretion, may annul this contract and/or impose a fine or fines or other penalties upon the contractor, and the annulment thereof shall not impair the right of the United States to claim damages from the contractor for the said failures or defaults;

5. It is further understood and agreed

(a) That no Member of or Delegate to Congress, or Resident Commissioner, shall be admitted to any share or part [fol. 2702] of this contract or to any benefit that may arise thereupon, but this provision shall not be construed to apply to any case wherein the contract is for the general benefit of the contracting corporation;

(b) That the contractor warrants that it has not employed any person to solicit this contract upon any agreement for a commission, percentage, brokerage, or contingent fee. Breach of this warranty shall give the Government the right to annul the contract, or, in its discretion, to deduct from the contract price or consideration the amount of such commission, percentage, brokerage, or contingent fee. This warranty shall not apply to commissions payable by contractors upon contracts or sales secured or made through bona fide established commercial or selling agencies maintained by the contractor for the purpose of securing business;

(c) That this contract is subject to all the provisions of the advertisement of the Postmaster General hereinbefore mentioned and to the provisions of the Postal Laws and Regulations applicable to this service; and the same are hereby made a part of this contract;

6. It is further understood and agreed

(a) That the term of this contract shall be from October 20, 1936, to January 8, 1939;

(b) That upon agreement of the Postmaster General and the contractor this route may be discontinued;

(c) That before this contract shall be annulled or terminated for any default in performance, notice specifying the nature of the default shall be given to the contractor by the Postmaster General and a reasonable time, in the discretion of the Postmaster General, allowed for the correction of such default; and that this contract shall not be annulled nor the contractor held liable for any failure in performance due to wars, insurrections, riots, strikes or acts of God.

IN WITNESS WHEREOF, The parties hereto have executed this contract as of the day and year opposite their names appearing.

Pan American World Airways, Inc. Exhibit 154

EXTENSION OF SERVICE AND AGREEMENTS

FOREIGN AIR MAIL ROUTE NO. 10

This agreement made between the United States of America, represented by the Postmaster General, and the Pan American Airways, Inc., a corporation duly organized and existing under the laws of the State of New York, hereinafter referred to as the contractor;

Whereas, the contract made the 24th day of September, 1930, between the United States of America and the Pan American Airways, Inc., for foreign air mail service during the term from October 20, 1930 to January 8, 1939 on Route No. 10, Paramaribo, Dutch Guiana, by way of certain intermediate points to Santos, Brazil, contains the following provision:

> "That the Postmaster General may increase the frequency of service on this route to twice a week or a greater number of flights, and may extend the service to other points in South America or the West Indies, curtail the route to omit points, omit or embrace intermediate points, and reduce the number of flights, but not in conflict with the provisions of paragraph (b), section 6, hereof."

1. Now, therefore, the Postmaster General hereby authorizes extension of service on said Route No. 10 from Santos by way of Florianopolis, Porto Alegre, Rio Grande do Sul (Brazil) and Montevideo (Uruguay) to Buenos Aires (Argentina), and return, once a week, on a schedule satisfactory to the Postmaster General, to be effective with flights southbound from Santos on and after November 1, 1931, and with flights northbound from Buenos Aires on and after November 8, 1931;

2. In consideration of said extension the contractor hereby agrees that the compensation to be paid by the United States of America for service on the entire route from Paramaribo to Buenos Aires shall be $1.80 per mile each way for the specified load of not exceeding 800 pounds, plus a rate of 90¢ per pound per 1000 miles, or pro rate thereof for greater or less mileage for any excess mails required to be carried in the same aircraft, effective with southbound flights leaving Paramaribo and Santos on and after November 1, 1931, and with northbound flights leaving [fol. 2710] Buenos Aires and Santos on and after November 1, 1931.

IN WITNESS WHEREOF, The parties hereto have executed this instrument.

[fol. 2711] I, H. PRESTON MORRIS, Secretary of PAN AMERICAN AIRWAYS, INC., a New York corporation, hereby certify that the following is a full, true and correct copy of certain resolutions duly adopted at a regular meeting of the Executive Committee of the Board of Directors of said Corporation duly held on the 30th day of September, 1931, a quorum of three being present, and the Board of Directors of said Corporation not then being in session:

"RESOLVED, that Mr. J. T. Trippe, the President of this Corporation, be and he hereby is authorized and empowered to effect an amendment or amendments to the contract now existing between this Corporation and the United States Government for the transportation of mail by aircraft on Route F.A.M. No. 10, and to effect such changes in, and in the conditions affecting, the service referred to in such contract, and such extensions of the route therein mentioned, as may be

mutually agreed upon by and between said President and the United States Post Office Department, and in the name and on behalf of this Corporation, and under its corporate seal, or otherwise, to execute and deliver a contract embodying such changes and amendments, and that H. Preston Morris, the Secretary of this Corporation, or C. M. Blaske, the Assistant Secretary of this Corporation, be and each of them is hereby authorized and empowered to affix the seal of this Corporation to such contract and to attest the same; and

RESOLVED, FURTHER, that the proper officer or officers of this Corporation be and they hereby are severally authorized and empowered to procure the consent, in such form as the United States Post Office Department may require, of the Indemnity Insurance Company of North America (the surety company which executed as surety the bonds now on deposit with the United States Post Office Department to secure the performance of the aforementioned existing contract between this Corporation and the United States Government) to such changes and amendments; and

RESOLVED, FURTHER, that the bonds heretofore executed by this Corporation to secure the performance of the aforementioned existing contract between this Corporation and the United States Government shall be deemed to apply to, and to secure the performance of, said contract as so amended, with the same efficacy as though originally executed and deposited with respect to such amended contract."

IN WITNESS WHEREOF, I have hereunto set my signature and affixed the seal of said Corporation, this 30th day of September, 1931.

[fol. 2712] I, H. PRESTON MORRIS, Secretary of PAN AMERICAN AIRWAYS, INC., a New York corporation, hereby certify that the following is a true and correct copy of an extract from the BY-laws of said Corporation:

"The Board of Directors may appoint from their own number an Executive Committee consisting of two or more members who shall meet when they see fit. They shall have authority to exercise all the powers of the Board of Directors at any time when the Board of Directors is not in session. . . . . ."

I further certify that the following is a full, true and correct copy of a certain resolution heretofore duly adopted at a regular meeting of the Board of Directors of said Corporation, duly held on July 18, 1929, and that said resolution has not been repealed:

"RESOLVED, that there be and hereby is delegated to the Executive Committee of the Board of Directors of this Corporation all the powers of said Board of Directors, the same to be exercisable at all times except when said Board of Directors is in session."

IN WITNESS WHEREOF, I have hereunto set my signature and affixed the seal of said Corporation, this 30th day of September, 1931.

[fol. 2713]
STATE OF NEW YORK :
COUNTY OF NEW YORK : SS.

On this 6th day of October, 1931, before me personally appeared Anna Kocak, to me known, who, being by me duly sworn, did depose and say that she resides in New York, N.Y., that she is Resident Assistant Secretary of the IN-

DEMNITY INSURANCE COMPANY OF NORTH AMERICA, the corporation described in and which executed, the foregoing instrument, that she knows the seal of said corporation, that the seal affixed to said instrument is such corporate seal, that it was so affixed by due authority and that she signed her name thereto as Resident Assistant Secretary likewise by due authority; and that the deponent saith further that she is acquainted with C. J. Koch and knows him to be the Resident Vice-President of said corporation, that the signature of the said Resident Vice-President subscribed to said instrument is in the genuine handwriting of said Resident Vice-President and was thereto subscribed by due authority and in the presence of the deponent; and the deponent saith further that the Superintendent of Insurance of the State of New York has, (pursuant to Chapter 33 of the Laws of the State of New York has,) pursuant to Chapter 33 of the Laws of the State of New York for the year 1909, constituting Chapter 28 of the Consolidated Laws of the State of New York as amended by Chapter 182 of the Laws of the State of New York for the year 1913, issued to the INDEMNITY INSURANCE COMPANY OF NORTH AMERICA his certificate, that said Company is qualified to become and be accepted as surety or guarantor on all bonds, undertakings and other obligations or guarantees, as provided in the Insurance Laws of the State of New York and all laws amendatory thereof and supplementary thereto; and that such certificate has not been revoked, and that the assets of said Company, unencumbered and liable to execution exceed its debts and liabilities of every nature whatsoever, by more than the sum of One Million ($1,000,000.) Dollars.

Witness my hand and seal the day and year aforesaid.

MORRIS G. KELLEY (signed)
Notary Public

It is hereby certified that C. J. Koch and Anna Kocak have been appointed Resident Vice-President and Resident Assistant Secretary, respectively, of the INDEMNITY INSURANCE COMPANY OF NORTH AMERICA at New

York, N.Y., that both of said appointments are in full force and effect as of the date hereof, and said appointments were made under and by authority of the following By-Laws adopted by the Board of Directors of the INDEMNITY INSURANCE COMPANY OF NORTH AMERICA at a meeting duly called and held on the 12th day of July, 1920, which said By-Laws have been compared by me with the originals thereof as recorded in the minute book of said corporation and are a true and correct transcript therefrom of the whole of Section 1, 2 and 3 of Article XII thereof and are in full force and effect:

ARTICLE XII

"SECTION 1. The President, or any Vice-President shall have power and authority to appoint Resident Vice-Presidents, Resident Assistant Secretaries and Attorneys-in-fact, and to authorize them to execute on the behalf of the Company and attach the seal of the Company thereto, bonds and undertakings, recognizances, contracts of indemnity and other writings obligatory in the nature thereof.

SECTION 2. Resident Vice-Presidents shall have power and authority to sign and execute on behalf of the Company any and all bonds and undertakings, recognizances, contracts of indemnity and other writings, obligatory in the nature thereof, and to bind the Company thereby as fully and to the same extent as the President could bind it.

[fol. 2714] SECTION 3. Resident Assistant Secretaries shall have power and authority to affix the seal of the Company to, and attest on the behalf of the Company, any and all bonds and undertakings, recognizances, contracts of indemnity and other writings obligatory in the nature thereof, and to bind the Company thereby as fully and to the same extent as the Secretary or other attesting officer could bind it."

It is hereby certified further that the following is a true and correct statement of the financial condition of said

corporation as of December 31, 1930, and that the financial condition of said corporation is as favorable now as it was when said statement was made:

FINANCIAL STATEMENT—DECEMBER 31, 1930

ASSETS

Cash in Office and Banks	$1,010,658.68	
Government Bonds (Market Value)	1,902,300.00	
Railroad Bonds (Market Value)	3,054,895.00	
Miscellaneous Bonds and Stocks	9,232,691.00	
Accrued Interest	110,409.07	
Premiums in Course of Collection	3,482,938.01	
All other Assets	134,940.67	
		$18,928,832.43

LIABILITIES

Reserve for Losses	7,392,185.01	
Reserve for Unearned Premiums	6,400,348.61	
Reserve for Unpaid Commissions (Not Due)	719,811.71	
Reserve for Taxes and Expenses (Not Due)	365,000.00	
Capital Stock	1,000,000.00	
Surplus	3,051,687.10	
		$18,928,832.43

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the seal of said corporation this 6th day of October, 1931.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 155

NEW YORK
SEPTEMBER 26, 1930

DIRECTORS, PAN AMERICAN-GRACE AIRWAYS, INC.

Gentlemen:

I take the opportunity afforded by the second anniversary of the commencement of operations by our Company on the West Coast of South America to give the Directors a brief resume of the operations, to date, and to remark on past and present performance.

The Directors may recall that on September 13, 1928 our operations were inaugurated by a flight of a plane piloted by Mr. Harris from Lima to Talara. Operations between the Canal Zone and Kollendo were commenced on May 17, 1929. Extensions of the route to Santiago, Chile, were made on July 16, 1929. The line was further extended to Buenos Aires on October 18, 1929, and to Montevideo on November 30, 1929.

The Post Office ordered twice-weekly service on July 1, 1930, at the same time cutting the running time two full days between the Canal Zone and Montevideo.

I refresh the Directors' minds with these dates so that they may appreciate the fact that within the space of practically one year Panagra has increased its mileage from 1200 miles per week to 18,000 miles per week. It has also increased its miles flown per day from 170 to 2579.

It was inevitable that such a rapid increase in route and mileage, coupled with the distance from the source of supplies, would entail added responsibilities and increased [fol. 2716] effort on an already hard-working organization. The necessary additions to that organization could not be made at a moment's notice. [Men] capable of doing their best work and also of handling themselves diplomatically in Latin America have to be very carefully chosen.

They could not be chosen and sent down beforehand, because of the policy that only a minimum expenditure must be incurred until we were placed on a twice-weekly basis.

It is, therefore, a source of gratification to your management, and I am sure it will be to the Directors, to be able to state that since operations commenced, in spite of high-pressure work throughout the organization, there has been no case of loss of life or limb to passengers and flying personnel, and not even a forced landing from motor failure whilst maintaining almost an unbroken schedule. It would be extremely unjust to attribute this record solely to undeserved good fortune. The men on the ground and in the air who have contributed to this record by unfailing diligence under difficult working conditions, and sometimes inclement weather conditions in foreign countries, should receive due credit.

It has been called to your management's attention that certain unfavorable reports have been received concerning the appearance of our planes, and an apparent lack of organization throughout our operations.

I have not been favored with a copy of these criticisms, but as far as I am able to determine, only one such was received from an individual who had any previous experience to qualify him as a judge. It is, therefore, impossible to make detailed reply. I know of no operations in any industry that could not be criticized if a person were so [fol. 2717] disposed. I would, therefore, beg the Directors to examine the following illuminating data:

Miles flown Sept. 1928 to May 17, 1929	46,000
" " May 17, 1929 to Dec. 31, 1929	282,100
" " Dec. 31, 1929 to Aug. 31, 1930	440,364
Miles flown weekly since July 1, 1930	18,000
Planes in operation May 17, 1929	5
" " " Dec. 31, 1929	11
" " " Aug. 31, 1930	15
Hours flown per plane per day	1.7
Pilots on Pay-roll Aug. 31, 1930	3

Flying hours per pilot per day	1.97
Motors in operation	25
Motors—Spares	15
Mechanics on Pay-roll—Dec. 31, 1929	29
" " " Aug. 31, 1930	52
Value of spare parts—Dec. 31, 1929	$ 26,300
" " " June 30, 1930	53,400
" " " July 31, 1930	59,800
Operating Costs per mile flown—1929	$ 2.20
" " " " " —to August 31, 1930	$ 1.72
Operating Costs per mile flown—July and August, 1930	$ 1.7
Passenger Revenue 1928	$ 5,700.
" " 1929	$ 72,500.
" " 1930 (to Aug. 31st)	$ 84,400.

Commenting upon the above data I would respectfully draw the Directors' attention to:–

First: The notable and rapid increase in mileage flown.

Second: Planes have been placed in operation to care for the increase, so that each plane is in the air less than two hours per day.

[fol. 2718]

. . . . . .

Sixth: Our passenger service seems to be giving satisfaction, as in the face of strenuous competition from the competing American company in Peru, the passengers [illegible] shows notable increase.

It will be recalled that your management was instructed to exercise the strictest economy in expenditures for operations, and that no large sums for permanent facilities were to be appropriated until the Post Office ordered at least twice-weekly service. This carried with it the obligation to delay the building of hangars and shops until it

was definitely known where these could be strategically located. It was, therefore, not until after July 1st, 1930 that the determination of what looked to be a permanent schedule permitted the expenditure for permanent facilities.

A re-allocation of appropriations was immediately asked for. The construction of a hangar at Lima was commenced. This is now ready for occupancy. Other facilities are either completed or in process of completion.

The services of a maintenance engineer were secured—[fol. 2719] Mr. C. C. Cole, late of the Western Air Express. Mr. Cole arrived in Lima the first part of August, 1930, with instructions to report immediately as to what should be done to place our maintenance on a level with that of any successful airline. Mr. Cole's reputation is so high that the Department of Commerce has appointed him to inspect planes for re-license from Talara to Montevideo, and will accept his statements as to fitness of Panagra's planes. Mr. Cole's recommendations will be carefully studied and placed before you for approval.

It is the intention of the management to have the use of the facilities of four overhaul stations along the route—Panair at Cristobal, Panagra at Lima, Curtiss Co. at Santiago and either Panair or Panagra at Buenos Aires. This latter depending upon the plans for the extension of "Alas" activities. Where necessary Flight Mechanics will accompany the planes, and Ground Mechanics will be located at intermediate points.

It is believed that it will not be necessary to purchase airports in Peru, Chile or the Argentine, but that by arrangements with the Governments and private Companies, the necessary facilities can be more cheaply obtained. I again call the Directors' attention to the anti-monopolistic policies of the large South American countries, and to their evidenced desire to control commercial aviation within their territorial limits by the erection of Government airports at which all commercial aircraft will be ordered to clear. An incident such as the recent invasion of Chile by a revolutionary plane, piloted by American aviators, will strengthen the determination of the Governments to enforce such policies.

[fol. 2720] It will undoubtedly be of interest to the Directors to read the latest impressions of travellers over our lines. I, therefore, attach to this report extracts from letters from Mr. C. C. Cole, from Commercial Attache Walter J. Donnelly, and from two other important passengers.

I most respectfully request that the Directors hasten the settlement of the unpaid bills for Panair and Grace services during 1929, and the first eight months of 1930. Our estimated Cash Position at October 1st will be:

Cash in Banks Sept. 25th		$222,100.
P. O. accruals including September estimated revenue		280,000.
		$502,100.
Unpaid bills including supplies purchased	$24,000.	
Appropriated for Chile	87,500.	
Unexpended appropriations	30,000.	141,500.
Available Cash		$360,600.

These figures would seem to show that the Company is entirely solvent. No proper statement of Profit or Loss can be made, however, until it is definitely decided what we must pay for supervision by Panair and for W. R. Grace agency fees. If a responsible figure is established for these services, it will be possible to provide, from current revenues, the additional equipment and facilities necessary to insure the continuance of successful operation.

Respectfully,

(signed) J. D. MacGregor

(Letterhead of)

POST OFFICE DEPARTMENT

Second Assistant Postmaster General

Washington

December 13, 1950.

Pan American Airways, Inc.,
122 East 42nd Street,
New York, N. Y.

Gentlemen:

This is to confirm the understanding with your Washington representative, with reference to the reformation of the contract on Route 4, Miami to Havana, to the effect that since your company has an arrangement with Cuba (understood to be temporary, with negotiations for a permanent arrangement) for the transportation of Cuban air mails to this country, this Department would charge your company at the rate of $3.20 a pound for the mails brought to Miami, regardless of whether any of such mail bears U. S. air mail stamps and give such Cuban air mails onward dispatch by our domestic air mail routes. It is understood also that your company will be charged for mails from Cuba destined for onward dispatch by F.A.M. Routes 5, 6 and 7, out of Miami.

Very truly yours,

For the Second Assistant Postmaster General.

(Sgd.) E. R. WHITE
E. R. White,
Director.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 157

"EXHIBIT A"

(Translation)

From "Diario Oficial" of Colombia, No. 21,596, of January 21, 1931.

LEGISLATIVE POWER

LAW NO. 8 of 1931
(January 14)

"approving a contract (the one entered into with Gonzalo Mejia covering the establishment of an air transportation service between Medellin and the Gulf of Uraba), and granting certain authorisations to the Government."

The Congress of Colombia

DECREES:

Article 1st.—Approval is given to the Contract entered into between the National Government and Mr. Gonzalo Mejia, covering the establishment of an aerial transportation service between Medellin and the Gulf of Uraba, which literally states as follows:

"The undersigned, namely: Tulio Enrique Pascon, male, of age, and resident of Bogotá, Minister of Mails and Telegraphs, duly authorized by His Excellency the President of the Republic, on behalf of the National Government, of the one part, hereinafter called the GOVERNMENT, and Gonzalo Mejia, Colombian citizen, male, of age, and a resident of Bogotá, acting on his own behalf, hereinafter called the CONCESSIONARY, of the other part, have entered into a contract containing the following articles:

[fol. 2723] "Article 1st.—The Concessionary undertakes, for his own account and risk, to undertake all the necessary negotiations in order to establish an aerial service for the transportation of passengers and cargo, between

the Gulf of Uraba and the city of Medellin. For this purpose, the Concessionary shall make connections with one or more companies in the United States of America, which are engaged in these matters, and which, as an essential condition, shall belong to the highest category, with respect to their capital, reliability and ability, to the satisfaction of the Government.

Additional Clause. The Concessionary, in making this connection, shall advise the Government as to the name of the Company or Companies with which it is made, and the present concession shall not be in effect if the Government does not approve them.

Article 2nd.—If the Government approves the connection made by the Concessionary with the companies, said Concessionary shall secure experts provided with airplanes for survey and scientific apparati for study, in order to examine the aerial currents and all the other atmospheric and topographic conditions, as well as to determine by these means if the service which it is intended to establish is fundamentally possible and practical. The studies referred to in this Article must be completed within the period of twelve months, counting from the day when this contract is definitively approved.

Article 3rd.—If it is found, from the preliminary studies referred to in the foregoing Article, that it is possible to establish the service in question, the Concessionary under- [fol. 2724] takes to "inaugurate and establish it within the following six months, that is, within the period of eighteen months, counting from the date when this contract is definitively approved.

Additional Clause. The service shall be understood to have been inaugurated and established when a regular service is in effect of at least two round trips weekly for passengers and cargo, between the Gulf of Uraba and Medellin, with planes having a carrying capacity of not less than one ton.

Article 4th.—The Government grants an exclusive right to the Concessionary for the establishment of the passenger and cargo service referred to in the present contract,

to be carried out by means of airplanes, between the Gulf of Uraba and the city of Medellin, and all the intermediate points between these places, which are included in the territorial zone hereinafter indicated.

Additional Clause. This privilege shall not in any way affect the establishment, in the zone covered by the right, of railroads, highroads, overhead wires, or any other kind of terrestrial roads, nor the establishment of river navigation services. Neither shall it affect the aerial transportation lines established or may hereafter be established along the Atrato River.

Article 5th.—The zone covered by this privilege comprises a stretch of land one thousand miles in width, covering the entire distance from the Gulf of Uraba to Medellin, and will be bounded as follows: An imaginary straight line [fol. 2725] is drawn from the mouth of the Leon River, in the Gulf of Uraba, as far as the city of Medellin. On each side of this line the concession comprises an area of fifty miles for the entire extension thereof.

Article 6th.—The concession, or privilege, shall be in force for the period of fifteen years, commencing from the day when the service is inaugurated, said period being designated for the life of the present contract.

Article 7th.—The concession, or privilege, may not in any way, or for any reason, hinder the flight across the territory covered by the concession, of any kind of tourist planes, or planes of any other kind, provided they are not rendering services for remuneration, creating competition with the Concessionary.

Article 8th.—The zone covered by the concession may be crossed by other aerial transportation services, provided they do not have the purpose of uniting the furthest points or intermediate stations in the zone covered by the privilege, for the object of competing with the Concessionary's service.

Article 9th.—The military, customs and police aircraft, as well as other aircraft used exclusively in the service of the State, shall have the right to fly freely across the zone

covered by this concession. The Concessionary undertakes to facilitate the landing of such aircraft in his own fields, and to provide the facilities of the hangars and other accessories gratuitously.

[fol. 2726] Article 10th.—The Concessionary undertakes to establish, for its own account and risk, landing fields at all the places necessary for efficient operation and the safety of the passengers and cargo.—

Article 11th.—After the concessionary has obtained the consent of the Government, issued in writing in each case, the Concessionary may install beacons or signals to show the places for landing, hangars, and other accessories for facilitating the landing and sheltering of the airplanes, and establishment of these signals being subject to the formalities and conditions which the Government may consider it advisable to fix.

Article 12th.—The Government shall not incur expenses of any kind, and only undertakes to furnish the land gratuitously for the landing fields when the same are located in uncultivated territory belonging to the Nation.

Article 13th.—When the places for the landing fields are located in territory belonging to private parties, the service referred to in the present contract shall be considered as a public utility for the purposes of the expropriation to be made; provided that it has not been possible for the Concessionary to make an agreement with the owners covering the respective conditions for the acquisition of the territory. The cost of the latter and the expenses required for the expropriation suit, shall be for account of the Concessionary.

Article 14th.—The aircraft shall be modern and provided with all scientific improvements.

[fol. 2727] Article 15th.—The Concessionary is subject to the provisions of the laws, decrees and conventions covering aviation, and to all the dispositions which the Legislative and Executive Powers may dictate in future for the regulation of said service.

Article 16th.—The tariffs, as well as the itineraries for the service, shall be submitted to the Government for approval. Such tariffs may not be higher than those established in the country by other aerial transportation services.

Article 17th.—The Government shall have the right to fifty official passages per annum on the aircraft of the Concessionary, and to reduction of ten percent, in the tariffs for the transportation of cargo.

Article 18th.—In the event that, at any time during the life of the contract, the number of airplanes should be insufficient for the requirements of the service, the Concessionary must increase the number to the extent necessary.

It shall be understood that the aircraft used in the service are insufficient in number when there are not enough to transport the cargo destined to be transported by aerial route and for such reason congestion of cargo is caused at the stations, lasting for at least three continuous months, except in case such congestion is caused by fortuitous case or force majeure. The Government shall duly notify the Concessionary that he must increase the transportation capacity of the service to the extent necessary, and the latter shall have a period of six months, counting from the date of notification, to remedy the deficiency and increase the number of airplanes.

[fol. 2728] In case of difference between the Government and the Concessionary regarding the capacity of the service, the matter shall be decided by experts designated by the parties.

Article 19th.—The Concessionary may not connect the service referred to in the present contract with other established services or those which may hereafter be established, without permission from the Government.

Article 20th.—The Government shall permit the establishment of radio-telegraphic apparati on board the aircraft, and also at the terminal points of the line, and on the two peaks or summits of the central and western chains of mountains which the aerial line will have to cross, the

Concessionary to abide by the dispositions governing wireless installations and to comply in advance with the formalities imposed by such dispositions for the establishment of the installations, including the requesting of special permits. The installations may only be utilized for the purpose of transmitting and receiving reports concerning atmospheric changes, and dangerous conditions on account of storms, fogs and seasonal rainy weather, and for communicating important notifications regarding losses, fires, or other information of this nature.

Article 21st.—The Concessionary obligates himself to establish close and gratuitous cooperation between the technical and scientific divisions of his company with the Government for the purpose of preparing maps, making inspections and the execution of work, duly and gratuitously providing the services of its experts in matters relating to aviation. The inspections shall not obligate the Conces- [fol. 2729] sionary to incur expenses on account of flights or trips by land of employees of the Concessionary.

Article 22nd. In case the Government should wish to utilize the service referred to in the present contract for the transportation of mail, or to permit the radio stations installed in accordance with Clause or Article 20th, to be given to the public service, it will be necessary to enter into special arrangements with the Concessionary.

Article 23rd. The service mentioned in the present contract shall be subject to Governmental inspection, which shall be effected by the Government's employees and agents. Throughout the entire period of the contract, the Government shall maintain with the company, a Supervisor, to be freely appointed and dismissed by it, whose salary, not to exceed four hundred pesos monthly, shall be paid by the Concessionary.

Article 24th. Any irregularities observed in the service shall be penalized by the Government with successive fines default. up to $1,000., according to the seriousness of the ~~failing~~. These fines shall also be applicable in cases of non-com- or pliance with the itineraries ~~of~~ alteration of the tariffs.

Article 25th. In case of war or disturbance of the public order, the Government may order the suspension of the service referred to in the present contract, until normal conditions are re-established, without indemnization for damages.

Article 26th.—The present contract may not be transferred, in whole or in part, to any person or company, without permission from the Government, which may reserve to itself the reasons which it may have for not granting the authorization. In no case may transfer be made to a foreign Government.

[fol. 2730] Article 27th.—The Government may administratively declare the present contract to have lapsed in the following cases, in addition to the cases specified under Article 41 of the Fiscal Code:

a) If the service has not been established within the period stipulated in Article 3rd.

b) If there is general interruption in the service for more than three consecutive months, except in case of force majeure.

c) If the guarantee or bond mentioned in Article 28th of the present contract is not duly established.

Article 28th.—During the two months following the definitive approval of the present contract, the Concessionary must establish, to the satisfaction of the Government, a guarantee or bond for the amount of Five thousand pesos ($5,000).

Article 29th.—In the event there should be occasion to declare the lapse or nullification of the contract for failings attributable to the Concessionary, the latter shall be subject to the payment of a fine of Five thousand pesos ($5,000) in favor of the State.

Article 30th.—The Concessionary must at all times maintain a legally authorized representative at Bogota.

Article 31st.—The present contract requires for its validity the approval of the Executive, after favorable opinion has been issued by the Cabinet, and shall be forthwith

passed to Congress for its consideration for the purposes of the corresponding legislative approval.

The foregoing shall be duly published in the Diario Oficial.

Bogota, September 29, 1930.

Article 2nd.—The Government is given authorization in order that it may, when it so deems advisable, qualify a port at an appropriate place on the Gulf of Uraba: for purposes of importation and exportation, and establishing there a customshouse with the necessary personnel.

Single Section.—The amount required for the operation of the customshouse indicated, shall be considered as included in the Budget of expenses for the fiscal year, in which the Government makes use of the authorization conferred upon it under the present Law.

[fol. 2732]

Article 3rd.—The Executive Power is authorized to extend the duration of the privilege dealt with in Article 6th of the present contract to twenty years, if it so deems advisable, and if in exchange for said extension it succeeds in obtaining valuable advantages for the official service.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 157A

CC: Vice President & Gen. Atty

PAN AMERICAN AIRWAYS, INC.
MEMORANDUM

DATE March 6, 1931.

TO	President	FROM	Chief
DEPT.	Executive	DEPT.	Foreign
LOCATION	New York City	LOCATION	New York City

SUBJECT COLOMBIA, THE MEJIA CONCESSION.

Dear Mr. Trippe:

Attached herewith is a translation of the Mejia concession. As it is a somewhat lengthy document I am summarizing below, for your convenience, the more important points:

1. Mejia is obligated to negotiate with American companies for the operation of the concession; the Government reserving the right to approve or disapprove the American assignee.
2. The necessary technical studies must be completed within a period of 12 months.
3. If, as a result of the technical studies, the operation of the concession is found to be practicable, the operation thereof shall commence within a period of 18 months from the date of the approval of Mejia's original concession.
4. The concession carries an exclusive right for the aerial transportation of passengers and cargo, but not mail. If the Government desires to have mail carried on the line, the matter has to be arranged through a special and separate contract.
5. The concession is for a period of 15 years from the date of the inauguration of operations.

6. The concessionaire must provide the necessary landing fields at his own expense. The Government, however, furnishes land free when the fields are to be located on uncultivated territory and on land belonging to the Government.

7. Tariffs and itineraries are to be approved by the Government; the tariffs may not be higher than those charged by other air transportation services in Colombia.

[fol. 2734]

8. The Government has a right to 50 passes per annum, and to a reduction of 10% on the transportation of cargo.

9. The service contemplated by the concession may not be connected with other air services without the special permission of the Government.

10. The Government will appoint a supervisor of the operations contemplated under the concession, whose salary, not exceeding 400 pesos monthly, is to be paid by the concessionaire.

11. The life of the contract (15 years) may be extended by the Government to 20 years if it deems it advisable, and "if in exchange for the extension it obtains valuable advantages for the official service".

Respectfully submitted,

/s/ Evan E. Young
Evan E. Young

[fol. 2735]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 158

April 7, 1931

The Honorable
The Postmaster General
Post Office Department
Washington, D.C.

Sir:

There are enclosed herewith four letters pertaining to service to be rendered by this Corporation under certain of its foreign air mail contracts. These include both curtailments and extensions during the balance of the current fiscal year, as well as during 1932. They suggest the following:

1. That Barranquilla be included on the direct Jamaica-Canal Zone Trans-Caribbean Service, supplementing the present North Coast Shuttle service between the Canal Zone and Barranquilla.

2. That service under F.A.M. Route No. 7 from Miami to Nassau be continued during the coming fiscal year under a waiver similar to the one now in effect.

3. That service between Maracaibo and Curacao, on F.A.M. Route No. 5 be temporarily suspended, effective July 1st, 1931.

4. That service on F.A.M. Route No. 10 be extended between Santos and Buenos Aires on a schedule of one round trip per week, effective May 19, 1931, so as to include Florianopolis, Porto Alegre, Rio Grande do Sul, Montevideo and Buenos Aires.

These four proposals are being submitted by us after very careful study, and we believe them to be in the best interests of the Government and postal users, as well as of advantage to this Company.

Foreign air mail service to Curacao, we are informed, has been of great benefit to United States oil interests having extensive operations at that point. In our opinion, how-

ever, this is not nearly as important as the extension of the East Coast service to Buenos Aires.

We have, therefore, recommended that the Department temporarily discontinue the Curacao service, notwithstanding the fact that this Company has a substantial investment in this route. This recommendation was made with the idea that the saving in cost to the Government thereby effected would help to defray a portion of the expense of the East Coast extension.

[fol. 2736] The retouring of the Kingston-Cristobal route, via Barranquilla, involves a very small additional aggregate mileage, and will provide speedier and more frequent service to the North Coast of South America, without impairing the usefulness of the service to the Canal Zone and the West Coast of South America.

We trust that the Department will give favorable consideration to this program, and will approve these recommendations.

Respectfully submitted,

J. T. Trippe, President

[fol. 2737]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 159

April 7, 1931

The Honorable
The Postmaster General
Post Office Department
Washington, D. C.

Sir:

It is respectfully requested that service on F.A.M. No. 10 be extended from Santos, Brazil to Buenos Aires, Argentine, via Florianopolis, Porto Alegre, Rio Grande do Sul, Montevideo and Buenos Aires on a once a week schedule beginning May 24, 1931.

In considering this request, you will recall that at the time the assets of the NYRBA Line were purchased by this

Corporation, there were in existence contracts with the Argentine and Uruguayan Governments for carrying their air mail up the East Coast to the United States. That the NYRBA Line had been performing service under these contracts for approximately seven months. The existence of the contracts was embarrassing to your Department, by reason of the fact that the compensation paid the contractor was less than half that charged by the United States Post Office Department for similar service to the United States via the West Coast. As part of this transaction, in order to avoid this embarrassment, the NYRBA contracts were cancelled and new ones were negotiated with the Argentine and Uruguayan Governments for East Coast service by this Company, at rates corresponding with those charged on the West Coast service.

The time is rapidly approaching when it will be necessary for this Company to commence operations from Buenos Aires and Montevideo to the United States via the East Coast. Our investment, including assets acquired from NYRBA in Argentine, Uruguay and points South of Santos, Brazil, is approximately $1,000,000 to date. This is greatly in excess of the investment of any of the air mail lines serving this territory, including both American and European.

We believe that the granting of this request is not only justified by reason of the pioneering work done by ourselves and NYRBA in this territory, but that it is to the distinct advantage of the United States Government and the postal users, for the following reasons:

1. Prestige of the United States in encircling the South American continent by its air mail service will be greatly enhanced. This will benefit the United States trade throughout all of South America which is now our greatest potential outlet market.

[fol. 2738] 2. The new territory served by this extension has a population in excess of 500,000, including the important commercial communities of Florianapolis, Porto Alegre and Rio Grande do Sul. In addition, the extension would be of substantial benefit to the im-

portant cities of Buenos Aires and Montevideo, which have a population of 2,200,000.

3. The establishment of two trunk lines to the Argentine and Uruguay, via the East and West Coasts, reduces the risk of complete curtailment of service, in the event of political disturbances in countries along one of the routes, as well as eliminating the seasonal interruption of service that is almost certain to occur during the six winter months on the Trans-Andean service.

4. Although the East Coast route to Buenos Aires is longer than the West Coast route, it serves the great Eastern Trade Route to South America, and is the only water level route to Buenos Aires from the United States. This not only assures all year round dependable operation, with regularity of service, but is the only route available to passengers who may object to flying at high altitudes.

5. United States interests in Brazil will be greatly benefited in meeting European competition by having direct air communication for mail and passengers with other branch offices in the Argentine and Uruguay. U.S. interests in Argentine, Uruguay and Brazil will be greatly benefitted by having this extension available for inter-communication in meeting European competition.

6. European subsidized lines are already entrenched and daily becoming stronger in this particular territory, and it is important that the United States enter this field at the earliest possible moment.

7. American business men and tourists have already evidenced considerable interest in having available a United States air service for the circumnavigation of South America.

Realizing the importance of this service, and the limited appropriation now available, if this extension is granted

as requested, we are willing to waive the pay in full on the northbound service from Buenos Aires to Santos during all, or such portion of the fiscal year 1932 as may be necessary.

Respectfully submitted,

J. T. Trippe
President

[fol. 2739]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 160

April 7, 1931

The Honorable
The Postmaster General
Post Office Department
Washington, D. C.

Sir:

In order to assist the Department in providing funds for the extension of service under F. A. M. No. 10 from Santos, Brazil to Buenos Aires, Argentine, via Florianopolis, Porto Alegre, Rio Grande do Sul and Montevideo, we suggest that the service under F. A. M. Route No. 5, now rendered by this Company from Maracibo to Curacao, be eliminated during the fiscal year 1932.

While this service is important to a limited group of American interests transacting business in Curacao, we believe that it is much more important to the United States postal users at large to provide for the extension on F. A. M. Route No. 10.

The boat service from Maracibo to Curacao is reasonably frequent, and a substantial saving in time will still be available by affording air mail service as far as Maracibo. The rerouting of service from Miami to the Canal Zone by way of Barranquilla will provide very nearly as good service to Curacao as has been provided under the existing schedules during the fiscal year 1931.

This suggested change would make available to the Department the sum of $43,254.00 for use in defraying part of the cost of the proposed extension on F. A. M. Route No. 10.

Respectfully submitted,

J. T. Trippe
President

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 161

DEPARTMENT OF STATE
WASHINGTON

In reply refer to
811.79611 Pan American Airways /984

April 9, 1931

Mr. J. T. Trippe,
President, Pan American Airways, Inc., and
Vice President, Pan American Grace Airways, Inc.,
122 East 42nd Street,
New York City.

Sir:

The Department refers to its letter dated February 12, 1931, concerning your request in accordance with the provisions of Executive Order No. 4971 of September 28, 1928 and the regulations issued by the Secretary of State on February 26, 1929 for permission for the Pan American Airways, Inc., to operate its aircraft into and from the Panama Canal Zone, and for permission for the Pan American Grace Airways, Inc., to operate its aircraft between the Panama Canal Zone and Colombia, Ecuador, Peru, Chile, Argentina, and Uruguay.

By virtue of the authority vested in me by Executive Order No. 4791 dated September 28, 1928, permission is hereby given for the Pan American Airways, Inc. to operate its aircraft to and from the Panama Canal Zone along the following routes, but subject to such regulations as have been or shall hereafter be issued with respect to the operation of aircraft in the Panama Canal Zone:

For The Pan American Airways, Incorporated.

1. Canal Zone—Jamaica—Cuba—Florida.
2. Canal Zone—Panama—Costa Rica—Nicaragua—Honduras—El Salvador—Guatamala—Mexico.

On the same basis permission is hereby given to the Pan American Grace Airways, Inc., to operate its aircraft between the Panama Canal Zone and the following foreign countries.

Colombia — Ecuador — Peru — Chile — Argentina — Uruguay.

Very truly yours,

For the Secretary of State:

(signed) FRANCIS WHITE,
Assistant Secretary.

Curtailment of FAM Services

In connection with the East coast extension, Mr. White instructed Mr. Grayson to recheck the appropriation available for 1932 and advise him of the situation.

Mr. Grayson reported that due to the restoration of the full mileage, Cristobal-Barranquilla, and the increase on the second trip of Panagra, there would be a deficit of a small amount which could be taken care of later.

This small deficit, however, was based on the elimination of Nassau, May 1 to January 1; the elimination of the Barran-

quilla-Curacao service; and an allowance of $23,000 for failures in service on all FAM routes.

I was requested to confer with them on this matter, and Mr. White instructed Mr. Grayson to notify the Company at once of the proposed discontinuance of these two services; also to secure waivers from the Company for the one month's pay provided in the contract in the case of discontinuance of service. Mr. Grayson found that you had already waived this one month's pay in the case of Nassau in a letter dated about a month ago. He is therefore writing you in regard to the waiver for Barranquilla-Curacao.

Yesterday Mr. Grayson called me again and asked me to confer with him and with Mr. White on the schedules you submitted last week. Mr. Grayson had prepared a schedule of his own which he thought was an improvement, but his schedule took no cognizance of our proposed service from Santos to Buenos Aires.

In the course of the discussion, Mr. While told Mr. Grayson that Panagra would receive only $1.60 per mile for the second trip during the year beginning July 1, and that notice to that effect was to be written to Pan American-Grace. He added that if they refused to accept this order the service on FAM No 9 would be curtailed to one trip per week, and intimated that he had his instructions to take this action. Mr. Grayson is therefore preparing a letter to Panagra along these lines, and asking that they renew their waiver of the additional pay on the second trip per week for the coming fiscal year.

[fol. 2742] Mr. Grayson's attitude is that if Panagra refused to accept this change there is nothing the Department can do except to curtail the service, but he doubts whether they would wish to do this. Mr. White's attitude is in favor of forcing the continuance of the present rate, but it is my personal opinion that Mr. Grayson will urge on him the necessity for continuing two trips a week down the west coast, in view of the commitments of the Department for this service to the public and to foreign postal administrations.

I thought it wise to make no comment and offer no suggestions on this phase of the matter.

In this connection, the matter of the cost of the east coast extension was discussed, and Mr. Grayson placed it at $253,000 for the full fiscal year. As I mentioned to you in my report of June 16 (Cases Pending in Washington) Mr. White is inclined to reduce the rate on the whole FAM No 10 contract to $1.80 a mile and to request a waiver for the return trip. However, this attitude is modified after a study of the schedules you submitted. Mr. White then stated that there was no commitment in regard to the east coast and that he had no definite instructions regarding it.

Mr. Grayson's schedule provided for a very excellent service between Cristobal and Trinidad on one round trip per week, making close connections at all points. In order to do this he had to change the schedule on FAM No 6-No 10.

His schedule, however, had certain noticeable defects as regards service between New York and Porto Rico. He brought up again the question of changing the schedule on FAM No 5 to avoid leaving Miami Tuesday morning, as that has been the source of very strong protest from business houses in New York. The result of that departure is, of course, that the FAM No 5 plane gets no mail from New York later than noon the preceding Saturday. Grayson has always objected strongly to this arrangement, and the schedule as now in effect was approved by Mr. White on my urgent request and over strong protest from Mr. Grayson.

The change in schedule FAM No 6-No 10 as submitted by you did not create a favorable reaction, since on mails to Buenos Aires the mail was expedited only one day as compared with FAM No 9, and the return mail from Buenos Aires reached Miami an hour and a half after FAM No 9 mail which had left Buenos Aires twenty-four hours before the FAM No 10 plane. Grayson and White both felt that the advantage gained was not sufficient to warrant the change in the schedule.

Mr. White's final instructions were to hold the whole question up of all changes in schedule for a few weeks in the hope that the completion of the airway to Miami would permit a change in the EAT schedule, and that a general [fol. 2743] revision of schedules could then be made which

would be more or less permanent and would effect some definite improvement.

I am in receipt this morning of your letter of June 16 enclosing a copy of your letter of that date to Mr. White, but I do not believe that that letter will produce any change in Messrs. White's and Grayson's attitudes. Generally speaking, they are reluctant to make any change in any schedule without assurance that such a change will be permanent, and they are definitely opposed to making a change where there is a prospect that it will have to be changed again in the course of a few months because of domestic connections.

In regard to the waiver on the second trip on the north coast, there was no discussion on this point; Mr. Grayson simply said that the Department could not accept a conditional waiver.

Mr. Grayson just told me over the telephone that he had received your letter and had studied the schedule. He thinks that the existing schedule is satisfactory for the present, but if you wish to change the schedule between the Canal Zone and Trinidad he has no objection. He and Mr. White, however, do not want to change the schedule on FAM No 6-No 10 at present. He is writing you a note to this effect.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 163

July 2, 1931

Thomas B. Doe, President

Hon. Walter F. Brown,
Postmaster General, Washington, D. C.

Dear Sir:

The situation in Cuba is rapidly coming to the point where, in order to protect our interests and carry out our agreement with the Cuban Government, it will be necessary

for us either to enter into a working agreement with Pan American or an open fight. Up to the present they have, through control of the business from Miami to Havana, made it difficult for us to develop as we should. Twice I have taken steps to prevent lines being opened between Miami and Havana, in hopes that Mr. Trippe would eventually see the wisdom of concentrating on the through business and leaving the local business to our Cuban company.

At present we are operating mail and passenger lines from Havana to Santiago and from Santiago to Antilla and Baracoa, under government guarantee that enables us to about break even. Cubans resent the moves made by Pan American to encroach on the strictly Cuban business, and I am convinced that the money and efforts spent by Pan American in trying to force us out of Cuba is building up ill-will, whereas a proper working agreement, which would enable us to proceed with our plans to develop the Cuban business would build up good-will for both of us and effect important economies.

[fol. 2745] I believe that a continuation of the present attitude would result in another service from Miami to Havana, with a working agreement between the Seaboard Air Line Railway and our Cuban company. I also believe that the Cuban Government would welcome such a move, as it would produce more traffic and therefore more revenue for Cuba. They, of course, know that Pan American has a $2-a-mile contract, and many of them feel it is unfair for this to be used as a club to prevent their developing their own aviation.

I am making every effort to arrange a proper agreement, rather than have an open fight, and I am taking the liberty of enclosing letter from Mr. E.W. Smith, receiver for the Seaboard Air Lines, and also letters from Mr. W.D. Pawley, president of our Cuban company, which, of course, were meant to be confidential and which I would appreciate your returning to me.

I would not presume to bother you with this matter if it were not for the fact that we wish to, in every way, cooperate with your plans for development of aviation, and do not wish to make any move which is contrary to your desires.

I appreciate that you are loath to step into these matters, but would certainly like to have such indication of your wishes in this matter as you might feel at liberty to give me.

Very truly yours,

Thomas B. Doe

[fol. 2746]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 164

July 7, 1931

Capt. Thomas B. Doe,
Eastern Air Transport, Inc., Sperry Building,
Brooklyn, N.Y.

My Dear Captain Doe:

Your letter of July 2 has received careful attention. While I, of course, appreciate the desirability of cordial relations existing between the various interests that are carrying the mails by air, I am of the opinion that the Department ought not to be drawn into controversies that are wholly outside our jurisdiction.

I have stated frankly to the air mail operators that in the present state of the industry it did not seem the part of wisdom to invade each other's territory with competitive services and that I did not believe that money paid for postal service should be used to set up services to injure competitors. In pursuance of this policy I suggested the abandonment by the Pan American Co. of the domestic field in the United States, and as a result of that suggestion you are now negotiating with the Pan American Co. for the taking over of their Atlantic City service. Their field is the international service to Mexico, Central and South America, and the West Indies. Consistently with the policy outlined, it would seem improper for any of our domestic air mail operators to use mail pay to invade the peculiar field of the Pan American Co.

[fol. 2747] For your information, I have another letter from Mr. Vidal, of the Ludington Lines, protesting against

the extension of your service to Atlantic City, and again offering to carry the air mail from New York to Richmond at a saving of a thousand dollars a day over the compensation paid the Eastern Air Transport Co.

Sincerely yours,

/s/ WALTER F. BROWN

September 4, 1931

My dear Mr. President:

In confirmation of my telegram of September 1, 1931, it is with great pleasure that I have the honor to advise Your Excellency that on August 24, 1931, there was incorporated under the laws of the State of Delaware, United States of America, an aerial transportation company known as Uraba, Medellin and Central Airways, Inc. This company has been organized with a view to operating the air transport service contemplated by the Concession granted by the Colombian Government to Sr. Gonzalo Mejia (Law No. 8, January 14, 1931).

Uraba, Medellin and Central Airways, Inc. is closely affiliated financially with Pan American Airways, Inc. which for several years past has been engaged in extensive air transport operations in Central and South America, Mexico, and the West Indies. The necessary flying and other technical equipment for the operations of the Concession will be furnished to Uraba, Medellin and Central Airways, Inc. by Pan American Airways, Inc. The technical personnel will be selected from among the technical experts now in the service of Pan American Airways, Inc., thus assuring that the service will be operating on a proper basis as regards efficiency, safety, and reliability.

Sr. Gonzalo Mejia, in company with Mr. Alan F. Winslow, President of Uraba, Medellin and Central Airways, Inc., will proceed shortly to Bogota to acquaint Your Ex- [fol. 2751] cellency's Government with all pertinent details

affecting the operation of this contemplated service and to comply with all requirements specified by Law and by the Concession above mentioned.

The Directors of Uraba, Medellin and Central Airways, Inc. are:

Messrs. Alan F. Winslow (Representative, Foreign Department, Pan American Airways, Inc.)
Evan K. Young (Vice President In charge of Foreign Department, Pan American Airways, Inc.)
Robert C. Thach (Vice President and General Attorney, Pan American Airways, Inc.)
H. Preston Morris (Assistant General Attorney, Pan American Airways, Inc.)
Gonzalo Mejia
..... (Colombian Director to be elected)
..... (Colombian Director to be elected)

The Officers of Uraba, Medellin and Central Airways, Inc. are:

Messrs. Alan F. Winslow, President
Gonzalo Mejia, Vice President in charge of Commercial Operations in Colombia
H. Preston Morris, Secretary
J. S. Woodbridge, Treasurer

The following statistical data as of July 1, 1931, with respect to the operating record of the Pan American Airways System, may be of interest in this connection:

18,500 miles of airways in operation.
85,793 passengers carried.
1,561,583 passenger miles flown.
1,788,754 pounds of mail, express and baggage carried.
101 air liners.
99.71% regularity of schedule maintained.

[fol. 2752] I trust that the full information which will be placed at the disposal of Your Excellency's Government by Sr. Mejia and Mr. Winslow, together with the general knowledge, possessed by the Government with respect to Pan American Airways Corporation, its organization, its operations, resources, etc. and its close financial and technical affiliation with Uraba, Medellin and Central Airways, Inc. will be sufficient to warrant Your Excellency's Government in formally approving the assignment by Sr. Gonzalo Mejia to Uraba, Medellin and Central Airways, Inc. of his above mentioned Concession, as provided for in Artiele 36 of the Concession.

I am, my dear Mr. President, with warmest personal regards,

Very sincerely yours,

J. T. TRIPPE
President, Pan American Airways, Inc.

His Excellency, Dr. Enrique Olaya Herrera
President of Colombia
Bogota, Colombia

CC: Vice Pres. and Gen. Attorney
Vice Pres. in Charge Foreign Dept.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 168

THIS AGREEMENT, made and entered into this 10th day of September, 1931, by and between URABA, MEDELLIN & CENTRAL AIRWAYS, INC., a Delaware corporation (hereinafter called the "Company"), party of the first part, and GONZALO MEJIA, residing at Medellin, Colombia, (hereinafter called "Mejia"), party of the second part,

WITNESSETH:

WHEREAS, Mejia represents that he is the sole owner of an exclusive concession granted to him by the Government of the Republic of Colombia for the operation of an aerial service for the transportation of passengers and cargo between the Gulf of Uraba and the City of Medellin, and between either of said points and intermediate points, and between such intermediate points, within the territorial zone therein described, evidenced by a written contract embodied in a Decree of the Congress of the Republic of Colombia, designated as Law No. 8 of 1931 (January 14), which approves said contract, and further represents that the attached copy of said contract and decree, marked "Exhibit A", is a true and correct English translation of the original thereof; and

WHEREAS, Mejia has heretofore by separate instrument agreed forthwith to convey, transfer, assign and set over to the Company the aforementioned contract and con- [fol. 2754] cession, and all of the rights and privileges of Mejia thereunder, and to cause the Company to be vested with such rights and privileges and with sole and complete right and authority, and to become duly qualified, to establish and operate the aerial transportation services contemplated under the said contract and concession; and

WHEREAS, Mejia further represents that he is experienced in matters relating to aerial transportation of passengers and cargo and desires, subject to, and in accordance with the terms, provisions and conditions hereinafter set forth, to enter the employ of the Company, and the Company desires so to employ Mejia;

NOW, THEREFORE, in consideration of the sum of One Dollar ($1.00), cash in hand paid by each of the parties hereto to the other party, the receipt whereof is hereby acknowledged, and of other good and valuable considerations, the parties hereto mutually agree as follows:

FIRST: That in the event the aforementioned contract between the Government of Colombia and Mejia relating to the operation of an aerial transportation service in

Colombia, and the aforementioned concession, and all of the rights and privileges of Mejia thereunder, are conveyed, transferred, assigned and set over to the Company by Mejia, and the Company becomes vested with all of such rights and privileges, and with sole, full and complete right and authority to establish and operate, and becomes duly qualified to establish and operate, the aerial service [fol. 2755] contemplated in said contract, the Company shall, upon the fulfillment of the foregoing conditions precedent, employ Mejia, and Mejia shall thereupon enter the employ of the Company for the term, and upon the conditions, herein stated, as commercial manager, subject to the control and instructions of the Board of Directors and/or the President of the Company to supervise and manage, within the Republic of Colombia, the commercial activities which may be carried on by the Company in said country in connection with the operation by it of an aerial service for the transportation of passengers and cargo by air in Colombia, and to render such other services, and do and perform such other duties, whether in or outside of Colombia, as shall be from time to time requested by the Board of Directors or the President of the Company.

Mejia shall devote his entire time, energies and attention exclusively, faithfully, diligently and efficiently to the performance of the duties hereinbefore referred to, and to the business of the Company, and shall use his best endeavors and skill to promote the business and interests of the Company.

SECOND: It is further agreed that in the event the conditions mentioned in Paragraph "FIRST" are fulfilled, and Mejia enters the employ of the Company, Mejia shall be entitled to receive and the Company agrees to pay to Mejia, as full payment for all services to be rendered by Mejia to the Company, compensation at the following rates in United States of America currency:

[fol. 2756] (a) $500. per each calendar month in the first year of Mejia's employment hereunder, and ratably for each fractional part of each such calendar month.

(b) $600. per each calendar month in the second year of Mejia's employment hereunder, and ratably for each fractional part of each such calendar month.

(c) $700. per each calendar month in the third year of Mejia's employment hereunder, and ratably for each fractional part of each such calendar month.

It is further agreed that in the event of and upon the commencement of Mejia's employment hereunder, as hereinbefore provided, the Company will pay to Mejia as further compensation for the aforementioned services an additional lump sum computed at the rate of $500. for each calendar month, and ratably for each fractional part of a calendar month, intervening between the first day of September, 1931, and the date on which the aforementioned conditions shall be fulfilled and Mejia shall enter the employ of the Company, such additional lump sum to be paid to Mejia upon the commencement of his employment hereunder.

The aforementioned compensation shall be payable by mailing a check therefor, to the order of Mejia, addressed to him at Medellin, Colombia, or otherwise as may be mutually agreed by the parties hereto.

It is further understood and agreed that the compensation hereinbefore in this Paragraph "SECOND" specified shall cover all expenses of Mejia while residing or travelling [fol. 2757] in Colombia, but that in the event the duties of Mejia to the Company shall at any time after the commencement of Mejia's employment hereunder require Mejia to travel outside of Colombia, Mejia shall be entitled to be reimbursed, and the Company agrees to reimburse Mejia, for such reasonable travelling expenses as shall be properly incurred by Mejia in connection with the performance of such duties outside of Colombia and as shall be approved by the President of the Company. A detailed itemization of all such travelling expenses so incurred by Mejia shall be furnished to the Company, on forms approved by the Company, as soon as practicable after the end of each calendar month, or upon the request of the Company.

THIRD: The term of Mejia's employment hereunder shall be three (3) years from the date on which the conditions mentioned in Paragraph "FIRST" upon which Mejia is to enter the employ of the Company shall be fulfilled. It is agreed, however, that the Company shall have the right to terminate Mejia's employment, and the agreement of employment, on the first day of any January or July subsequent to the commencement of such term, by mailing to Mejia, not less than thirty (30) days prior to such date of termination, a written notice thereof addressed to Mejia at Medellin, Colombia.

IN WITNESS WHEREOF, the party of the first part has caused this instrument to be signed by its President thereunto duly authorized, and its corporate seal to be hereunto affixed and duly attested, and the party of the [fol. 2758] second part has hereunto affixed his signature and seal all as of the day and year first above written.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 169

The New York Times, December 12, 1931

AIRLINES TO SHARE TRAFFIC IN COLOMBIA

Pan American Buys Interest in Scadta, Agreeing to Division of Central American Trade.

Pan American Airways, operating lines, with Miami as a base through the West Indies and Central and South

America has signed a preferential agreement with Scadta lines operating in Colombia, it was revealed here yesterday by Juan T. Trippe, President of the American system. Dr. Peter Paul von Bauer, managing director of Scadta, has been in New York for some time conferring with officials of Pan American.

The new agreement does away with competing and parallel lines in and near the Canal Zone. At the same time Mr. Trippe announced that Pan American had purchased a substantial financial interest in the Scadta company which operates under the laws of Colombia, through which Pan American will be represented on the Board of Directors of Scadta. The majority on the Board, however, will continue to be Colombian citizens.

On Dec. 1 Scadta signed an agreement with the Colombian Government by which the air line becomes the air-mail administrator for the country. Under the new arrangement with Pan American, Scadta discontinues its lines along the north and west coasts of South America and into the Canal Zone, a region which is served by Pan American Airways. Scadta in turn plans to expand its lines in the interior. Recently the United States Post Office Department made an agreement with Colombia covering the exchange of American airmail at the seaboard terminals for distribution in Bogota, the Colombian capital and other interior cities over the Scadta lines as well as for Colombian mail destined for the United States.

The new agreement Mr. Trippe said brings about coordinated schedules making it possible to move the mail between New York and Bogota in forty-four hours and passengers in fifty-six hours, a saving of eighteen days over the fastest steamer service. The lines also are to carry international express.

DEED OF ASSIGNMENT OF THE MEJIA CONCESSION TO URABA, MEDELLIN & CENTRAL AIRWAYS, INC. JANUARY 11, 1932

Instrument No. 36

In the City of Bogota, Department of Cundinamarca, Republic of Colombia, on January 11, 1932, before me Gregorio Ospina E., First Notary Public of this Circuit, and the witnesses hereto, Messrs. Luis M. Guerrero M. and David Becerra D., males, of legal age, residents of this city, of good character and without any impediment to act as witnesses, appeared Messrs. Doctor Alberto Pumarejo, Minister of Mails and Telegraphs, as to whose official character I certify, in the representation of the National Government; Gonzalo Mejia in his own name; and Juan Uribe-Holguin, representing the corporation Uraba, Medellin & Central Airways, Inc., with its principal office in Wilmington, County of New Castle, State of Delaware, United States of America, organized under the laws of the said state, of which corporation he is the attorney in fact pursuant to public instrument No. 2015 of October 26, 1931 executed in the First Notarial Office of Bogota, all of the appearing parties being males, of legal age, the first and last mentioned being residents of Bogota and Mr. Mejia being a resident of the City of Medellin, which parties I know personally, and they deposed:

That they raise to a public instrument the following contract of December 22, 1931, approved by the Executive on the 8th instant, pursuant to a favorable opinion given by the Council of Ministers, which contract embodies the assignment made by the appearing party Gonzalo Mejia to the Uraba, Medellin & Central Airways, Inc. of the concession for a service of aerial navigation between Medellin and the Gulf of Uraba which was granted by the National

Government pursuant to a contract of September 29, 1930, [fol. 2761] duly approved by the Executive, pursuant to a favorable opinion issued by the Council of Ministers on October 8, of the same year, and then approved by law No. 8 of 1931, said contract being elevated to public instrument in the Fourth Notarial Office of Bogota in public instrument by deed No. 281 of February 12, 1931:

"The following contract has been entered into between the National Government represented by Alberto Pumarejo, Minister of Mails and Telegraphs, acting under authority of his Excellency the President of the Republic, of the first part; Gonzalo Mejia, a resident of Medellin, of the second part; and the corporation Uraba, Medellin & Central Airways, Inc., with its principal office at Wilmington, County of New Castle, State of Delaware, United States of America, and duly organized under the laws of the said state, represented herein by Juan Uribo-Holguin, its attorney in fact pursuant to public instrument No. 2015 of October 26, 1931 executed in the First Notarial Office of Bogota, of the third part:

"FIRST—Mejia, with the permission to assign stipulated in Article 26 of the contract hereinafter mentioned, which permission was granted by the National Government by virtue of the Resolution of the Ministry of Mails and Telegraph No. 193 dated the 14th instant, approved by his Excellency the President of the Republic, assigns to the corporation Uraba, Medellin & Central Airways, Inc. the concession for a service of aerial navigation between Medellin and the Gulf of Uraba which was granted to him by the National Government pursuant to a contract of September 29, 1930, approved by the Executive after favorable opinion by the Council of Ministers dated October 8, 1931, and then by law No. 8 of 1931, or in other words, the privilege thereby granted, together with all of the rights corresponding to him under the said contract, without any exception whatever. The corporation named is to hold all the rights given by the contract to the concessionaire to [fol. 2762] the same extent as it had been as if it had made the contract itself and, conversely, the corporation is to be bound to perform all of the obligations stipulated in the

contract excepting those already performed. The obligations referred to in Article First and Second of the contract, namely, to make a proper connection and to perform the preliminary studies, have been complied with, the National Government having so declared in Resolution of the Ministry of Mails and Telegraph No. 181 of November 9, 1931, approved by His Excellency the President of the Republic on the eleventh of the same month.

"SECOND—In compensation of the said assignment the Uraba, Medellin & Central Airways, Inc. allocates to Mejia fifteen hundred (1,500) shares of the common stock of the corporation, without par value, being the same in all respect as the remainder of the common stock, the certificate or certificates for which it will deliver to him. Mejia will execute the corresponding receipt to the corporation.

"It is stipulated that Mejia shall have no action for cancellation of the present contract of assignment by reason of a failure to deliver to him the said certificate or certificates for said fifteen hundred (1,500) shares, nor for any other reason, but shall only have an action against the assignee corporation for the delivery of the said certificates. In no event may the present contract be annulled or rescinded.

"THIRD—Uraba, Medellin & Central Airways, Inc. expressly declares that with reference to everything concerning the contract herein assigned to it, it will be subject to the Colombian law and to the jurisdiction of the National courts, and that it waives recourse to diplomatic channels with respect to any claim based upon the rights and duties deriving from the contract, excepting in case of a denial of justice, it being understood that there is no such denial [fol. 2763] if the corporation has exhausted all of the remedies and actions which, pursuant to Colombian laws, may be utilized before the judicial authorities, all pursuant to Article 42 of the Fiscal Code.

"FOURTH—As set forth in public instrument No. 281 of February 12, 1931, executed in the Fourth Notary Official of Bogota, by which the concession contract was elevated to public instrument and pursuant to Article 28, Dr. Juan Antonio Toro constituted himself surety for Mejia

in the sum of five thousand dollars ($5,000). The National Government, in consideration of the fact that the assignee corporation will furnish the guarantee hereafter mentioned, hereby releases the said Dr. Toro from all liability and declares his surety cancelled.

"FIFTH—Pursuant to the said Article 28 of the concession contract the Uraba, Medellin & Central Airways, Inc. has already deposited in the Banco de la Republica, to the order of the Ministry of Mails and Telegraphs, in the form of Colombian Internal Debt Ten Per-cent (10%) Bonds, the sum of five thousand dollars ($5,000), for the purpose of guaranteeing the performance of the said contract. The certificate of deposit bears the number 854 and is dated the eighteenth of the present month. The said Company shall have the right to receive the interest upon the deposited Bonds as stated in the aforesaid certificate.

"SIXTH—The National Government agrees to the assignment covered by the present contract and approves the same. In the future it will consider the Uraba, Medellin & Central Airways, Inc. as the concessionaire. The Government also agrees to accept the guarantee referred to in the foregoing paragraph, and which supersedes and replaces the first security posted.

"SEVENTH—The present contract requires for its validity the approval of His Excellency, the President of the [fol. 2764] Republic, to be given upon favorable opinion by the Council of Ministers. It shall then be elevated to public instrument and, in due course, published in the Diario Oficial.

"There were added to the present Notary's Protocol a certified copy of each one of the two Resolutions herein before cited.

"In testimony whereof the present contract is signed at Bogota on December 22, 1931, before two witnesses.

"Signed, ALBERTO PUMAREJO
GONZALO MEJIA
JUAN URIBE-HOLGUIN

"Witnesses: signed, LUIS JORGE CARZON
MANUEL J. ACEBEDO

(Contract bears two documentary stamps duly cancelled, for the value of $1.04).

"Republic of Colombia—Council of Ministers—Bogota, January 8, 1932.

"At today's meeting the Hon. Council issued a favorable opinion with respect to the preceding contract.

"The Minister of Mails and Telegraphs,
Signed, ALBERTO PUMAREJO"

There is annexed to the protocol the original of the contract above transcribed and a copy of the Resolutions No. 181 and 193 of 1931 to which the latter part of Article 7 of the said contract refers and which are as follows:

"RESOLUTION NO. 181 OF 1931

"Ministry of Mails and Telegraphs, Bogota, November 9, 1931.

[fol. 2765] "Article 1 of the contract entered into with Mr. Gonzalo Mejia for the establishment of a service of aerial navigation between Medellin and the Gulf of Uraba approved by Law 8 of 1931, provides that the concessionaire, to the end of establishing the service in question, 'shall make connection with one or more companies of the United States of America, devoted to such matters, and which shall be, as an essential condition, of the highest category by reason of their capital, reliability and technical knowledge, to the satisfaction of the Government', and that 'upon the concessionaire making this connection he will furnish to the

Government the name of the Company or Companies with which he has made the connection, and the present concession shall have no effect if the Government does not accept the said Company.'

"Article 2 provides that 'once the Government has accepted the connection made by the concessionaire with the said Companies, the concessionaire shall bring experts provided with airplanes for exploration and the proper scientific apparatus, to study the air currents and all other atmospheric and topographical conditions to the end of determining if the proposed service is fundamentally possible and practical. The studies to which this Article refers must be finished, as the clause states, in the term of twelve months, beginning on the date when this contract is definitely approved.'

"The concessionaire in an official communication dated October 26th, last, states that, as he had previously advised by cablegram from the United States, he has made a connection, as required by the contract, with Pan American Airways, Inc. and its subsidiary Uraba, Medellin and Central Airways, Inc. The concessionaire further advises that the preliminary studies prescribed by Article 2 of the concession contract were made by experts of the said companies, and that as a result thereof the service covered by [fol. 2766] the said contract is fundamentally possible and practical. With respect to the connection with Pan American Airways, Inc. and its subsidiary Uraba, Medellin and Central Airways, Inc., the Government has no observation to make, for the reason that the former is an organization known throughout the world, which has established under excellent conditions a wide air service which comprises a great part of the American continent, and the other Company, as a subsidiary of Pan American, offers no obstacles whatever to fulfill the purposes of the connection in question.

"With regard to the preliminary studies, the concessionaire has presented a report by Mr. Andre A. Priester, Chief Engineer of Pan American Airways, Inc., by which it appears that a study was duly made of the air currents

and other atmospheric and topographical conditions obtaining in the territorial zone covered by the concession granted to Mr. Mejia, and that the conclusion reached by the company is that by utilizing amphibian multi-motored planes, equipped with radio, supported by similar radio apparatus installed at Medellin and the Gulf of Uraba, and coupled with landing facilities which can be established, it is fundamentally possible and practicable to operate an air transport service for passengers and freight in the aforesaid zone. As a basis of his conclusion, the Chief Engineer of Pan American Airways, Inc. refers to the physical survey made personally by an authorized representative of the Company and by Mr. Fred Clarke, Chief Pilot of Pan American Airways, between May 22nd and May 31st, of the present year, and to the flights effected by the said pilot in a Sikorsky amphibian plane, over the territory between the Gulf of Uraba and the neighborhood of Medellin on the 30th and 31st days of the said month. Therefore the studies prescribed by Article 2 of the contract were performed in the manner stipulated, with affirmative results and within the term established therefor.

[fol. 2767] "In consequence of the foregoing, the Ministry RESOLVES:

"FIRST—To accept the connection reported by Mr. Gonzalo Mejia with the Pan American Airways, Inc. and Uraba, Medellin and Central Airways, Inc., made by him pursuant to the provisions of Article 1 of the contract entered into with him for the establishment of a service of aerial navigation between Medellin and the Gulf of Uraba, approved by Law 8 of 1931.

"SECOND—The obligation on the part of the concessionaire to make the preliminary studies prescribed in Article 2 of the contract is hereby declared performed, and as a result of the said studies the service in question is found to be fundamentally possible and practical.

"Let due notice hereof be given and publication be made.

"The Minister,

"RESOLUTION No. 193 OF 1931
(December 14)

"whereby permission is granted to Mr. Gonzalo Mejia to transfer to Uraba, Medellin and Central Airways, Inc. the concession for the establishment of a service of aerial navigation between Medellin and the Gulf of Uraba.

"Ministry of Mails and Telegraphs—Bogota—December 14, 1931.

[fol. 2768] "Mr. Gonzalo Mejia has requested permission to transfer to the Company entitled Uraba, Medellin and Central Airways, Inc., with its principal office in Wilmington, State of Delaware, United States of America, the concession granted to him by the Government for the establishment of a service of aerial navigation between Medellin and the Gulf of Uraba as per contract of September 29, 1930, approved by Law 8 of 1931. Petitioner presents a duly certified copy of the Diario Oficial No. 21853 of November 28, last, in which appears:

"'(a) A certificate by the First Notary of Bogota, dated the 6th of the same month, recorded in the Chamber of Commerce of this city on the 7th instant, whereby it appears that by public instrument No. 2091 of November 5, 1931, Dr. Juan Uribe-Hoiguin protocolized the following documents: the certificate of incorporation of the aforesaid corporation; copy, certified by Notary Public Edward

Schuster of New York under date of September 28th last, of the Bylaws of the said corporation and the general Power of Attorney conferred by the Company on Mr. Alan Francis Winslow, a resident of New York.

"'(b) A Certificate of the same Notary, dated November 7th last, by which it appears that Mr. Alan Francis Winslow, in public instrument No. 2015, executed on October 26th last, substituted to Dr. Juan Uribe-Holguin the Power of Attorney conferred upon him by Uraba, Medellin and Central Airways, Inc. Petitioner also presents copy of official communication No. 340 of the Ministry of Industries, Department of Commerce, Second Section, dated the 9th instant, by which it appears that the Executive, in Resolution No. 14 of the 2nd instant, declared performed on the part of Uraba, Medellin and Central Airways, Inc., all of the legal requisites prescribed by Legislative Decrees No. 2 and 37 of 1906 with reference to the permanent establishment of the said corporation in this country and the constitution of a general attorney in fact to represent it in Colombia.'

[fol. 2769] "Since Article 26 of the said contract provides that the contract may not be assigned without permission of the Government, and there being no objection to the assignment described in the petition by the concessionaire, Mr. Mejia, it is hereby RESOLVED:

"To grant permission to Mr. Gonzalo Mejia, to assign the concession for the establishment of a service of aerial navigation between Medellin and the Gulf of Uraba, pursuant to contract approved by Law 8 of 1931, to the Uraba, Medellin and Central Airways, Inc.

"The Government shall not accept the assignment referred to if the assignee corporation does not expressly declare that it submits to the provisions of Article 42 of the Fiscal Code and if the other proper formalities shall not be fulfilled.

"Let notice hereof be given.

"The Minister,

Signed, ALBERTO PUMAREJO

"Republic of Colombia—Executive Office—Bogota, December 15, 1931.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 171

COPY

Buenos Aires, December 24, 1933

Mr. Harold R. Harris, Vice-Pres.,
Pan American Grace Airways, Inc.,
Lima, PERU.

CONFIDENTIAL

Dear Harold:

While we were in Montevideo together I was so worried about what was going to happen to our mutual interests, that I did not observe the advertising that Bonino was putting out for you people. It was only during the last couple of days that I started to look around and observe just what was going on, otherwise I would have brought the matter up while we were together.

I noted in Bonino's office that there were two large maps of the System on which only the names "Panagra" and "Pan American Grace Airways, Inc." were shown.

As you know we opened up an office in the Palace and the material sent over from Buenos Aires advertising your routes, was all of the nature I have described. As a matter of fact no one observing the advertising done in the booth would have thought that Pan American Grace was a part of Pan American Airways System and when I looked

closely at Bonino's office I could find very little that would not make the public believe that Pan American Grace was not the backbone of Pan American Airways.

I do not think I am one-sided in considering both companies and certainly I have always given instructions to this office and also to Bonino that no attempt whatever should be made to influence the public to travel via the East Coast as against the West, but I certainly must object to the advertising being done here and in Montevideo. We have joint offices and wherever they exist it is impossible to put out advertising that brings before the public one company in preference to the other. It may be that you are not thoroughly aware of the copy that has been sent here—personally I was shocked although I suppose I should have known about it as our people should have advised me.

If you want to advertise on the West Coast Pan American Grace, and not mention the System, that is your business, but certainly I have a right to a voice in what is done where both companies operate. The New York office never puts out anything that in any way could make the public believe that the West Coast was less important than the East, at least I have never seen it if they have.

I have personally sold tickets over your line and went out of my way to keep Miss Breckenbridge from changing her proposed trip to the United States although she called [fol. 2771] me at midnight last Thursday complaining about not being able to get a reservation as promised. You realize that if we were in any way competing with you, it would be a very easy matter to convince many people that the high altitudes flown on your route would probably not be as agreeable as flying up the East Coast. I am only mentioning this point to let you know that we would not for a minute think of selling our own Company before one that we only have a 50% interest in and yet it would not be a difficult matter to talk the East Coast if we had no financial interest.

I do not blame you at all for being proud of your Company and wanting to get as much publicity for it as pos-

sible, but everything considered I do not believe it should be your policy to play Pan American Grace as being distinct from the Pan American Airways System. The operation should be considered as a whole and I think our New York office does so. The line on the West Coast is only a small part of the total mileage operated under United States postal contracts; we never think of your being foreign to the System and everything we do is open to you. If you will look at your advertising you will readily see that it originates from that of the System and wi would hardly seem equitable for your Company to copy what the System does not unduly emphasize the West Coast Operation.

You and I have always gotten along and I hope you will agree with me that I am not unreasonable in asking you not to send to Buenos Aires or Montevideo material that could be considered as prejudicial to our interest, as we certainly do not intend to do anything to hurt yours.

I did not ask Bonino to have this office boy discontinue the use of the uniform you gave him, but I hope you will do so. Just why I did not notice the word "Panagra" on his cap while you were there, is beyond me, but I certainly did before I left. If a uniform is necessary for the boy, we shall be glad to join with you in designing one that cannot be considered either "Panagra" or "Panair". The only insignia that could go on the boy's cap would be that of the System and I suppose we would have trouble in agreeing on the colour to be used, so it might be well to just let the boy wear civilian clothes. Of course we have no objection to his wearing his present uniform when he goes to meet your planes, but he certainly cannot do it any other time, unless we get another boy to wear Panair clothes all the time. Just what we would do with two office boys is beyond me.

With kindest regards

Yours faithfully,

.....

Geo. L. Rihl

MONTEVIDEO & B.AIRES PUBLICITY

JDM
JTS
JMVL

LIMA, December 30, 1933.

Mr. Geo. L. Rihl,
Panair do Brasil S.A.,
Rio de Janeiro.

Dear George,

Thank you very much for your December 24 confidential letter on the subject of the Montevideo Panagra publicity.

Taking up this letter paragraph by paragraph, I agree with you that we were so busy worrying that we did not have much chance to think about the details such as the local Montevideo publicity. However, now that I think of it I believe that the Bonino office maps which you refer to are some lithographed posters which were gotten out by our Santiago office some two or three years ago and which it was my impression had completely disappeared from all of our offices. At any rate I have told Van Law and Salsilli, who is the Santiago Traffic head and happens to be here in Lima now, that all of these posters as far as B.Aires and Montevideo are concerned are to be destroyed, and that the only Panagra maps and posters which are to be shown in that district are the standard Pan American Airways System black-and-white map as published everywhere, which is standard for both Panair and ourselves, but as put out by Panagra has the special Pan American-Grace wing on the lower left corner and has the words "Pan American-Grace Airways, Inc." at the bottom, although at the top of the map the wording is "La Red Pan American Airways". I have told Salsilli to straighten out Bonino on his advertising and posters at once, in order that unfortunate instances of this sort can never recur.

With regard to the material sent over from B.Aires to the office opened up in the Palace, I don't recall what this

could be, but presume it was material which Moore must have had on hand there at B.Aires. By no means do we want to make any comparisons between the West Coast and the East Coast routes in any such way as has apparently taken place in connection with this material sent over from B.Aires, to Monte by Mooré. If you are still in B.Aires when you receive this letter, I think it would be a good idea to have Moore destroy any publicity which Panagra may have sent him which tends to make the public believe that Pan American-Grace is the backbone of the Pan American Airways System. It is certainly very much to my sorrow that I learn of such a thing occuring in this very important phase of our advertising. In this connection, why not suggest to Moore that if he ever has any doubt in his mind as to publicity sent him by Panagra that he take it up both with Van Law and Rice, since controversial matters of this sort are likely to build up into giant questions, although they were never intended to be of a disparaging nature. In my mind Pan American-Grace Airways has always been and always will be proud to be a minor part of the great Pan American Airways [fol. 2773] System, and the System as a whole is the thing that I have continually in mind as a background for the more direct problems which have to do with my own work with Pan American-Grace Airways. I believe that you and I worked together in most satisfactory fashion in our very fundamental problems as worked up for the Montevideo Conference report, and that absolutely no major emphasis was made on Pan American Airways or Pan American-Grace Airways by either one of us, but that we both played our cards to give the maximum advantage to the Pan American Airways System, rather than make any attempt to sell either the East Coast or the West Coast to the official notice of the Conference delegates. This, you may be sure, will be always the attitude of myself and my associates, and I regret exceedingly anything that may have happened in connection with publicity at either Montevideo or B.Aires which might tend to indicate any other attitude on our part. I assure you that if such a thing occured it was not intentional.

With regard to the Bonino office-boy, I observed, as you did, the weird uniform which he was wearing at various times, but assumed that it was worn by him when I chanced to see him, in connection with some receipt or dispatch of Panagra planes. Quite frankly, the uniform made very little impression on me, except that it was so badly gotten up. I am in complete agreement that the uniform this boy wears should have the Panagra name taken off it, if it appears on the clothing anywhere, and if it is necessary to have any words that the words should be "Pan American Airways System". If you don't have any objection, I can't see why he cannot have two caps, wearing one cap marked "Pan American Airways" for receipt and dispatch of Panair planes, and another cap marked "Panagra" for receipt and dispatch of Panagra planes, these caps to be used only in connection with receipt and dispatch of the respective airplanes, although at other times I don't see any objection to his wearing a Pan American Airways System or Pan American Airways cap, (if it isn't worthwhile having the word "System" on the Panair cap,) at all times when he is not actually receiving or dispatching Panagra planes.

It is my understanding from Salsilli that Moore is directly in charge of all the publicity and propaganda for both organizations in both B.Aires and Montevideo, and I suggest that he might overhaul all of the controversial possibilities and eliminate them immediately. I have given the necessary instructions to our own traffic people to see that such possibilities do not occur in the future.

Warm personal regards,

Sincerely,

(Signed) HRH
H. R. Harris

February 23, 1934.

H.F.

Memorandum of Conference with Mr. Francis White

I had a conference with Mr. Francis White on February 23, 1934, in regard to the attitude of the State Department to the development of American aviation in Latin America.

Mr. White stated that as early as 1922 or 1923 he had been impressed by the activities of the Scadta Company in Colombia and had concluded that the United States had better get started if it did not wish to find Central and South America entirely preempted by foreign controlled companies. At that time he asked the War Department to conduct a survey flight between the United States and the Canal Zone and the War Department reported enthusiastically as to the possibilities of developing air transport routes in this area. He also asked the Post Office Department to look into the matter. The Post Office Department sent an inspector to the Canal Zone. The inspector made no real investigation of the possibility and reported that from a mail standpoint the subject was fantastic.

Mr. White was abroad for about nine months in 1926. On his return he found that the Scadta Company had greatly [fol. 2775] increased its activities. It had obtained monopoly concessions in a number of Central American countries and was planning to extend its activities northward. Dr. von Bauer made numerous trips to Washington and requested permission to enter the Canal Zone and the United States. Mr. White stated to Dr. von Bauer that the question of permitting foreign aircraft to fly into the Canal Zone was one which had grave military complications and would have to be carefully studied. Dr. von Bauer also visited Postmaster General New and requested air mail contracts. Postmaster General New told him that no such contracts would be forthcoming except to an American company which used American plans and American pilots.

Mr. White deliberately withheld action on Dr. von Bauer's request for permission to enter the United States and the Canal Zone until there should be developed American companies able to fly into Central and South America.

About 1927, Mr. White became aware of the plans of Pan American Airways to develop air transport routes between the United States and South America. By this time the monopoly concessions obtained by Dr. von Bauer in Central America were expiring because of his failure to initiate service within the time prescribed. Mr. White's recollection is that Pan American Airways obtained its own concessions in most of the countries of Central America without State Department aid.

[fol. 2776] By the end of 1928 Dr. Von Bauer had apparently made up his mind that he would not be able to operate into Central America and was more interested in maintaining a monopoly position in Colombia so as to prevent the extension of American air lines south or east of the Canal Zone. The State Department thereupon undertook negotiations with the Colombian Government for American aircraft to have the right to fly into Colombia in exchange for permitting Colombian aircraft to fly into the Canal Zone.

Mr. White recalls that at some time, probably in 1929, he became seriously concerned over the problem as to the attitude which the State Department should take to various American companies which were operating or attempting to operate air transport routes in Central or South America. He had noted the fact that England, France and Germany had each adopted the policy of backing one strong air transport line. He was afraid that if numerous American companies should endeavor to establish air transport lines in Central and South America the foreign companies would play off one American company against the other and that all the American companies would eventually be destroyed. On the other hand, he was well aware of the established policy of the State Department not to assist one American company against another.

After studying the situation he came to the conclusion that the air mail situation was considerably different from

[fol. 2777] that of other businesses. The business of transporting the mails was a government function. All American companies had enjoyed the privilege of competing for the air mail contracts. When, as a result of competitive bidding, these contracts had been awarded to a company that company had become in effect the instrumentality of the Government for carrying the mails. He, therefore, believed that in the case of countries located along an air mail route or a contemplated extension of such route, the State Department might properly permit its representatives to accord assistance to the American air mail contractor even if this should mean intervening in a struggle between the air mail contractor and some other American company. He discussed this matter with Secretary Stimson who concurred in the views which he had expressed.

I recalled to Mr. White's attention that in addition to the general concessions which he had mentioned, the Government had a direct financial interest in the operation of the air mail contractor since the Government received the revenue on the return mail from foreign countries and that if the air mail contractor did not succeed in getting contracts with these foreign countries the revenues of the Government were correspondingly decreased. Mr. White said that he remembered this phase of the matter.

I called Mr. White's attention to the correspondence be-[fol. 2778] tween Mr. Stimson and Mr. Brown which had been placed in evidence on February 20, 1934 in regard to the Guatemalan situation. He said that he had no specific recollection as to Guatemala although he did recall complaints on the part of Pan American to the effect that the American Minister in Guatemala was obstructing their efforts.

I showed Mr. White the question asked by Mr. Black as to a document containing a statement that the State Department would be justified in informing its representatives that giving assistance to the Tri-Motor Company would benefit foreign interests. He said that he had no specific recollection about this matter although he remembered having heard that Nyrba had made various arrangements with

the French in Brazil and that he may have thought that Tri-Motors was working with the French.

I also called Mr. White's attention to Mr. Black's question as to instructions given to the American Embassy in Paris to assist Pan American. Mr. White said that while he had no specific recollection about the precise instructions referred to, he did recall that Pan American had been obliged to apply to the French Government for authority to operate in French Guiana and in the French West Indian Islands and that he may very well have instructed the American Embassy to lend all proper assistance to Pan American in obtaining these operating rights.

[fol. 2779] I asked Mr. White whether he had ever heard of a report by an employe of the State Department made in 1931 containing a statement that the State Department had been used to favor Pan American. He said that he had never seen such a report. He said, however, that the State Department had an employe by the name of Edward Stinson who was in one of the Bureaus of the Latin American Division. Mr. White did not think well of Mr. Stinson. However, Mr. Stokely Morgan who was Mr. Stinson's immediate superior, thought that Mr. Stinson had some abilities and accordingly retained him as an assistant. Mr. Morgan's successor, Mr. Monro, did not think well of Mr. Stinson. At about this time, someone brought Mr. Stinson to the attention of Mr. Joseph Cotton, the Undersecretary of State, and Mr. Stinson was given the job of writing certain reports for the use of Mr. Cotton and Mr. Stimson. Mr. Stimson also had no confidence in Mr. Stinson and shelved his reports. However, Mr. Stinson continued making reports on a great variety of subjects and submitting them to the Secretary. Mr. White thought that this might well have been one of these reports prepared by Mr. Stinson. Mr. White also suspected Mr. Stinson of being in close communication with Mr. Drew Pearson.

A. Garni, Esquire,
New York.

Dear Garni,

SIZE OF EQUIPMENT

NORTHERN DIVISION

I think before this equipment question is definitely closed it would be worth your while to give some further study to the question whether we should have S-43's or S-42's.

1) While the S-43's are undoubtedly large enough at present, it will be a year before they are built and, if we figure on using them five years, that means we are considering a 6-year program. In my opinion the S-43's will be too small before the six years have expired. This however does not necessarily mean we should buy an S-42 now because under the proposed plan where we have to buy only one S-43 we could still buy an S-42 later and probably save during the next two or three years, by having a smaller ship, enough to at least equalize the additional cost of not having bought an S-42 originally.

2) A very important point to be considered is that if we can put all our traffic on one plane which carries mail pay, a large part of our passenger revenue then becomes net profit. If we carry the same traffic running two sections of a smaller plane, one of which is without mail pay, the passenger revenue on the latter plane goes toward making

up operating expenses and leaves nothing in the way of profit. At the present time, for instance, we are running double sections of the Sikorskies and must do so to serve the traffic. The second section has no chance of making any money because even if every seat is filled the total revenue is barely enough to pay operating expenses.

[fol. 2781] 3) I would also suggest that you study further the figures we were looking at the other day which show that an S-42 only about half full will pay expenses leaving the additional space for potential profit, whereas the margin for potential profit on the present S-38's is practically zero and on the S-43's is very much less than on the S-42's. The point I have in mind here is that without mail pay no matter how much traffic were offering we could not make money operating S-38's, for even if they were packed to capacity we could barely pay operating expenses. With the S-43's under like conditions we could make some money, but not very much. With the S-42's, assuming the traffic were available, we could make a very comfortable return on our investment.

The equipment we buy now will probably be in use when the present mail contract expires and we have no way of knowing whether we will be receiving any mail pay then or even if we will receive our present mail contract pay up to the end of the contract. It is very important, therefore, to consider the problem of having equipment large enough to give us a chance of breaking even and earning a profit without mail pay. If we cannot assume that there is enough traffic for a ship large enough to earn revenue sufficient for its operating expenses and a profit, then we must take it for granted that when mail pay ceases we will have to fold up the line. It seems to me that the constructive course must be to assume that with proper promotion work sufficient traffic can be developed. Here again it may nevertheless be the part of conservatism to have the S-43 at the start having in mind prompt replacement with an S-42 as traffic conditions warrant; but, there is no doubt that provided a certain minimum traffic can be secured the S-42 is by far the more economical and more profitable unit.

[fol. 2782] 4) Another point to be considered in connection with the S-42 is that we can undoubtedly have one available quite a long time sooner than an S-43 and we will also be getting a more thoroughly tested ship. The S-43 is a new design and Trippe is quite right when he says that there will be a great many delays in ironing out numerous difficulties which will arise on the tests of this ship. The S-42 has been going through this process for months and is not yet finished. We would escape this delay by taking an S-42.

5) If S-42's were used it would be impractical to provide maintenance for them at Cristobal. Maintenance work would have to be done at Miami. This would mean that Panair's plane from Miami would go through to Guayaquil and that our plane from Guayaquil would likewise go through to Miami. Trippe might object to this but if he did not do so I do not see that there would be any objection on our part. I do not know just how he would fit his schedule together under such an arrangement. It is possible he would have to have three planes going through to Miami and that in that case he would want to run two of his to Guayaquil against our one to Miami. This I would not consider satisfactory although on ratio of mileage it would not be so unreasonable as flying from Cristobal to Miami via Barranquilla we would be flying say 2,200 miles over his line as against something over 1,000 miles between Cristobal and Guayaquil, which on a ratio of mileage would entitle him to fly our line twice to our flying his once.

6) The express movement over our line is growing and the Northern Division is the bottle neck for this as well as for international traffic. The growth of this business will cut down our passenger capacity. Trippe estimates that [fol. 2783] of the fourteen seats that are provided by the S-43 only twelve will be available because of the express requirements. I think that he is right and a point may easily be reached where there will have to be further sacrifice of passenger capacity or revenue of express business. Even twelve seats, however, means something more than doubling our present capacity, and, on the basis of our steamship experience, it is hard to see how this should be

inadequate. I am not sure, however, that the parallel is a correct one. If you will take our present traffic over the line which now goes in two sections and combine it in one section, even after making allowances for extra traffic which the two sections may develop, I think you will reach the conclusion that the S-43 with twelve seats does not really represent doubling our capacity. Moreover we are providing a new method of transportation which has already shown a capacity to develop at a rate in ecess of anything we are accustomed to in connection with steamers and I believe that that growth has only begun. Not only the cumulative effect of our continuance in business but the improvement which will come from return of better financial conditions and development of tourist business, will, I believe, give us some really startling results. Even with our present inadequate equipment we are rejecting traffic and I have no doubt that we are additionally losing traffic which we never hear about because of the known discomfort of these planes. The number of international passengers which we carry will I am sure be greatly increased once we get better equipment in this Division and all of these international passengers north and south will have to go through this bottle neck. Local traffic will also I believe improve with better facilities.

[fol. 2784] In view of all the above it is my feeling that in buying an S-43 we cannot count on its being adequate for more than two or three years and I am not sure but that a close study of the figures would show that it is only very slightly more than adequate even now. If we buy this ship, therefore, I feel that we should do so fully recognizing that it is not likely to be adequate during its useful life and that we will have to replace it in a few years with a larger ship and that we are spending the extra amount which this represents in the interest of conservatism. It is over a year ago now since I went over these figures and reached the conclusion that the S-43 was adequate. We have rather taken this for granted in the discussion ever since seeking to get S-43's but I am not sure that conditions have not sufficiently changed even within the year to warrant a different conclusion at this time. I think before deciding, therefore,

Campbell and Vidal should make a careful canvass of the whole situation in the light of conditions as they are today and that you should then decide the matter in the light of your analysis of their conclusions.

Very truly yours,

/s/ HAROLD ROIG

P.S. Perhaps Trippe would be willing to agree that we might switch from S-43's to S-42's at the end of say three months after the Commodore operation is begun, if we felt that the experience of the Commodores indicated the S-43's to be inadequate. I should think that he could do this without prejudice to his situation and it would certainly be extremely helpful to have this Commodore experience before deciding. Needless to say, the decision to which I refer would be that of W. R. Grace & Co.

I will go into this whole question of size of equipment on the ground with Harris and MacGregor and advise our combined views later.

Pan Grace Charter Agreement "Confidential"

After reading the charter arrangement between Pan American Airways, Inc., and Pan American Grace Airways, Inc., we were very disturbed to find that we are obligated to operate a crew and plane of this division between Cristobal

and Guayaquil, Ecuador, alternate weeks during the term of the aircraft lease. We realize that in making this arrangement the consummation would not appear to be difficult to the New York executives because the Commodore and crew would be in Cristobal at the time the service was to be rendered. It is immediately apparent, however, that this will add approximately 23 to 24 hours to the time of the flight group of this division.

Again, considered as a problem to be solved, this is not difficult, the only trouble being that it is another problem on top of those already facing us. We are at a loss to understand how we will be able to conform with the PAA or Department of Commerce regulations in checking out pilots over this run. As far as we can ascertain at present, only Pilots Clark and LaPorte have flown the Guayaquil route and it would not be feasible to confine their schedules to the Miami-Cristobal-Guayaquil route. Possibly some arrangement can be made with Pan Grace to have one of their men familiar with this route travel as copilot on the Panair planes until our pilots are qualified, but we understand this service is not a matter of the future, being planned to commence immediately the chartered Commodore arrives at Cristobal.

Another point which concerns us is the well known fact that Pan Grace organization does not conform with the Department of Commerce or PAA standards in the matter of weight control. We might mention, for instance, that Department of Commerce Inspector Keeley made a notation the day he departed from Cristobal in the S-38 that by even a rough calculation the plane was overloaded a matter of some 100 pounds. We can foresee friction between Pan Grace Traffic Department and the pilots of this division who will insist correctly in limiting the payloads so that the authorized useful load will not be exceeded.

Minor difficulties, which will undoubtedly be solved, have already arisen between the Pan Grace representative, Major Martin, and the Division Engineer concerning the selection of the Commodore. This is caused in part by the necessity of our providing a Commodore for the Brazilian Division on the Manaos run. The only plane which ap-

peared to be available was the NC659M which was one of the listed planes for selection by Pan Grace. This leaves only two planes, the NC668M and the NC664M, from which [fol. 2786] which the Pan Grace representative is to make a choice. The NC668M is now on the Para service. The NC664M is undergoing partial overhaul, ostensibly for transfer to the Pan Grace System, and with the transfer of the NC659M it will not be practicable for us to maintain our schedules if the Pan Grace representative were to select the NC668M and expect it to be immediately ferried to Cristobal, which means that this transfer must await the completion of repairs to the NC664M, regardless of which plane is selected. Major Martin pointed out that the agreement states that "the aircraft lease will become effective forthwith upon such selection and acceptance and that as soon as practicable thereafter Panair will deliver the aircraft so selected to Pan Grace at Coco Solo airport in Cristobal".

Undoubtedly, Major Martin will advise Pan Grace New York office concerning the delay and we are therefore advising you of the circumstances so that no undue pressure may be placed upon us to make delivery of the aircraft before sufficient equipment is available to protect the schedules of this division.

It is obvious that the resources of the Caribbean Division are being strained to their limit, as we have a ferry to Brazil with a Commodore, no equipment being returned; a ferry to Cristobal with a Commodore, no equipment being returned; and a ferry to UMCA with an S-38, no equipment being returned. These ferry flights naturally affect the immediate efficiency of our flight group and will increase the expense of the Maintenance Department because of the necessity, on account of shortage of equipment, of doing maintenance work at night to insure the necessary reserve for schedules.

They also penalize the income of the Caribbean Division, in that the return of the respective crews to Miami preempts pay passenger reservations, and this is more serious than it appears because we cannot afford to have the men away longer than absolutely necessary, therefore have to make NSPL passes for the return trip. Space

is at a premium over practically the entire division and immediately a passenger is turned down, a barrage of requests is received, emanating from all points, including New York, to make an effort to provide space, which is something that cannot be accomplished without delaying the return of one or more members of our flight group. To this in most cases we have to say 'no', and the refusal does not in any way increase our popularity with the members of the Traffic Department who may not be fully aware of the efforts made to meet the requirements of other parts of the System. We, in turn, realize that it is one of the responsibilities which go with the position of Operations Manager to take the blame for the necessary decision of replacing pay passengers, but naturally even this part of the problem has to be coordinated. Therefore, as far as possible, definite obligations for ferry flights at a fixed date should be avoided so that we can utilize ferry flights to the best advantage of all concerned as we are able to do in the case of the NC659M, realizing that if this plane had to get to Brazil by July 1, it would be to our advantage to send it as soon as possible so that we could be assured of return space for the ferry crew and utilize it to avoid taking the NC822M into the ports of the Leeward and Windward Islands.

We realize that certain obligations have now been made and will have to be met in some manner, but we believed it worth while to outline to you some of the thoughts which arise in our minds concerning these transfers.

CABLE ADDRESS "PANAGRA"

LETTER NO. JDM 2123

SUBJECT: Post Office

Hotel Tivoli
Ancon, Canal Zone
November 28, 1936

Mr. J. D. Mac Gregor,
BUENOS AIRES.

As suggested by you on the phone I proceeded to Balboa on the plane leaving Lima November 23rd. On arrival here I contacted Senator Reynolds of North Carolina, who was leaving the following day by our plane, and also Mr. Chaplin of the Hearst newspapers, who was also leaving the following day on the same trip. I had a very constructive talk with these gentlemen individually, the contact with Mr. Chaplin continuing far into the night (Kelly's Ritz). The following morning I took the early train to Cristobal, arriving in time to meet the Lucia carrying Mr. Harlee Branch, Second Assistant Postmaster General, Mr. Garni, and Mr. Campbell. After greeting these gentlemen I went out to France Field in order to talk with Mr. Sibley, President of the United States Chamber of Commerce, who was a through passenger from Miami, transferring to our plane departing at 9:30. The meeting with Mr. Sibley although short was very pleasant.

Since Mr. Garni had suggested I accompany him on the Lucia to Balboa, I sent Mr. Beatty over on the scheduled plane to introduce Senator Reynolds and Mr. Chaplin to Mr. Sibley since they would be companions on the trip. I then contacted General Brett, Colonel Ballard, Colonel Coleman, Major Kelly, and Major Tailor of France Field. The first two were sailing at noon for the United States, so several rounds of farewells were necessary. I then

picked up Mr. Campbell and we located Mr. Branch and his Secretary, Miss Jean Clark, and took them to lunch at the Strangers' Club after driving them around in Mr. Beatty's car to the various points of interest on the Atlantic side. After lunch I arranged for them to be shown the operation of the locks through the courtesy of Captain Calloway. On the way back from the locks we had a flat tire and were fortunately rescued by the Governor of the Province of Colon, Lignadier, thus making it possible for me to give Mr. Branch an opportunity to discuss local conditions with a high Panamenan official who has been very friendly to us for a long time.

A conference was then held between Campbell, Beatty, Nelowet and myself in connection with the accounting and business problems of the Northern Division office, at which time it was agreed that plan No. 1 of Mr. Vidal's recent personal letter to Nelowet providing for the turning over of a good deal of the accounting work to the Panama Agencies would be carried out as quickly as possible even though it might be later decided that plan No. 2 would be the proper final solution.

That night through the courtesy of Mr. and Mrs. Lyle Prather (Manager of the receiving and forwarding agency of the Panama Railroad), Mr. Campbell, Miss Clark, and I attended a dance at the Strangers' Club, finally returning to the Lucia after having spent a fairly full and profitable day.

On the trip through the Canal on the Lucia the morning of the 26th I was able to discuss several background matters with Mr. Campbell and also again contact Mr. Branch as well as Mrs. Dearing. Mrs. Dearing had not met either Mr. Branch or Mr. Garni so I was able to effect the introductions.

[fol. 2788] Upon arrival at the Tivoli, Mr. Garni went over with me the matters mentioned in your personal letter to me of November 20th and showed me your letter to him of November 18th. He handed me a copy of a memorandum which he had given Mr. Branch on the steamer. I am attaching a copy of this memorandum herewith (Exhibit

A). Unfortunately no map attachments are available, but the memorandum is perfectly understandable without the maps.

Mr. Garni told me that prior to his departure from New York he had cabled Mr. Roig in London the gist of what he was going to discuss with Mr. Branch and had advised Mr. Roig to make his, Mr. Garni's, plan known to Mr. Trippe who was in contact with Mr. Roig in London. He also had Mr. Thach for luncheon on Friday, the day that he sailed from New York; and had told Thach of his plan.

Yesterday afternoon Mr. Garni and I called on the Governor, Mr. Calhoune, and the Governor's Aide for aviation, Lieutenant Smith. Last night Mr. Garni, Campbell, and I went over the final draft of Exhibit B attached herewith and laid plans for a conference which Mr. Branch had decided would be held at 11 o'clock this morning instead of the original date of 3 o'clock yesterday afternoon, the postponement being necessary because of the absence of Mr. Lamiel in Cristobal yesterday. Mr. Garni, Mr. Campbell, and I discussed certain of our Panagra problems, particularly the problem of eliminating all division accounting and centralizing this work in Lima. Mr. Garni's first reaction was that this might not be desirable from the standpoint of possible double taxation on the company through the local taxes in the country where the income originates plus an additional tax in Peru when the income is picked up in the books kept in Peru. I believe that he rather likes the idea unless this or some other major consideration which has not yet come to mind shows the idea not worth while. I also outlined some of our minor irritations in Bolivia and particularly stressed the lack of help which Guzman Tellez is suffering from. I also mentioned the fact that apparently all of the Grace people in Bolivia were not receiving sufficient compensation to prevent them from actively looking for better paid jobs in other organizations.

Mr. Garni advised me that next month he would join the Panagra board. I judged from his conversation that a fourth man will be put on the board in representation of Pan American Airways.

When the meeting with the Post Officials finally did take place, Mr. Garni very thoroughly expressed the necessity of making Cristobal in one day from Miami. Mr. Lamiel pointed out that the Post Office Department now has a contract with the Pan American Airways which definitely provides for airmail carriage to Cristobal by way of Barranquilla and that if that were to be changed to provide for a direct route Miami Cristobal not only would the contract have to be re-drawn but the net cost to the U.S. Post Office would be increased by $73,000 a year because of the additional mileage which would have to be paid from Cristobal to Port of Spain via Barranquilla on account of the Port of Spain Cristobal operation, which is also under contract to Panair. In other words, the distance from Kingston to Cristobal direct is 127 miles further than the distance from Kingston to Barranquilla, and the U. S. Government secures an effective operation under the present set-up from Cristobal to Port of Spain via Barranquilla by [fol. 2780] paying only the additional mileage Barranquilla Port of Spain, since that service connects in both directions with the main U. S. mail line Miami Kingston Barranquilla Cristobal.

Mr. Lamiel offered as an alternate plan that Panair would be required to operate in one day Miami Cristobal via Barranquilla, the section Barranquilla Cristobal to be operated at night with a night landing in Cristobal south bound and night take-off in Cristobal north bound but early morning landings in Barranquilla north bound. Mr. Garni objected to this on two grounds, first, that Panair have shown on the thirty-nine trips since the schedule was speeded up on July 15th they have been so late into the Canal thirteen times that we had to postpone our departure to the following day and that if they could not make it Miami Barranquilla in one day it seemed reasonable that they could much less do Miami Barranquilla Cristobal in one day. And secondly he pointed out that passengers would have to get up very early in the morning north bound at Cristobal in order to reach Miami the same day.

A long discussion then ensued upon Mr. Garni's advocating a third complete service to Buenos Aires via the West Coast but from Arequipa to Buenos Aires via La

Paz and Cordova. Mr. Branch stated that the budget hearings had already been completed and that the only way this matter could be re-opened would be on an emergency basis and that he would not feel justified in advocating a third service down the West Coast at this time.

Mr. Garni then launched into an exposition of his alternate suggestion that the beginning of a third service be instituted by means of a service from Cordova to Arequipa via La Paz. Mr. Branch suggested that this be operated in a different way—that is, by only running one trip per week through from Arequipa to Santiago and the other from Arequipa to Buenos Aires via La Paz. Mr. Garni stated that this was out of the question in view of the importance of the American concerns and investments in Chile. In the general dicussion that followed between the five of us in the conference—that is, Mr. Branch, Mr. Lamiel, Mr. Webber of the Post Office, Mr. Garni, and me—the following interesting and important facts were brought out:

1. The Post Office officials agreed that if we did not ask for more mileage between Cristobal and Guayaquil we could run that line by the way of Cali, Popayan, or Buenaventura, Tumaco, or any other way, with their blessing.

2. Mr. Lamiel had been given to understand that the Scadta was not permitted to operate into the Canal Zone, hence it was necessary for us to deliver airmail for Bogota to Scadta at Barranquilla. I exploded this theory by pointing out that Scadta operated into the Canal Zone for many months. I also mentioned that Umca could give direct connection to the Canal Zone from Bogota and Medellin.

3. On the East Coast Panair promised to cut the operation from Miami to Port of Spain to a total elapsed time of eighteen hours.

4. Panair now receive mail pay on their second trip from Miami to Para. Mr. Branch has agreed that after July 1, 1937 he will pay them all the way to Rio on this second trip [fol. 2790] provided that within six months Panair will have instituted the cut of operation between Para and Rio, but if they do not institute this service and do not put in

the eighteen hour schedule between Miami and Port of Spain and one day schedule between Port of Spain and Para he will withdraw the mail pay on the second trip (presumably from Para south). He states that if he withdraws this mail pay he will then have funds with which to pay us for the Arequipa/La Paz/Cordova operation.

5. The budget as submitted provides a portion of the money required for the full Atlantic operation, also money for the Alaskan operation and also money for two round trips Miami/Buenos Aires on the East coast plus the operation from the west coast to La Paz. Nineteen thousand dollars is mentioned for this last item.

6. Mr. Garni stated if the Arequipa/La Paz/Cordova service were authorized and subsidized we would be willing to give up the subsidy on the Buenos Aires Montevideo service.

The net result of the discussion was that Mr. Garni did not leave the "Exhibit B" memorandum with Mr. Branch as planned at first since Mr. Branch stated that in order to bring this matter to a head in view of the important points that we made—that is, that we were with our present operation through Chile likely to be held up by the Chilean Government each time when our operating permit expired and that if we did not act immediately we would lose the opportunity to be first in operation on the La Paz/Cordova run in favor of either the French or the Germans—he would, on receipt of a memorandum from Mr. Garni outlining the reasons for what would otherwise be considered an international extension in which the U.S. Government had no interest, see whether he could justify an emergency appeal to the budget Director for the inclusion of a minimum possible sum which we would accept for the implantation of this start toward a third complete service.

Mr. Garni told Mr. Branch that he would prepare such a memorandum promptly upon his arrival in New York and hoped to get it to Mr. Branch by airmail late next week. Meanwhile Mr. Branch is cabling his office to pave the way for a possible emergency request in the near future in view of the seriousness of the Bolivian situation.

Mr. Nelowet had a seat on the plane for Miami today but he gave it up for Mr. Garni, who left Balboa for Cristobal on our regular scheduled flight about 1:35, after instructing Mr. Campbell and me to draw up a preliminary basic study upon which an official memorandum could be prepared to be submitted to Mr. Branch. Mr. Campbell is now engaged in working this matter out, and I hope to have some further information for you on this same mail.

After Mr. Garni left, Mr. Branch called in Mr. Balluder, who arrived today from Mexico, and Mr. Silliman, who arrived two days ago, and we went over in detail with the Post Office officials a number of points which the various Governments had submitted to the consideration of the forthcoming Postal Conference in order to secure the operating companies' reaction to the questionable points. It would appear from the points raised that none of them are likely to be incorporated in the final convention agreement, since most of them are likely to be opposed by one or more countries in addition to the United States.

[fol. 2791] The only matter which seems to be fairly universally desired by other Postal Administrations and which may cause trouble, as far as our discussions went, is the question of one kilo of mail free on each schedule for each country. Both Balluder and Silliman objected most strenuously to this in the name of Panair, and the U. S. Postal authorities feel that it is impossible for them to accede to this idea either.

One point which Balluder brought up independently was discussed at considerable length. This was the question of parcel post at air express rates. Mr. Branch stated that he did not care to discuss this and a number of other points at this time in much detail since the Department itself had not yet established a definite policy, but they were giving study to the matter. As far as the U. S. is concerned the question boils down to the matter of whether they will exercise their right to 800 pounds in each one of our planes and fill this additional space with parcel post. The lines along which they are thinking just now would be to provide a parcel post service for packages weighing perhaps between six ounces and a pound. Mr. Branch is thoroughly

familiar with the additional income which we now are securing through our air express service and is of an open mind as to whether or not we should be permitted to continue to indefinitely postpone the parcel post plane service in order to allow us to secure this additional pay load for our own account. My impression from Mr. Branch's statement was that the parcel post inclusion in our 800 pounds of mail from the U.S. is still a long time off.

(Sgd) H. R. HARRIS

[fol. 2792]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 177

Confidential Memorandum re:

AIRMAIL SERVICE U.S.A. TO BUENOS AIRES VIA WEST COAST OF SOUTH AMERICA

PAN AMERICAN-GRACE AIRWAYS:

Increase in Traffic and Airmail Revenue:

The chairman of the Imperial Airways, when commenting on the increase in traffic and airmail revenue, at a meeting of shareholders held November 10, 1936, said:

> "The majority of that increase was due to the rapid growth in Empire airmail which had risen 78% in the year, due in part to the doubling of the frequency of service and in part to the substantial reduction in airmail rates by the General Post Office."

I quote this interesting statement, coming from a high authority in aviation development, because it has a direct bearing on the problems with which the U.S. airmail line to Buenos Aires via the West Coast is confronted.

The operating frequency over this service is no longer sufficient nor are the airmail rates low enough to attract the amount of air mail which would result from a more moderate rate.

There are at present only two airmail services per week to Buenos Aires via the West Coast, one on Monday and the

other on Friday from the U.S.A. The interval between these two services is sufficiently great, as to make it still necessary to resort to a great deal of cabling on matters that could in many instances be treated by airmail, were there another connection between Monday and Friday, or say Wednesday, and if the schedule recently improved from 7 days to 4½ days (U.S.A. to B.A.) could be further improved to 3½ days, which would be possible soon after a permanent 1-day schedule from the U.S.A. to Panama is established, such improvement in time, coupled with increased frequency and a reasonable downward revision in airmail rates would, we feel satisfied, have a very salutary effect on the quantity of airmail carried, as is evidenced by the experience of the Imperial Airways.

Geographically, Buenos Aires is over 1,200 miles nearer to the U.S.A. via the West Coast than via the East—or 1,866 miles nearer from Miami, via the islands and via Bolivia. This feature, which cannot be changed, together with better than average flying conditions prevailing almost throughout the year, lends itself admirable for the establishment of an airmail service from the U.S.A. to B.A. via the West Coast that will in time not only be equal to the 72 hour service from Europe to B.A. but will actually be shorter, as with cooperation and a certain capital expenditure to provide facilities for night flying between Panama and Lima there is no reason why the U.S. airmail connection to B.A. should be more than 2 days and 5½ hours.

The West Coast airmail service has now been in existence for some 7½ years and while considerable progress has been made, we believe that the time has arrived to duplicate this progress.

The service via the West Coast, however, is confronted with other problems, which must be met promptly if the future of this service is not to be exposed to a serious menace resulting from territorial invasion by foreign coin- [fol. 2793] panies. The heavily subsidized European lines, particularly the Germans, who already have extended their airmail and passenger services, to Santiago (Chile) and are already running a line from Sao Paulo to Cochabamba (Bolivia), have their eye on Bolivia and up the West Coast of South America.

Simultaneously the Chilean National Line (LAN), the Bolivian National Line (LAB) and the Peruvian Line (Faucett) have already consummated an agreement under which they plan to preempt Bolivia, joining their respective facilities to establish what for the present might be called a "local international airmail service."

The menace resulting from this combination must have a prompt answer if the American airmail line is to be developed as it should be so as to keep its premier position equalled by none as regards frequency, time and efficiency.

The seriousness of this situation is accentuated by the fact that the Bolivian Government, which is very jealous of its neighboring republics on the West Coast, all of whom enjoy a twice-weekly U.S. airmail service, is determined to have a similar *international* service. We have received a number of communications during the last few weeks, all of which read about like this:

"The situation in Bolivia is extremely delicate."

"The Germans are pushing vigorously their plans for penetration in South America."

"The President of Bolivia is extremely anxious to have an international airmail service run through his country to Buenos Aires."

"If we do not fall in with his views, we may find him offering the German Company attractive terms (operating rights) to run the European service from B. A. through Bolivia to Peru and Ecuador."

These remarks represent excerpts from a letter received in September from the General Manager of Panagra, who is at present in South America, but a more recent letter dated November 9, from W. R. Grace & Company's General Manager in Bolivia, indicates that the Bolivian Government is determined to get an international airmail service, and in fact the Bolivian Government has appointed a special commission to study the whole question and to report to the President.

COLOMBIA:

The President of Colombia has, on November 16th, sent us a message inquiring as to the feasibility of changing the present route of F.A.M. 9 in western Colombia so that it would touch at Cali and some other point or points in western Colombia instead of merely skirting the coast and touching Buenaventura and Tumaco as at present. From the point of view of Pan American Grace Airways and also the United States Post Office, this is a very interesting possibility, since Buenaventura and Tumaco are merely transit points for more important interior centers and have no connection with the interior by air, whereas a stop at Cali would directly tap an important source of mail and passenger movement.

Subject to more complete surveys, it would appear that the logical route to follow in order to touch at Cali would be an almost direct route from Cristobal to Cali with a [fol. 2794] probable refueling stop at Bahía Sólano. From Cali the route would proceed south along the Cauca and Patia river valleys, swerving slightly to the west in order to avoid the very high country in southern Colombia and northern Ecuador, and then proceed south over relatively low country in Ecuador between the coast and the high mountains. Stops would probably be made at Popayán or some point in the province of Xarica, or both. The proposed route between Cristobal and Guayaquil is shown on the attached map.

To do what President López apparently desires, would, according to a preliminary calculation, add only some 85 to 90 miles to the water route now followed, but once the overland route can be followed all the way to Guayaquil instead of skirting the Coast from Tumaco south, the mileage would again be about the same as now.

Therefore, to meet all these problems, viz.:

1. Increased frequency
2. Reduced time
3. Preemption of Bolivia

4. Serving of very populated district in western Colombia.

5. To definitely and effectively establish a 1-day service from the U.S.A. to Panama.

thereby protecting generally the position of airmail routes FAM 5 and FAM 9 of Pan American Airways and Pan American Grace Airways, we suggest that the United States Post Office give serious consideration to the desirability of increasing the through airmail service by FAM routes 5 and 9 to a frequency of 3 times per week.

It is suggested that this third service between Miami and Cristobal be operated by a shorter and more direct route than at present this route to pass through Havana, Grand Cayman Island and Old Providence Island. Preliminary studies indicate that these islands are suitably spaced and offer favorable conditions for use as refueling stops. The total distance between Miami and Cristobal by this route is 1,178 miles and it would be easily possible for this distance to be covered in one day.

For reasons above indicated, it is further suggested that this third service run from Panama to Cali via Bahía Solano and then to Popayan, Tumaco, Guayaquil, etc.

In order to meet the Bolivian situation it is proposed to run this third trip from Arequipa direct to La Paz, then tap the very important tin mining centers (Patino and others) by continuing the route to Oruro and Uyuni, then towards the important Argentine cities—Salta, Tucuman, Córdoba, through to Buenos Aires.

We further submit for your consideration the deviation of the existing two services from their present route between Mendoza and Buenos Aires to take in the important Argentine city of Córdoba. This deviation which we consider so essential would add only about 80 miles per trip to the existing service.

A schedule and maps are attached hereto, showing the proposed operation of these services on the basis of 3½ days elapsed time between the United States and Buenos Aires.

[fol. 2795]

PROPOSED F.A.M. 9 SCHEDULE SHOWING ONE DAY SERVICE TO CRISTOBAL, DEVIATION VIA CALI (COLOMBIA) AND CORDOBA (ARGENTINE), AND THIRD SERVICE VIA BOLIVIA

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 178

EXTENSION OF F.A.M. 9 THROUGH BOLIVIA TO THE ARGENTINE

The activities of the European subsidized airlines, particularly the German line, which has been extending its airmail and passenger services into Chile from Argentine and into Bolivia from Brazil with the obvious intention of pushing them further up the West Coast, make it essential that immediate steps be taken not only to protect the competitive position of Panagra but also to increase the efficiency of the United States airmail service as an aid to American trade and interests in these countries and in the Argentine.

Obviously the most practical step would be to increase to three times a week the frequency of the United States airmail service from the United States to Buenos Aires via Cristobal and the West Coast of South America (F.A.M. routes 5 and 9) and to operate the Miami/Cristobal section of these services by a more direct route which could be covered in one day, as a result of which it would be possible to shorten the F.A.M. schedule by one day and carry mail and passengers from the United States to Buenos Aires in $3\frac{1}{2}$ days with increased frequency, thus maintaining the supremacy in speed and frequency which the U. S. airmail services have hitherto held.

If authority to increase the frequency on this route cannot be obtained immediately, for budgetary or other reasons, the following is proposed as an alternative intermediate step which is essential to protect Panagra's position on the West Coast and to increase its influence and efficiency as a carrier of United States mail in Bolivia and Argentine:

I. Establish immediately a 1-day service from the United States to Cristobal, which would thus make possible a $3\frac{1}{2}$ day service from the United States to Buenos Aires.

II. Operate the existing twice-weekly service as at present but deviating the route between Mendoza and Buenos Aires to include the important Argentine city of Cordoba.

III. Operate an additional United States mail service from Arequipa, Peru, to Cordoba via La Paz, the capital of Bolivia; Oruro and Uyuni, important Bolivian tin mining centers; and the Argentine cities of Salta and Tucuman. This service would connect with the existing service at Arequipa and Cordova.

The attached schedule the shows proposed operation of these services after all of the above improvements to the existing services shall have been placed in effect. Pending the establishment of one-day service from the United States to Cristobal, a provisional schedule between Arequipa and Cordoba, tying in with the existing F.A.M. 9 schedules, would be operated.

PRESENT SERVICE UNITED STATES (MIAMI) TO BUENOS AIRES, IN 6 DAYS VIA EAST COAST OF SOUTH AMERICA (F.A.M. 10)

Miles	7,412
Miles per year	739,679
COST TO U.S. POST OFFICE AT $1.80 PWR MILE	$1,331,422
COST TO U.S. POST OFFICE AT $2.00 PER MILE	$1,479,358

[fol. 2739]

PROPOSED EXTENSION OF F. A. M. 9 THROUGH CALI (COLOMBIA) AND BOLIVIA TO THE ARGENTINE

PROPOSED SERVICES:

Route	Miles	Miles Per Year	Cost	Total
One Trip Cristobal/Montevideo via present route but deviating through Cali (Colombia) and Cordoba (Argentina)	4,536.1	471,754	$1.50	$ 707,632
One Trip Cristobal Buenos Aires via present route but with above deviations	4,403.6	457,974	1.50	686,956
*One Trip Arequipa to Cordoba via La Paz Oruro, Uyuni, Salta, and Tucuman	1,385.0	144,040	1.50	216,060
TOTAL COST TO U. S. POST OFFICE				$1,610,648

PRESENT SERVICES:

Route				
One Trip Cristobal/Montevideo via Santiago and Buenos Aires	4,461.6	464,006	$1.50	$ 696,009
One Trip Cristobal/Buenos Aires via Santiago	4,329.0	450,216	1.50	675,324
TOTAL COST TO U. S. POST OFFICE				$1,371,333.
ADDITIONAL COST OF PROPOSED ADDITIONAL SERVICE				$ 239,315

* This service would continue through to Buenos Aires by making exact connection at Cordoba with one of the two Cristobal Buenos Aires schedules.

[fol. 2800]

UNITED STATES TO BUENOS AIRES

Annual cost of suggested third service *in 3½ days* U. S. A. (Miami) to Buenos Aires via island route*, Cristobal, West Coast of South America, and Bolivia	$ 855,134.0
Annual cost of present *6-day* service U. S. A. (Miami) to Buenos Aires via East Coast of South America	$1,331,422.
Annual saving to U. S. Government, based on East Coast cost of $1.80 per mile (one round trip per week)	$ 476,288.
Annual saving to U. S. Government, based on East Coast cost of $2.00 per mile (one round trip per week)	$ 624,224.

* Or by direct flights Miami-Kingston and Kingston Cristobal, which would increase the distance only 30 miles and the annual cost only $5,710.

[fol. 2801]

SUGGESTED THIRD SERVICE UNITED STATES (MIAMI) TO BUENOS AIRES IN 3½ DAYS VIA CRISTOBAL AND WEST COAST OF SOUTH AMERICA (F.A.M. 9)

	Miles	Miles Per year	Per Mile	Cost
Miami/Cristobal via Havana, Grand Cayman Island and Old Providence Island	1,178	122,512	$1.80*	$220,526
Cristobal/Buenos Aires via Cali, Popayan, Guayaquil, Lima, Arequipa, La Paz, Oruro, Uyuni, Salta, Tucuman and Cordoba	4,068	423,072	1.50	634,608
COST TO U. S. POST OFFICE		545,584 Miles		$855,134

* This mileage rate to apply until twin-engine aircraft are replaced by four-engine aircraft.

[fol. 2802]

PRESENT SERVICE UNITED STATES (MIAMI) TO BUENOS AIRES IN 6 DAYS VIA EAST COAST OF SOUTH AMERICA (F.A.M. 10)

Miles	7,112
Miles per year	739,679
COST TO U. S. POST OFFICE AT $1.80 PER MILE	$1,331,422
COST TO U. S. POST OFFICE AT $2.00 PER MILE	$1,479,358

[fol. 2803]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 179

Copy for Mr. A. Garni

Hotel Tivoli
Ancon, C. Z.
December 7, 1936

Mr. J. D. Mac Gregor,
BUENOS AIRES.

Mr. Branch expressed a desire on December 4th to observe the physical transfer of airmail from Panagra to Panair at Cristobal. Consequently he and Mr. Michaelson, Balluder and I took our plane from Balboa on regular schedule December 5th to Cristobal. At Cristobal we were joined by Mr. Campbell and Mr. Taylor, the Cristobal Postmaster. Mr. Branch apparently had no criticism of the physical exchange but asked a number of questions about the safety of the mail for Central America which is stored overnight in the vault in the Panair passenger station at France field.

We remained in Cristobal overnight in order to take advantage of a trip which I had arranged with Major Taylor, acting Commanding Officer of France Field, to take Mr. Branch and Mr. Michaelson on a fishing trip December 6th. This fishing trip carried, in addition to Major Taylor, Captain N. B. Harding, Mr. Branch, Mr. Michaelson, Mr. Flexer, American Chargé d'affairs in Panama, Mr. Balluder, Campbell, and me, and proved to be most satisfactory to all on the trip even though *no fish were caught*. The United States Army Air Corps crash boat was used. The trip was made from France Field through the breakwater to the mouth of the Chagres river, where we disembarked and visited Fort San Lorenzo on foot. This is a most interesting ruin of the Spanish time, captured and sacked by Morgan's men in 1671.

The fishing trip was resumed up the Chagres as far as the launch could go, when we disembarked and walked to the Gatun locks, from where we returned to France Field by automobile and from France Field to Albrook Field in a special Panair Ford through the courtesy of Mr. Balluder.

During the launch trip Mr. Branch took the opportunity to speak to Mr. Balluder, Mr. Campbell, and me about the negotiations he had been having with Pan American Airways in regard to the additional services on the East coast of South America. He stated that a final agreement had been reached in writing whereby Pan American Airways would receive payment for a second service from Miami to Pará until such time as Mr. Branch could secure additional funds with which to pay for a second trip on the East coast all the way down. This payment for the second trip was also predicated on the establishment by Pan American Airways of a *one day service from* Miami to the Canal Zone, and Mr. Branch made this the key note of his conversation with us, also that Panair would operate a second trip through Brazil on a cut-off, thus eliminating what Mr. Branch called "the Brazilian elbow." Mr. Branch led us to believe in his conversation that if these two promises by Panair—that is, Miami/Canal in one day and operation of the Brazilian cut-off—were not forthcoming in six months after the payment on the East coast second [fol. 2804] trip South of Pará was commenced he would consider that Pan American Airways had violated their agreement, with presumably the consequent cancelation of the mail pay on the second trip. Mr. Branch intimated that he felt that so far Pan American Airways had not shown entire good faith in connection with their operation between Miami and the Canal. As far as he could see they were not taking any steps toward the implantation of a direct service Miami to the Canal in one day. Mr. Branch stated he had told Mr. Trippe that improvement on the East coast—by which I presume he meant airmail payment for a second trip—was only justified if the West coast service to Buenos Aires was speeded up by means of a one day connection between Miami and the Canal, and that this matter was in his mind of vital importance.

You will note that this above conversation confirms what Mr. Branch told Mr. Garni and me in our postal conference as reported in my letter to you of November 28th (JDM 2123).

/s/ H. R. H.

[fol. 2805]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 180

[Handwritten notation—Argentina Airports Moron]

PAN AMERICAN AIRWAYS SYSTEM

MEMORANDUM

DATE June 3rd, 1937.

TO Vice-President Young

DEPT. Executive

LOCATION New York

FROM Regional Director

DEPT. Pan American Airways Inc.

LOCATION Rio de Janeiro

SUBJECT BUENOS AIRES—RADIO CONTROL FOR NEW INTERNATIONAL OVERLAND OPERATION.

In connection with the handling and protection of our contemplated overland operation on the new international route Rio-Asunción-Buenos Aires, it will undoubtedly be advisable for us to make some arrangement with Pan American-Grace Airways for the use of their facilities at Morón airport at Buenos Aires, at least pending the final resolution of the Buenos Aires municipal airport situation. Inasmuch as such an arrangement would undoubtedly be covered by an agreement between the respective managements of Pan American-Grace Airways and our own, in New York, I shall defer any action in this direction pending receipt of your instructions.

Insofar as the use of Morón airport is concerned, we have little or no choice for the time being, unless we were to consider extensive construction and airport improvement work at another site which could at best only be temporary. I certainly cannot recommend that we make any airport installation whatever at Buenos Aires, beyond the absolute

minimum necessities, until such time as the local airport situation may show signs of being definitely resolved and a specific program under way. In view of the foregoing and considering the desirability of providing maximum flight control, radio directional, communications and ground, as well as efficient passenger, mail and cargo dispatch facilities, on a temporary basis and with the minimum of outlay, an arrangement for the use of Pan Grace's facilities is indicated.

Pan American World Airways, Inc. Exhibit 181

(Letterhead of Pan American Airways, Inc.,
New York City, N. Y.)

ESCRIPTORIO CENTRAL NO BRASIL
RIO DE JANEIRO

June 16th, 1937.

Mr. Evan E. Young, Vice-President,
Pan American Airways Inc.,
Chrysler Building,
NEW YORK CITY.

CONFIDENTIAL.

Dear Mr. Young,

For your information I am quoting herewith an excerpt from a copy of letter signed by Mr. J. E. Muhlfeld, General Traffic Manager of Pan America-Grace Airways, ad-

dressed to Grace & Co., Santiago, which was recently received by our Buenos Aires office:

"*Re. Traffic Correspondence, Buenos Aires.*

After discussing the subject of traffic correspondence in the Argentine with Mr. Vidal and Mr. Harris, it has been decided that in the future Santiago Office will refrain from corresponding directly with Mendoza, Cordoba, Salta and Tucuman and will write to Buenos Aires directly on all traffic matters pertaining to the Argentine.

Buenos Aires Office will in turn supervise the traffic work throughout the Argentine, reporting directly to you".

This specific confirmation of the fact that the representation activities of our Argentine Company, in Panagra's behalf, are not solely confined to Buenos Aires and immediate vicinity but that they do, in fact, extend to all of Argentina, may be of some assistance to you in connection with the current discussions which I understand are taking place with Grace & Co. in New York. Irrespective of the fact that Panagra assumes two thirds of the operating costs of the Argentine Company there is hardly any question but that they are getting "value received" and that it would cost them greatly in excess of their present outlay were they to set up their own organization to handle their business exclusively.

With kind regards.

Sincerely,

s. M. J. Rice
M. J. Rice,
Regional Director.

MJR:OF.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 182

(Letterhead of Pan American Airways, Inc.,
New York City, N. Y.)

ESCRIPTORIO CENTRAL NO BRASIL
RIO DE JANEIRO

June 17th, 1937.

Mr. Evan E. Young, Vice-President,
Pan American Airways Inc.,
Chrysler Building,
NEW YORK CITY.

CONFIDENTIAL.

Dear Mr. Young,

Supplementing my confidential letter to you of May 22nd, I now wish to take this opportunity to go into more ample detail as regards the detrimental effect which, in my opinion, the formation of a new Argentine Company by Pan-Grace would have, particularly in consideration of the general civil aviation situation in Argentina, as well as the competitive and commercial aspects.

As I mentioned briefly in my previous letter, from the political viewpoint the vital interests of both Pan-Grace and our own company are greatly benefited due to our ability to present a strong, integrally unified and coordinated front on all major issues through the intermediary of a single local company which derives greater power and commands infintely more respect from Argentinian officialdom due to the fact that this single representative Company is the spokesman for a powerful combination of far flung interest which take in *all* of the countries of South America rather than being confined to any one sector. While without careful analysis this premise may seem dogmatic, I can assure you that to either Mr. Harris or myself or to any of our local people who are handling the day today contacts in Argentina, it is a point of major importance. The various government departments in Argentina, for-

most among them of course in our instance being the Department of Civil Aeronautics, are constantly beleaguering us with the usual variety of "oficios", requests for detailed reports on certain phases of our operations, questionnaires, etc. The present ability of our Argentine Company to handle all such matters in a very general manner and to avoid delving into a wealth of what might often be embarrassing detail is frequently dependant upon sole joint representation. The moment that we have separate companies both Pan-Grace and ourselves must inevitably find ourselves confronted with a wide open situation whereby we are both vulnerable to being played one against the other, regardless of whatever cooperative efforts we may attempt, by the Government.

A very good case in point is the situation with which Pan-Grace and ourselves found ourselves confronted two years ago, when the income tax authorities charged both companies with grave irregularities in connection with our avowed failure to properly report our financial picture in Argentina since the initial period of our operations i.e. since the beginning of Pan-Grace's operation to Argentina [fol. 2808] as well as in our cases from the initial period of our East Coast operation, and *not* since the formation of the local company and its appointment as joint representative for both the parent corporations. I need not go into this involved situation because it is a matter of record and well known to both Messrs. Vidal and Johnston upon whom the principal headaches devolved at the time. The fact remains however, that by virtue of the fact that our two companies were able to arrange a series of conferences between our local company and a single official of the income tax department and thus bring about a harmonious settlement which satisfactorily solved the *specific* difficulties of each of the two companies, made it possible for Pan-Grace and ourselves to clean up what might have been a nasty situation accompanied by sizeable fines and serious embarrassment. It will be recalled that, at the time, the income tax authorities endeavored to split their treatment of Pan-Grace's situation from ours and that we were both equally anxious to procure joint and simultaneous treat

ment of the situation as a whole, through the Argentine Company in the capacity of general representative, due to the quite obvious advantage to be derived on our parts.

Another typical instance is the recent question of the new Air Transport regulations which the Department of Civil Aeronautics attempted to put through as a forerunner of their proposed bid competition for the contemplated Argentine interior lines set-up. These regulations were so patently restrictive and overwhelmingly indicative of practically complete Government control, that, had the Department of Civil Aeronautics been successful in "railroading" them through, it would have been practically ruinous for either Pan-Grace or ourselves to attempt to continue our operations in the Argentine. Naturally it was of utmost importance to our collateral interests to do everything possible to procure amendment or withdrawal of the said regulations but, on the other hand, it is self evident that neither Pan-Grace or ourselves could have risked jeopardizing our local interests had we each been represented by a separate local company. As it actually worked out, we were able, practically single handed (for the opposition manifested by Condor and Air France was indeed weak, due to the very fact that each of them feared to say very much due to the risk of incurring extreme displeasure and consequent material prejudice on the part of local authorities) to bring about the withdrawal of these regulations—at least for the time being. In such situations our Argentine Company derives major backing from the fact that it represents every conceivable type of aeronautical operation—land plane as well as large flying-boat—operating in every country in South and Central America with a strong background of experience with the legislation and regulations of the various countries. You will notice that I specifically mention South America rather than to extend this scope to the more distant countries which the System serves. This is for the reason that the Argentine political situation accords major importance to their own "sphere of interest" referring more particularly to the adjacent countries of Brazil, Chile, Paraguay and Uruguay.

The recent case of the La Cumbre radio station wherein Pan-Grace refused to accept the services of the official Government radio station and instead constructed their station on the Chilean side of the Andes, is still another outstanding example. The Government and especially the Depart- [fol. 2809] ment of Civil Aeronautics has been extremely piqued by this action and there is little doubt but that had they been able to lay their hands on a single independent local company that represented Pan-Grace, their retaliation would have been severe. As it is, the fact remains that the Department of Civil Aeronautics is attempting to retaliate in some measure by withholding our operating rights for the Asunción international extension and we are thus suffering to some degree as a direct result of the La Cumbre incident. The fact remains that, in such cases in general, Pan-Grace and ourselves are both able to bear the lesser imprint of such limited retaliative measures than would be the case if either of us had to bear the full brunt through individual local companies.

The duplication of representation efforts in the case of two separate and independant local companies would be tremendous. As you know, Argentina is long on involved routine and it is indeed a boon to the operating organizations of Pan-Grace and ourselves to be able to handle this routine through a joint local company with the standard preface "The Cia. de Aviación Pan American Argentina acting in behalf of Pan American Grace Airways Inc. and Pan American Airways Inc. . . . . " rather than through the medium of separate treatment on the part of each company. In this connection, also to be considered is the fact that the rather extensive expense items incidental to stamp taxes, dispatch fees, etc., will be exactly doubled if separate handling is necessary as would be the case with separate local companies.

I hardly need go into the financial side of this picture for either Comptroller Johnston or Comptroller Vidal can readily provide some actual figures to show that it would cost Pan-Grace at least double the present amount. I must admit that in our own case, if we did not have the Pan Grace representation to consider in Argentina, we could

cut down the expenses of our Buenos Aires Office very considerably for, quite visibly, the major portion of our expense there is necessitated by the high frequency of Pan-Grace services and the extensive amount of attention which same require incidental to solicitation and physical handling facilities. The financial advantage which we might derive however from separate handling of our interests by independent local companies is greatly overwhelmed by and secondary to the more important political and competitive situations.

I need not mention that with separate companies neither company can keep up as elaborate and effective an organization to cope with the labyrinth of red tape and formality surrounding clearance, licensing of pilots, mechanics, etc., inspection of planes upon arrival and departure by Civil Aeronautics Department representatives, etc.

Considering the fact that both Pan-Grace and ourselves are today confronted with a rapidly augmenting pressure of foreign competition, we would simply be playing into the hands of Condor and Air France were we to weaken ourselves in Argentina by setting up separate representation. Naturally in both theory and practice the separate representative companies would cooperate very closely but it would be indeed naive not to appreciate that, even with the closest possible coordination, there is bound to be a certain loss of efficiency insofar as joint action is concerned. Our individual organizations naturally have different ideas with [fol. 2810] respect to many phases of our interests and whereas with a single representative these differences are to a great extent absorbed, it would be only natural that a noticeable loss of traction would exist while two separate representatives on the spot, tried to agree among themselves on what to do—while at the same time our competitors would be gaining ground. I am not being supercilious when I suggest that due consideration be given to the fact that the Germans and the French are rarely able to agree upon anything except joint action when faced with a common enemy. Unfortunately our competition in Argentina is principally German and French.

At the present time we require the full strength and unity of a joint Argentine company as we never have before in the past. It is the fond dream, of long standing, of the present Director of Civil Aeronautics, to see a 100% Argentine air transport concern operate all of the interior services within Argentina and, in addition, extend to all of the adjacent countries. In accordance with his theory the rights of all foreign operators would then be cancelled and they would be forced to transfer their passengers, mail and cargo to the Argentine national transport system at the nearest point to the Argentine border. This is of course, at least for the present, a Utopian conception but one which can create many obstacles in the path of our collective interests if not properly handled. It is my impression that any change in our present organization in Argentina could only serve to diffuse the strength of our efforts.

Kind personal regards,

Sincerely,

s/ M. J. Rice
M. J. Rice,
Regional Director.

Pan American World Airways, Inc. Exhibit 183 —

Panama Agencies Co.
Cristobal, C. Z.

ORIGINAL AIR MAIL LETTER

Copy Follows by Steamer

CRISTOBAL
August 7, 1937

Mr. J. D. MacGregor,
NEW YORK

Following survey of our position with regard to the promises made to the U. S. Post Office Department about getting

up our schedules, and taking into consideration the fact that we now have only one S-43, the only way we can meet our U. S. Post Office commitments to operate in 2½ days between Buenos Aires and the Canal Zone, in both directions, will be to change the operating days. One very simple method of accomplishing this would be to follow out my original recommendation that we operate Sunday and Wednesday southbound out of the Canal and arrive in the Canal on Monday and Thursday northbound. understand that Panair didn't like this, probably on account of their own equipment problem; however, under their present method of operating they are required to have two S-42's on the Cristobal/Miami operation, and this plan of mine would not require more than that number. Please take this up with Panair officially in order that we can be in a position to resume the 2½ day operation, in both directions, over our line in the near future, in order to avoid difficulties with the U. S. Post Office. In my opinion, Panair have to accept this plan anyway, because, under our present arrangement with only one S-43, they will be unable to operate any further north of the Canal than Barranquilla on Mondays and Thursdays, and, presumably, they will not do this, but will actually operate Cristobal/Miami on Tuesdays and Fridays.

We must, of course, not lose sight of the basic situation with which we are now faced; that is, our whole F.A.M. operation is completely dependent upon the ability of our one S-43 to carry on the whole load of our operation between Cristobal and Guayaquil. As you know, Panair have not had any S-43's in the Canal Zone since July 14th, and do not plan to have this type of plane in the Canal in the future. Certain possibilities exist if our S-43 breaks down, and I will enumerate them here:

[fol. 2812] In the first place, presumably we can charter Panair's S-42 to operate from Cristobal to Guayaquil. This immediately means we have to give up the Cali operation, reverting to Buenaventura and water landings in Guayaquil. Presumably the Bahía Solano flag stop would have to be retained, although that is not particularly important.

Another possibility would be to charter or purchase an S-43 from Panair. Presumably this is impractical on account of their shortage of equipment. You undoubtedly have heard that yesterday Panair's S-43 cracked up in La Guayra. Information here is very sketchy, but it would appear that it was rather badly damaged, with some injury to at least the flight crew. The cause of this accident is unknown here. If you get any information on it I would appreciate hearing from you.

A third possibility would be the purchase by Panagra from the factory of an additional S-43.

After talking with Campbell about the possibility of securing prompt action on the implantation of new landing fields in Colombia, particularly at Tumaco, I am rather pessimistic about any prompt action by the Colombian Government in making landing fields available, or in permitting us to operate land planes through Colombia to the Canal. As I have previously advised, I feel that the idea of working toward land plane operation through Colombia to the Canal is the final goal toward which we should work, but I must confess that the only real and immediate solution of our present problem is for Panagra to purchase an additional S-43 as soon as possible. Mr. Campbell, with whom I have discussed this matter in great detail, concurs in this idea.

/s/ H. R. Harris
H. R. Harris

HRH:AW
cc JK

P.S. It is barely possible that some of the S-43's which are now privately owned, such as Mr. W. K. Vanderbilt's plane, might be available for purchase at a reasonable price and prompt delivery.

[fol. 2813]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 184

THIS AGREEMENT entered into this first day of September 1937 between PAN AMERICAN GRACE AIRWAYS, INC., a corporation of the State of New York, United States of America, hereinafter referred to as "PANAGRA", and COMPANIA DE AVIACION PAN AMERICAN ARGENTINA, S. A., a corporation of the Argentine Republic, hereinafter referred to as "THE AGENT", WITNESSETH AS FOLLOWS:

WHEREAS, PANAGRA, operates an International Air Service for the transportation by air of passengers, mail and express, into, through and out of the Argentine Republic, and

WHEREAS, THE AGENT, has a suitable organization and facilities to represent PANAGRA in the Argentine Republic;

NOW, THEREFORE, in consideration of the premises and mutual covenants herein contained, it is agreed as follows:

1. THE AGENT shall have exclusive commercial representation of PANAGRA in Buenos Aires, and at such other points in the territory of the Argentine Republic as PANAGRA may, from time to time, designate, and for this purpose the said agency or commercial representation shall comprise the following purposes:

(a) Such administrative steps and negotiations as it may be necessary or advisable to undertake national, provincial or municipal authorities of the Argentine Republic in order to keep in force ( ) concessions or contracts which Panagra [ ] may have, as well as the obtention of new franchises, privileges or new agreements which [ ] Panagra may execute with such authorities. The principal [ ] THE AGENT shall be to take charge of all necessary negotiations and steps to be undertaken with the Argentine postal authorities, including the collection and of sums owing to PAN-

AGRA by the Argentine Postal [illegible] receipt for postage on correspondence to be transported by air route, or for other reasons.

(b) THE AGENT shall likewise have charge of the obtention of the necessary documents relating to the clearance and reception of the air lines of PANAGRA in Buenos Aires and at such other points in Argentine territory as PANAGRA may designate, in the regular service for air transportation of passengers, merchandise and mail.

[fol. 2814] (c) The contracting by THE AGENT in the Argentine Republic for passengers and freight, for the transportation of passengers or merchandise and freight over the airlines of PANAGRA, issuing for this purpose the respective tickets or transportation vouchers (cartas), including checking of baggage and collecting excess charges, attention to all other details connected with such contracting for transportation as may be arranged for.

THE AGENT shall also be encharged in the Argentine Republic with the attention to and performance of details concerning the execution of contracts for transportation entered into by PANAGRA outside of the Argentine Republic and which result in the receiving and forwarding of passengers and baggage, or merchandise transported by the aircraft of PANAGRA.

THE AGENT shall also pay, for the account of, and bill to, PANAGRA, any commissions to sub-agents in Buenos Aires, and any other designated points in Argentine territory, for transportation over the line or lines of PANAGRA and its affiliated companies sold by such sub-agents in accordance with the terms of contracts which PANAGRA may have with such sub-agents.

(d) THE AGENT shall have the duty to contract for the special chartering of planes of PANAGRA, subject, in each case, to prior authorization being obtained from PANAGRA, and to attend to and enforce the execution

of such special chartering in accordance with regulations.

(e) THE AGENT shall likewise keep watch at the airport of PANAGRA in Buenos Aires, but THE AGENT shall in no way be responsible for, or have charge over, the regular operation of the lines of PANAGRA within the Argentine Republic, nor for the conservation of its fixed or flight material, in which two respects PANAGRA shall retain for itself all of the respective obligations.

II. PANAGRA shall pay THE AGENT for the above indicated services two-thirds of all the necessary normal, or basic, expenses for the maintenance and operation of the offices and personnel of THE AGENT in the Argentine Republic. These normal expenses shall not include any special, or extraordinary, expenses which THE AGENT may incur at the request of, and solely for the benefit of, PANAGRA, or any other company which THE AGENT may similarly represent.

[fol. 2815] Such special expenses shall be billed by THE AGENT directly to the company at whose request, and for whose account, they were incurred.

PANAGRA, in addition to paying, as above stated, two-thirds of the normal expenses incurred by THE AGENT in the maintenance of its organization and company, likewise obligates itself to pay to THE AGENT a sum equal to one percent. (1%) calculated on all cash income received by PANAGRA in the Argentine Republic as a result of: (a) sale of passenger tickets; (b) excess baggage; (c) freight (express) weight or volume charges; and (d) special charters of planes.

III. The settlement of accounts between PANAGRA and THE AGENT shall be made monthly, pursuant to the terms of this contract, and for this purpose THE AGENT will send to PANAGRA at regular intervals the debit notes, supported by appropriate vouchers, covering the repective amounts.

IV. THE AGENT shall have the obligation to promote the development of air traffic over the Lines of PANAGRA and shall carry out the necessary propaganda and publicity with respect to the services rendered by the company which it represents, and provide the utmost facilities for the utilization of the said means of transportation.

V. This agreement shall be retroactive to the first day of January 1936, and shall remain in force until such time as either party may give formal written notification of its intention to terminate this contract. This written notification must be given at least 60 days prior to the date on which the contract is to terminate.

[fol. 2816] VI. For all purposes of this contract, the parties hereto subunit themselves to the jurisdiction of the ordinary courts and tribunals of the City of Buenos Aires and to the laws of the Republic of Argentina.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 186

Minutes of Adjourned Special Meeting of the Board of Directors of Pan American-Grace Airways, Inc., held at the office of Pan American Airways, Inc., Chrysler Building, New York, N. Y. on the 27th day of January, 1938, at 12.45 P.M.

PRESENT:

Messrs W F Cogswell
A Garni
H P Morris
R H Patchin
H J Roig
J T Trippe
E E Young

being a quorum of the Board.

Mr J D MacGregor, Vice President and General Manager of the corporation, was also present.

Mr Trippe called the meeting to order and on motion duly made and seconded was appointed Chairman of the meeting. Mr Cogswell, Secretary of the corporation, recorded the minutes.

Mr Roig called for the vote on his resolutions regarding overland operation in Colombia as set forth in the minutes of the meeting of December 23, 1937. A vote upon such resolutions having been had, the same were declared adopted, Messrs Cogswell, Garni, Patchin and Roig voting in favor of same and Messrs Morris, Trippe and Young not voting.

Messrs. Morris, Trippe and Young desired to have their views appear in the record as follows:

In view of the recommendations of the Vice President in [fol. 2823] Charge of Operations, as submitted to the Board by the Vice President and General Manager, that the ser-

vice now operated on that sector of the present West Coast route between Cristobal, C. Z. and Guayaquil, Ecuador be transferred to operate via Cali, Colombia, and Quito, Ecuador; and in view of the support of this recommendation by Messrs Cogswell, Garni, Patchin and Roig, Messrs. Morris, Trippe and Young did not wish to delay a move which the management has recommended. They, therefore, refrained from voting against the resolutions offered.

They stated that, in their opinion, the continuance of operations via a coastal route, contemplated in the Kellogg-Olaya Treaty between the United States and Colombia, would be to the best interests of Pan American-Grace Airways, Inc.

They pointed out to the meeting that, while they felt the route via Cali and Quito could be established, they are of the opinion that the more direct route between Cristobal and Guayaquil, following the great circle course (or with an intermediate stop at Buenaventura if desired), would:

(a) In the aggregate, prove to be faster, as well as shorter;

(b) Be preferable from a technical operating standpoint;

(c) Permit greater schedule regularity and fewer interruptions on through service between Cristobal and Ecuador, Perú, Chile, Bolivia and the Argentine; and

(d) Over a period of time be more profitable to the company commercially, on account of the greater volume of total traffic that would accrue to it, with especial [fol. 2824] reference to through passenger traffic between the United States and Ecuador, Perú, Chile, Bolivia and the Argentine.

They further pointed out that if the traffic which might be developed between the West Coast city of Cali and Cristobal was an objective in the plan for the interior route, they felt that such traffic might best be developed by means of a separate shuttle service between Cristobal and Cali, thus providing full capacity of equipment as compared with

the limited capacity that would be available by including Cali as a point of call on the more circuitous through service.

Messrs Morris, Trippe and Young also pointed out that although their fellow Directors present have in the past indicated as a matter of policy that they did not view with favor a program contemplating large four-engined equipment operating through to Guayaquil on a charter or other mutually cooperative basis with Pan American Airways on one or more weekly round trips on account of the possibility of prejudicing Pan American-Grace's position as an independent company, they were still of the opinion that such a program was feasible and would be to the best interests of Pan American-Grace Airways as well as to the general public, in view of the greater capacity and efficiency of flight equipment thereby possible.

Messrs Cogswell, Garni, Patchin and Roig made the following statement on the record with respect to their vote [fol. 2825] in favor of the resolution:

While regretting the necessity of acting without the full concurrence of their associates, Messrs Cogswell, Garni, Patchin and Roig feel that the welfare of the service calls for action without further delay and that the recommendations of the management, being sustained by the reports referred to below, should be adopted by the Board.

The land operation over Colombia has been the subject of careful study over several months. The conclusions reached by the management are based on detailed studies and reports. The Company has the planes with which to institute the service. We are unable to concur in the conclusions of our associate directors based on what they believe to be the commercial advantages of the plan they propose.

There being no further business, the meeting adjourned.

/s/ J. T. Trippe
Chairman of the Meeting

/s/ W. F. Cogswell
Secretary

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 187

EXHIBIT B

MEMORANDUM
January 27, 1938

At Mr. Trippe's suggestion Messrs. Garni and Roig called at the Pan American office at 9:45 this morning for a final conference on the subject of W. R. Grace & Company's representative's request to transfer the route between Cristobal and Guayaquil to a route between Cali and Quito. They examined the operating cost estimates prepared indicating the expected cost of operation using an S-42-B and S-43 on the coastal routes, as against DC-3s on the interior route.

Copies of these estimates are attached with this record.

Colonel Roop and Mr. Vidal joined the discussion and pointed out to the meeting the basis on which the cost estimates had been prepared. The reasonableness of both sets of figures were agreed to by all present.

Before finally requesting that a Board meeting of Pan American-Grace Airways be convened to consider action under the resolution submitted by Mr. Roig to transfer the route, Mr. Trippe offered to arrange for a demonstration service of from three to six months with the Pan American Airways S-42-B in addition to Pan American-Grace's S-43. He offered to absorb on the part of Pan American Airways the additional indicated differential in the cost of operating [fol. 2827] the coastal route as opposed to the interior route ($2,000 per annum) pointing out that Pan American was confident that the result of such a trial service would amply demonstrate that the additional capacity could be well utilized to secure additional traffic as compared to the interior route under the plan proposed by Mr. Roig. He stated that both the ton miles and seating capacity of the coastal service would be doubled between Guayaquil and Cristobal as compared to the interior route on the assumption of ten seats maximum capacity, which was submitted by Messrs. MacGregor and Vidal on behalf of the Management as being

the maximum capacity that would be available on that route with DC-3s. Mr. Trippe also further pointed out that informal discussions with the underwriters had indicated that the passenger liability rate on the coastal route as against the interior mountainous route would be less, indicating the relative safety of the two routes in the opinion of an outside underwriter. Mr. Garni, however, pointed out that underwriters often did not properly discount local conditions in arriving at their rate schedules.

Mr. Trippe also stated that Pan American was willing to offer to make this demonstration without indicated profit because of its interest in building up traffic on trans-Caribbean services running between Miami, Kingston and Cristobal, which was now suffering by virtue of the fact that there was such limited capacity south of the Canal Zone on Pan [fol. 2828] American-Grace Airways and that the alternate plan to fly via Cali and Quito did not materially improve this condition. He also pointed out that the express in addition to passenger traffic was continually increasing and Mr. Vidal confirmed that certain shipments to the Argentine had been rerouted via the East Coast because of lack of capacity on the west coast operation. Mr. Garni finally asked Mr. Trippe whether Pan American would agree to turn over the through service between Cristobal and Miami to be run by Pan American-Grace Airways itself, if Grace & Company would not push its program of operating between Cristobal and Guayaquil via the interior route.

Messrs. Garni and Roig finally took the position that notwithstanding the reduced capacity and other factors advanced by Pan American in favor of the coastal service, that they still felt that their resolution should be immediately considered and action taken thereon.

Mr. Trippe thereupon suggested immediately convening a Board meeting so that formal action could be had and Messrs. Patchin and Coggswell were asked to come up-town to join Messrs. Young and Morris so that a quorum would be available.

At the conclusion of the informal meeting Mr. Trippe pointed out to Messrs. Garni and Roig that officials con

cerned in Pan American were without exception in agreement that the move suggested by the Grace directors would [fol. 2829] not be to the best interests of Pan American Grace Airways and they felt that time would confirm their opinion. Mr. Trippe pointed out that he would offer to have the difference of opinion between them submitted to arbitration or to Colonel J. Monroe Johnson, Assistant Secretary of Commerce and Mr. Harllee Branch, Assistant Postmaster General, two government officials most concerned with the general question at issue, but to this suggestion Messrs. Garni and Roig took the position that the problem was an operating one and they did not feel that either an arbitrator or the two officials above referred to were qualified to reach even an informal suggestion, even though the matter were presented to them informally and in the friendliest way by Messrs. Garni and Trippe as above suggested. The informal meeting adjourned to a formal meeting at approximately 12:30.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 188

April 29, 1938

Memorandum for Mr. A. Garni,
Vice President
W. R. Grace & Co.,
New York.

Please be advised that today, at five minutes to one, I received a telephone call from Mr. Evan Young requesting me to have lunch with him. Upon my arrival at his office I found Doctor Von Bauer and Mr. Ribl, and we all went to lunch together. I had no previous intimation that I was to lunch with Doctor Von Bauer.

During lunch I took the opportunity of thanking Mr. Von Bauer for the actions of the Scadta Company in not opposing: first, our request to the Colombian Government to operate through Cali, and second, that they did not oppose our request to change our route from the sea route to the over land route.

I went on to say that I had recommended to my Directors that Panagra enter into a traffic and airmail agreement with Scadta and Adelca along the lines and for the period of the contracts those companies had with Pan American Airways. I mentioned that the only reservation I had was that I should like to have some assurance that Scadta would not operate into Quito and in that way enter into competition with our West Coast international service. Doctor Von Bauer vigorously confirmed what we had been told by Mr. Trippe. He said that Scadta had no desire to operate to Quito.

He stated that President Lopez had told him that he wished to leave some personal monument to his administration, that he had not the money to build roads as his predecessor had attempted to do, and that in his opinion the easiest way to do something of a striking nature was to develop air services in Colombia and connect that with the neighboring roads of Venezuela and Ecuador.

Doctor Von Bauer stated that he had suggested to the President that he could best develop Colombian aviation by putting in decent airports, but that that did not appeal to the President because it represented a large investment of funds which were not available; and the President, therefore, requested that Scadta make surveys to both Quito and Caracas, the President undertaking to get the necessary permits. In that way the President figured on leaving some important executive act without cost to him by which his administration would be patriotically remembered.

Doctor Von Bauer said that, speaking for Scadta, he still did not wish to operate internationally but that, although at the present moment, with the imminent change of administration in Colombia, the matter of the Quito connection had been dropped, he could not guarantee that a succeeding administration would not revive the question. What he would state was that the question would not be revived by him or by Scadta and that, if the question arose through the instigation of a succeeding Government, the problem would have to be restudied and some method devised to solve it.

[fol. 2831] Doctor Von Bauer said that he wished that Pan American-Grace would give some consideration to Scadta problems. He said that, upon my assurance that we had no present intention of engaging in cabotaje in Colombia, he asked why then did we ask for landing rights at Turbo and Medellin. He intimated that asking for these landing rights was not necessary if we did not intend to engage in cabotaje, that the mere fact that a route via Turbo/Medellin/Cartago to Cali was granted would give by Colombian law automatically the right to land there for emergency purposes, whether for refueling or for refuge from weather.

Doctor Von Bauer stated that, just as the Colombian Government might, on account of public or political pressure, try to force him to go to Quito, we might be faced with an attempt to make us serve the cities of Antioquia and Medellin, near which we pass on the new route. Doctor Von Bauer stated that Scadta naturally would deprecate the running of a lot of international airlines across Colombia, because sooner or later it would bring a demand that the international planes deliver mail and engage in international traffic in the interior, which would greatly prejudice the Scadta position. He said very frankly that Buenaventura was the hub of his activities and that his entire organization was built to function from that outlet, and the loss of revenue to international operators would mean the death of Scadta.

I said I could see his position very well but that the prime object of Panagra's existence was to carry airmail to Buenos Aires via the West Coast of South America in as speedy a fashion as possible, and, in order to accomplish this, we could not make a number of stops at Colombian cities, and that we would in every way fight for only a limited number of stops throughout the line, in order that a fast schedule might be maintained.

Doctor Von Bauer said that he had spoken to Mr. Kuhl about the agreement with Panagra and that Kuhl had told him that two years ago a draft was prepared but that nothing had come of it, but that he would again write to Mr. Kuhl, and he suggested that we send Mr. Kuhl our ideas of the contract in writing in order that it might be studied.

Doctor Von Bauer intimated that in all probability Scadta would have to establish, at quite some expense, a redespatch point at Cali and the Scadta schedules would have to be studied, so that if possible a rearrangement could be made which would provide for the rapid transfer and transmission of airmail and express in Colombia in connection with Panagra's departures and arrivals.

In conclusion, Mr. Von Bauer was extremely regretful that he was unable to arrange for luncheon with Messrs. Iglehart and Garni. In his own words, he said: "You know I am just like any other employee, at the end of a string waiting for the latch-door to open". He said that it was imperative that he leave for Europe tomorrow and he wished me to personally convey his remarks to you. If he finds that, in spite of his urgency to leave (because of serious business complications in Austria), he is not able to settle certain business matters pending in New York, he will at once advise us and accept with great pleasure an invitation to any function you might care to extend.

[fol. 2832] He stated that on one of his first visits to the States, I believe in 1925, he endeavored to interest Mr. Joseph P. Grace in the Scadta Line but that there was some hitch and that Pan American jumped right into the picture. He wished me to convey to you that he still remembers with a great deal of pleasure the kind and courteous way he was received by Mr. Grace at the time he visited him in Hanover Square.

Apart from the above, Mr. Von Bauer said that he thought some study should be given by Pan American-Grace to the portion of the route lying between Turbo and Antioquia. He said that, as I was aware, Buenaventura was the wettest place in Colombia and that the weather extended inland very often as far as Antioquia. The Doctor thinks that we should arrange for meteorological information from that section by the establishment of proper facilities. He also said that, while he could give radio service from Turbo and from Medellin, neither of these stations could give meteorological information from a part of the sector we would fly, and which he considers the most difficult part of

the new route. I shall discuss this further with Pan American Airways on account of their flying experience on the UMCA route.

J. D. MacGregor

[fol. 2833]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 189

(COPY)

June 30, 1938

Mr. A. Garni
W. R. Grace & Co.
7 Hanover Square
New York City

My dear Mr. Garni:

I regret that I was engaged in a hearing when you called this morning. When I became available this afternoon your office reported that you had gone for the day.

I talked with Mr. Lamiell this morning concerning the proposed second direct air mail schedule between Miami and the Canal Zone. Frankly, this situation does not appear very encouraging.

In order to improve the service on the West Coast south of the Canal Zone we authorized the so-called La Paz "cut-off" several months ago, which entails an annual cost of about $261,000. In addition, we established a direct schedule from Miami to the Canal Zone, at a cost of about $228,000 per annum.

Notwithstanding these additional and expensive services there has been very little improvement in the schedules and practically no mail benefit. To authorize another direct service from Miami would cost approximately $162,000 a year additional; which would be offset to the amount of about $72,000 if the service now being maintained between

the Canal Zone and Barranquilla is abandoned. Even with this offset of $72,000 a year the Department would be put to an additional expense of around $90,000 a year.

This, added to the $261,000 for the La Paz "cut-off" and the $228,000 for the one direct schedule from Miami to the Canal Zone, would make a total cost of $579,000 per year.

Unless some substantial benefits are to be obtained through a second direct schedule between Miami and the Canal Zone I doubt whether such an additional service, with the attendant cost, would be justified.

I am leaving tomorrow for a short vacation and I suggest you confer further with Mr. Lamiell concerning possible improvement in the service.

Sincerely yours,

Harllee Branch
Second Assistant

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 190

November 11th, 1938.

Mr. Evan E. Young, Vice President,
Pan American Airways Inc.,
Chrysler Building,
NEW YORK CITY.

CONFIDENTIAL.

Dear Mr. Young,

I recently had occasion to call Mr. Bradley to Rio for the purpose of discussing several pending matters and, in the course of our various conversations, we touched upon several matters of importance, the gist of which I am passing on to you as of possible interest at the moment.

1. EXCHANGE SITUATION IN ARGENTINA:

We reviewed in detail the matter of procurement of official exchange for remittance of our accumulated

peso surplus to New York. As you are of course aware, the two most recent remittances were accomplished at the free market rate as a result of our inability to obtain official coverage.

While it is definitely a statement of fact that the procurement of dollar coverage at the official or "pegged" exchange rate today, in Argentina, is rare if not impossible of accomplishment. I mention an incident which took place in the month of March this year and which apparently has not enhanced nor in any way strengthened our position with the Government Exchange Board. It appears that at that time Pan Grace had been employing most, or practically all, of their peso income on capital expenditures incidental to airport construction and improvement work etc., within Argentina, and was in further need of additional pesos, to cover current operating costs. A transaction in the open market was then consummated in which $50,000.00 U.S. was converted at the then current rate of exchange of 3.84 to the dollar (current rate: 4.20 to one). This transaction, under ordinary circumstances, would have caused no comment. However, inasmuch as Pan Grace simultaneously had pending before the Exchange Control Board a request for official exchange to cover remittance, the former transaction was looked upon with natural askance. At best, the wisdom of converting U.S. dollars at the open market rate, while simultaneously requesting remittance coverage at the official rate, is indeed open to question; such a procedure would enable one to import U.S. dollars in Argentina, purchase pesos on the open market, then with those pesos buy back a greater amount of dollars than was originally employed in the transaction. As to whether our inability to procure official coverage is directly attributable, either in whole or part, to this transaction, I would not care to hazard a guess. The fact remains however that neither organization has enjoyed this privilege since the month of August 1937, when Pan Grace accomplished their last remittance at an official exchange rate.

[fol. 2835]

2. REDUCED AIRMAIL RATES:

The foregoing also ties in quite closely with the adoption of the lower airmail rate schedule offered by us some time ago in conformity with the exchange of correspondence on this subject between your office and mine. The delay in arriving at a final decision appears to be solely attributable to the question of exchange coverage. As you will readily recall, our offer specifically stated that liquidation of such accounts as may accrue from income on mail dispatched from Argentina to the United States is to be made in U.S. dollars at the official rate of exchange. Alternatively if official coverage could not be guaranteed the new rates were to be increased in the same proportionate ratio as the official exchange rate has to the free market rate. In other words we are interested in getting a fixed amount of dollar revenue per weight unit and it is immaterial to us as to whether Argentina chooses to handle it by granting official coverage or by making the rate high enough to protect us at the open market exchange rate. Naturally, it is to the interest of both Argentina and ourselves to have the former arrangement placed in effect inasmuch as if official exchange coverage is granted the peso rate quoted to the public will be proportionately lower than in the latter case. Mr. Bradley advised me that this matter was still in the process of active discussion with the postal authorities but that he was hopeful that immediately following his return to Buenos Aires it would be possible to expedite a prompt decision. I expect very shortly to receive a report of his findings, which I shall of course pass on to you as soon as received.

3. BUENOS AIRES FEDERAL AIRPORT PROJECT:

The possibility of obtaining early action on the Government airport project at Buenos Aires was discussed at some length but, after all is said and done, my reaction is that little optimism is justified. The chances for any material action or progress in that direction appear to be as remote today as at any time since the

initiation of conversations and discussions on that subject years ago. Mr. Bradley feels that it may well be two or three years before any concrete action is forthcoming.

4. GENERAL RELATIONSHIPS WITH PAN GRACE IN ARGENTINA:

In the course of our conversations I accorded marked emphasis to the question of the repeated complaints received from Pan Grace and their very patent dissatisfaction with the general handling of their business and representation in Argentina by both Messrs. Bradley and Moore. While Mr. Bradley was definitely cognizant of this dissatisfaction in general, he professed to be genuinely astounded to learn of the extent of their [fol. 2836] criticism and complaints. He based his reaction on the allegation that no official of the Pan Grace organization ever, either verbally or in writing, has made any other than routine criticism of his handling of their affairs. In his own defense he pointed out that his position, insofar as Pan Grace is concerned, often tends to be peculiar and at times embarrassing in that his orders from them are received from multiple sources and are, more often than not, conflicting in sense. According to his statement he received direct orders from no less than seven officials of the Pan Grace organization, in addition to the supervision of this office in connection with matters which concern either Pan American Airways Inc. or our local subsidiary. In Bradley's defense, and even after discounting considerably for possible exaggeration, there is no question but that this long standing situation has not as yet been corrected entirely and, in its present status, leaves much to be desired from an organization standpoint. This of course is a matter quite beyond my sphere of jurisdiction and I mention it here solely with the idea in mind that perhaps it might be of some assistance to you in weighing the complaints directed against our Buenos Aires organization which are frequently brought to your attention.

The mention of Pan Grace's dissatisfaction quite naturally lead our conversation around toward a discussion of the possibility that they might wish to install their own office at Buenos Aires, at some future date. Out of a clear sky Mr. Bradley came out with the statement, accompanied by enjoinments as to its "off-the-record" nature, that Mr. Vidal had already discussed the subject with him in detail and had actually gone so far as to suggest the possibility that Bradley might serve as President of their local organization as, if and when the formation of such an additional corporate entity might take place. If true this little tid-bit is not only paradoxical, but would certainly appear to be whimsical on the part of Pan Grace. I pass it on to you for what it may be worth.

In general my opinion of the Buenos Aires situation, on the whole, has undergone little change from that expressed in my previous and copious reports on this subject. I still feel that Pan Grace is getting their money's worth in ample and generous measure, that their representation—both commercial and institutional—is handled in a strictly impartial manner, that, while Mr. Bradley is no "world-beater" his services are as satisfactory as can be expected under the circumstances, that our general representation of Pan Grace in Argentina compares favorably with their representation in other countries which they serve both as regards cost and accomplishment. The replacement of Messrs. Bradley and Moore, either or both, is and will undoubtedly continue to be an intermittently recurrent subject for discussion. It is my well considered opinion that it would be unwise, impolitic and certainly not convenient to give any thought, at the present time, to the possible supplanting of Bradley by another local [fol. 2837] man in a similar category. It is extremely unlikely, even admitting all of Bradley's faults, that another man could be procured at less than twice the figure that we pay Bradley whose all-round worth would prove more satisfactory under existing circumstances. As regards the possible replacement of Moore, which

Mr. Vidal strongly advocated. I am not wedded to any "stand pat" attitude and if such an organization change is demanded and might serve to assuage Pan Grace for the time being, I have no objection as long as Moore's successor is well chosen. If such action is finally decided upon however I would like to see its execution deferred until I have the opportunity of discussing personally with you all angles of the subject.

I trust that the foregoing will serve to provide you with up-to-date background to supplement my previous reports on Argentina.

With kind personal regards,

Sincerely yours,

/s/ M. J. Rice
M. J. Rice,
Regional Director.

[fol. 2838]

Pan American World Airways, Inc. Exhibit 191.

My Dear Trippe:

They say, you never read a letter; please read this one carefully, it will save you time. Please don't lose it, but destroy it after you have read it. I will explain to you in a nutshell the object of my present visit:

1. The situation in Germany is getting increasingly difficult, things have moved from bad to worse. I don't need to prove that, you can read it in the newspapers.

2. In Colombia the nationalization law came into effect. At the same time the new President shows certain leanings towards the Nazis and has paid them already a substancial subsidy. If nationalization of SCADTA is delayed too much, prospective Colombian buyers of Scadta shares might

lose interest. Colombian Government also fears and objects to German interference in domestic Colombian aviation.

3.—Under those conditions my position is getting more doubtful than ever. It is more and more impossible for me, to manage SCADTA on a fiction; which; if revealed, would have most dangerous consequences both in Germany and Colombia. SCADTA in itself is a sound business, its political aspect can be efficiently managed, but I must have solid ground under my feet.

Here is my suggestion:

a) P.A.A. sells to me definitely the majority-stock of SCADTA, leaving me in full and free possession of said block of stock. I acquire the majority not in view of selling it to a Colombian Syndicate, but to keep the stock for my own benefit.

b) In order to comply with the Colombian nationalizacion-law I am willing to sacrify my German nationality and adquire Colombian citizenship. I have all hopes to believe, that si[illegible] have worked in Colombia from 1911 on, since undoubtedly the co[illegible] owns me gratitud and since the new President is a personal friend of mine, the Colombian Government will facilitate this matter and will accept me as Colombian owner of the majority-stock, as prescribed in the new nationalizacion-law.

c) This move would make me entirely independent from Germany? It would increase considerably my desirability as a partner with your Board of Directors. It would give me a solid standing with SCADTA's colombian and german employees, in sum, it would clarify and simplify the situation so as to give a picture acceptable to everybody concerned.

d) As bonafide owner of Scadta's controlling stock, the relations between PAA and SCADTA would stay entirely what they are now. I believe, our partnership would be even closer, because I would not only carry the responsability for SCADTA's management, but in addition also the responsability for my own investment. You would'nt need

to work with a bunch of unknown and highly unreliable colombian stockholders, but with an individual, whom you had known for 10 years and who has been all the time a loyal partner. In addition, SCADTA would be free from disturbances to be expected if SCADTA controlling stock would be turned over to a bonafide colombian syndicate.

[fol. 2839] c) You will be at liberty to keep your minority stock, as I wish you would do. On the other hand, if you want to liquidate some of it, it would increase good will in Colombia, if we could add to the number of bonafide colombian shareholders. However small or large your investment in SCADTA might be, you can rest assured, the SCADTA will allways be to PAA a valuable, friendly and loyal associate.

I believe this to be an ideal solution. I know of none other, which could meet your and my interest and at the same time overcomes the existing political difficulties.— Please think it over and see, if it fits in your CAA-picture without a big splash of publicity. Primaturely revealed, it would spoil everything. Probably the best explanation to CAA would be to say, that we have decided to liquidate the Scadta-Stock-Syndicate. You may believe me, that it was pretty hard for me, to reach the decision of changing my nationality, but since there is no other way, I am willing to do it, but please, make it otherwise not too expensive for me. — It is most desirable that for the next shareholders meeting in February I could prove ownership of controlling stock by an ownership-certificate issued by the National City Bank and not by a notarial certificate open to suspicions.

I am really sorry, that each of my visits to New York means additional headaches for you, but a lasting solution is unavoidable and very urgent.

Yours very cordially,

[illegible] by [illegible]

[fol. 2840]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 192

Memorandum of Conference relating to Proposed Agreement between Pan American Airways Corporation and W. R. Grace & Company

On February 14, 1939, about 12:30 p.m., a conference was had on the above subject at which the following were present: Mr. Pogue and Mr. Gates of the Civil Aeronautics Authority; Mr. Cogswell of W. R. Grace & Company; Messrs. Trippe and Cooper of Pan American Airways, and Mr. Friendly, Counsel for Pan American Airways.

Mr. Gates opened the meeting by saying that last week Mr. Trippe and Mr. Roig had made known to certain members of the Authority the agreement which Pan American Airways Corporation and W. R. Grace & Company proposed to enter into; that some question had been raised by him to the effect that the agreement seemed to be of the sort which was required to be filed with and approved by the Authority under Section 412 of the Civil Aeronautics Act, but that he had not wished to express any definite opinion upon this subject without hearing from the Counsels for the Companies, who were not present at the meeting in question; and that it was for this reason that the present meeting had been called. He suggested that one of the representatives of the companies outline the nature of the problem.

Mr. Friendly agreed that the general terms of the proposed agreement were as follows: In the first place it was an agreement between the two owners of the stock of Pan American-Grace Airways, acting in their capacity as such and neither of these companies being air carriers. The agreement involved in the first place the election of Mr. Roig as President, of Pan American-Grace Airways, the company, not heretofore having had a president. It involved, secondly, a committment on the part of Pan American Airways Corporation to cause its subsidiary, Pan American Airways, Inc., to inaugurate promptly a second direct trip between Miami and Cristobal, and thereafter to

maintain an adequate direct service connecting with Pan American-Grace Airways departures from Cristobal. As a penalty for non-compliance with this agreement (in the event that it was decided by Arbitration that there had been such non-compliance, and no compliance was had within such time as the arbitrators might permit), Pan American Airways Corporation agrees that it would cause its representatives on the Board of Pan American-Grace Airways to take such action as would permit Pan American-Grace Airways, assuming that the representatives of Grace & Company on its Board were so advised, to apply to the Civil Aeronautics Authority for a Certificate of Convenience and Necessity to operate directly into the United States provided, however, that Pan American Airways should be entirely free to oppose this application.

Mr. Friendly stated that he was of the opinion that this agreement was not within the provisions of Section 412 of the Civil Aeronautics Act. Certainly the agreement between the two stockholders to elect Mr. Roig as President did not come within the terms of that Section, although, of course, Mr. Roig would have to get permission of the Authority to continue as President of Pan American-Grace just as he now had to get permission to continue as Director of Pan American-Grace. The other part of the agreement did not come within Section 412 in his opinion because it was not an agreement between air carriers and, furthermore, did not [fol. 2841] involve any agreement as to the respective services of more than one air carrier but simply related to the service to be offered by a single air carrier.

Mr. Cogswell expressed his agreement with these views.

Mr. Gates said that the only doubt which he had upon the subject arose from his belief that Pan American Airways Corporation really was an air carrier.

Mr. Friendly stated that he entirely disagreed with any such view; that he thought the record was perfectly clear to the effect that Pan American Airways Corporation was nothing more than a holding company and was not in any way an operating company; but even if Mr. Gates were correct in this assumption, Mr. Friendly's views as to the

question directly at issue would not be changed since, in any event, it was perfectly clear that W. R. Grace & Company was not a carrier.

Mr. Pogue and Mr. Gates then conferred between themselves. After this conference, Mr. Pogue said that he did not quite see how they could be expected to make any pronouncement at this time.

Mr. Friendly said that we were not asking either for an approval for the agreement or for any declaratory ruling that the agreement did not need to be filed; that he and Mr. Cogswell as Counsels to the respective companies were perfectly willing to take the responsibility of advising their clients that the agreement did not need to be filed, but that we were loath to proceed in the face of a positive indication that Counsel for the Authority entertained a different view. Mr. Gates said that after the full discussion of the matter which had been had, he did not wish us to think that he had any positive view that the agreement should be filed; and Mr. Pogue said that although he could not give us any official expression, his opinion was that on the facts stated we were right in thinking that the agreement did not need to be filed.

Dictated by Mr. Henry J. Friendly

February 15, 1939.

Confidential

MEMORANDUM

The statement which the Minister of War made to us (to Dr. von Bauer and myself) during the afternoon of the 5th of this month, was, in summary, as follows:

a) Not only the special geographical situation of Colombia, but recent developments in Europe and their repercussions on the foreign policy of the United States and the

American continent as a whole, impose upon the Government the necessity of effectively ensuring its control over the air transport companies, both for reasons of national sovereignty and because of its obligation to guarantee the peaceful and constantly increasing development of civil aviation companies.

b) SCADTA is the principal subject of these considerations, not only by reason of its outstanding position and the important services of various kinds which the Company has been rendering to the country, but likewise because the preponderance of German personnel in its organization has aroused serious apprehensions in the people of the United States. And although the naturalization of Dr. von Bauer legally meets the requirements of the law with regard to the nationalization of the Company, and even though the Government has never believed that SCADTA is carrying on, or may in future carry on, activities which might constitute a menace to the so-called "good-neighbour" policy, the Government considers it not only desirable but essential to hasten and bring pressure to bear upon this process of nationalization, in such a manner as to eradicate any suspicions that may be entertained in connection with this situation.

c) On the other hand, SACO presents special features which must be taken into consideration in order that the solution which the Government is seeking in this situation may be achieved as rapidly as possible. The group at the head of this Company, which is very pertinacious, is endeavoring to have the Government support it more effectively both financially and with other advantages and special rights, basing its aspirations on the fact that the Government is one of its stockholders and that the Company is a wholly national one. These aims may be brought before the next Congress in the form of proposed bills, which would create a situation that would [fol. 283] take the matter out of the control of the Government, and provoke debates of a violently nationalistic nature, which, in any event, would be most undesirable.

d) Under these conditions, the Government believes that it must look for a concrete solution to this problem, and that this solution lies in the merger of the two Companies, under equitable conditions, permitting of the participation of new Colombian stockholders, the Government itself taking a larger share in the stock. The details of operation will be the subject of a careful study made under the direction of the Government. As long a period of time may be taken for the settlement of these details as may be required in an undertaking of this nature, which demands delicate and skillful handling; however, it is necessary that an agreement, in principle, be concluded before July 20th next.

The impression which I, personally, gathered from the interview with the Minister was that the idea was to exert pressure of a sympathetic nature on SCADTA in order to induce the latter to accept the plan of the Government,—pressure motivated on the one hand by the misgivings of the United States with respect to the apparent nationality of the Company, and on the other hand, by the danger that SACO may stir up controversial discussions in Congress, which would impose upon the Government the necessity of making substantial and unfruitful investments, at the same time reviving hectic arguments of a partisan nature, which would be most prejudicial. The pressure would be sympathetic and characterized by goodwill, since the Minister did not hide the fact that the Government has a sympathetic attitude toward SCADTA and that it is the desire of the Government not to allow the negotiations to result in a situation that would be unjustly burdensome for SCADTA. On the contrary, it was evident that it was his intention to ensure for this important national company a stable and prosperous condition, through the authorization to the Company, over a considerable number of years, of the concessions and rights which are enjoyed by SCADTA at the present time.

From the statement made by the Minister, and as a result of my deliberations on the general problem with regard to SCADTA, I have reached the conclusion that the Com-

pany should not hesitate to accept the merger plan, not in a spirit of resignation to an unavoidable evil, but as being probably the best way of consolidating its position and ensuring its future progress.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 194

[Handwritten notations—J.T.T.—E. E. Young—Brazil Operations Rio Corumba]

TELEPHONE CONVERSATION BETWEEN MR. LATCHFORD AND MR. YOUNG— 12:30 P.M., JULY 15.

Mr. Latchford of the State Department just 'phoned me and said that the Department had just received a cable from the American Embassy at Rio to the effect that in view of Condor's application to the Brazilian Government for authorization to operate a second weekly trip on the Rio-Corumba route, Mr. Rice was filing an application with the Government on behalf of Panair do Brasil for authorization to operate a weekly service on that route, and was doing this without awaiting the outcome of the Embassy's negotiations in connection with the Brazilian domestic aviation picture.

Mr. Latchford added that the State Department at once cabled to the Embassy (Ambassador Caffrey) stating that it felt that the action of Panairs do Brasil in the matter was precisely the correct one, and to delay the filing of the application might well be fatal, since after if Condor's application for the second weekly frequency was approved, Condor could then xxxxxx energetically oppose Panair do Brasil's application on the ground that with a twice-a-week frequency, a fully adequate service was provided, etc. Mr. Latchford added that the Department's cabled reply to the Embassy also contained a statement to the effect that the New York office of PAA would be verbally advised of the

substance of the Embassy's cable to the Department, and of the Department's reply thereto.

Mr. Latchford concluded by stating that most careful and very sympathetic consideration was being accorded to the matter of "Washington" affording adequate compensation for the proposed Panair do Brasil Rio-Corumba weekly service.

August 7, 1939.

Mr. P. P. von Bauer,
President,
SCADTA,
Barranquilla, Colombia.

Dear Dr. von Bauer:

Personal and Confidential

Just a hasty line today by which to let you know, for your strictly private and confidential information, that we have recently stated to the Department of State, Washington, that from now on no more German employees will be taken on by SCADTA. The Department still seems to be maintaining a rather keen interest in SCADTA and its activities. I know that you will be good enough to govern yourself in accordance with our statement to the Department.

With regard to the purchase of the Soledad property by SCADTA, I have submitted the entire question to Mr. Trippe, with all pertinent information and comment, and expect to have a conference with him in regard to it within the next few days.

With kindest personal regards,

Sincerely yours,

Evan E. Young,
Vice President.

EEY:O'N

[fol. 2846]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 196

[Handwritten notation—Colombia]

September 6, 1939.

President,
Executive,
New York.

Vice President,
Executive,
New York.

SCADTA.

CONFIDENTIAL

Referring to our conversation some time ago regarding Scadta and especially to the request you made at that time that the necessary action be taken by the Scadta Management to assure that in the event of the outbreak of hostilities in Europe, no untoward incident would occur on the part of any of the German employees of that Company, I submit the following report:

At the instance of Scadta, a Presidential Decree, applicable to all Colombian civil aviation operations, was issued, effective September 4. The Decree provides:

1. All public and private airports are placed under the control of the Minister of War. A military detail, consisting of an officer and ten men, has been placed at each airport and operating base where they are to remain on continuous duty.

2. A military officer or civilian employee of the Government is assigned to each airport and operating base as the "Airport Captain" or "Co-Airport Manager." They will be held responsible for the efficient control of all activities at the airports and operating bases, and no aircraft may take off without a "clearance" from them.

3. Colombian military pilots will, in the capacity of co-pilots, be in every plane and make every flight within

Colombian territory, with the exception of flights made by Colombian native-born licensed pilots.

In addition to the control measures embodied in the Decree, and at our instance, the following supplemental action has been taken or is under way:

1. A twenty-four hour watch, to guard against the remote possibility of sabotage of our planes, has been established at the important Soledad and Barranquilla operating bases.

2. An experienced and thoroughly reliable "operating" employee of our Company will be immediately transferred to Colombia with the principal duty of seeing to it that all of the "control" measures are efficiently and effectively carried out.

[fol. 2847] Frank Powers, one of our senior representatives at Rio de Janeiro, has been given this assignment and is now en route to Colombia.

3. The services of the German personnel in the Scadta organization, including pilots, will be dispensed with through retirement, grounding, and leaves of absence as rapidly as may be practicable without disrupting the organization.

4. Scadta will advise the Colombian Government that it is willing to sell to the Government Scadta's airport at Cartagena—the construction of which has been practically completed; this in order that the Colombian Government may, if it so desires, place the airport at the disposal of the United States military authorities in the event of an emergency.

5. The discontinuance by Scadta of its Barranquilla-Turbo service (the nearest operation to the Panama Canal) provided the operation would be taken over by Umca or conducted by a 100 per cent. Colombian entity.

The various measures mentioned above, including those provided for under the Presidential Decree, would appear to be fully adequate for the purpose in question. Moreover, we have the positive and formal assurances of the Scadta

Management, and we may place full credence in them, that no untoward incident on the part of any of the German personnel of that organization will be countenanced or permitted to occur.

[fol. 2848]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 197

Barranquilla, Colombia
September 28, 1939.

Mr. Evan E. Young, Vice President
Pan American Airways, Inc.,
New York City

Dear Mr. Young:

"Private and Confidential"

I had fully intended, while enroute to Colombia, to get a line off to you shortly after my arrival here, but a rather active program during the past week did not permit.

Arrived on schedule Wednesday, the twentieth, and remained at Barranquilla until Monday morning the twenty-fifth, at which time I proceeded to Bogota, returning here yesterday afternoon. My impressions gathered during the first week here, listed in order of importance as I see them, are as follows:

SCADTA ORGANIZATION

Mr. von Bauer: It is perhaps unnecessary for me to say that my immediate reaction was most favourable and coincides in all respects with your appraisal of him. He is a capable executive and a gentleman, respected and liked both within the organization and by the community as a whole. He received me most cordially and gave me the better part of his time during my first few days here. Altho it may be a bit premature for me to attempt, at this time, to analyze his reaction as a whole

to my presence here, I am inclined toward the opinion that he feels that it is wholly unnecessary insofar as concerns the operation of the SCADTA organization, and has acquiesced somewhat in deference to the wishes of Pan American Airways and those of the U. S. embassy at Bogota. While he has outwardly exhibited a most cordial attitude in his relations with me; I cannot help but feel that he looks upon me quite as an "outsider" whose presence here is to be countenanced only because of current conditions. I shall have ample opportunity to arrive at a more definite conclusion in this respect in the near future at which time I shall of course inform you in the premises. Altho we have discussed, in a general way, the contemplated consolidation, I have pointed out to him that my mission here is concerned only with the safety of operations insofar as pertains to the carrying out of the precautionary measures with which he is wholly familiar.

Colonel Boy: Appears to be a very serious minded man, quite capable, and "with both feet on the ground". He is genuinely liked and respected by all of the SCADTA personnel and enjoys very friendly relations in business and government circles. My talks with him to date have been extremely formal and, altho his attitude too is one of friendliness, there appear to be indications that his reaction to my mission here is quite similar to that of Mr. von Bauer.

In addition to the above named gentlemen, I have of course also met all "key" personnel, with whom however, I have had no occasion for extended conversation. I might mention here that Doctor von Bauer, at the outset, requested me to confine my inquiries regarding operations, statistical data, etc., to him in the interests of accuracy and in order that I may be assured that such information and figures as may be furnished me are correct. I have accordingly held strictly to his wishes in this respect.

[fol. 2849] OPERATIONS DEPARTMENT: While SCADTA's operations for the past several years might

well be interpreted to indicate a smooth running and efficient organization, their safety measures, when compared with those of Pan American Airways, suffer considerably. In this respect I refer particularly to the lack of emergency fields and adequate direction finding equipment, contact scheduled flying, and marginal single engine performance (Boeings) over mountainous terrain, etc. I am unable to inform you in detail as to any or all of these several points at this time, but should be in a position to do so in the very near future.

FLIGHT PERSONNEL: As you are of course aware, the major portion of the flight group, pilots and co-pilots particularly, is composed of native born Germans who, from a strictly operations viewpoint, have done and are doing an admirable job. They execute their duties in orderly fashion and appear, on the whole, to be a very serious minded group of young men. Most of them are married and raising families here, some of whom have been with the organization for a considerable number of years and own, or are purchasing, their own homes here in Barranquilla. I mention this latter point here, for I feel that it has a definite bearing in considering the status of the individual employee in this category. Unfortunately, from an organization viewpoint, most of these men are at the present time considerably worried as to their status with the Company as a result of the recent despatches that have appeared in the local press respecting the purported wholesale dismissal of their group. I have discussed this matter at length with Mr. von Bauer and we are in accord that it behooves us to tactfully exert every effort to dispel the idea for, quite obviously, it is an unhealthy condition at best. I am hopeful that, together, we may be enabled to shortly accomplish something toward that end.

U.S. EMBASSY—BOGOTA: Immediately upon arrival at Bogota on Monday, I arranged for an appointment with Ambassador Braden, which was set for three-thirty that afternoon. To say that the reception accorded me was friendly, would be somewhat of an understatement. Mr. Braden somehow seemed to feel that the presence of a Pan American Airways representative here just about settled

all of the worries that have been attendant upon him and his staff in handling the SCADTA personnel problem. Also present at this conference, which lasted approximately two hours, were Mr. Keith and Captain Munn. In the evening I was invited to the Ambassador's home for cocktails where I had the opportunity to meet Colonel Lang and Colonel Buenaventura, the recently appointed Director of Aeronautics, both civil and military, for Colombia, following which I had dinner with Captain and Mrs. Munn.

My general impression of the Ambassador and his staff is that they are, without any trace of doubt, wholly sincere in their handling of the SCADTA "problem." That they have accorded it a disproportionate amount of time and effort is quite evident, but understandable in the light of recent events here with respect to the outward anti-German feeling that exists on all sides in Colombia. I can well appreciate the Ambassador's feeling of responsibility before the American and British business representatives, as well as the British diplomatic group here as a result of their openly expressed views on SCADTA. It is a very much discussed topic as I learned from conversations with several of the American colony at Bogota, two of whom were old personal acquaintances of mine from Puerto Rico.

Insofar as concerns the actual operation of the airline, the Ambassador, as I mentioned previously, feels [fol. 2850] that my presence here relieves him of the flight personnel problem. He is however, very much interested in the contemplated merger of SCADTA and Saco and the new set-up as a whole, and appeared somewhat disappointed to learn that I was not sufficiently familiar with the various phases of negotiations to intelligently discuss the subject in detail. I mentioned that on the occasion of the forth-coming visit of Mr. Grant and either yourself or Mr. Riffl, he would no doubt be fully informed as to our plans.

Returning now to the matter of German personnel in SCADTA flight group, I somehow view with less apprehension the potential risk that exists with respect to the Canal

problem, now that I have had occasion to view the local picture. At the outset, the type of flight equipment employed renders the accomplishment of the purported objective quite impossible under adequate surveillance. True, there may possibly be one or more men in the group who might, under certain circumstances, be tempted to undertake the assignment, but the possibilities for success are indeed remote. Entirely apart from that phase of the elimination of the German flight personnel, I would point out that it is quite within the realm of possibility that the question may be brought up in connection with the organizing of the new Company, in which event it would appear advisable to endeavor to work out a plan for their gradual replacement. It is of course unnecessary to point out that, should the United States become involved in the present conflict, a radical change in this respect would immediately become mandatory. Under the circumstances therefore, I suggest the following for your consideration:

> It being only reasonable to assume that no sizeable group replacements could possibly be effected on relatively short notice because
>
> (a) the cost involved would render such procedure commercially inexpedient when viewed strictly from a dollars and cents viewpoint
>
> (b) the possible lack of qualified American (or Colombian) senior pilots
>
> (c) The time element involved, which would necessitate detailed familiarization with the routes flown and terrain.
>
> would it not appear more feasible to take on a group of Americans who hold transport pilot rating as co-pilots, for training with the present German senior pilots? Their presence as a member of the crew would accomplish the dual purpose of permitting strict surveillance during flight and at the same time afford the opportunity for familiarization with all routes. Should the removal of certain personnel become necessary, our position would thereby be greatly enhanced in that we

would have American personnel ready for check-out as the occasion arises. This recommendation is of course based on the assumption that the matter of expense is of primary importance, as well as the belief that it would be exceedingly difficult to find experienced American pilots, in what we know as the "Senior" group, might be willing to undertake a foreign assignment at this time even at an attractive financial inducement. On the other hand, it is wholly conceivable that the opportunity for comparatively rapid advancement to Senior Pilot status may be attractive to transport pilots now employed in the category of Junior- or Co-Pilots with American transport companies.

[fol. 2851] I have made no mention of this phase of the subject to Mr. von Bauer, and shall of course refrain from doing so until such time as I may receive your comment and instructions. It may well be, in the event that you concur in this respect, that the matter may be accorded a more cooperative or sympathetic reception by Mr. von Bauer were he to receive a recommendation of this nature direct from you.

There are a number of matters that I have not touched upon here that must necessarily be deferred until such time as I have had occasion to more thoroughly digest the local picture. I do hope however to forward you a full and detailed report in the very near future.

With kindest personal regards,

Most sincerely,

F. Powers (signed).

December 16, 1939

Mr. Ellis O. Briggs, Asst. Chief
Division of the American Republics
Department of State
Washington, D. C.

Dear Mr. Briggs:

Enclosed you will find a rough summary of the activities of Pan American since September 1st to date on the Scadta situation.

I am sorry it has taken me so long to gather this information but some of it had to come from out of town and then I could not devote one hundred per cent of my time to it. I am sure that you can realize that many hours can be spent discussing personnel matters. We have a very peculiar problem in that the men who go to Colombia for the most part will not remain there a great length of time due to the nationalization necessary under Colombia laws and doubly so with the government's participation in the reorganized Scadta.

For your information I am in receipt of a wire today from Mr. Corral in answer to one I sent him yesterday that no good would be accomplished towards the reorganization before the first week in January. I am informed that they celebrate in Colombia the Christmas holidays by closing down practically all business. I expect to be in Colombia on January 3rd.

We are proceeding actively in our endeavor to fill the position with Americans from our own organization, who will be able to function under the reorganization.

Very truly yours,

George L. Rihl
Vice President

[fol. 2855] December 15, 1939

Memorandum concerning action taken and being taken in Colombia on the Scadta situation

September 1st: Mr. Grant, a well-known legal authority on Latin America, went to Colombia to make a preliminary survey of the situation.

September 5th: Mr. Grant reported to Ambassador Braden.

September 8th: An interview was arranged between President Santos and Mr. Grant, the substance of which was reported in a memorandum to Ambassador Braden.

September 9th: A conference was called by the President, to which were invited the Minister of War, Mr. Grant, Colonel Boy, and Mr. Roca Castellanos, Colonel Boy's Assistant in Bogota. The last two mentioned gentlemen are in the services of Scadta. At this meeting the President outlined the general features of his nationalization program. The Minister of War took up the details of the stock participation

of native-born and naturalized Colombians and the Government. The results of this interview were likewise covered in a memorandum by Mr. Grant to Ambassador Braden.

September 10th: Mr. Grant went to Medellin for preliminary negotiations with the Saco company, looking toward the consolidation of that entity with Scadta.

September 11th: Mr. Grant began conferences with representatives of Saco and Scadta on the basis of indications made to Mr. Grant by the President and the Minister of War.

September 13th: Mr. Grant went to Barranquilla.

September 14th: Discussions were held with Messrs. von Bauer and Tietjen regarding legal changes that would be necessary in the original nationalization plan to accommodate the Minister's ideas regarding shares to be held by Colombian interests.

September 15th: Mr. Grant left Barranquilla for New York.

September 17th: Conferences were begun in New York on the results of Mr. Grant's trip to Colombia.

September 20th: Mr. Powers, one of Pan American's most experienced field men, stationed at Rio but summoned to New York for instructions before being transferred temporarily to Colombia, left for Barranquilla, where he is at the present time. Mr. Powers' transfer was made as a result of assurances given to Ambassador Braden by Mr. Grant. Mr. Powers reported to Ambassador Braden in Bogota shortly after his arrival in Colombia.

[fol. 2856]

Week of September 25th: Mr. Powers' preliminary report on his observations was received in New York and discussions begun in the New York office of the Company. Due to the legal, financial and political angles involved, the matter was given extensive study.

Week of October 7th: Messrs. Trippe and Rihl attended a meeting in Mr. Burke's office in Washington, and the Scadta situation was fully discussed.

October 11th: Mr. Grant returned to Barranquilla.

October 12th: Mr. Rihl went to Barranquilla.

October 16th: Messrs. Grant and Rihl arrived in Bogota and reported to the Ambassador.

October 18th: Mr. Martin Corral was summoned from Medellin for a conference regarding his accepting the presidency of Scadta. A tentative arrangement was made with him, subject to the approval of the President of Colombia.

October 23rd: An interview was arranged between the President and Mr. Rihl. At this conference the President outlined his desires in connection with the reorganization of Scadta and the proposed merger of Saco. A full report of this conversation was immediately made to the Ambassador.

October 25th: Messrs. Rihl and Grant proceeded to Medellin, together with Messrs. Corral and von Bauer and representatives of the Government and Saco, to complete a merger agreement with that company.

October 28th: Mr. Rihl departed for the Canal Zone to interview General Stone, leaving Mr. Grant in Colombia to work out legal details concerned with the reorganization of Scadta. General Stone was fully advised of the situation and the conversations between the Ambassador and Mr. Rihl.

October 31st: Mr. Rihl arrived in New York and began making arrangements to get technicians to Colombia.

November 5th: Mr. Leuteritz, Chief Communications Engineer, left for Colombia to begin a survey of the Communications system of Scadta and make a report on changes needed and the cost to complete same.

November 7th: A meeting of the Executive Committee of the Company was held, at which the Scadta situation was thoroughly analyzed. In view of the report made by Mr. Rihl on what had been requested by the Ambassador and required by the President of Colombia, it was decided that it would be impossible for Scadta to carry out such a program without additional financing, and this would not be possible until:

[fol. 2857]

a. A new operating concession and postal contract had been made by the Government which would give the company exemption from taxes, duties, etc., over a long period of time;

b. Execution of a management contract between Scadta and Pan American that would make it possible to comply with the desires of the President and the Ambassador.

e. Re-form the existing by-laws of Scadta to permit of the control of the company in order to conform with the new laws and desires of the President.

November 8th: Mr. Trippe went to Washington to see the State Department and Civil Aeronautics Authority on the Scadta matter.

November 9th: Mr. Rihl went to see the State Department on the Scadta matter.

November 10th: Mr. Whitney saw the State Department and the Civil Aeronautics Authority on the Scadta situation.

November 14th: An Executive Committee meeting of Pan American was held, and Mr. Rihl was given instructions to proceed to Colombia to work out the details of the necessary agreements to be made with the Government and Scadta.

November 14th: Mr. Rihl left New York for Colombia.

November 17th to November 20th: Messrs. Rihl, Grant and Mr. Corral, who was summoned from Medellin, agreed on the revisions necessary for the draft of the by-laws that had been prepared in Bogota.

November 21st: Mr. Steele, Assistant to the Chief Engineer, left Miami for Colombia accompanied by Mr. Bond, an operations manager on leave from China, and Mr. Zalduondo, Assistant Traffic Manager of the Eastern Division.

November 21st: Messrs. Rihl, Grant and Corral proceeded to Medellin for further conferences with the Saco interests.

November 26th: Messrs. Rihl, Grant and Corral left for Bogota to confer with necessary government officials and to report to Ambassador Braden.

November 28th: The Minister of War received Messrs. Rihl, Grant, Corral and Cruz Santos, a lawyer representing the Saco interests. At this meeting, the Minister who was representing the President, was handed drafts of the necessary contracts and a general discussion of the important points was held. It was at this meeting the minister stated that by December 15th or 16th the law then pending in Congress would pass and the President would have authority to make contracts that would give the reorganized company sufficient guaranties to permit of its operating on a commercial basis. A full report was made to the Ambassador.

[fol. 2858]

November 29th: Mr. Grant left for New York.

December 2nd: Mr. Rihl went to Barranquilla.

December 7th: Mr. Rihl left for Washington and New York.

December 8th: Messrs. Trippe and Rihl were received at the State Department where a verbal report was made.

Week of December 11th: Mr. Rihl began assembling data for preparation of the information contained in the present memorandum. Discussions were held and inquiries made regarding personnel that would be willing to go to Colombia.

December 15th: Word was received from Colombia that the law giving the President authority had been passed.

[fol. 2859]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 201,

[Handwritten notation—Scadta merger]

Copy

Bogotá Colombia,
January 18, 1940

Mr. Martin del Corral,
Hotel Granada,
Bogotá, Colombia

Dear Mr. del Corral:

This letter will express in general terms my understanding of the commitments under certain conditions that Pan American Airways, Inc. is willing to take in connection with the operation of Avianca.

We will assume the responsibility for the technical direction of the company, it to be understood that, while such responsibility is ours, Avianca will only employ personnel approved by us that are in any way connected with the operation of the flight equipment of the company. However, the employment or discharge of such personnel will be subject to due advice and consultation with the Management.

In connection with the technical direction of Avianca, Pan American is willing to assume the obligation of directing the training of Colombian personnel that will be capable of taking over the technical operation of the company. It is understood, however, that the Management of Avianca will cooperate with us in such form as we may from time to time request in order that this training may be facilitated and advanced as rapidly as possible within the financial resources of the company. We cannot be held at fault for the delay in training of Colombian personnel if Avianca does not always find it commercially possible to permit of the introduction into the company of such procedure and Colombian personnel as we may indicate.

As I have advised you on various occasions, we do not feel it will be necessary presently to discharge a substan-

tial number of the personnel of the company as now operating in order to comply with the aforementioned commitments. However, it should be understood that the training of Colombian personnel will unavoidably mean substitution over a period of time of a considerable number of the present employees, who may not be considered Colombians by the Government for the air transport industry in Colombia. It must also be remembered that any training program calls for cooperation on the part of the organization as a whole. It is not sufficient to merely have a few instructors, whose principal duty is to teach. If we find among the [fol. 2860] present personnel any resistance to the training program, such elements will, therefore, have to be eliminated.

We will expect, before formally assuming the obligations mentioned herein, to execute a contract with Avianca that will set forth the conditions as to length of our services, the flight and communication equipment that we feel Avianca will have to acquire during the next few years in order that Pan American may feel safe in assuming the responsibility for the nationalization of a company not owned by it, and the remuneration to be received by us for our services. We also feel that before signing the contract we should complete our undertaking to sell to the Government certain of our holdings in Avianca so that it will be, as a major stockholder, a party to the contract.

In order not to delay making the changes which will be necessary to accomplish the program outlined herein, we will assume all necessary responsibility meanwhile the negotiations are under way for the sale of our stock and formal signing of a contract covering the obligations we are undertaking.

Trusting you will find I have correctly stated the substance of our many conversations on these matters, I am

Yours faithfully,

George L. Rihl
Vice President

[fol. 2861]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 202

Translation

Letterhead of the Ministry of War
of the Republic of Colombia

Bogotá
January 23, 1940

Mr. George L. Rihl,
Vice President of Pan American Airways,
City

Esteemed Sir:

The Government has been carefully studying the proposed amended bylaws of Sociedad Colombo-Alemana de Transportes Aéreos (Scadta), which in future will be called Aerovias Nacionales de Colombia (Avianca), and inasmuch as among the provisions of said bylaws there are some which establish the definitive organization of the Board of Directors of the Company when the Government shall have exercised its option to acquire shares to complete 60%, I should be pleased if the stockholders' meeting, to be held today in Barranquilla, should refrain from setting up new situations which might constitute an obstacle for future but immediate negotiations looking towards an agreement on the regulations to govern the future life of the Company, once the Government shall have purchased up to 60% of the shares, and with respect to the course which the Government should adopt, insofar as concerns the procedure for nationalizing the Company. The shareholders' meeting today might confine itself to ratifying the incorporation of Saco into Scadta, to changing the name of the Company, to election of a new President and to the calling of a later meeting to be devoted to deciding upon the other measures which have been contemplated up to the present time. In the meanwhile, the Government would have opportunity clearly to agree with the interested parties upon its course of conduct in respect of the questions above mentioned, and this would undoubtedly be of

great convenience to the shareholders of the Company and naturally to the Government itself.

With sentiments of distinguished consideration, I remain,

Very truly yours,

(sgd.) José Joaquín Castro M.
Minister of War

[fol. 2862]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 203

Barranquilla, Col.,
January 25, 1940

Mr. Juan T. Trippe, President,
Pan American Airways, Inc.,
Chrysler Building,
New York, N. Y.

Dear Mr. Trippe:

I wish to herewith confirm my statement to you over the 'phone today that I have kept the Ambassador fully informed as to my actions since my arrival in Colombia. As far as I know, the Ambassador is in agreement with my course of action, though, naturally, he is disappointed that I have not been able to move more rapidly. I feel that he would have told me had he thought that I had been dilatory in any way.

At your request, I will try to give you a summary of what has occurred since my arrival and what is being planned. You will please understand that in none of my dealings with either the Government or the Scadta officials have I in any way referred to the Embassy. Even in my talks with Mr. Corral I have taken the attitude that what we had to be done was dictated by our interpretation of what the Government desired in the way of nationalization and our becoming responsible for the operation of the Company.

January 3rd. I arrived in Barranquilla and saw von Bauer, who told me as a matter of interest that Colonel Boy had been advised by the President not to make any further move regarding sep-

arating from Scadta. According to v.B., the President stated that he would give Boy his orders as his superior officer (Boy is a Colonel in the Colombian Army) as to what part he wanted him to play in Avianca. I advised Corral that I had to go to Bogotá the following day, which was in accordance with my instructions. Corral was advised that if he got the opportunity he should impress on the President that Avianca would need the full backing of the Government in making the German element in Scadta fulfil their obligations as employees. The President and the Minister of War were in Barranquilla when I arrived. [fol. 2863]

January 4th. Went to Bogotá and reported to the Ambassador. I told him what v.B. had said about Boy. The Ambassador felt that we should accept Boy's resignation, and I agreed to it. The Ambassador drew up a memorandum of what was to be done, copy of which you have.

January 5th. Returned to Barranquilla and found Johnston, Morrison and Titus there. Went over with Grant, Corral and Morrison manner of handling stock in Avianca deal.

January 6th. Spent entire morning in Scadta office discussing holding of stockholders' meeting and status of Saco liquidation. No decision made on meeting, as we had not sufficient information from Medellín regarding Saco deal. Had long discussion with v.B., in which he was advised that he could not hold a position in the Company or on the Board. Received word from New York to send Morrison back to Mexico immediately, but was advised that Rice would come down the following week. Sent estimates to New York on expenses of men to be sent down, the Scadta personnel to be let out and new equipment needed.

January 8th. Worked with Corral and Grant all day on Agenda for stockholders' meeting. Made up certain transitory clauses for the bylaws. Long talk with v.B. Found him bitter and ready to fight adoption of bylaws that kept naturalized Colombians from receiving equal

treatment with native-born citizens. Advised Morris did not know when would sign up with Government.

January 9th. Reported to New York by 'phone on the situation. Went over financial matters at the Scadta office with Tjetjen and Johnston.

January 10th. Talked with Trippe over the 'phone in Washington, who had not received my estimates, which were taken by Morrison to be mailed. Saw V.B. and Tietjen in the afternoon, the former stating he would not resign until arrangements had been made with him. He again mentioned matter of not being represented on the Board, and the fact that he would own 10% of the Company.

[fol. 2864]

January 11th. Tried to contact Ambassador in Medellín but without success. Told V.B. that we were not interested in whether Board of Directors approved our actions or not, and that stockholders' meeting would be held the following Wednesday. Also told him that I thought he was making a mistake in not being willing to resign. Had long talk with Rice on situation, and decided he should go back to Rio the following week so that he could return to Colombia as soon as possible.

Contacted Ambassador by 'phone in the evening and advised him what had been done. He stated over 'phone that he thought Boy could be kept if he was taken out of all operating control and given the job of convincing the Colombian public that native Colombians would make good pilots if given proper training.

January 12th. Talked with Tietjen in morning and Corral after lunch, who reported to me his conversation with the President and the Minister of War. Apparently the President very much disturbed over learning changes we were expecting to make.

Talked with Fendell, who had come down from Bogotá to see me about starting Public Relations Department. Fendell highly recommended by the Ambassador as standing in very well with all newspapers.

Saw the President in the evening for a few minutes and made engagement to see him Saturday evening late; to go into Scadta matters.

January 13th. Went through Scadta plant with President, Scadta representatives and other officials. Kuehl was guide. In the evening went into the Public Relations question very extensively with Rice and Fendell.

President sent for Rice at 7.30 and talked with him for an hour and a half about aviation in Colombia and Brazil. Corral was present and told me that Rice made a good impression. I saw the President from 9.30 until 11.15. The President obviously very much worried about our taking over management of Scadta, as he was greatly impressed by German influence noted on his trip through the plant. He asked me to go to Bogotá with Corral and have dinner with him the following week, before making final decision as to the changes that had to be made in Scadta.

[fol. 2865]

January 14th. Saw Corral and advised him that had agreed to go to Bogotá to see the President before taking final steps and taking over. I could not reach the Ambassador, but the Consul did later in the day. Corral worried over the President's attitude.

January 15th. Started checking and analyzing Scadta pay roll to ascertain ratio of number of Germans as compared to natives, and amounts paid respective classifications. Had talk with v.B. and Kuehl. Told Kuehl he would have to go. Wanted him to understand this fully, as he had been called to Bogotá to see the President for the following day. Kuehl refuses to resign as he feels confident President will insist that he be kept. Made no definite arrangement with Fendell, as do not feel he would be a good man in the long run for the Company. He is not a prepossessing type.

January 16th. Talked with Mr. Trippe, but difficult to explain situation, particularly as connection was not good. Discussed with v.B., Tietjen and Grant

Directors' and stockholders' meetings for following week. Received word from Corral that President had postponed meeting until Thursday night.

January 17th. Talked with Mr. Trippe just before leaving for Bogotá regarding price I was to ask for stock that we were to sell the Government. I was told that I was to only ask a price that would get us out without loss, which would be $53, U.S. currency per share. On arriving in Bogotá called at Embassy and talked with Keith and Wright. Saw Corral before he went to see the President. He wanted to be assured that PAA would co-operate in every way with Avianca.

January 18th. Discussed what Corral was to say to President at lunch that day; also discussed with him and Gabriel Valle a Mr. Echeverría, at present with American Foreign Power in Barranquilla, as a possible candidate for manager of Avianca. Saw Corral after his talk with President and reported same to Messrs. Keith and Wright.

Talked from Embassy with Mr. Trippe on 'phone, and reported situation. Dictated letters to Corral and the Ambassador, copies of which are attached. Did not send letter to the Ambassador, as talked to him afterward on the 'phone in Medellín. The Ambassador stated that he would not object if the President insisted on Selbstaadt being kept, and agreed to his being given some position on the ground or some work where he did not handle [fol. 2866] operations. Had dinner with the President, the Minister of War and Corral, but no decision was reached as to the handling of the Scadta situation. The President very insistent that only minor changes be made in the present organization, which I could not agree to, as we felt that it was absolutely necessary that all heads of departments and key operating men be either Colombians or Americans. The President stated he would see us the following day.

January 19th. Member of the President's family died and so he called Corral to advise that he could not see us both, but would see him some

time during the day. Reported to Embassy the status of the situation as it existed at that time, going into detail as to what had been discussed at dinner the night before. Helped prepare wire to State Department.

Talked with Mr. Trippe and Grant in Barranquilla about contract for sale of our stock. Went to Embassy in the afternoon and arranged to see Ambassador Sunday morning or, if possible, Sunday afternoon.

Corral saw the President and later explained to Odoño, Calle and me what had been said. Mr. Odoño is a member of the Board of Directors of Saco and a great personal friend of Corral's, as is Mr. Calle, who is also a Director of Scadta. Corral asked their opinion on what the President had said. They both agreed that either PAA take control of operations or they don't, as it would be utterly impossible to follow the President's suggestion that the management be continued as at present in Scadta, with the addition of one or two Americans.

January 20th. Talked with Corral over memo that President had given him the day before, copy of which is attached. Talked with Grant in Barranquilla about changes in bylaws and arranged for Mr. Echeverria to go to Bogota Sunday, which he did not do because he could get no space on the plane.

Reported to the Embassy in the afternoon, where I had copies made of the President's memorandum. Discussed with our lawyer, Uribe Holguin, legal matters regarding Saco and Cesantia Law. Had dinner with President, Minister of Hacienda and Corral. Arrived at no decision as the President was still insisting on no contract being made with PAA for management. He was most insistent that very few Germans be let out. He stated that most of them had been in the country many years and could be of great assistance in the operation of the Company. He made it very plain, however, that he wanted the cooperation of PAA and American interests in general. It was very clear that the President was trying to follow a middle of the road course, his policy being dictated by local politics.

[fol. 2867]

January 21st. Went to see the Ambassador at 4 p.m., who had returned that day from Medellín. Expected to be called by the President to continue the conversation of the night before, but the call did not materialize. Explained what had occurred the night before. Corral, Odoño and Calle came out to the Ambassador's house to make a courtesy call, and Corral advised that the President had just told him he wanted to see the three of them and Dr. Cruz Santos on Monday morning. I was not invited, but it meant I had to stay in Bogotá. Corral stated that night that he would have a showdown with the President in the morning.

January 22nd. After seeing the President in the morning, Corral advised me that nothing had been accomplished, but they were to see the President again at 5.30. I reported to the Ambassador in the afternoon and he prepared a wire for Washington. I saw Corral, Odoño, Calle and Cruz Santos about 9 p.m. They gave me a letter from the Minister of War, asking that we do certain things at the stockholders' meeting on Tuesday. Copy of this letter is attached. I advised that we would not confirm Saco deal as basis of that deal was that Government would give new contract to Avianca.

Advised the Ambassador at 11 p.m. new turn deal had taken, and I believe he countermanded sending the wire that he had prepared earlier. President had evidently mentioned the possibility of Government buying our entire interest, which Corral did not like, stating that if that happened, he would have nothing to do with the Company.

January 23rd. Went to see the Ambassador before leaving for Barranquilla to advise him more in detail what had happened the night before. Arrived at Barranquilla and went immediately to see Kuehl to ask him if he would not resign, which he refused to do unless he were given guarantee that resignation would not prejudice his cesantía (legal accrued compensation on discharge) and unless he got orders from the President. I did not feel as if I should fire him at the meeting as I was not sure that the President would consent

to his being discharged. It must be realized that while Scadta is a commercial company, it is entirely dependent on the President's willingness to give it a concession that will permit the Company to continue to operate on a favorable basis.

At the stockholders' meeting v.B.'s resignation was accepted, the name of the Company was changed and the ratification of the Saco deal was postponed for another stockholders' meeting. No President was elected, as Corral [fol. 2868] had advised me in the morning that he would not accept until it was clearly defined as to whether PAA was to be responsible for the technical management of the Company and the extent to which the Government expected to take part in the management of the Company.

January 24th. Discussed with Kuehl letter that he was to write the President, offering to resign. Could come to no agreement with him because of the cesantia he wanted. Apparently this matter will have to be left up to the Labor Board to decide, as there seems to be considerable difference of opinion as to the interpretation of the law.

Talked with Echeverria, who seemed to be a very intelligent man, with a background that should make him valuable to the Company. He is interested in the position, though no salary was talked; but he stated that he would not accept a connection if the Government had any active part in the management of the Company.

Talked to Schnurbusch about accepting an advisory position with the Company, which has the approval of the Ambassador. He promised to take the matter under consideration.

January 25th. Talked with Mr. Trippe, explaining how matters stood. He was assured that the Ambassador had been advised of the latest developments, and as far as I knew felt that everything was being done that could be done under the circumstances. It was explained that the ten days' delay seemed unavoidable, again taking into consideration that without a con-

tract, it would simply be impossible to justify any extraordinary expenses that may be required in order to try to nationalize the Company and thereby conform to the law.

Talked to Corral, who expected to see the President later. Saw Schnurbusch, who agreed to accept a position as adviser, but on the condition that his cesantía be liquidated at the present time. As we precisely want to avoid paying the cesantía at the present moment, do not feel that much progress was made with him.

Received call from Corral, in which he advised that he had had a very satisfactory interview with the President, who had made up his mind that it was not feasible to have German and American influence in the management, and that therefore he had decided that the Company could make a contract with PAA. Advised the American Consul at Barranquilla immediately, for transmission by secret code to the Ambassador. Corral asked that when I went to Bogotá I be prepared to quote a final figure as a fee for PAA's services. I called Mr. Trippe and reported the latest developments. He felt that 2% of gross was the [fol. 2869] minimum and that we could charge that amount only because of the fact that the Government was willing to grant an unusually favorable concession, and we wanted to show our cooperation. A 2% fee is certainly not unreasonable, though I expect to find a great deal of resistance, as the Government feels that the mere fact that we will have control over the operations should mean a lot to PAA.

I will leave for Bogotá on Sunday morning with an operating contract and concession already prepared. I hope to come to an agreement on all points next week, but it will be unusual to be able to conclude two such important documents as an operating concession and a contract for the sale of stock to the Government in that length of time.

With kindest regards, I am

Yours faithfully,

George L. Rihl

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 204

January 29, 1940

In order to confirm my recollection of the discussion with officials concerned in Washington some ten years ago when the arrangement with von Bauer was negotiated, I arranged a luncheon appointment today with Mr. Francis White, formerly Assistant Secretary of State. Mr. White not only confirmed the fact that he was familiar with our purchase of the majority of Scadta shares through Dr. von Bauer, but also stated he had been officially told at the time by the Minister from Colombia that no agreement was possible either with Pan American or the United States Government to fly through Colombia until an arrangement satisfactory to Scadta and Dr. von Bauer had been concluded.

He pointed out that Olaya had advised him that Scadta stood very well in Colombia. It had done a grand transportation job for the country. Notwithstanding Austrian stock interest it was considered a Colombian enterprise, and Dr. von Bauer was considered as speaking for Colombia, he in fact having been nominated as one of the two official delegates representing Colombia at the Havana Air Convention in 1928, where our Government was represented by Charles Hughes, Henry Fletcher, Francis White and others. Mr. White stated that the Colombian Minister, Dr. Olaya, had invited him to luncheon at his house to meet von Bauer in order to attempt to arrange landing rights for Scadta in the Canal Zone. Mr. White told me the technical regulations for flying into the Zone had been somewhat slowly prepared by the War Department following the Havana Convention, and also lay on his desk for a long time before promulgation by the Government of the Canal Zone. Mr. White further stated that this delay extended beyond the effective date of the Kellogg-Olaya Treaty. Also he recalled a date on which one of Scadta's key concessions would lapse due to the company's inability to fly through the Canal Zone. Mr. White reaffirmed from

recollection that a violent anti American campaign had been instituted by Scadta prior to the arrangement between von Bauer and Pan American and this was causing our Government much concern. He agreed also that a realistic approach to the problem of extending American air lines down the west coast of South America required an arrangement with von Bauer, and that at the time the concern of the War Department had had to do with the possibility of German pilots actually flying over the Canal Zone and not over Colombia as he had understood.

(The Kellogg-Olaya Treaty granted and still grants Scadta permission to fly in the Canal Zone proper and to the United States although Scadta had tried for years to obtain permission to fly to the Zone for commercial traffic connections. Following the transfer of stock from the von Bauer group to Pan American, Scadta shortly withdrew its service from the Canal Zone and no further effort was made to extend through there or to the United States.)

[fol. 2871] Another senior official with whom this Scadta problem was discussed in its initial stages, due to its extension of air mail service down the west coast, was Postmaster General New. No doubt Post Office Department files relating to this period will disclose most of the position.

In its proposal to the Postmaster General to transport mail on the west coast route (F.A.M. 9) Pan American-Grace Airways included an agreement between Pan American and Scadta whereby Pan American had exclusive rights to use the Scadta bases along the west coast of South America. This proposal was submitted only a short time after the arrangement with von Bauer and the enactment of the Kellogg-Olaya Treaty.

J. T. Trippe

[fol. 2872]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 205

PAN AMERICAN AIRWAYS, INC.

MINUTES OF REGULAR MEETING OF EXECUTIVE COMMITTEE — MAY 14, 1940

The President reported briefly on progress of the program which was currently being carried out in Colombia at the request of the American Ambassador and high officials of the State and War Departments concerned. He stated that 22 Americans designated by Pan American were already in Colombia, including officials serving as General Manager, Assistant to General Manager, Operations Manager, Maintenance Engineer, Chief Pilot, and Communications Superintendent; also that this group included five American pilots, and that three additional American pilots were scheduled to arrive in Colombia within the next thirty days. He said that One Pan American long range Adcock direction finder had already been calibrated and was in operation at Baranquilla, and that substantial progress had been made in erecting two other direction finders. Mr. Trippe pointed out that with the arrival of the remaining American pilots above referred to and the placing in operation of the remaining two ground direction finders, the program requested of Pan American by United States officials as being in the public interest and required in connection with the defense of the Canal and which had been agreed to by Pan American will have been completed. The actual cost to Pan American Airways, Inc., he further stated, will have closely approximated the sum of $50,000, excluding equipment transferred not required for the com-
[fol. 2873] mercial operation of the service, for which Scadta will be billed only a nominal amount.

Mr. Trippe also reported on a conference which had been held with Ambassador Braden that morning at the request of the Department of State. There were present in addition to Ambassador Braden and Mr. Trippe, Mr. Thomas Burke, Chief of the Division of Inter-American Communications of the Department of State, Mr. Thomas Morgan, Chairman

of the Executive Committee, and Vice-President George L. Rihl. Mr. Trippe stated that he had submitted at the conference the outline of a program which he referred to as Plan B. This plan would provide for the simultaneous separation from the Scadta service of the following technical employees:

14 pilots
12 flight mechanic radio operators
42 mechanics
10 airport managers
7 radio men

He pointed out that the date of separation would be approximately thirty days following the date on which Plan B would be placed into effect. He stated that he had pointed out to Ambassador Braden and Mr. Burke at the conference that Pan American had drawn up Plan B on the assumption that current developments in Europe might require, in the opinion of the United States Government officials concerned, a more far-reaching program than that covered by Plan A, currently being carried out.

Mr. Trippe reported that Ambassador Braden and Mr. Burke had stated at the conference that the Department of State and other Government agencies concerned felt that [fol. 2874] a program looking towards the early separation from the active service of Scadta of all European technical personnel was required and would be in the public interest and necessary in connection with further plans having to do with the defense of the Canal. The Ambassador indicated, however, that some difficulty might be expected where all technical personnel who had been in Scadta service more than five years separated or discharged without the approval in advance of the President of Colombia. The Ambassador referred to conversations that had been had in Colombia with the President and the Minister of War both by himself and by Mr. Rihl. He inquired whether it might be possible to amend the plan outlined by Mr. Trippe so as to place, if required, these older employees in a retired status but continuing them in Scadta's employ.

Mr. Morgan stated at the conference that he was in general in full accord with the program and that he would favor the change suggested by the Ambassador in the event the necessary permission from the President of Colombia was not forthcoming. The Ambassador stated that he would take the matter up with the President of Colombia through the Embassy and would shortly be prepared to advise Messrs. Trippe and Rihl whether or not the President of Colombia would interpose objection to the simultaneous separation of all European personnel, including personnel of European origin now in Scadta service, but expressed the hope that there would be no delay in Pan American's undertaking to proceed with this program.

[fol. 2875] Mr. Trippe then explained that although Pan American controlled Scadta there was an appreciable Colombian minority interest that would undoubtedly object to the management assuming the costs mandatory under Colombian law in discharging employees, when such action was not commercially justifiable and which would seriously affect the company's financial position. It was therefore evident that the minority interest would have a perfectly valid claim against Pan American unless these costs could be absorbed in some way by Pan American. Mr. Burke stated that the Department would be glad to submit a confidential letter to the Civil Aeronautics Authority setting forth that the expenses to be incurred by Pan American, which Mr. Trippe had estimated to be an additional $250,000, would be in the public interest and required in the interest of the national defense of the United States, and that appropriate consideration should be given such an expenditure in connection with future rate cases.

Mr. Trippe reported that the conference with the Ambassador and Mr. Burke had adjourned after his agreement that he would recommend to his Board that Pan American Airways be authorized to proceed with the program on request by the Government officials concerned.

Thereupon, Mr. Morgan presented his views, outlining the desirability of immediate action being taken by the

Executive Committee. After general discussion, it was proposed, seconded and unanimously carried that an appropriation of $250,000 be authorized to cover the expenses to [fol. 2876] be incurred by Pan American in connection with Plan B, in addition to the $50,000 previously authorized for Plan A.

[fol. 2877]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 206

PAN AMERICAN AIRWAYS, INC.

MINUTES OF REGULAR MEETING OF EXECUTIVE COMMITTEE — MAY 24, 1940

Mr. Trippe reported to the meeting on the status of the program for the nationalization of the Colombian service. He stated that the President of Colombia had given permission for the separation from the active service of Scadta of all European technical personnel, and that the discussion which was held at the last meeting of the Executive Committee had been approved by the United States Department of State.

[fol. 2878]

PAN AMERICAN AIRWAYS, INC.

MINUTES OF REGULAR MEETING OF EXECUTIVE COMMITTEE — MAY 28, 1940

The meeting considered a report by Mr. Trippe on the progress of reorganization Plan B relating to the realization of the Colombian service. He stated that at a meeting held in Washington last week, which was attended by representatives of the Navy Department and the Department of State, such program had been completely endorsed and that data relating to the expenditures made by the Company in connection with carrying out such program would be available for consideration in connection with future rate cases.

Mr. J. T. Trippe, President
Pan American Airways Corporation
Chrysler Building
New York, N. Y.

Dear Mr. Trippe:

In accordance with various resolutions promulgated by the Stockholders' meeting of the SCADTA on Saturday, June 8th, this company will henceforth be known as AEROVIAS NACIONALES DE COLOMBIA, S. A. (AVIANCA). The cable address of the new company will be "AVIANCA" at all points in Colombia.

While you will of course receive official copies of the minutes and resolutions of the meeting referred to above, through the conventional channels, it is the purpose of this letter merely to inform you promptly of the change of name of the company, in order that notification of all offices of Pan American Airways may be facilitated.

Very truly yours,

/s/ M. J. RICE

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 209

Memorandum of Conference with the Civil Aeronautics Authority Reference Scadta

On Thursday, June 13, 1940, Mr. Trippe, accompanied by Mr. Cooper, appeared before the Civil Aeronautics Authority.

There were present Vice Chairman Branch and Mr. Ryan of the Civil Aeronautics Authority, also Mr. Pogue, General Counsel, and Mr. Gates, Chief of the International Division.

Mr. Trippe stated: that he wished to advise the Members of the Authority of the Scadta situation and the developments leading up to the present position—that he had not previously done so because of the request of the State Department and recent developments and plans be kept absolutely confidential and not discussed with other agencies until arrangements for installing complete American management and personnel in place of former German management and personnel had been put into effect, that this secrecy was deemed necessary as any preliminary publicity might have given rise to sabotage.

Mr. Trippe described briefly the circumstances leading up to the purchase by Pan American Airways of a majority interest in Scadta—the arrangements under which former management and personnel had been allowed to continue—the opportunity which Pan American Airways had been offered by Dr. Von Bauer in 1938 to resell to him (or to persons whom he represented) the entire Pan American Airways interest without loss—that Pan American Airways had refused to make this sale because of its feeling that the sale would be inconsistent with the best interests of the American position in South America—that this offer and the apparent ability of Dr. Von Bauer to finance the resale was the first occasion on which Mr. Trippe and other Pan American officials who had dealt with the Scadta situ- [fol. 2881] ation had become suspicious of Dr. Von Bauer's motives.

Chairman Hinckley of the Civil Aeronautics Authority joined the meeting and thesdiscussion continued in executive session after the withdrawal of Mr. Pogue and Mr. Gates.

Mr. Trippe then described representations made to Pan American Airways in 1939 by the State Department, Ambassador Braden, and the War Department, insisting that the defense of the Canal Zone required elimination of German management and personnel from the Scadta organization, and the request that Pan American Airways arrange promptly for such elimination as a matter of national defense—that "Plan A" was adopted, as a result of these representations. Under this Plan, Pan American Airways, in the latter part of 1939, installed complete Pan American management for Scadta, installed direction finders to keep check on the movements of Scadta planes, and proceeded with a gradual plan of substitution of German flight and ground personnel, explaining that the Colombian Government up to that time had been unwilling to allow the discharge of Scadta personnel who had been in service for over five years.

Mr. Trippe then described the later conferences in the early part of 1940 with officials of the State and War Departments who insisted that the complete exchange of personnel must be made without delay in aid of the national defense—that as a result Plan B was agreed upon—that under this Plan secret arrangements were made to fly into Colombia sufficient American personnel to take the place of all German flight and ground personnel still employed by Scadta—that due to the situation in Europe the Colombian Government had finally and very recently indicated that it would make no objection—that on the day prior to the conference the Plan had been put into effect, all services for Scadta had been suspended for two days, and that on [fol. 2882] the day following, services would be resumed using new American personnel only.

He further explained that Colombian labor laws required that large payments be made to discharged Scadta personnel that it would be necessary for Pan American

Airways to bear this expense in addition to its own direct expenses in sending its personnel to Colombia to take over the Scadta management—that the total of these direct non-recurring capital outlays by Pan American Airways would aggregate over $400,000—that, in addition, the higher salaries to be paid American personnel would add to the operating costs of Scadta about $150,000, making a total outlay which Pan American Airways would incur, of between $500,000 and $600,000 by the middle of 1941, all of which had and would be spent as a national defense requirement and not as a result of commercial requirements.

The Authority then discussed with Mr. Trippe the manner in which Pan American Airways could be reimbursed for these national defense outlays, stating that no method existed under which the Authority could repay the non-recurring capital disbursements—that the additional operating costs of Scadta after 1941 might possibly be taken into consideration in fixing Pan American Airways rates in the Latin American services under an inter-company agreement between Pan American Airways and Scadta—that, however, all expenses incurred by Pan American Airways in aid of the national defense ought to be repaid to Pan American Airways by agencies or departments other than the Authority.

It is hoped and expected that Scadta as thus reorganized under American management will be designated as the Colombian National Company.

Thereupon the meeting adjourned.

[fol. 2883]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 210

PAN AMERICAN AIRWAYS, INC.

MINUTES OF ADJOURNED REGULAR MEETING OF EXECUTIVE COMMITTEE NOVEMBER 12, 1940

* * * * *

Mr. Trippe reported that acting under instructions from the Committee he had phoned Mr. Evan E. Young at Barranquilla on November 7th and November 8th. Mr. Young had requested Dr. Corral to furnish him with assurance that all twenty eight of the remaining German or Colombian naturalized German employees of Avianca would be released during the ensuing six weeks' period. Dr. Corral had advised him that he did not consider such action could be carried out without considerable risk to Avianca and furthermore that such action in such short time would be considered as a second "blitzkrieg" in Colombia and would bring about further political complications embarrassing to the company and the President of Colombia. Dr. Corral stated to Mr. Young he would immediately call on the President of Colombia at Bogota and confer with him as to whether he would approve the six weeks separation period. Dr. Corral advised Mr. Young that on his return from Bogota after seeing the President he would be prepared to state to Mr. Young whether he would carry on as Avianca's chief executive or resign. It requested to furnish the above mentioned assurance.

Mr. Trippe stated he expected to receive word from Mr. Young as to the matter during the week of November 11th. Mr. Trippe also reported to the Committee that he had outlined the position to Under Secretary Welles during an interview at the State Department on the afternoon of November 8th and that Mr. Welles had stated that he would send instructions to Ambassador Braden to intercede with the President of Colombia in an effort to secure his acquiescence in obtaining the approval of the program to be presented to him by Dr. Corral.

[fol. 2884]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 211

PAN AMERICAN AIRWAYS, INC.

MINUTES OF REGULAR MEETING OF EXECUTIVE COMMITTEE NOVEMBER 19, 1940.

* * * *

Mr. Trippe thereupon reported to the meeting upon the inspection trip to Colombia made by Mr. Evan E. Young, a Senior Vice-President of the Company, and also upon a supplemental conference which had been held with Acting Secretary Welles.

Mr. Trippe said that he had stated to Acting Secretary Welles that the Company would eliminate all of the remaining twenty-eight German and Colombian naturalized German employees of Avianca if Secretary Welles thought such action necessary. It was the sense of the meeting that the Company was prepared to continue to do everything possible requested by the State Department in carrying out the program for the release of all of such employees of Avianca, regardless of whether Dr. Cisneros would be willing to continue as Avianca's Chief Executive.

[fol. 2885]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 212

July 10 1941.

[Handwritten notation—Brazil operations—Corumba]

Memorandum of telephone conversation between Messrs. Rihl and Harding today, July 10th

I called Mr. Harding to advise him that Mr. Young had just talked with Mr. Rice in Rio, who told him that the Condor was applying for a second schedule to Curumba. Mr. Rice stated that while the starting of a second service

by Condor might not eliminate Panair do Brasil from that run, yet it would make it difficult, particularly in view of the necessity of coordinating the schedules with Panagra. The Government could also take the position that the route was sufficiently served by a twice a week service.

Mr. Rice stated that Mr. Burden was very much concerned over the situation, and so Mr. Rice recommended to Mr. Young that he be given permission to take the necessary steps to have Panair do Brasil open the service immediately. I told Mr. Harding that Mr. Young had given the necessary authority and that the service would be opened at once, unless for some unforseen reason Mr. Tripp, who was absent, objected. Mr. Harding wanted to know if we had enough Lodestars to carry on the service and I told him we did, certainly for the time being. I also told Mr. Harding that as urgent action seemed to be necessary we were foregoing a commitment on the part of Washington regarding the expenses, but that we would expect Washington to take care of the cost in some way. Mr. Harding stated that they would use their best efforts to see that we were compensated, and seemed extremely appreciative of our action.

Mr. Harding, in a joking manner, stated he had heard there was a lot of traffic on that run.

G.L.R.

[fol. 2886]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 213

PAA MEMORANDUM FORM

		DATE	July 15, 1941
TO	President	FROM	Vice President
DEPT. OR DIV.	Executive	DEPT. OR DIV.	Executive
LOCATION	New York	LOCATION	New York

SUBJECT:

Suggested Panair do Brasil Rio-Corumba Service.

REFERENCE:

As you of course know, Pan American-Grace Airways recently inaugurated a service from the Pacific Coast, via LaPaz, to Puerto Suarez, near the Brazilian border, and is currently planning to extend this service to Corumba, on the Brazilian side of the border.

CONDOR, the wholly owned German national company, now operates a subsidized service on a once-a-week frequency between Rio and Corumba. It recently applied to the Brazilian Government for permission to increase the frequency to twice-a-week.

As the situation now stands, CONDOR would be the only connecting carrier (Corumba) with Pan American-Grace Airways, and this end-on connection would of course strengthen CONDOR's position not only as regards this particular line, but also its position in general in Brazil.

In view of the foregoing, I recently telegraphically exchanged comment with our senior representatives at Rio de Janeiro with regard to the practicability of Panair do Brasil, our Brazilian national company, operating a service between Rio and Corumba, on a once-a-week frequency.

There is attached a copy of my most recent telegraphic report from our Rio office. You will note the comment therein respecting the importance of the suggested operation in connection with the "de-Germanizing" of Brazilian domestic aviation. Also, the comment to the effect that if the service is to be operated, Pan American Airways should be prepared to guarantee a suitable return on the capital investments and operating costs involved.

I fully concur in Panair do Brasil's statement that if it is to undertake this service we should be prepared to guarantee a suitable return, for instance 10%, and I advance the suggestion for your consideration that if the U.S. Post Office Department would accord mileage pay to Pan American Airways for the presently unpaid-for fourth trip (Rio-Porto Alegre-Buenos Aires sector) at the rate of $1.80 southbound and $1.00 northbound, our company would then [fol. 2887] be in a position to accord the guarantee to Panair do Brasil, as set forth in their telegram. This non-paid-for fourth trip between Rio and Buenos Aires via Porto Alegre, was inaugurated December 17th last, and has been operated continuously since then. The matter is both an important and an urgent one. The Brazilian operating rights for Pan American-Grace Airways to extend to Corumba are expected daily, and unless we are to see CONDOR reap a substantial benefit from the Pan-Grace situation, and incidentally strengthening CONDOR's basic position in Brazil, prompt action would appear to be required. It is earnestly recommended that Panair do Brasil receive the fullest support from our company in connection with a Rio-Corumba service, if Washington can make it possible for us to accord such assistance.

There is attached hereto brief factual data regarding the route under discussion, together with a rough sketch map.

Office of the President — July 18th, 1941

C. V. Whitney, Esquire,
Chairman of the Board
Pan-American Airways Corporation
Chrysler Building
New York City.

Dear Sonny,

In accordance with Roig's conversation with you, I have pleasure in enclosing copy of the letter I propose sending to the CAB on Monday, and also a copy of the Minutes of Special Meetings of the Board of Directors and Stockholders of the Pan American Grace Airways. The letter is for you and any associates that you choose to show it to, but obviously it is confidential until it is delivered to the CAB.

I am going to Montauk and will be at Gurney's Inn from today at Noon until Sunday morning. On Sunday I will be in Westbury and Monday morning in my office. If you want to speak to me at any time I will be available.

Yours sincerely,

(Dictated by)

D. STEWART IGLEHART

[fol. 2890]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 216.

July 21, 1941.

Civil Aeronautics Board,
Washington, D. C.

Attention: Hon. Harllee Branch, Chairman

Dear Sirs:

New Orleans/Panama Service
Docket No.

Pursuant to our Notice of Intention to file application for the above route, Gulf & Caribbean Airways, Inc., a wholly owned subsidiary organized by us, filed corresponding application July 21 as per copy enclosed. We feel that we should point out certain circumstances in reference to the filing of this application which do not appear from a reading of the application itself.

As you know, jointly with Pan American Airways Corporation we formed Pan American-Grace Airways, Inc. (Panagra) about twelve years ago. This company is operating a direct trunk line air service (over 7,000 route miles) serving the Panama Canal Zone and seven South American countries: Panama, Colombia, Ecuador, Peru, Bolivia, Chile and the Argentine. It is now instituting service to Corumba, Brazil, where it will connect with a Pan American line running to Rio. It enjoys great prestige and is one of the most potent American influences in the southern continent.

The proposed New Orleans/Panama route is a logical extension of the existing service of Pan American-Grace Airways, Inc. Such an extension providing a direct and independent connection with the United States for Panagra's great trunk line would add greatly to the efficiency of the Panagra operation and measurably facilitate and improve the service between the United States and the important South American countries on the Panagra route. For these reasons and because it would provide a second complete and independent direct line between the United States and South America, such an extension would clearly be in the national interest. As a 50% stockholder of Pan American-Grace

Airways, Inc. we have, therefore, felt that this New Orleans Panama route should be applied for and operated by that company as an extension of its existing route.

Application has not been filed by Pan American-Grace Airways because Pan American Airways Corporation, the other 50% stockholder in Pan American-Grace Airways, Inc. has been unwilling to agree to the filing of such application or to consider the modification of certain agreements or alleged agreements which they consider preclude Pan American-Grace Airways from filing such application without their consent. As the directors representing Pan American Airways on the Board of Pan American-Grace Airways, Inc. have refused even to attend meetings of the Board of that company for the purpose of discussing the question, all action by Pan American-Grace Airways in the matter has been rendered impossible.

For the reasons indicated, we believe that Panagra should apply for and operate this New Orleans Panama route. The action of Pan American Airways Corporation above referred to makes this impossible. Our only recourse, therefore, is to file this application by Gulf & Caribbean Airways, Inc. with the understanding that if it is granted the connecting service will be operated in a manner designed to accomplish so far as possible the objective that would be attained by its operation as an extension of the Panagra Route and with the further understanding that if prior to final decision on the application of Gulf & Caribbean Airways, Inc., Panagra should be in position to file and should file application herein, Gulf & Caribbean Airways, Inc. would be willing to arrange for the withdrawal of its application.

[fol. 289] We respectfully request that pursuant to Sections 205(a), 415 and 1002(b) of the Civil Aeronautics Act 1938, the Civil Aeronautics Board institute an appropriate proceeding to determine whether, under Sections 408, 409, 411 and other relevant provisions of the Act, Pan American Airways Corporation and the directors of Panagra who are also director and/or officers of Pan American Airways

Corporation are justified in preventing the filing of an application by Panagra in its own name for the New Orleans-Panama Route, and take such other action in the premises as the Board may deem appropriate.

Respectfully yours,

W. R. Grace & Co.
President

[fol. 2892]

Pan American World Airways, Inc. Exhibit 217

August 2, 1941.

Memorandum of Points to be Considered in Connection with Charter of Equipment.

The general basis of the proposed arrangement is understood to be that each of the companies shall receive the revenues and be chargeable with the expenses on the sector for which it holds a certificate but that aircraft of one company would be physically operated over the route of the other. This is to be much along the lines of the agreement dated March 17, 1939, as amended under date of August 15, 1940, between Western Air Express and United Air Lines, approved by the C.A.B. in Docket No. 215. This memorandum is prepared to outline certain questions which must be determined before it would be feasible to attempt to set the detailed terms of the arrangement down in writing.

(1) *Route.* It is understood that the discussion commenced in connection with PAA's New Orleans application. Any arrangement in respect of the New Orleans route would necessarily have to be contingent on the granting of so much of PAA's application as provides for service between New Orleans and the Canal Zone, and this would be on a "when, as and if" basis.

At my conference of Friday with Mr. Poig and Mr. Cogswell
~~Campbell~~, we discussed the possibility of making the ar-

rangement applicable to the Canal Zone-Miami route, although I stated that I had no knowledge whether Pan American would be disposed to agree to such an arrangement. This point should be explored.

If the arrangement is made applicable to the Miami route, there will be then a question as to whether it should also be made applicable to the New Orleans route on a "when, as and if" basis or whether it should be confined to the Miami route. If the arrangement were to be made applicable to the New Orleans route, would this be on a firm basis or would it be optional with Panagra?

While there was some discussion as to making Gulf and Caribbean Airways a party to the arrangement, it appears that any such plan would necessarily involve the transfer to PAA of any certificate issued to Gulf and Caribbean, and the C.A.B. would hardly be disposed to issue a certificate to Gulf and Caribbean on any such basis. In other words, if satisfactory charter arrangements are made and approved by the C.A.B., it would seem to follow that the Gulf and Caribbean application would not be pressed.

(2) *Character of Charter.* Is it intended that the charter should be reciprocal, that is, involving not only the use of Panagra equipment on PAA routes but also the use of PAA equipment on Panagra routes?

(3) *Effective Date.* At present the only available equipment which would be satisfactory for the proposed charter are the three Boeing S-307 four-engine aircraft owned by PAA. If the arrangement contemplates the use of PAA equipment on Panagra routes, would it be made effective immediately or would it await the delivery of DC-4s to Panagra?

[fol. 2863] (4) *Number of Schedules to which Charter Arrangements are to Apply.* There would have to be some agreement on the number of schedules per week to which the charter arrangements would apply. This might be either a fixed number, or a minimum and maximum with provisions for notice by one company to another in the event of changes within the agreed range.

(5) *Schedules and Stops.* The agreement would have to provide that the hours of departure and arrival of the connecting schedules should be either as specified or as fixed by mutual agreement. A somewhat allied question is that of intermediate stops. Paragraph 13 of the agreement between Western Air Express and United Air Lines provides that the party over whose route the plane is being operated shall have the exclusive right to fix the scheduled stops. This would seem inherent in an arrangement whereby the party over whose route the plane is operating receives the revenues and is chargeable for the expenses of the operation. The agreement might, however, contain a provision to the effect that the purpose of the parties is to provide satisfactory through service and that the determination of intermediate stops is to be made with this underlying purpose in mind.

(6) *Cost of Charter.* In the Western Air-United agreement, the charter was at cost, including depreciation, but with no return on investment. This question should be explored as regards the proposed arrangement.

(7) *Crews.* Paragraph 3 of Western Air-United agreement provides: "The crew of each airplane used in conducting connecting schedule service under this agreement * * * shall be employed and serve as heretofore only on the routes of their respective employers." Such an arrangement is advantageous from the standpoint of route familiarity, coordination with ground personnel, and in connection with the problem of risk of loss. As against this, there may be a question of type familiarity if the chartered equipment is of a type used by one company and not the other. Definite decision must be reached on this point, as it affects the charter hire, risk of loss, etc.

(8) *Risk of Loss.* The Western Air-United agreement provides (par. 24) that the risk of loss is on the company over which route the aircraft is being operated. This would seem obviously the right solution of the problem where that company's flight crews are operating the plane. If the owner's flight crews continued to operate, this problem would occasion considerable difficulty. The agreement requires the using party to insure unless the owner is

satisfied with the user's self insurance. This would appear to be a fair provision.

(9) *Publicity, Time Tables, etc.* An understanding would be required as to the method in which the service of DST chartered airplanes would be made known to the public. The Western Air-United agreement is fairly vague upon this subject. Paragraph 10 provides that each party shall display in the cabin a sign disclosing the name of the owner and the name of the operator. Paragraph 12 provides that tickets shall distinctly show that the trip east of Salt Lake City is being made via United and the trip west of Salt Lake City via Western. Paragraph 32 provides that United shall permit Western to display on its DST airplanes the word "Mainliner".

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 218

October
29th
1941

Mr. Harold J. Roig, President
Pan American-Grace Airways, Inc.
New York, N. Y.

Dear Harold:

Recent government action indicates that no four-engine equipment, either Constellations or DC-4s, will be released for purchase by the airlines until late spring or summer of 1943. In view of this situation Pan American Airways has placed conditional orders for forty-three DC-3s for use on Latin American services and Alaska.

The indications are that deliveries on DC-3s to the airlines will be authorized commencing in June, 1942, approximately a year before any four-engine equipment could be anticipated. While Pan American-Grace has as yet placed no orders for DC-3s, Pan American in its priority applica

tion has reserved six of the forty-three above referred to for Pan American-Grace Airways.

Should Pan American-Grace not avail itself of all or part of these six ships, to the extent allocated, Pan American would, of course, be glad to purchase them or any part thereof. The 1942-43 allotment by the government of DC-3s for commercial use as between Pan American and domestic airlines is already under way.

I will appreciate your advising me before November 5th, the date of the next Pan American Board meeting, as to Pan American-Grace's decision with respect to these six ships. Unless Pan American-Grace takes advantage of this option I see no opportunity for our joint company to provide additional capacity so urgently required south of the Canal Zone until adequate four-motor equipment is available for express services.

Sincerely,

J T T

President

[fol. 2895]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 219

November 4, 1941

W. R. Grace & Company,
7 Hanover Square,
New York, New York

Dear Sirs:

We have your letter of October 27 in reply to our letter of October 22. Our letter of October 22 was not, as you characterize it, "a categorical refusal to provide connecting service for Panagra's fourth trip as at present operated." Our letter merely pointed out that this fourth trip is not properly spaced to provide adequate through mail or passenger service, and suggested that Mr. Roig or Mr.

Harris confer with our System officials with a view to arranging suitable schedules for four adequately spaced trips per week. As a matter of fact, we have been at all times, and still are, anxious to institute a fourth schedule between Miami and the Canal Zone and it was with a view of presenting the matter in the most favorable light to the Post Office Department that we suggested in our letter of October 22 that Mr. Roig or Mr. Harris work out a revised schedule with our System officials.

The proper officials of the Post Office Department have been asked to approve a fourth direct schedule on a basis which would afford connections with the fourth schedule which has been inaugurated on our joint service. The Department will not approve at this time a fourth direct mail trip between Miami and the Canal Zone to connect with the new schedule inaugurated on the West Coast.

In view of this fact there is no occasion to reply to the other statements contained in your letter, although it should be said that with regard to most of such statements we are in complete disagreement.

We again ask that Mr. Roig or Mr. Harris cooperate in the preparation of an adequate schedule for a through fourth trip. In our opinion an adequate fourth through [fol. 2996] schedule would move more United States mail than would a trip connecting with the present fourth trip of Pan American Grace, and would enhance the likelihood of the Post Office Department being willing to designate a fourth direct trip between Miami and the Canal Zone as a regular mail schedule for Pan American Airways. Obviously, the interests of Pan American Airways are prejudiced until this can be accomplished.

There is clearly not the slightest occasion for holding the special meeting of the Board of Directors of Pan American Grace which has been called for November 5 to consider a proposal that Pan American Grace extend its route from the Canal Zone to Miami or other terminal or terminals in the United States, and in this connection apply to the Civil Aeronautics Board for the necessary certificate of convenience and necessity.

Substantially the same proposal has been repeatedly advanced by the Grace interests in direct conflict with the agreement under which Pan American-Grace was organized.

Such a proposal was first advanced by the Grace interests in the winter of 1938-1939, when, after extended negotiations the parties came to an agreement on February 14, 1939, effective until February 1, 1944. Notwithstanding the fact that such agreement disposed of the matter, a like proposal was again advanced by the Grace interests in January, 1941, when a special meeting of the Board of Directors of Pan American-Grace was called for the purpose of considering a proposal that the joint company extend its route to New Orleans. However, Pan American again considered the matter and came to the conclusion that such an extension would not only constitute an unwarranted departure from the prior agreements of the two stockholders, but would not be in the interests of Pan American-Grace itself, and we so advised Mr. Roig.

Six months later, however, another special meeting of [fol. 2897] the Board of Directors of Pan American-Grace was called, this time for June 18, 1941, to consider the proposal that the joint company extend its route to New Orleans. The matter was again presented to the directors of our Company with the result that they were again unanimously of the opinion that it would be neither in the interests of our Company or of our jointly owned company, or in the public interest, for our representatives on the Board of Directors of Pan American-Grace to approve such proposal. We wrote you under date of July 22, 1941, confirming this, but also advising you that in line with our agreement with you of February 14, 1939, we were glad to submit the matter to arbitration and requested that such arbitration be held at once. As you know, we have never had a reply to our letter of July 22, 1941 (a copy of which is attached hereto).

Nothing has transpired since which could in any way alter the position which we have heretofore taken. The adequate competing service provided for in the agreement

of February 14, 1939 has been maintained and, as stated above, we are not only willing, but anxious to inaugurate a fourth schedule between the Canal Zone and the United States as soon as approval by the postal authorities can be obtained. Such approval is, of course, essential not only from a business point of view but is also required by our agreement with you of February 14, 1939 which provides that, with the exception of a second trip between Miami and the Canal Zone, Pan American Airways "shall not be obligated to operate any schedules and services not designated by the Post Office Department as mail schedules."

Under these circumstances no useful purpose can be served by further discussion of the proposed extension by our respective representatives on the Board of Directors of Pan American-Grace, particularly these days when our officials are so much occupied with matters having to do with [fol. 2898] the National Defense. Accordingly our representatives on the Board do not expect to attend the special meeting which has been called for November 5.

We remain willing, however, as we stated in our letter of July 22, 1941, to arbitrate the matters involved in accordance with the provisions of our agreement with you of February 14, 1939, and we repeat the request therein made for such arbitration. We will appreciate it if you will advise us of your position in this respect.

Very truly yours,

PAN AMERICAN AIRWAYS CORPORATION

A. GARNI
First Vice President

November 12, 1941

Pan American Airways Corporation
15 Exchange Place
Jersey City, New Jersey

Dear Sirs:

We refer to your letters of November 4th and July 22nd.

It seems hardly necessary to reply to yours of November 4th in detail. The facts speak for themselves. There was no "agreement under which Pan American Grace was organized" in conflict with the idea of their coming through to a terminal in the United States. There is nothing in the agreement of February 14, 1939 which prohibits the question being raised in the manner in which it has been. The meeting called for November 3, 1941 was in pursuance of that agreement and your refusal to permit your representatives on the Panagra Board to attend that meeting was in direct violation of its explicit terms.

As you will recall, immediately following our receipt of your letter of July 22nd, discussions were begun between Mr. Trippe and Mr. Roig looking to a settlement of our problems and reply to that letter was accordingly deferred pending the outcome of these discussions.

Both of your letters under reply suggest arbitration under the agreement of February 14, 1939. In our opinion the questions at issue do not come within the arbitration clause of that agreement at all except the question of the adequacy of your connecting service between Miami and the Canal Zone. As to that, and the other questions at issue,

we would call your attention to the fact that the agreement specifically provides that the questions to be arbitrated are those which cannot be settled by the Board of Panagra. The [fol. 2900] action of your representatives who are directors of Panagra in refusing to attend meetings of Panagra called for the purpose of discussing the questions at issue has made impossible even an attempt by the Board of Panagra to dispose of these questions as directors of Panagra acting under their full legal responsibility as such and has thereby eliminated these questions from the arbitration clause of the agreement.

In our opinion, it is in the manifest interest of Panagra and in the public interest that Panagra should apply for a route between the Canal Zone and a terminal in the United States. Your letters under reply deny this and repeat what you have so often and so frankly said before that your Board of Directors and your Executive Committee have considered the matter and decided that this is not in the interest of your company. In our opinion this matter is not one to be decided by your Board of Directors or by your Executive Committee, nor one to be decided with reference to the interests of your company. In our opinion the directors of Panagra are under not only a general legal responsibility as directors but also under a very special duty by virtue of various provisions of the Civil Aeronautics Act and the order of the Civil Aeronautics Board permitting them to hold the interlocking positions which they occupy, to administer the affairs of Panagra as an independent air carrier entirely and exclusively in the interest of Panagra and in the public interest. The position which has been so repeatedly and so outspokenly taken by your company and by the representatives of your company who are directors of Panagra, namely, that while acting as directors of Panagra their actions in matters where they consider there is a conflict of interest should be dictated by your Board of Directors and by your Executive Committee and should be governed primarily by what is in the interest of Pan American Airways rather than by what is in Panagra's and the [fol. 2901] public interest, is at the base not only of the present difficulty but of others which have arisen from time to time.

We feel that the orderly administration of Panagra's affairs, provision for its normal growth and development and its ability to be of maximum service to the United States Government requires prompt clarification of the existing situation. The body best qualified to determine the paramount public interest in the situation is the Civil Aeronautics Board. We see no alternative but to submit the entire matter to the Board for its determination of the following propositions:

1. Whether or not directors of Panagra should pass upon Panagra business brought before them as directors of Panagra and entirely from the standpoint of what is in the best interest of Panagra and in the public interest and without regard to the interest of any other company with which interlocking relationships exist.

2. Whether or not Panagra should have the full standing of an independent air carrier in every respect and be in position to take prompt and uncontrolled action in any and all matters without deadlocks, refusal to attend meetings or other negative action by some of its directors having the effect of putting one air carrier (Pan American) in control of another (Panagra).

3. Whether or not Panagra should in the public interest as well as in its own interest forthwith take steps to bring its service through from the Canal Zone to Miami and/or New Orleans thus providing an independent through trunk line over the Panagra Route from Buenos Aires to the United States.

Very truly yours,

W. R. GRACE & CO.

Dear Sirs:

We refer further to yours of November 4th.

Recent discussions in connection with the proposed Camaguey stop in which we have pointed out some of the difficulties with the existing Miami/Cristobal service and the effect of the Camaguey stop thereon make it unnecessary to discuss here the portions of your letter relating to these subjects.

The draft agreement attached to yours under reply appears to be merely one providing for mutual options, thus committing no one to anything until the mutual exercise of these options. Otherwise it follows pretty literally the United/Western Air form rather than attempting to develop from that as a starting point, a setup which might, as the writer originally suggested and hoped, meet our particular problem. Every point to that end which the writer discussed with Mr. Trippe is in this proposed agreement resolved in accordance with Mr. Trippe's views and contrary to those the writer expressed:—hardly an indication of a desire to settle the matter in this form. As drawn, the agreement seems to accentuate and perpetuate rather than to ameliorate Panagra's present position. Whatever its usefulness may be in other directions, we do not see that the proposed agreement meets our basic problem.

While we might readily answer your other statements, we do not believe that any useful purpose would be served

by further correspondence at this time regarding these quite irrelevant matters.

Very truly yours,

PAN AMERICAN-GRACE AIRWAYS, INC.

President

[fol. 2903]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 222

January 27, 1942

The Honorable
The Postmaster General
Washington, D. C.

Dear Sir:

Pursuant to schedules on file with your department, Pan American Airways, Inc. since September 1940 has been operating with Boeing S-307 four-engined strato-clippers three high speed trips per week between Miami, Florida and the Canal Zone, these trips departing from Miami on Tuesday, Thursday and Saturday of each week and from the Canal Zone on Sunday, Tuesday and Thursday of each week. At the time when these trips were inaugurated, the appropriation was inadequate to permit payment for all of them and payment has been received for only one of these three weekly round trips, the other trips being operated as voluntary flights. It was proposed at the time that new rates would shortly be fixed by the Civil Aeronautics Board and that all these schedules would then be designated as mail trips.

The increased volume of traffic to the Canal Zone as a result of national defense activities and the inauguration of additional schedules south of the Canal Zone by Pan American-Grace Airways, Inc. make an increase in the service to that point desirable. It is now possible for us to inaugurate a fourth weekly trip with Boeing S-307 four-

engine equipment, with southbound trips departing from Miami on Tuesday, Thursday, Saturday and Sunday and northbound trips returning from the Canal Zone on the same days, all on the same schedule now applicable to our Tuesday and Thursday trips. Within the next month we expect to be able to add a fifth and sixth weekly trip.

We are quite willing to stand by the arrangement made in August, 1940, with respect to the voluntary character of the second and third trips although it was not, of course, supposed that the arrangement would remain in effect for any such length of time. However, it would appear to us that any additional trips operated on this vital trunk route should be operated as mail pay schedules in the same way as the four round trips per week now designated between Miami and Rio (and three round trips per week between Rio and Buenos Aires) via the east coast route and the four round trips per week now designated between the Canal Zone and Buenos Aires via the west coast route. If your department concurs in our view as to the desirability of this proposed additional service to the Canal Zone, we respectfully request that your department designate the fourth proposed schedule for mail pay and indicate whether it is prepared similarly to designate the proposed fifth and sixth weekly schedules.

Very truly yours,

PAN AMERICAN AIRWAYS, INC.
By:

Evan E. Young
Vice President

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 223

POST OFFICE DEPARTMENT

Second Assistant Postmaster General

Washington

January
28
1942

Mr. Evan E. Young
Vice President
Pan American Airways, Inc.
Chrysler Building
New York, N. Y.

My dear Mr. Young:

Reference is made to your letter addressed to the Postmaster General January 27, concerning the desirability of providing a fourth weekly flight on FAM 5 between Miami and the Canal Zone, in which you refer to the fact that specific payment is made for only one of the three present weekly flights between those points, the other two flights being operated as voluntary flights, and state that it appears any additional flights operated on this vital trunk route should be operated as mail pay schedules, with request that if the Department concurs in this view it indicate whether it is prepared similarly to designate also fifth and sixth weekly schedules.

The rates of pay for service by your company on FAM routes 5, 6 and 8, are based upon bids submitted more than 13 years ago (and bids for FAM 10 were submitted more than 11 years ago), with certain negotiated changes also made some time ago. It must be assumed that the rates heretofore fixed that may have been necessary to meet the conditions of traffic and the character of equipment available at that time, may not be the reasonable rates under present conditions and that perhaps the pay already received for the service as a whole may be sufficient to cover service including the proposed flight.

It appears necessary in the proper administration of the service to await the issuance of the rate order, before authorizing pay for the proposed additional flight, or, if your company sees fit to make the flight without the mail pay authorization, to have the mails carried on the voluntary flight without specific pay until such time as the rate order becomes effective.

Sincerely yours,

SMITH W. PURDUM
Second Assistant Postmaster General

COPY

[fol. 2905]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 224

COPY COPY

March 12, 1942

The Honorable Smith W. Purdum
Second Assistant Postmaster General
Washington, D. C.

My dear Mr. Purdum:

At the conclusion of the conference this afternoon in your office you asked that we submit a letter to the Department, setting forth the financial arrangement under which Pan American Airways, Inc. would be able to undertake additional services on certain trunk lines to Latin America.

For the period ending June 30, 1942 or until such earlier date as the appropriate rates for such services are set by the Civil Aeronautics Board, Pan American Airways, Inc. would agree to operate, if designated by the Post Office Department:

(a) Four additional round trips per week between Miami and Canal Zone, via Camaguey, at the rate of $1.00

per mile southbound and $.60 per mile northbound—an average of $.80 per mile for the contract rate of 800 pounds. Any additional mail tendered would be carried at a pro rata reduction of the contract rate, namely $.50 per pound per 1,000 miles southbound and $.30 per pound per 1,000 miles northbound;

(b) Four additional round trips per week between San Juan, Puerto Rico and Buenos Aires, via Port of Spain, Belem, and Rio de Janeiro, at the rate of $.80 per mile southbound and $.40 per mile northbound—an average of $.60 per mile for the contract load of 800 pounds. Any additional mail tendered would be carried at a pro rata reduction of the contract rate, namely, $.40 per pound per thousand miles southbound and $.20 per pound per thousand miles northbound.

The Company is prepared to provide daily service between Miami and the Canal Zone via Cienfuegos,** effective next Monday, March 16th. The fourth and fifth weekly service between Puerto Rico and Buenos Aires, via the San Juan-Port of Spain cut-off, and the "Belem-Rio de Janeiro cut-off" could be instituted within approximately a week after designation of such additional service by the Department. The sixth and seventh weekly trip between San Juan and Buenos Aires would take a somewhat longer period to institute pending the availability of additional flight equipment which we expect shortly to have allocated in view of the current urgent need of additional service brought about by the suspension of surface shipping between the United States, Brazil and the Argentine.

Respectfully,

John C. Cooper
Vice President

** Should have read "Camaguey".

In replying mention number, initials and date

June 11, 1942

Mr. John C. Cooper
Vice President
Pan American Airways, Inc.
135 East 42nd Street
New York, N. Y.

My dear Mr. Cooper:

Reference is made to previous correspondence including your letter of March 12, with respect to the authorization of service on additional flights between Miami and Balboa and between San Juan and Buenos Aires via the East Coast. Reference is also made to the new schedules issued by your company, effective June 1, which include the additional flights.

This matter has been given very careful consideration with the view of taking action that would be fair and proper, in connection with which the office of the Civil Aeronautics Board has been consulted as to the sufficiency of payments being made by the Department under the mail pay authorizations already issued.

For the present authorizations have been issued under which the company will receive the same pay as heretofore and the additional flights that are of material value for mail service will be used as voluntary flights without spe-

cific pay, under the provisions of the contracts and amendments thereto. Copies of the orders are enclosed.

Sincerely yours,

Smith W. Purdum
Second Assistant Postmaster General

BEFORE THE
CIVIL AERONAUTICS BOARD
Docket No. 779

In the Matter of the alteration, amendment and modification of the certificate of public convenience and necessity of

PAN AMERICAN-GRACE AIRWAYS, INC.

under section 401 (h) of the Civil Aeronautics Act of 1938, as amended, to provide for a route terminal in the United States.

PETITION OF THE ANTITRUST DIVISION OF THE DEPARTMENT OF JUSTICE FOR LEAVE TO INTERVENE

TO THE HONORABLE
THE CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

Comes now your petitioner, the Department of Justice, and respectfully represents that it has a substantial interest in the matters in controversy in the above entitled proceeding and desires to intervene in and become a party to said proceeding, and for grounds of the proposed intervention says:

I

That the Department of Justice is the governmental agency upon which rests the duty and responsibility for the enforcement of the antitrust laws.

II

That the federal antitrust laws are applicable to carriers for hire engaged in interstate or foreign commerce; that your petitioner is concerned with any agreement or arrangement between such carriers which restrains compe-

tition or constitutes an attempt to monopolize; that there [fol. 2909] is sought in this proceeding a determination by this Board whether the route of the Pan American-Grace Airways, Inc. (hereinafter called Panagra) should be extended from the Canal Zone to the United States and to allow expansion of its terminal facilities; that the attempted limitation of such expansion by other interests as hereinafter set forth, involves the question of suppression of competition and the public issues of restraint and monoply.

That your petitioner is informed that Pan American Airways, Inc. (hereinafter referred to as Pan American), its officers and directors, and others, have sought through divers ways to impede, obstruct and stifle the efforts of Panagra to expand as proposed in this proceeding and thereby compete effectively with Pan American.

That your petitioner is further informed that Pan American, which owns 50% of the stock of Panagra, has through a continuous course of conduct sought to render ineffective the ability of Panagra to successfully compete with Pan American in air commerce in and between the South American nations and the United States, and more specifically Pan American has sought and will seek as a party to this proceeding to oppose before this Board the extension of Panagra's services and expansion of its terminal facilities in the United States; and that the effect of such opposition, if successful, will be to continue the exclusive air transport rights between the United States and the South American countries in Pan American.

III

That because of their property interests private parties to the proceeding are not primarily concerned with the substantial public issues involved; that the Department of Justice, through its Antitrust Division, is the only governmental agency charged with the duty of investigating complaints with respect to restraints and monopolies and [fol. 2910] to present evidence thereon; and that participation by the Department of Justice in this proceeding is in furtherance of the anti-monopoly policy of Congress as

expressed in the Civil Aeronautics Act of 1938, as amended, which the Board administers, and the federal antitrust laws which the Department of Justice must enforce.

WHEREFORE, your petitioner prays leave to intervene and be treated as a party hereto with the right to have notice of and appear at the taking of testimony, produce and cross examine witnesses, and to be heard in person or by counsel upon brief and at the oral argument, if oral argument is granted.

Respectfully submitted,

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 227

[Handwritten notation—12/21/42]

CONFIDENTIAL

Summary of Agreement and Action Taken Regarding Reimbursement for Costs of De-Germanization Services in Brazil

As a result of discussions initiated by Defense Supplies Corporation early in 1941, Pan American Airways Inc. agreed to cause its subsidiary, Panair do Brasil, to operate certain so-called "De-Germanization services to replace Condor in Brazil. These services were provided for in a contract dated October 31, 1941 between Defense Supplies Corporation and Pan American. Throughout the preliminary discussion between representatives of Defense Supplies Corporation and Pan American, which lead to the contract, it was understood that Panair do Brasil would be reimbursed for operating the services in question which, under normal circumstances, would not be justified commercially.

After considering various methods of reimbursement proposed by Pan American, Defense Supplies Corporation

finally prevailed on Pan American Airways to agree that an effort would be made to obtain the reimbursement through the mail rate fixed for the Latin American operations of Pan American with the understanding that Defense Supplies Corporation would use its best efforts to get the Civil Aeronautic Board to agree to this.

Accordingly it was provided in the contract of October 31, 1941 that if, within the time specified, Pan American submitted to the Civil Aeronautics Board a contract with Panair do Brasil covering the services in question and if such contract was not approved by the Civil Aeronautics Board, then Pan American could withdraw from the contract with Defense Supplies Corporation. The purpose of this provision was to enable Pan American to get from the Civil Aeronautics Board a commitment to pay for the services on a fixed basis set up in its contract to be made with Panair do Brasil before Pan American was obligated to carry out the program called for in its contract with Defense Supplies Corporation.

[fol. 2913] After considerable negotiation between Defense Supplies Corporation and the Civil Aeronautics Board and between the Defense Supplies Corporation and Pan American following the submission of the contract with Panair do Brasil, Pan American was advised that the Civil Aeronautics Board would approve the contract if certain modifications were made. They were made but the Civil Aeronautics Board then declined to approve that contract. In its letter dated December 20, 1941 declining such approval the Civil Aeronautics Board did state:

> "that any losses incurred by Panair in performing the services specified in the contract between the Defense Supplies Corporation and Pan American (or such of them as may be designated by the Defense Supplies Corporation), provided the standard of honest, efficient, and economical management are met, will be treated as a legitimate cost by Pan American in rendering its international services and; furthermore that a reasonable profit to Panair will also be treated as a legitimate cost of Pan American in rendering said services and will be considered by the Board in deter

mining the need of the carrier under section 406 (b) in fixing the rate of compensation to be paid Pan American."

This was not satisfactory to Pan American since it left the matter completely unsettled and involved the whole situation with the difficulties and complications of an ordinary rate case. However, Pan American had in the meantime commenced to carry out the contract with Defense Supplies Corporation and the de-Germanization services were in operation to a large extent. Therefore relying upon the assurances from the Civil Aeronautics Board and the hope that a fair settlement would be made, Pan American and Panair do Brasil proceeded to carry out the de-Germanization program.

In its decision in the rate case dated August, 1942, the Civil Aeronautics Board concluded that the services provided for in the contract between Pan American and Panair do Brasil would produce an adequate profit without outside assistance so that no allowance was required pursuant to the letter referred to above. The profit estimated by the Board was approximately 5% as compared with a return of [fol. 2914] 10% allowed on Pan American's Latin American services. Moreover, the Board's conclusion was obviously erroneous. This was exactly the situation Pan American had imagined because of the difficulty of submitting proof in a late case to satisfy the Civil Aeronautics Board.

In a petition for rehearing, reargument and reconsideration of the rate case decision, Pan American pointed out that there were certain errors in the estimates upon which the Board relied in reaching its conclusion, regarding the de-Germanization services. For example, the Board had assumed that the mail compensation, including subsidies, would be the same on the de-Germanization routes as on the routes previously operated by Panair do Brasil. This conclusion was obviously erroneous because no subsidy has been received for any of the de-Germanization services. Furthermore, the operating record of Panair do Brasil since commencing the de-Germanization services shows a very marked decrease in earnings. In fact that Company showed a loss of $26,112.59 for the first 9 months of 1942.

as compared with a net profit of $192,030.59 for the 9 months of 1941.

By its order dated November 25, 1942 the Civil Aeronautics Board granted in part the petition for rehearing and permitted Pan American to introduce additional evidence on the point in question. A study is now being made in order to prepare such evidence and to determine what part of the loss of earnings in recent months was due to the de-Germanization services. It is apparent that considerable work will be required to make a complete segregation of the revenues and expenses of the de-Germanization services and there is no assurance that any payment will ever be obtained for the services even though Pan American feels that something is due if the basic understanding with Defense Supplies Corporation is to be carried out. Furthermore Pan American and the Board would like to get the rate case cleared as soon as possible.

The contract of October 31, 1941 provides that it expires on December 31, 1942, with an option to Defense Supplies Corporation, exercisable any time prior to December 10, 1942, to continue the contract to the end of December 1946. This option was not exercised, Defense Supplies Corpora- [fol. 2915] tion having notified Pan American that it had no intention of continuing the contract.

In informal discussions earlier this year with representatives of Defense Supplies Corporation it was indicated that the contract would not be continued beyond the end of this year and at that time it was suggested that Pan American should present a lump sum bill for the cost of operating the de-Germanization services. Now that it is definite that Brasil's obligation to operate the de-Germanization services will terminate at the end of 1942, it would appear to be simpler to follow this suggestion of Defense Supplies Corporation, namely, to reimburse Panair do Brasil by a lump sum payment to be determined by an appropriate study of the records after the operation under the contract has been completed, rather than to attempt to keep the rate case open and to have an adjustment of the rate made for the period prior to December 31, 1942.

The various considerations set forth in this memorandum all indicate that a lump sum payment would be the best and fairest way of terminating the matter. As a suggestion, such a payment might take the form of a reduction of the purchase price of the Lodestar aircraft now due from Pan American to Defense Supplies Corporation. It is therefore suggested that this be taken up with the appropriate representatives of Defense Supplies Corporation. If it could be agreed that a lump sum payment will be made, the rate case could be terminated promptly without further consideration of the de-Germanization services and the amount of the payment could be determined by a study satisfactory to Defense Supplies Corporation. Pan American would be willing to undertake the study alone or to cooperate with any representative of Defense Supplies Corporation in making it.

Mr. Harold J. Roig, President
Pan American-Grace Airways, Inc.
7 Hanover Square
New York, New York

Dear Harold:

Upon my return from Miami yesterday I found that Pan American is working on the preparation of exhibits for the Latin American certificate case and in this connection is developing and planning postwar traffic schedules to be operated with L-49's (Lockheed Constellations) or other similar new equipment. The question has arisen as to whether it would be desirable for us to consider the inter-

change of this new equipment between Pan American Airways and Pan American-Grace Airways so as to enable a single ship to be flown all the way from Miami to Buenos Aires and return.

I further learned that Pan American-Grace Airways is working on similar exhibits and has been in touch with Pan American's Traffic Department in this connection. I am therefore writing to ask if you would care to discuss the question of interchange of equipment between the two companies for presentation in this case.

Very truly yours,

/s/ HOWARD B. DEAN
Howard B. Dean

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 229

Memorandum of Conference

During the morning of Tuesday, May 16, 1944, I called Mr. Harrison Tweed, counsel for Pan American-Grace Airways, and said to him that there was an important matter in connection with the Latin American certificate case which we would like to discuss with him and Mr. Roig. Mr. Tweed fixed the appointment for Mr. Roig's office at 2:30 P.M.

Mr. Balluder and I called at Mr. Roig's office at that time and met Mr. Roig and Mr. Tweed.

I stated that a problem had arisen in connection with the Latin American certificate case which we wished to discuss with them. I said that this problem had been creating difficulty at the conference which we had had with the Panagra representatives on the previous afternoon, and had been rendered acute by a final decision which had been made at a meeting with Mr. Trippe which had followed.

I said that in the course of discussions with Mr. Trippe over the past several weeks, there had developed a new idea having an important bearing upon the presentation

to be made in the Latin American certificate case, and that a final decision to proceed upon this basis had been made at a meeting in Mr. Trippe's office the previous afternoon. I said that this idea was one which we regarded as of considerable importance and that we would like to make it available for consideration by Pan American-Grace but that it was equally important to us that it should not be the property of other applicants until the exhibits were exchanged on June 1. I said that our natural impulse would have been to go to Mr. Roig and place the thought before him in confidence but that the question had arisen in our minds whether he would feel that he was in a position to receive it in confidence. I mentioned the fact that he was a director of Grace Line, Inc., which was an applicant, and that Mr. Garni was a director not only of Grace Line, Inc. but of Eastern Air Lines. I said that we felt in view of this we should first ascertain whether Mr. Roig felt that he could discuss the matter with us without feeling that he was under obligations to reveal it to these other applicants.

Mr. Roig said that so far as the Eastern Air Lines problem was concerned he felt this could be dismissed; that in this case he considered Eastern Air Lines just as much the enemy of Pan American-Grace as we considered it to [fol. 2918] be the enemy of Pan American; and that from a Pan American-Grace viewpoint he would insist that nothing be given to Eastern Air Lines which would be of value to them. He said, however, that the Grace Line matter presented quite a different problem. While he had nothing to do with the preparation of Grace Line's case he naturally did see the Grace Line people and there was a question in his mind whether he and his colleagues could withhold from Grace Line information that might be of value to them.

Mr. Tweed asked whether the idea in question was of such a nature that not knowing it would hurt Panagra. I said that the question whether the idea was a good one or not, of course, was debatable; that we thought it was good and that consequently it was our view that for Panagra not to know it would be a disadvantage to that company. I said also that if Mr. Roig felt that he could not receive this material in confidence I believed that it would be necessary

to terminate the discussions which had been going on between the traffic and operating officials of Pan American and Pan American-Grace in connection with the preparation of the certificate case exhibits. I said that the idea in question affected various matters which would come up in these conferences and that our people could not properly continue the discussions unless they were in a position to make this material available to the Pan American-Grace staff.

I said that whether or not this would be a detriment to Panagra was also a question on which there might be different opinions.

Mr. Tweed asked whether the idea was one which Mr. Roig would not have unless we placed it before him. I said that all I could say on this was that I had seen no evidence that he had it, although perhaps this was the kind of mystery which was actually well known to everyone. I apologized for having to make such a secret out of the matter but said that obviously when we were discussing whether a disclosure could be made I could not very well make the disclosure.

Mr. Roig said that the matter was very difficult; that if he felt that the suggestion was of no importance he would be inclined to take the position that he had better not know of it but that, on the other hand, if it was of importance he did not like letting his Grace Line connections interfere with the welfare of Panagra. He said that the very fact that we thought that the idea would be good and of sufficient importance to take up with him in this way, made him feel that in all probability the idea fell in the latter category.

[fol. 2919] There was some discussion of the possibility of my disclosing the idea to Mr. Tweed with the thought that if he considered it to be entirely without merit there would be no need of Mr. Roig's pursuing the matter further. I said that I was perfectly willing to do this but it seemed to be agreed that Mr. Tweed would hardly wish to take the responsibility of saying that the idea was not even worth consideration.

Mr. Roig said that he would like to consider the matter further; that it appeared to him that the only way in which

it could be handled would be for him to obtain authority from his Grace colleagues to handle the matter on his own on behalf of the Grace interests, and that he would do this as soon as Mr. Garni returned from Washington. I emphasized the need of a speedy solution for the reason that I thought the conferences between the staffs would have to be suspended until a decision was reached.

Mr. Tweed produced a memorandum from Mr. deGroot stating that he was disturbed over the fact that Pan American was now estimating that it would deliver 20,000 people a year to Pan American-Grace at Balboa, and that this would produce an 83% load factor in contrast to the 40% which Mr. deGroot had previously estimated. This increased load factor would throw Pan American-Grace into a profit rather than a subsidy category. I said that I did not know the source of the 20,000 figure or how it had been arrived at, although I had no doubt that the increase over previous estimates was the result of the proposed lowering of fares. I said also that this discrepancy might be a result of the new ideas on which we were proceeding and afforded an illustration of the fact that continued collaboration would hardly be possible unless we could discuss the matter freely with Mr. Roig.

Mr. Balluder and I then returned to the Pan American office. We advised Gen. Roop, Mr. Ferguson and Mr. Chenea of the talk which we had had with Mr. Roig and they agreed to instruct their staffs to advise the Pan American-Grace officials who were seeking conferences that these would have to be deferred pending a decision which Mr. Roig was making on a matter that we had placed before him.

On Wednesday, May 16, Mr. Tweed telephoned me. He said that Mr. Roig had told him that he had cleared the [fol. 2920] matter with his Grace colleagues on the basis that Mr. Roig alone would handle the matter for the Grace interests, and would like to discuss the matter further on Thursday. An appointment was made to meet at Mr. Roig's office on Thursday, May 17, at 10 A.M.

[fol. 2921]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 230

Memorandum of Conference

Pursuant to appointment, Mr. Ballinger and I called at Mr. Roig's office at 10 A.M. on Thursday, May 18, 1944. Mr. Harrison Tweed attended the conference. This conference was held pursuant to the understanding that Pan American had certain plans with regard to its presentation in the Latin American certificate case which it desired to reveal in confidence to Mr. Roig and Mr. Tweed, and which they were prepared to receive in confidence.

I stated that over the past few weeks we had had a number of discussions with Mr. Trippe in regard to the presentation to be made in the Latin American certificate case; that Mr. Trippe had the feeling that our proposed presentation was of too commonplace a character, and that unless Pan American and Pan American-Grace came out with something new and different the effect upon the position of both companies would be unfavorable. I said that Mr. Trippe also had the feeling that there was great interest in Government circles in Washington in mass transportation to Latin America and this not so much to tourist resorts, such as the West Indies, but to the countries of Latin America with which our future commerce and trade might be of great importance—such as Brazil, Peru, Chile and the Argentine. Mr. Trippe felt that this mass movement could be accomplished only through greatly reduced rates. On the other hand, the figures showed that with the use of the L-49 such rates could be offered only at a very large subsidy cost.

About this time Mr. Trippe had made a visit to the Pacific coast and had been greatly impressed with the Douglas DC-7, as to the performance of which he had been given certain figures which we believed were not generally available. The use of this ship would produce very startling economies. Crew cost per passenger mile would be almost cut in half; depreciation and maintenance costs per passenger mile would be lower, and generally the plane,

having a carrying capacity of more than twice that of the L-49, would not have anything like twice as great an operating cost. We had come to the conclusion that it would be to Pan American's advantage to reflect the utilization of this plane in its exhibits, and we believed that it would likewise be to the advantage of Pan American-Grace to show the use of this aircraft.

At this point we gave to Mr. Roig and Mr. Tweed certain confidential figures in regard to the characteristics of the DC-7.

[fol. 2922] Mr. Balluder outlined Pan American's plans as to the use of the DC-7 and the services to be operated to the Canal Zone. He said that our plans contemplated one daily flight with a DC-7 from New York to Rio via San Juan and Belem; another from New York to Buenos Aires via San Juan, LaGuaira and Manaos; another from Los Angeles to Balboa; and another from Miami to Balboa, the latter connecting with Pan American-Grace's express service. In addition, we would operate an L-49 from Miami to Balboa connecting with Pan American-Grace's local service, and an L-49 from New Orleans to Balboa which would proceed thence to Rio. Mr. Balluder gave figures as to the number of passengers whom Pan American would deliver at Balboa by these various means, the number whom Pan American would expect to take out of Balboa on the L-49 service to Rio, and the traffic which would be turned over to Pan American-Grace on the assumption that about half the remainder would represent traffic for the west coast as distinguished from traffic for the north coast, central Colombia and local Canal Zone traffic. This amounted to about 18,000 passengers per annum.

Mr. Roig at first displayed a very sympathetic attitude toward the proposal. He said that he recognized there were economies in the use of a larger plane, particularly in the light of the experience which the Grace Line had had with the use of a new type of freighter which carried twice the cargo that could be carried by a former type at very little greater expense. He felt that this should also prove true in the air transport field.

Mr. Roig asked, however, why we continued to run a DC-7 out of Miami and why we ought not to show the DC-7 as running directly out of New York to Balboa, possibly with a stop somewhere in Cuba. I said that we felt it was not desirable to show a service which directly paralleled that of the domestic airlines between New York and Miami, and that we believed that a stop in Miami as distinguished from one in Cuba had great traffic advantages since Miami was a natural funnel for routes from the central and middle western part of the United States.

At this point Mr. Roig became considerably exercised over Pan American's plan to run a service to Buenos Aires directly out of New York. He said that he felt this would make Panagra a jerkwater line, and that he would then have to go back to Docket 779 and ask that Panagra's terminal in the United States be made not Miami but New York.

I said that I could not see why our suggestion for showing a larger type of equipment created any change in this situation. I recalled that Pan American's original applica- [fol. 2923] tion made in November, 1943 included a direct route from New York to Buenos Aires and that the only change which we were now making was to propose the operation of this service with what we considered a superior type of equipment which we also wished to have placed on the west coast route.

Mr. Roig said that a passenger desiring to go to Buenos Aires via Panagra would have to plan his arrival at Miami so as to arrive ten or twelve hours before the departing plane, and would probably have a layover of the same duration in Balboa, and that in the time when this passenger was laying over a passenger out of New York could actually be getting to Buenos Aires; that this meant that Panagra not only would lose the Buenos Aires traffic but probably traffic to Santiago and Lima as well.

I said that there was no reason why any such delays as those which Mr. Roig had intimated should occur. I said that so far as Balboa was concerned we advocated very strongly that the DC-7s should be operated directly from

Miami down the west coast through an appropriate interchange or charter arrangement; that this would completely eliminate the Balboa problem since the plane would go right through no matter how late it was and there would be no danger whatever of missed connections. As to Miami, I said that the problem was more difficult but that I could see no reason why our exhibits could not state that we would look with favor on an arrangement which would permit the through operation of planes from Miami to New York, under charter or interchange agreement with the domestic airlines, and that I was confident that the matter would ultimately be worked out in that way.

I also pointed out that Panagra had certain advantages for Buenos Aires traffic which Mr. Roig had not mentioned. In the first place, there was the question of the passenger who desired to stop over en route to whom the Panagra route offered a good deal more in the way of attractions than the San Juan-LaGuaira-Manaos operation. I also said that I thought Mr. Roig erred in considering the New York area to be the only source of traffic within the United States. I said that we felt the Pacific coast was an extremely important source of future traffic to Buenos Aires, and that as to this Panagra was obviously in a position far superior to anything that Pan American ever could be. I said that as to the middle west also it seemed to me that Panagra would have the edge even allowing for the fact that some people from this area might like to proceed to South America with a stop at New York.

[fol. 2924] Mr. Roig said that as far as he could see we were trying to consign Panagra to the position of being a jerkwater line, and that he would never accept this even if it meant the loss of all of Grace's investment in Panagra.

I said to Mr. Roig that I could not see the justice of this position at all. I again stated that it seemed to me he was confusing two issues; one was his dislike of Pan American's operating a service out of New York. That issue had been in the case since November and our present proposal did not change it in any way. So far as Panagra's operations south of the Canal Zone were concerned, our desire was to

make these just as effective as possible and our proposals were designed to that end. The trouble was that Mr. Roig kept insisting that Panagra could never amount to anything on account of delays at Miami and Balboa and at the same time refused to do anything about it short of insisting on prolongation of Panagra's own route. I repeated that the Balboa problem was entirely under control and could be easily remedied by an interchange arrangement which we very much desired, and that I felt the Miami situation would yield to treatment and that in any event there were advantages to Panagra in drawing on traffic available through the Miami gateway, which Mr. Roig wholly ignored.

Mr. Balluder brought out that with an interchange arrangement two additional DC-7s would be sufficient to handle Panagra's requirements, whereas if Panagra insisted on a separate operation three planes would be needed. This meant a very substantial saving through an interchange agreement.

I again suggested that Mr. Roig endeavor to consider the DC-7 proposal on its merits and apart from the New York situation which did not seem to me to be changed in any way by the introduction of this new thought. Mr. Roig said that his initial reaction had been favorable but that he was commencing to wonder whether with our operation out of New York Panagra would have sufficient traffic to justify a DC-7, or for that matter, an L-49. I suggested that Mr. Roig endeavor to approach the matter in a somewhat less pessimistic frame of mind and advise us when he was ready to discuss it again.

H. J. F.

[fol. 2925]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 231

Memorandum of Luncheon Conference

Mr. Tweed lunched with me on Friday, May 19, at my invitation to discuss the position in the Latin American certificate case in the light of our conference of May 18 with Mr. Roig.

I began by stating that we were utterly taken aback by the turn which the conference had taken. I said that I had tried to make clear yesterday that the question of service by Pan American out of New York had been in the case since November and was not affected except in terms of volume by the introduction of the DC-7. I said there was one other point which I had not emphasized yesterday and that was that the idea of service out of New York had not been introduced into the case by Pan American. I explained that Eastern had applied for a route from Washington direct to Ciudad Trujillo, and that all of Mr. Roig's steamship friends, including the Grace Line itself, had applied for routes out of New York. I said that to expect Pan American under these circumstances to close its eyes to the facts of geography was simply impossible, and that it would not benefit Pan American-Grace if we had, since this would simply mean that the route out of New York would be awarded to someone else.

I said that my second impression of the conference was that, conceding that direct service from New York to Buenos Aires presented some problems for Pan American-Grace, Mr. Roig refused to do anything to enable Pan American-Grace better to meet these problems and refused because of the fact that by meeting these problems he would hurt his chances of getting Panagra's route extended to Miami. Mr. Tweed asked me what I meant by "doing something." I said that I referred to an arrangement for the through operation of equipment from Miami and possibly from New York through the Canal Zone to points on the west coast.

I said that I thought it might assist Mr. Tweed to have the background on the history of the interchange proposals

because I felt that Mr. Roig's reactions to this idea were somewhat conditioned by the long history of this subject. I thereupon reviewed the various charter and interchange proposals at some length.

Mr. Tweed said that the situation was very difficult indeed; that when he had come into the case he had felt that it was important that the two companies should show [fol. 2926] a high degree of cooperation and also that a picture should be presented that there was some competition between the two companies. He felt that the present situation threatened the attainment of both these objectives.

Mr. Tweed said that this matter had actually started to boil up about a week or so ago. He said that Mr. Vidal had told him that he had discovered that Pan American was showing service out of New York to Miami. Mr. Tweed had then had a telephone talk with me in which we had discussed various things and he had asked me whether Pan American was showing such service. I had said to him that we certainly were not planning service between New York and Miami, although I had seen some preliminary schedules in which the Pan American traffic people showed a departure out of New York simply to give some idea as to when a passenger proceeding on a connecting plane of one of the domestic airlines would have to leave to make the connection. I said that, of course, I had not construed Mr. Tweed's question as relating to service from New York via San Juan which had been in the case from the beginning. Mr. Tweed said that he had relayed the results of our telephone talk but that Mr. Vidal still was not satisfied and shortly before our conference of Monday, May 15, had brought the matter up again with Mr. Tweed. At this time Mr. Vidal for the first time made it clear to Mr. Tweed that his inquiry related to service between New York and San Juan. Mr. Tweed told Mr. Vidal that this was something different from what Mr. Tweed had asked me, and said that if Mr. Vidal had any question about the matter he should bring it up at the conference. Mr. Vidal had in fact asked at the conference on Monday whether we intended to operate direct service from New York via San Juan to Buenos Aires and I had immediately responded that, of course, we did so intend.

Mr. Tweed said that he believed that Mr. Roig honestly had not appreciated the New York angle of the problem until our talk, although he could not find any good reason for this and conceded that there had been nothing in the way of concealment on our part.

I asked Mr. Tweed what he thought of my crystallizing the interchange issue by writing a letter to Mr. Roig. I said that I had no hope that Mr. Roig would react favorably to the interchange idea, but that if he had any interest in it I would prefer to take the matter up with him orally rather than confronting him with a letter. On the other hand, if he were going to remain adamant about the problem, I would prefer to have Pan American write such a letter and also bring the matter up in the Panagra Board. Mr. Tweed [fol. 2927] said that he would explore the situation but had no hope that Mr. Roig would look with favor on the idea of an interchange.

We had a good deal of discussion as to whether Mr. Roig was justified in opposing an interchange because of the fact that this might hurt Panagra's chances of getting through to Miami. We also discussed the question whether, if Mr. Roig decided that Panagra should oppose Pan American's New York-San Juan application, this fell within the permissible scope of Mr. Tweed's retainer or whether this was a matter that would have to be taken up with the Panagra Board. No definite positions were taken as to this latter question.

Mr. Tweed agreed that until some further conclusions were reached no useful purpose would be served by further meetings between the staffs of the two companies, and that in particular the meeting called for this afternoon (May 19) should not be held.

Mr. Tweed also inquired in exactly what respects what we had told him and Mr. Roig yesterday was confidential. I said that what was confidential was our plan to use as large a plane as the DC-7 and also the performance characteristics of that plane. I said that the fact that Pan American was intending to operate an express service from New York to Buenos Aires was not confidential.

H.J.F.

[fol. 2928]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 232

July 12, 1944.

MEMORANDUM OF CONFERENCE.

Pursuant to Mr. Roig's request, Mr. Dean and I met with him at the apartment of Mr. Harrison Tweed at 3 P.M. on the afternoon of July 11, 1944.

The first subject discussed was the advisability of Pan American-Grace Airways reflecting in its estimates in the Latin American certificate case the use of DC-7 equipment on its express service.

Mr. Roig stated that he had not been able to persuade himself that the use of such large equipment was warranted. He said that the estimates which had been made, involving the use of L-49 equipment, meant doubling the present passenger traffic and still showed a deficit; that Pan American-Grace did not serve as populous a territory in South America as did Pan American Airways; that, with Pan American operating direct service from New York to Buenos Aires, he felt Pan American-Grace would not get even half of the Buenos Aires traffic; and that for these reasons, even if Pan American were justified in showing DC-7 equipment on certain of its express routes, he doubted whether the same was true of Pan American-Grace.

Mr. Dean and Mr. Friendly felt that an estimate of double the existing traffic was not at all optimistic and would probably be regarded as unduly conservative. They stated that Pan American felt that there were two advantages in showing the use of DC-7 equipment. One of these was an economic reason. Pan American felt that it was very important to reduce passenger fares, and the available figures indicated that the cost per passenger mile of operating the DC-7, assuming reasonable load factors, was very much less than that of operating the L-49. The second was from the standpoint of presentation. Pan American felt that it was far better to be in the position of presenting something that could be criticized only as being too ad-

vanced and of answering any such criticisms by saying that if the Board did not feel the time was ripe for operation of this type of equipment Pan American could operate DC-4s or L-49s just as well as anybody else, than presenting a picture based upon L-49s or DC-4s, finding other airlines presenting more advanced types of equipment, and then having to run after them and say, "We can do that, too."

Mr. Roig recognized the force of these considerations but said that he just could not see himself supporting traffic estimates of the size that would be needed to justify the [fol. 2929] DC-7. He suggested as a possible alternative that Pan American-Grace might base its estimates upon the use of the L-49, with supplemental estimates showing the result of using the DC-7. He said he had not thought this through and did not wish to be committed to it. Mr. Friendly and Mr. Dean said that they likewise would like to think this over.

The discussion then turned to the question of interchange. Mr. Roig asked what kind of interchange was meant and said that when the subject was discussed, his thoughts always turned to a certain agreement which had been presented to him. Mr. Friendly suggested that Mr. Roig rid himself of this thought and that the discussion be on the merits, uncomplicated by any agreements or discussions in the past. Mr. Dean explained that the type of interchange which we favored was one under which a four-engined aircraft could fly from New York to Buenos Aires, operating from New York to Miami over the certificate of a domestic carrier, from Miami to Balboa over Pan American's certificate, and from Balboa to Buenos Aires over Pan American-Grace's certificate. The aircraft might be owned by any one of the carriers participating in the interchange. Each carrier's flight crews would operate the plane over its own route. Each carrier would be responsible for the safety of operations on its own sector. Each carrier would receive the revenues earned through operation over its portion of the route and would pay such expenses as flight crew salaries and expense, gasoline and oil, etc. Charges for such items as aircraft and engine depreciation and overhaul

would be offset, with balances to be settled at an agreed rate. Although the airplanes would bear some insignia identifying the owning company, they would also be placarded so as to show the identity of the company operating them over the particular portion of the route.

Mr. Dean stated that he had in mind the possibility of some kind of exchange of pilots as well as an interchange of equipment so that certain Pan American-Grace pilots could be brought to the United States for a tour of duty at Miami while certain Pan American pilots could obtain experience in operating over the mountainous country in South America served by Pan American-Grace. Mr. Friendly said that while he saw no objection to this if it could be worked out, he felt that the present discussions ought not to be complicated by consideration of these questions which involve difficult problems in regard to labor agreements, seniority, etc. He felt that Mr. Roig should understand that the only commitment that we were making as to matters of this sort which were collateral to the equipment interchange itself was that at any time we would [fol. 2930] be glad to sit down and discuss these in a cooperative spirit.

Mr. Roig stated that an interchange arrangement would definitely have great advantages from the standpoint of the passenger; that it would avoid the necessity of change of plane and would likewise avoid any problem of having to take an earlier plane in order to avoid the risk of missed connections. He also recognized that such a plan would probably result in better equipment utilization for Pan American-Grace, since its four-engined equipment would be part of a larger pool with smaller reserve requirements. He raised certain technical questions in regard to the workings of an interchange but did not appear to regard any of these as constituting any real obstacle.

The question was raised as to whether the possibility of such an interchange should be taken up at this time with Eastern or National. Mr. Friendly stated that he did not believe that anything would be gained by this since neither of these airlines would be receptive to such an arrangement

so long as they thought they could get into Latin American on their own. Mr. Roig said that he fully understood this since he had been in the same position himself. Mr. Friendly said that Pan American had been under no illusions as to the reasons for Mr. Roig's attitude toward interchange so long as he thought that Pan American-Grace's route might be extended north of Miami.

Mr. Friendly stated that whether or not an arrangement could be made with the domestic airlines for interchange north of Miami, he thought that an arrangement between Pan American and Pan American-Grace for interchange south of Miami should be made and was in the interests of Pan American-Grace.

Mr. Roig reflected for some time on the matter and then said that he supposed there were a good many people in Berlin who were thinking just now as to the merits of unconditional surrender. Mr. Dean stated that our attitude was not one of demanding any surrender but that we felt that an interchange was in the best interests of Pan American-Grace and ought to be recognized as such.

There was then some discussion as to the requirement of secrecy which Pan American had imposed with respect to the DC-7s. Mr. Roig said that he could see no reason for this, particularly since Pan American's annual report for 1943 had disclosed Pan American's intention of utilizing planes carrying more than 100 passengers.

[fol. 2931] Mr. Dean stated there were two reasons for the original imposition of the secrecy requirement. One of these was that Pan American at the time was dealing with the manufacturer and did not wish to have its negotiations jeopardized by other airlines. This reason was no longer a factor since Pan American had obtained a position with respect to this aircraft, out of which it was willing to take care of Pan American-Grace if Pan American-Grace so desired. The other reason was that Pan American did not wish its plan for the utilization of this aircraft in Latin American services to be known by other airlines since Pan American felt that this was a somewhat novel plan and that the inclusion of this aircraft in its presentation would give

Pan American an advantage, of which it did not wish to be deprived. This latter factor still existed. Mr. Dean said that if Mr. Roig felt that he could recommend the use of the DC-7 by Pan American-Grace, we would not object to his discussing the matter with his associates under the same conditions of confidentiality which Pan American had imposed upon him, but that, on the other hand, if Mr. Roig felt there was no merit in the proposal it might be better not to go further with it. Mr. Roig said that unfortunately the situation was not quite as clear as this; that while he personally was not satisfied that the use of such large aircraft would be justified, he did not regard the matter as beyond the realm of discussion and would like to be able to talk it over with his associates. It was left that Mr. Roig would give further consideration to the questions of the use of DC-7 equipment and of interchange, and would talk further to Mr. Dean about them at or after the Pan American-Grace Board meeting on July 13.

Mr. Tweed inquired whether it would be possible to resume the exchange of information as to estimates of revenues and expense between the staffs of the two companies which had been going on prior to the inauguration of the DC-7 discussions, with a view at least to reducing the area of disagreement. Mr. Friendly stated that at the moment the Pan American people were so busy revising their estimates in the *Latin American* case and working on the other cases which the C.A.B. had initiated that he did not believe that anything was in shape for discussion. Accordingly, he suggested that this matter also be deferred for further discussion.

July 19, 1944

I lunched with Mr. Roig at his request. He stated that he had given a great deal of consideration to the discussions which I, Mr. Friendly, Mr. Tweed and himself had had last week at Mr. Tweed's apartment regarding the interchange of equipment between Pan American-Grace Airways, Pan American Airways, and one of the domestic carriers operating between Miami and New York. He stated that he was frankly impressed with the commercial and business advantages of this type of interchange, but that speaking for W. R. Grace and Company's interest, he was not prepared to agree to such an interchange at this time, because he felt that it would definitely prejudice the position of Panagra in its becoming anything more than a connecting carrier. I advised Mr. Roig that he might expect that Pan American Airways would pursue and follow the position already taken that this interchange agreement should be entered into and that we would continue to make a record of our endeavors along these lines.

had ed

Mr. Roig then stated that he ~~would~~ discuss ^ with Mr. Garni the question of the size of the equipment which Panagra would use in the development of the Latin American certificate case, and that they had come to the conclusion that for the sake of "elbow room" they would mention three types, namely, DC-6, DC-7, and the Constellation, but not commit themselves definitely to any particular one. I told Mr. Roig that I felt this policy was weasling, and that he was trying to have his cake and eat it too, which from our interest in Pan American-Grace was far from satisfactory. Mr. Roig said that he was trying to get these ideas down on paper with the aid of Mr. Tweed, and at such time as he had been successful in doing this, Mr. Tweed would then go over the subject with Mr. Friendly.

I referred to the clipping from the *Aviation Monthly* regarding Gessel's appearance before Examiner Brown in the hearing of Adolph Garni with respect to his directorships in Eastern Airlines and Pan American-Grace. Mr. Roig assured me that Mr. Gessell was not appearing in any way for Pan American-Grace and that the published reports were in error. After luncheon Mr. Cogswell telephoned me and read me a letter of July thirteenth which Mr. Gessell had written to Examiner Brown, calling his attention to the fact that he was representing Mr. Garni only, and not Pan American-Grace. I asked Mr. Cogswell to send a copy of this letter to Mr. Friendly.

February 21, 1946

Mr. Harold J. Roig, President
Pan American-Grace Airways, Inc.
135 East 42nd Street
New York, New York

Dear Harold:

We have discussed the matter of your proposed operation of the two Pan American-Grace Constellations with Mr. Shannon and Mr. Vidal on the basis of Mr. Shannon's memorandum to me of February 16th. This matter was referred to our Executive Committee meeting on February 19th. The Committee felt that the operation as outlined would result in excessive cost to Pan American-Grace as well as providing uneconomical utilization of this equipment.

I have been requested by the Committee to submit to you a plan whereby Pan American Airways, Inc. would be willing to contribute two Constellation aircraft to a pool

to be formed with Pan American-Grace's two Constellation aircraft making a total of four aircraft of this type. With this fleet, an efficient operation could be conducted from the Miami base serving both the East and West coasts of South America by providing a daily service from Miami to Lima and a three times weekly service from Miami to Rio. This would result in a utilization of a little over nine hours per day per unit which could be still further improved, as for example, through a second daily service between Miami and Balboa, if warranted, or a daily Miami-Barranquilla trip. In support of our plan, I attach a memorandum outlining in detail the economic disadvantages of the proposal submitted in Mr. Shannon's memorandum and justifying in every respect our suggestion that a pool of equipment be formed to increase the utilization of the equipment to a satisfactory point, where the cost per mile will be comparable to that which we expect to obtain in our Constellation operations elsewhere.

I need hardly elaborate on the point that a through service from Miami to Lima, such as would be provided by the proposed equipment interchange, would be highly desirable from the standpoint of the traveling and shipping public.

We are confident that our proposal is entirely practical and in the interest of Pan American-Grace Airways, as well as the public interest. If you will kindly advise me that you concur in principle, I shall immediately take the necessary steps to coordinate this program, and put it into effect at the earliest possible moment.

Very truly yours,

[fol. 2934]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 235

Aside from the low utilization (six hours per day) which would result from Panagra's proposed operation of their Constellations between Lima and Balboa, having the aircraft serviced at the latter point by Pan American, there are other objections based on economy and efficiency which make such proposed plan of operation undesirable.

It is estimated that at least thirty men would have to be available in the Canal Zone to carry on routine maintenance of the aircraft and periodic long service, since the Constellation aircraft do not conform to any type presently contemplated for the Latin American Division which will standardize on C-54's. This would require the stocking and servicing of an abnormally large inventory of spares, parts, accessories, etc. to maintain only two aircraft. Pan American could not periodically withdraw from its present complement of maintenance personnel in the Canal Zone the estimated thirty men required for the Constellation service without completely disrupting its own scheduled operations. Therefore, it must be assumed that these thirty men would be additions to the present staff. Between brief periods of concentrated and accellerated activity these men would have relatively little to do. At least half of the men would have to be American skilled mechanical personnel brought from the United States, involving payment of $75.00 monthly foreign allowance at a total monthly cost of $1,125.00. Assuming two years as the average length of assignment and incidental transfer and settlement expenses as $1200.00 per man, there is an additional monthly cost of $750.00.

We note that an engine change would be required every six weeks and that in such cases the aircraft might be ferried to New York, which would involve 19½ hours non-revenue flying time at a direct flight cost of approximately $5,250.00. During this time the aircraft would have to be withdrawn from Scheduled operations for an absolute minimum of three days, that is, two days transit time and one day in the shops. Considering maintenance scheduling com-

plications, necessity for test flights after engine installation, etc., five or six days is much more likely. This would leave only one aircraft with which to carry on the scheduled operations, which is considered entirely unfeasible from a practical point of view. The alternative would be to have the engine change performed in Balboa and the motors shipped to New York for overhaul. But here again extraordinary costs are involved, since the total transportation cost per engine New York—Balboa, including crating, insurance, ocean freight and cartage, would be $636.15, or $5,089.20 per engine change.

Higher maintenance labor costs due to inefficiency and higher hourly depreciation as a result of low utilization would further increase the direct flying expense. The direct hourly labor cost, including burden, for routine main- [fol. 2935] tenance of Constellations has been calculated at $21.60. This includes only such service as would normally be performed in the Canal Zone and does not extend to main-base work such as engine overhaul. Assuming only 50% efficiency due to stand-by time of the thirty men, this figure becomes $43.20. The same is true of the $18.58 hourly depreciation figure on the airframe calculated on the basis of 4800 hours per year, since Panagra's estimated 2400 hour annual utilization figure will result in hourly depreciation of $37.16.

It might be contended that the allowance for inefficiency is too great; however, we still believe that other factors which enter the maintenance picture, such as shipping and handling a large volume of spares by air or boat, higher cost of local supplies, etc. will make this figure a conservative one for estimate purposes and that experience may reveal an even greater departure from the hourly labor cost originally estimated by our engineering department on the basis of "mass-maintenance."

The effect of the above expenses would be to increase the direct flight cost per hour from $269.25 as estimated for PAA Operation of Constellations in Transcontinental Flights to $322.86, or per passenger-mile from $.036 to $.0431. The total annual increased direct flight expense under Panagra's plan would be approximately $258,564.

The foregoing observations weigh heavily in favor of some alternate plan of operation which might be worked out based on an interchange of equipment between Pan American and Panagra. As a concrete example of what might be done along these lines designed to give at least 50% better utilization of equipment, the following is offered:

Route			
Miami-Balboa-Lima		2645 miles	10:35 hrs.
x 7 (Weekly Round Trips)			148:10 hrs.
Miami-Rio de Janeiro			
Mia—Jua	1040		
Jua—Spa	631		
Spa—Bel	1212		
Bel—Rio	1535		
Total		4418 miles	17:45 hrs.
x 3 (Weekly Round Trips)			106:30 hrs.
Grand Total Weekly			254:40 hrs.

The above schedule, if made effective, could result in daily round trip service Miami—Lima and three times weekly Miami—Rio, using four aircraft with an average daily utilization of 9:06 hours.

Since the complement of maintenance personnel in Miami regularly ranges from two to three thousand men, no [fol. 2936] difficulty would be encountered in assigning from this large number sufficient personnel with which to service and maintain the Constellations including engine changes. Also the shop burden in Miami would be correspondingly lower than in the case of Balboa.

Several modifications of the foregoing alternate plan could be worked out to increase the utilization. For instance, the establishment of a second daily round trip Miami—Balboa, if warranted by traffic, would bring the fleet unit utilization figure to 11:28 hours per day, with a consequent decrease in mileage cost. It is suggested as indicative of what can be devised to improve on the present Panagra proposed method of operating the Constellations.

March 13, 1946

MEMORANDUM

RE: DISCUSSION OF CONSTELLATION INTERCHANGE AT PAN AMERICAN-GRACE BOARD MEETING MARCH 12, 1946

After the formal business of the meeting had been concluded, Mr. Garni asked whether there were any other matters to be considered. Mr. Dean stated that he had been having discussions and correspondence with Mr. Vidal and Mr. Shannon and, through cable, with Mr. Roig, concerning the operation of the two Constellations on order by Pan American-Grace and the proposal that these two airplanes, together with two Pan American-owned Constellations, be based at Miami and operated as a single fleet from Miami to Lima on the one hand and down the East coast on the other. Mr. Dean said that the matter was very pressing because if Pan American was to do this it would be necessary to make immediate arrangements for the placing of trained personnel and spare parts at Miami.

Mr. Garni said that there were three pending questions in regard to this matter:

1—While it appeared that the method of operation of the Constellations proposed by Pan American would involve substantial economies, it was desired that Mr. Vidal

check the matter from a cost standpoint. Mr. Dean stated that of course we had no objection to this and would give Mr. Vidal every facility for making this check but emphasized the need of expedition.

2—Mr. Garni stated that it would have to be understood that if, by the time of the delivery of the DC-6s Pan American-Grace were extended to the United States, it would not be obligated to continue in the equipment pool agreement. Mr. Friendly said that there was no desire on Pan American's part to force Pan American-Grace to remain in the equipment pool agreement any longer than Pan American-Grace's own best interests dictated; that on the other hand it was quite obvious that since Pan American had not intended to operate the Constellations out of Miami, Pan American would be incurring certain costs in setting up the equipment pool arrangement which otherwise would not have been incurred; that it would be reasonable to incur these costs if there were a certain period for working them out; but that if the period were to be unduly short, Pan American-Grace ought to compensate Pan American for the additional costs that had been incurred and had not been recouped. Mr. Garni said that he could entirely see the point of this. Mr. Dean said that whatever difficulties he might have had with the Grace directors on certain policy questions, he had always found that in financial discussions they were entirely fair and that he had every confidence that this problem could be settled on a basis that was fair to both companies. Mr. Garni expressed himself as in agreement with the general proposal that there be a penalty for cancellation by Pan American-Grace of the equipment pool arrangement in advance of what [fol. 2939] might be considered a reasonable period. The questions of what the term of the equipment pool arrangement was to be and what penalty there should be on advance termination, were left for handling between the two managements.

3—Mr. Garni said that he would want to have it understood that the equipment pool arrangement was without prejudice to the rights of W. R. Grace or Pan American-Grace in Dockets 779 and 525. Mr. Friendly said he was

puzzled to know just what Mr. Garni meant. On the one hand he entirely agreed that the equipment pool arrangement was not intended to be any waiver or release of any rights or claims of W. R. Grace or Pan American-Grace with respect to the extension to the United States. On the other hand if the equipment pool arrangement became a fact it would be a fact and there was no way in which Pan American could agree to disguise the fact. Mr. Cogswell said that Grace did not want to have the equipment pool arrangement used as an argument in any further proceedings because if it were to be so used it might be cheaper for Pan American-Grace in the long run not to have the arrangement, if the arrangement was going to prejudice its case for an extension in any way.

Mr. Friendly said that he could not follow this line of argument. He said that Pan American had urged for years that an equipment inter-change was perfectly practicable and would accomplish many of the objectives urged by Grace in favor of the extension to the United States. It would be wholly unreasonable for Grace to ask Pan American to agree that when such an arrangement had finally been made, Pan American would not make any reference to its existence. Actually such an agreement would accomplish nothing from Grace's standpoint anyway. The agreement would have had to be submitted to the CAB, everyone could see the planes flying and Public Counsel certainly would not be bound by any agreement between the parties not to refer to the existence of the arrangement. Moreover, from Pan American's standpoint a refusal on the part of Grace to enter into such an arrangement because of the fear that it might work too well would be perhaps an even more helpful argument than the working out of such an arrangement. Mr. Friendly repeated that while there was no desire on Pan American's part to have this agreement operate as any waiver or release by Grace or Pan American-Grace, he would certainly recommend that Pan American not place itself in a position where any reference by it to the workings of the agreement could be charged by Grace to be an act of bad faith.

Mr. Garni agreed that the situation was a difficult one.

Mr. Friendly stated that he felt that there was no great difficulty and that he would not have any particular trouble in working out suitable language with Mr. Gesell or whomever else Pan American-Grace might have acting for it in this matter.

The question was left on this basis, it being agreed that Mr. Cogswell would let Mr. Friendly know whether or not Mr. Gesell would act as attorney for Pan American-Grace. Mr. Friendly emphasized the need of expedition from the legal standpoint, pointing out that the matter was one which would have to be submitted for approval to the C.A.B.

April 8, 1946

Mr. Harold J. Roig, President
Pan American-Grace Airways, Inc.
135 East 42nd Street
New York, New York

Dear Mr. Roig:

Mr. Vidal requested me this morning to advise you immediately whether Pan American Airways would have any objection to the sale by Pan American-Grace Airways, Inc. of the two Constellations for which Pan American-Grace has contracted with the Lockheed Company.

It is our judgment that the maximum benefit to Pan American-Grace as a company, and the best service to the public, would be accomplished by Pan American-Grace going through with its commitment to purchase these aircraft and operating them in a pool along with two Constellations owned by Pan American, so as to afford through daily service from Miami to Lima, as outlined in my letter of February 21, 1946 and the accompanying memorandum.

You stated at the meeting last Thursday that the Grace directors were unwilling to consider either this plan or a similar plan involving C-54 equipment, notwithstanding the obvious financial advantages to Pan American-Grace Airways, Inc. In order to give you further time to reconsider this matter, Pan American Airways is willing to confirm to you that if by April 12th, you still insist on selling the two Constellations, we will purchase these, thereby relieving you of your commitment to Lockheed.

Sincerely yours,

s/ HBD

Vice President & Chief Engineer

April 15, 1946

Mr. Harold J. Roig, President,
Pan American-Grace Airways, Inc.,
7 Hanover Square,
New York 5, N.Y.

Dear Harold:

Before leaving for South America Howard Dean asked me to reply to your letter of April 11, 1946.

In view of your unwillingness to consider the operation of either Constellation or C-54 equipment under an inter-

change agreement at the present time, and reserving all our rights in the matter, and to avoid further prejudice to the interests of our joint enterprise, Pan American Airways Corporation is willing to approve of the management of Pan American-Grace purchasing up to three (3) war surplus C-54s at $75,000 to $90,000 each and arranging to convert them at the Douglas factory at a cost of about $175,000 each,—on the understanding, however, that these planes will be equipped in a manner generally similar to the C-54s which Pan American Airways is having converted, so as not to preclude the possibility of their being pooled with the Pan American planes under an interchange arrangement if one can be worked out at a later date.

With respect to engine overhaul for these aircraft and major overhaul for the aircraft themselves, the situation is as follows: Pan American plans to concentrate overhaul of R-2000-9 engines at Brownsville and of R-2000-11 engines at Miami. We will be glad to undertake the overhaul of those engines for Pan American-Grace at one or the other of those bases, depending upon the type engine to be installed in your planes. We also expect to be able to handle the major overhaul of these aircraft for you at Brownsville, although, of course, we cannot make a commitment of indefinite duration on this subject.

With respect to the Constellations, we will be glad to discuss with your representatives the mechanics of taking over your commitment to Lockheed.

Sincerely yours,

E. Ballucder

New York	New York

CONTROL BY PAN AMERICAN OF AEROVIAS NACIONALES DE COLOMBIA (AVIANCA)

HISTORICAL ANTECEDENTS

Pan American acquired its original interest in AVIANCA (then called Sociedad Colombo-Alemana de Transportes Aéreos (SCADTA)) on April 10, 1931, in pursuance of a contract made between Pan American and Dr. Peter P. von Bauer for the purchase by Pan American from him of a 60% stock interest in SCADTA and his commitment to acquire for Pan American up to 5,000 additional shares of the company to be purchased in the open market. The total outstanding shares of SCADTA at that time were 20,000. Pan American acquired from von Bauer 12,000 of his own shares and 4,884 shares purchased through von Bauer in the open market. By the end of April, 1931, Pan American therefore owned 16,884 shares out of the total of 20,000 shares of SCADTA, or a stock interest of 84.42%.

The General Stockholders' Meeting of February 22, 1935 authorized the issue of 10,000 additional shares. By agreement with the other stock interests, Pan American waived, in part, its pre-emptive rights for the purchase of the new stock and in place of exercising such rights for a total of 8,442 shares, it limited its purchase of new shares to 7,200 in order to make a greater number of these new shares available for purchase by the Colombian public. The new shares were disposed of as follows:

	Shares
Purchased by Pan American Airway Corporation	7,200
Purchased by Colombian public	1,605
Unsold in the Treasury	1,195
TOTAL	10,000

As a result of the foregoing purchase, Pan American then held a total of 24,084 shares out of a total outstanding of 28,805 shares, or 83.61% of the outstanding stock.

Pursuant to the reorganization of SCADTA in conformity with the desires of the Colombian Government, which included, among other objectives, the change of name of the company to Aerovías Nacionales de Colombia (AVIANCA), and the purchase by SCADTA of all of the assets of a competing company by the name of Servicio Aéreo Colombiano (SACO), a Special Stockholders' Meeting held on June 8, 1940 changed the capital structure of the company by providing for a total of 400,000 shares of authorized capital of the par value of 10 Colombian pesos each, to be distributed as follows:

[fol. 2943]

	Shares
For exchange for old shares at the rate of 5 to 1, plus 3 to 1 additional, resulting from capitalization of reserves	240,000
Shares to be issued for payment to SACO for the agreed value of its total assets	60,000
Shares to be subsequently issued by action of the Board of Directors	100,000
TOTAL	400,000

As a result of the foregoing change in capital structure, Pan American received 192,672 shares out of a total of 300,000 shares then outstanding, its stock interest therefore declining to 64.224%.

During the Fall of 1945 arrangements were made, with the approval of Pan American, to sell to the public the

100,000 shares of additional authorized stock in AVIANCA, or as much thereof as the public would purchase. As a result of this sale, Pan American, since approximately the end of 1945, has held and now holds a stock interest of only 48.16%.

In the above historical sketch intermediate changes of par value, and of bearer stock to registered, provision for possible classes of stock and other details of corporate set-up have been omitted, because they are not relevant to the question of control.

SITUATION PRIOR TO STOCKHOLDERS MEETING OF FEBRUARY 23, 1940.

Legal Situation:

During this period Pan American Airways's stock interest, as above noted, ran 84.42% until 1935, and then dropped to 83.61%. The stock at the time was bearer stock. As between the stockholder and the corporation, under Colombian law, the holder of bearer certificates, or the holder of proof of possession of bearer certificates, is the owner and has the right to vote. During all of the interval from 1931 to the stockholders annual meeting of 1940, the great bulk of the Pan American stock was in fact voted by Dr. von Bauer under a legal device which proved constructive physical possession by him of the respective stock certificates. But the actual owner of the majority stock interest was Pan American, and, from the purely theoretical standpoint, Pan American during this period had theoretical control. However, as will be hereafter noted in the analysis of the Factual Situation, Pan American did not control SCADTA during the period mentioned, either through its actual ownership of the stock or otherwise.

The passage of two important Colombian laws during the period prior to March 1940, must, chronologically, be here noted, although the effects of these laws will be discussed hereafter.

(a) 1944 *Law* [illegible] 1944. The first of these laws was Law [illegible] of 1931 creating the office of Superintendent of Corporations and establishing certain rules for the corpo-

rate administration and government regulation of commercial stock corporations. Among a number of archaic and highly onerous provisions established by this legislation in an attempt to protect minority interests, is the limitation established by Article 28, namely, that no stockholder, regardless of how many shares he may own or represent, may exercise, either directly or by any interposed person, more than 25% of the total votes of the shares represented at a stockholders' meeting.

So great was the protest by local business interests against this law following its enactment that by a subsequent law of the same year, namely Law 134 of 1931 (Art. 88), it was indefinitely suspended. It remained in suspense for about five years, when, by virtue of Article 15 of Law 128 of 1936, it was revived, to become effective September 1st, 1937. Even with the revival, the law remained dormant because the President refrained from exercising his authority to name a Superintendent of Corporations and his assistants. Finally, on Decree No. 1984 of October 10, 1939, the President decreed the existence of the Office of Superintendent of Corporations and proceeded to appoint the key personnel as provided in the original law of 1931.

With respect particularly to the AVIANCA situation, by October 10, 1939, negotiations were already pretty well along towards the nationalization of the then SCADTA company, in line with the desires of the Colombian Government. The writer of this memorandum had already been in Colombia several weeks in representation of Pan American and had discussed the main points of the Government's reorganization program with the President of the Republic, the Minister of War who had jurisdiction of aviation at the time, and the negotiators appointed for the SACO company, whose assets were to be acquired by SCADTA. Anticipating the difficulty which the limitation on the right to vote would have in connection with the nationalization program, Mr. Grant, assisted by Pan American's attorney at Bogotá, and by Dr. von Baer, persuaded the President of the Republic and the Minister of War to sponsor in the Congress a law making an exception, with respect to the restriction on voting rights, in the case of domestic aviation

companies in which the Government had a stock interest. The law was adopted as Law No. 68 of 1939 and in its Article 2 stated succinctly that the limitation on voting rights established by Article 28 of Law 58 of 1931 should not apply with respect to aviation companies in which the Government had a stock interest. This exception would have applied to SCADTA because by reason of the purchase of the assets of the SACO company for stock of SCADTA (to be reorganized as AVIANCA), and the distribution of this stock to the stockholders of SACO, the Colombian Government would acquire a stock interest in SCADTA of approximately 6%.

Law 89 of 1938—The second of the laws which were enacted prior to February 23, 1940 was the nationalization law for Colombian civil aviation. In effect, the provisions of this law restricted the majority stock ownership of [fol. 2945] domestic commercial aviation companies in Colombia to Colombian nationals. After December 31, 1942, the term originally set by the law for compliance with its provisions, no aviation company could register a commercial plane in Colombia and consequently no such company could operate a domestic service in the country, unless its common stock were owned in a proportion of at least 51% by Colombian nationals, or by Colombian corporations whose stock in turn was owned at least 51% by such nationals. It should be remarked in passing that the term for compliance with the nationalization law was calculated to coincide with the expiration of the operating contract held by SCADTA. This contract actually expired on December 16, 1942.

Factual Situation

As above indicated, the facts surrounding Pan American's ownership of a majority stock interest in SCADTA negative any conclusion that Pan American controlled the company, even before Law 58 of 1931 came into force by virtue of Decree No. 1984 of October 10, 1939. Pan American's contract with von Bauer for the purchase of his majority interest in SCADTA and the arrangements and conditions on which that contract was predicated, called for the following policies:

(a) that the actual interest of Pan American in SCADTA should not be publicly disclosed, because to have disclosed this interest would have reacted immediately to the great prejudice of SCADTA.

At the time of the purchase, the SCADTA company and its management enjoyed great prestige in Colombia. Not only had it given Colombia the first successful commercial airline in the Western Hemisphere, operating without subsidy of any kind, but it had provided a factor of incalculable benefit to the country's economic situation, hampered as this had been for centuries by lack of rapid, adequate and dependable media of communication. Negotiations were pending, which were successfully consummated in a contract in the year 1932, turning over to SCADTA the whole of the administration and operation of the airmail system of the country. Even as early as 1932 there was arising in Colombia a deep sentiment of nationalism with respect to aviation. SCADTA had always been considered by the public and the Government as a Colombian enterprise, founded as it had been by Colombians and a few German residents of Barranquilla in 1919. The Colombian people took great pride in the success of SCADTA and the example of its operations among the American Republics. Colombia was acknowledged as the pioneer of commercial aviation in the Western world. SCADTA had been the recipient of an excellent operating contract and of a great number of other favors at the hands of the Government. To have disclosed its large majority ownership by foreign interests at the time, especially by United States interests when relations between Colombia and the United States were none too cordial, would have been perhaps a fatal blow to the Company's continued progress. This was recognized by Pan American and by Dr. von Bauer; hence, secrecy was deemed the only logical policy in connection with the purchase of von Bauer's holdings.

[fol. 2946] (b) That von Bauer and all of his management were to continue in administrative and technical control of the enterprise. Von Bauer was to consult Pan American in such connections as he thought appropriate, but was not to be controlled necessarily by its advice or preferences. In

Pan American's files are a great number of letters exchanged between von Bauer and Mr. Evan E. Young, on a wide variety of subjects, wherein the advisory spirit of Pan American's intervention is clearly reflected. Instructions and orders were never given; at most, suggestions were conveyed and probably were disregarded as often as followed.

The Board of Directors of SCADTA at that time was composed, in great majority, of the same personnel who had been directors for years under Dr. von Bauer. Of the twelve members on the Board, Pan American at no time had more than three, and these were members of its New York staff, none of them ever resident in Colombia. Liaison, if such existed, was made through the writer of this memorandum, who visited Colombia occasionally and when there attended meetings of the Board. This might have happened once or twice a year. By the fall of 1938, when the Civil Aeronautics Act of the United States went into effect, all Pan American personnel who had been directors of SCADTA resigned, with the exception of the writer who continued until the Annual Meeting in February 1941. The resigning personnel were replaced by Colombians or by officers or employees of SCADTA, or associates of von Bauer, resident in Colombia.

(c) That the policies of SCADTA, its operating personnel and its plans should not be changed or re-adjusted in any way. As a matter of fact, no change or re-adjustment was made in any of these respects until the latter part of the year 1939 when pressure was exerted by the United States Embassy in Bogotá for de-germanizing the SCADTA company. But from 1931 until about the middle of 1939, the General Manager, the operations manager, the chief engineer, the chief pilot, the communications staff, the maintenance staff and, in fact, all of the operation personnel of the company remained as it had been for years past.

Over and above the foregoing policies which were agreed upon between Pan American and von Bauer, the following factors militated against any attempt by Pan American to control SCADTA:

(1) The increasing interest and intervention of the Government in the company and its operations. This was due, in considerable measure, to the Government becoming "air-force minded" and desiring to build up strategic airports over its territory, and to have means of training military pilots. As a matter of fact, a contract with a subsidy had been authorized for SCADTA by the Government as early as 1924, contemplating the establishment of an aviation school for the training of pilots.

Another reason for the Government's increasing interest in SCADTA was the rising sentiment of nationalism in regard to domestic aviation, to which reference has already [fol. 2947] been made. Between 1934 and 1938 several attempts were made to formulate a domestic aviation law, which culminated in Law 89 of May 26, 1938, in force today, nationalizing domestic airline enterprises. As an element of this growing nationalism, there were powerful advocates in Colombian political and legislative circles, as early as 1936, of the Government's taking over SCADTA. Articles and editorials on SCADTA appeared profusely on the front pages of the leading newspapers of the country. Reporters were incessantly investigating the company and its business, as well as interviewing its officials. In such circumstances and under such scrutiny, it would have been extremely difficult to have hidden Pan American's control, should Pan American have attempted to exercise it even by a relatively unimportant change in the company's officers, directors, policies or plans.

A striking example of the absence of control by Pan American in the affairs of SCADTA during the period under review was the secret contract entered into between the Colombian Government and SCADTA in the year 19 , when war with Peru over the Leticia dispute was imminent. The contract virtually made SCADTA, its airports, facilities, equipment and pilots, the official air force of the Colombian army. Although Dr. von Bauer confidentially communicated the fact of the negotiations to Pan American and the consumation of the contract, Pan American exercised no control in authorizing or vetoing it. Pan American's preference in the matter would obviously have been

against jeopardizing the whole of its investment in a military enterprise. Yet the contract was not only entered into but performed, up to the point of readiness for military action by SCADTA in the event of war with Peru. The controversy was settled and hence further action by SCADTA was rendered unnecessary.

(2) Another factor which negatives the idea of control by Pan American during the period under review is the character of Dr. von Bauer and his co-workers. These gentlemen had virtually founded the enterprise; had pioneered its development in the face of enormous physical obstacles; knew intimately Colombia's topography, climate, economy and population. They were men of strong will and fixed ideas. They would never have taken kindly to any attempt by Pan American to supersede their own experience or knowledge of Colombian aeronautic conditions and requirements. Indeed the writer, from his acquaintance with these men, might venture the suggestion that they would have treated any such attempt by Pan American with ill-concealed contempt. Pan American's executive and technical staff were cognizant of the specialized knowledge of SCADTA's officers, and did not interfere in their operating or administrative technique, beyond suggestions and assistance, on the request of SCADTA, towards modernization of methods, facilities and equipment.

(3) A further factor which is indicative of Pan American's absence of control is that at no time prior to March 1940 did SCADTA utilize the services of Pan American's legal counsel in Colombia. As a matter of fact, the officers of SCADTA were barely acquainted with him and he knew the directors only by reputation. SCADTA maintained its own legal department, while both in Barranquilla and in Bogotá it had outside counsel, under retainer who were [fol. 2948] neither selected nor approved by Pan American. These attorneys owed no obligation whatever to Pan American, and on a number of occasions they manifested a distinct national bias in favor of SCADTA as against Pan American.

SITUATION FROM FEBRUARY 23, 1940 TO MARCH 1946.

The division of periods before and after February 23, 1940 is made by the writer because the Stockholders Meeting of 1940 marked a radical change in the corporate set-up, the management and the policies of SCADTA as well as in the relations between Pan American and that company. The so-called Medellín agreement of October 26, 1939 had been signed, embodying the desires of the Government for the eventual nationalization of the company, its change of name, its acquisition of the assets of SACO and preparation for the acquisition by the Government and/or by Colombian nationals of a majority stock interest. The fact of Pan American's ownership of a 64.224% stock interest in the company was now public.

The pressure by the United States Embassy for complete de-germanization of the enterprise had reached its maximum and the Government of Colombia was ready to cooperate in the program, although not yet ready to go to the extremes advocated by the American Embassy.

Legal Situation:

As noted above, Law 58 of 1931 was now fully applicable to corporations. The only exception was that embodied, in favor of aviation companies in which the Government had an interest, in Art. 2nd of Law 68 of 1939. At the SCADTA Stockholders Meeting of February 23, 1940 it was resolved to approve the negotiation whereby SCADTA had acquired the assets of SACO; but when it came to authorization of an increase of the capital stock of SCADTA for the payment in shares of the SACO assets, counsel called the attention of the meeting to the fact that the necessary ⅔ vote for the increase of the capital could not be given, because under Law 58 of 1931 Pan American could vote only 25% of the total votes represented (although it actually held a stock interest of 64.224%), and because the exception provided by Art. 2nd of Law 68 of 1939 could not be invoked because the Government had not yet acquired a stock interest in SCADTA.

Pan American, represented at the meeting by its Vice President, Mr. Rihl, was therefore unable to obtain passage of its resolution to authorize the increase of capital stock, since it could not muster the necessary ⅔ vote under the by-laws, notwithstanding its holding 64.224% of the stock and having on its side a very considerable percentage of additional votes.

Directors of the company were not elected at the Stockholders Meeting of February 23, 1940 because the directors had been elected for a two year term, pursuant to the by-laws, at the Stockholders Meeting of 1939.

The real test of Pan American's control of AVIANCA came at the Annual Meeting of the stockholders in March [fol. 2949] 1941. At that meeting two issues were to be determined; first, the amendment of the by-laws to effect a change of the corporate domicile of AVIANCA from Barranquilla to Bogotá, as determined by Pan American to be necessary for the development of the company. This transfer would involve the transfer also of the office of the President and of the heads of department. The second issue was the matter of electing a Board of Directors from among prominent business men of Bogotá instead of Barranquilla so that meetings of the Board might henceforth be held in Bogotá.

For the purposes of this memorandum, it is not necessary to recount the amazing details of the violent popular uprising in Barranquilla when the notice of the Annual Meeting was published, carrying the intention to transfer the company's domicile and headquarters to Bogotá. Suffice it to say that popular agitation on the question paralyzed for nearly a week the business activities of a city of 200,000; that it required the services of the police and the army to protect the AVIANCA premises and the persons of the Pan American officials who were present to vote at the meeting; and lastly, that the United States Ambassador made a special trip to Barranquilla to investigate the situtation.

At the Stockholders Meeting itself, Pan American's right to vote this change was directly challenged, on the

basis of Art. 28 of Law 58 of 1931. Pan American's representatives then attempted to apply the exception provided by Art. 2nd of Law 68 of 1939, because by that time the Colombian Government had acquired a small interest in AVIANCA through its receipt of AVIANCA stock in the SACO assets purchase transaction. The question was referred to the Superintendent of Corporations at Bogotá, the Stockholders Meeting being adjourned until he could reply. The Superintendent sent a representative to the meeting. This representative, to the astonishment of Pan American's representatives, expounded to the meeting the interpretation by the Superintendent of Art. 2nd of Law 68 of 1939, to the effect that the exception established by that Law was meant to run *in favor of the Government*, as a stockholder, and *not in favor* of private parties. Despite hours of argument and contention between Pan American's representatives and the representative of the Superintendent of Corporations, he maintained his position and refused to recognize Pan American's right to vote beyond 25% of the stock represented. The only recourse would have been to challenge the interpretation by court action, meaning appeal to the competent courts at Bogotá and eventually to the Supreme Court.

In the face of this situation, Pan American was unable to change the corporate domicile of the company to Bogotá. Furthermore, it was unable to elect its own Board of Directors but had to effect a compromise whereby the minority element retained a majority of the Board in Barranquilla. By means of this compromise, the Board was elected by unanimous vote; hence the question of 25% did not arise.

Since that date to the actual date in 1945 when Pan American's stock interest dropped to its present 48.16%, Pan American was unable to elect a Board of Directors of [fol. 2950] its own choosing nor otherwise to control the company. The interpretation made by the Superintendent of Corporations of Art. 2nd of Law 68 of 1939 was never judicially challenged, and governed the Stockholders Meetings through March 1946.

Factual Situation:

Since the Stockholders Meeting of March 1941, the Board of Directors (seven in number) have always been Colombians, both principal directors and their alternates. They are all prominent and independent business men of Bogotá or Barranquilla, with whom Pan American had no ties either of business or of friendship. The only member of the Board connected with Pan American has been its Bogotá attorney.

AVIANCA has had at all times a separate Legal Department, whose personnel are known personally only to ex-Vice President Rihl and the writer of this memorandum. Its outside Counsel have also been independent, without any ties to Pan American, and have been known personally only to the writer, although Mr. Rihl did know personally one of AVIANCA's outside Counsel in Bogotá until the latter's death in 1945.

The President of AVIANCA, who was elected at the Annual Meeting of March 1941, is a Colombian native of notoriously independent mind. He has consistently followed a policy of his own in the management of the company and Pan American's intervention has been solely in an advisory capacity.

The Government's intervention in the affairs of AVIANCA is now a matter of course. Reports are frequently requested by the Superintendent of Corporations as well as by the Director of Civil Aeronautics. At every stockholders meeting, the Superintendent has a representative present who does not hesitate to enter into the deliberations. The Government, since March 1941, has had two Directors out of seven on the Board neither of whom has ever been connected or even acquainted with the officers of Pan American.

PRESENT SITUATION

Since the fall of 1945 Pan American stock interest has dropped to 48.16%. Under Colombian law and under the by-laws of AVIANCA, it takes a majority vote to pass resolutions. Pan American obviously cannot muster alone

this majority vote. Moreover, the interpretation against its ability to vote more than 25% of the shares represented at a stockholders meeting, still stands, so that its position is that of a relatively small minority.

The Board of Directors continues to be composed of prominent and independent Colombian business men, residents of Bogotá, who do not hesitate to apply their own policies and ideas in the management of the company.

[fol. 2951] The President of AVIANCA continues to be Dr. Martin del Corral who works with his Board closely and, more than ever, exercises vigilance for the interests of AVIANCA and not necessarily those of Pan American.

The prospects and plans of AVIANCA, in the face of present strong local competition, have lost all semblance of consideration for the prospects and plans of Pan American. AVIANCA is in every respect an autonomous Colombian enterprise, taking care of its own interests first, in the competitive struggle now going on in inter-American air transport.

CONCLUSIONS

From the foregoing statement of the legal and factual considerations bearing upon the question treated in this memorandum the following are the only reasonable conclusions:

(1) That from Pan American's original acquisition of a stock interest in SCADTA in 1931, through the Stockholders Meeting of 1940, the circumstances were such as to preclude control by Pan American and that Pan American in fact never exercised such control;

(2) That the situation, both legal and factual, from the Stockholders Meeting of 1940 until Pan American's stock interest dropped under 30%, in the fall of 1945, was such that Pan American could not have exercised control, not even a "negative" control, because in effect it had a relatively small minority interest, and faced unsympathetic elements within and without the company;

(3) That under the present situation, no such control is possible either legally or in fact because Pan American has

no majority stock interest by reason of its ownership of only 48.16% of the stock, nor can it exercise any form of negative control because it actually has only a maximum of 25% of the voting rights at any stockholders meeting, this proportion being insufficient to block any action whatever on the part of the majority stockholders.

BEFORE THE

CIVIL AERONAUTICS BOARD

Docket No.

IN THE MATTER OF

AN AGREEMENT BETWEEN

PAN AMERICAN AIRWAYS, INC.

and

PAN AMERICAN-GRACE AIRWAYS, INC.

Dated July 30, 1946

The petition of PAN AMERICAN AIRWAYS, INC. thereinafter referred to as PAA respectfully shows to the Board as follows:

1. PAA is a corporation organized and existing under the laws of the State of New York. PAA holds various certificates of convenience and necessity for routes between the continental United States and the Canal Zone.

2. Pan American-Grace Airways, Inc. thereinafter referred to as Panagra is a corporation organized and existing under the laws of the State of Delaware. Panagra holds a certificate of convenience and necessity for a route between the Canal Zone and various points in South America.

3. A substantial amount of the passenger, air express, mail and cargo traffic proceeding between the continental United States and the Canal Zone originates at or is destined to points on Panagra's certificated route in South America.

4. Various foreign-flag and other American-flag carriers are about to begin operations between the continental United States and countries of South America which Panagra is certificated to serve. The service contemplated by

MICRO CARD 22
TRADE MARK ®

1207

MATTHEW BENDER & COMPANY
MB

83

microcard

such carriers will be through one-plane service without a requirement of change of plane at the Canal Zone.

5. A controversy has existed between the parties and between Pan American Airways Corporation and W. R. Grace & Co., the owners of the stock of Panagra, with respect to the filing by Panagra of an application for an extension of its own route from the Canal Zone to the continental United States. This controversy is reflected in the Board's Dockets 525, 707, 744 and 779, the last-mentioned of which is now pending on writ of certiorari in the Supreme Court of the United States.

6. In order to provide, on a long-term basis, through one-plane service between points on Panagra's certificated [fol. 2954] route in South America and points on PAA's certificated routes in the United States for the greater convenience of the traffic and shipping public, to enable themselves to compete more effectively with the foreign-flag and other American-flag carriers which are about to commence operations between the continental United States and points on Panagra's certificated route in South America, and to settle the controversy between them, PAA and Panagra have entered into an agreement dated July 30, 1946, a copy of which is attached hereto marked "Exhibit A" and made a part hereof, and W. R. Grace & Co. and Pan American Airways Corporation have entered into an agreement also dated July 30, 1946, a copy of which is attached hereto marked "Exhibit B" and made a part hereof.

7. The agreement between PAA and Panagra, a copy of which is attached as Exhibit A, constitutes a cooperative working arrangement within the meaning of Section 412 of the Civil Aeronautics Act. The agreement between W. R. Grace & Co. and Pan American Airways Corporation, a copy of which is attached as Exhibit B, is not deemed to be within the purview of any provision of the Act but is submitted for the information of the Board since it relates to the subject-matter of the agreement between PAA and Panagra and its effectiveness is dependent upon the approval of said agreement.

WHEREFORE, petitioner respectfully prays that the Board make and enter an order approving the aforesaid agreement between PAA and Panagra dated July 30, 1946, under Section 412 of the Civil Aeronautics Act and such other sections of the Act, if any, as may be applicable thereto, and that the Board shall grant such other, further and different relief as to it may seem just and proper.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 241

(Letterhead of Pan American World Airways System, New York 17, N. Y.)

[Handwritten notation—Correspondence File 2114.41]

August 19, 1946.

Hon. James M. Landis, Chairman,
Civil Aeronautics Board,
Washington 25, D. C.

Dear Sir:

Since the decision of the Circuit Court of Appeals for the Second Circuit remanding the Panagra Terminal Investigation, Docket 779, for further proceedings before the Civil Aeronautics Board and the order of the United States Supreme Court of June 10, 1946 granting a writ of certiorari to review that decision, agreements have been reached between W. R. Grace & Co. and Pan American Airways Corporation and between Pan American Airways, Inc. and Pan American-Grace Airways, Inc. (Panagra) which, upon becoming effective, will dispose of the controversy between Pan American and W. R. Grace & Co. which gave rise to CAB Docket 779 as well as to CAB Dockets 707 and 744.

On August 5, 1946, Pan American Airways, Inc. filed an application under Section 412 of the Civil Aeronautics Act for approval of the Pan American-Panagra agreement. The agreement between Grace and Pan American Airways Corporation was also annexed to the application for the information of the Board since it relates to the subject matter of the agreement between Pan American and Panagra and its effectiveness is dependent on the approval of such agreement. Paragraph 6 of the Grace-Pan American agreement provides:

> "6. *Pending Litigations* The parties will forthwith make suitable application to the Supreme Court of the United States and to the Civil Aeronautics Board requesting that the proceedings now pending in the said Court and before the said Board relating to the con-

troversies between them shall be kept in *statu quo* until the Civil Aeronautics Board shall have made a final order in the proceeding relating to the Panagra-PAA contract contemplated by paragraph 20 thereof and, if a timely proceeding to review any such order shall be instituted, until such proceeding for review shall have been finally determined. Upon an order of the Civil Aeronautics Board approving said contract having been made and become final, the parties will make appropriate applications for the dismissal of all such proceedings."

Under the terms of these agreements, the subject matter of the controversies presented in CAB Dockets 779, 707 and 744 will be disposed of and application for dismissal [fol. 2957] made both by Pan American and by Grace upon the Panagra-Pan American agreement being approved by order of the Civil Aeronautics Board and such order becoming final. It is respectfully requested, therefore, that CAB Dockets 779, 707 and 744 be kept in *statu quo* until the Board shall have made a final order in the proceeding relating to the Panagra-Pan American agreement and any timely review of such order finally determined.

Very truly yours,

/s/ HENRY J. FRIENDLY
Counsel for Pan American Airways Corporation and Pan American Airways, Inc.

CAHILL, GORDON, ZACHRY & REINDEL
Counsel for W. R. Grace & Co.

Pan American-Grace Airways, Inc. joins in the foregoing request.

November 25, 1946

[fol. 2959] II.

Docket 779 does not establish any facts which support the contention that the Through Flight Agreement is contrary to the Public Interest.

The most outstanding fact disclosed uniformly by the briefs submitted by intervening airlines is the complete inability of these intervenors to find any substantial basis for attacking the merits of the Through Flight Agreement as such.* Intervening airlines do not dispute the evidence summarized in Panagra's main brief establishing the advantages to the public which will be provided by the single plane through service between the east coast of the United States and the west coast of South America made possible under the agreement. Nor do these intervenors seriously assert that the economy and efficiency of Panagra's services will not be substantially improved. Moreover, they seem to recognize, by the very tenor of their argument, that the agreement places Panagra in a position to compete with them and others on more even terms.

Intervening airlines in seeking a basis for opposing the agreement attempt to avoid consideration of its terms and public benefits by attacking the parties to the agreement, their motives and their past relations. By making a wholly improper use of isolated bits gleaned from the evidence in Docket 779 these intervenors have sought to create a false picture of Panagra's operations and Panagra's relations with its parent companies. It is asserted Docket 779 establishes that Grace and Pan American Corporation can never reconcile their differences, that their relationship is "inherently bad", that the agreement will not work, that Panagra's interests will be subordinated to the monopoly designs of Grace on the one hand and Pan American on the [fol. 2960] other, and that accordingly Panagra in its own interest should not be allowed to proceed with the Through Flight Agreement.

* Public Counsel does raise certain points concerning various provisions of the agreement, but under the stipulation these cannot be dealt with here, and accordingly Panagra's position will be presented at oral argument.

While there is no factual support for these arguments, the Board will, of course, recognize that intervening airlines are not actually concerned with Panagra's welfare. Certainly Braniff is anxious to see Panagra wither and die on the vine so that its new South American routes may be developed without the annoyance of strong American flag competition. Certainly Eastern is anxious to have its routes extended first to the Canal and presumably, when times are propitious, further south, to skim the cream of the Latin American traffic passing between the east coast of the United States and principal points on the west coast of South America. While the position of National, Chicago and Southern, and Colonial is none too clear, they also enter this proceeding not for the purpose of determining what is best for Panagra's welfare or in the public interest but of preventing any action by Panagra which will impinge upon the successful carrying out of their own commercial plans. These carriers in various ways, and notably Eastern have at all times sought to block Panagra and to prevent it from having an opportunity for normal growth and healthy development. And it is small comfort indeed that Public Counsel now feels Panagra should rely on Docket 779 when attorneys for the Board and for Eastern so vigorously opposed any court order which would even support the Board's jurisdiction to direct an extension.

The arguments based on Docket 779 require little discussion to demonstrate that they are completely unsupported by the facts:

(A) The controversy which led to Docket 779 has been settled and the aggravating cause of earlier deadlocks has been permanently eliminated.

Intervenors briefs reflect a keen disappointment that Panagra's parents and Panagra and PAA have reconciled the past difference of opinion which has existed concerning [fol. 2961] Panagra's operations north of the Canal and that the controversy is now at an end. Drawing on Docket 779 they seek to magnify the nature of that controversy beyond all proportion to the established facts and then despair because a controversy which they have concocted

out of whole cloth is not in all its aspects disposed of to their satisfaction. It is even suggested that there is something unhealthy and immoral in the fact that the controversy has been settled. Intervenors apparently hope to keep the controversy alive because its existence seems to give them more assurance that they will obtain their particular route ambitions.

While the advantages of the Through Flight Agreement, from the point of view of the public interest, do not in our opinion hinge upon whether or not the controversy is settled, the fact is that the controversy is at an end. The parties themselves, who certainly must have some familiarity with the subject matter, assert this to be the case (Tr. 249-251, 537-8), and the record establishes beyond doubt the validity of this contention.

The "inherently bad" situation to which the Board referred in its opinion arose out of the fact that deadlocks in the Board of Directors occurred because of the controversy concerning the extension of Panagra north of the Canal. This controversy has not only been terminated by eliminating the cause for deadlocks but excellent machinery has been provided under the contracts for disposing of questions which on previous occasions led to misunderstanding (Tr. 68, 111, 112). The "inherently bad" situation can no longer fairly be said to exist. Not only has Panagra, except for this one issue, grown and developed with harmony among its directors and with great singleness of purpose but there is no reason to believe that the situation will change in the future. Even in the heat of Docket 779 both Mr. Roig and Mr. Trippe repeatedly testified to the fact that serious disputes in Panagra's Board of Directors have for many years been almost entirely confined to the single extension issue and related problems (Docket 779, Tr. 759-760, 1194, 2467-2169). They made clear that on other ques-[fol. 2962] tions the Directors have proceeded in complete agreement and that the operations of the company benefitted from the contribution to its development made by each parent (Docket 779, Tr. 754, 1558-59). This fact was again emphatically affirmed in this proceeding (Tr. 362-5, 509-10, 441, 442).

Mr. Roig testified in Docket 779:

"Q. Mr. Roig, is it your opinion that Panagra's history has been one of development and progress from the beginning?

"A. Well, I think the record shows it and if you like I would run over some of the steps that have been taken since.

"Q. I am going to take up that in a moment, but I am going to ask you two more questions along that line. There have been differences in the Board of Directors, have there not, on the various steps in this program of development and progress that you mention?

"A. There have on some of the steps but it would be a great mistake if anyone got the impression that there has been a difference of opinion on everything that happened.

"Q. As a matter of fact, Mr. Roig, on all the questions up to the instant one, the extension to the United States, the differences have been resolved, have they not?

"A. With the exception of the terminal in the United States and the publicity question, we have reached a conclusion among ourselves, yes, on all these questions.

"Q. Leaving aside the publicity question for the moment, and also, of course, the instant question, which is for the Board to consider, these differences have not been permitted to block the steady progress and development of which you speak, in your opinion, have they, Mr. Roig?

"A. Well, except to the extent that the present controversy has blocked for some years our coming to the United States, and that publicity may have had some bearing, I don't think very direct. The very fact that those other matters have been settled and that they have been in number relatively few, shows that they have gone on, and that isn't a matter of [fol. 2963] opinion, the record shows it." (Docket 779, Tr. 759-760)

So extreme are the contrary contentions of certain intervening carriers as to the nature of the disputes which they claim exist in Panagra's management that one is forced to believe that these carriers, each dominated by a single individual, mistake healthy discussion for bitter conflict. There is nothing which Panagra has to apologize for the fact that it has a real and functioning Board of Directors. Its directors have not always unanimously agreed, or for the fact that for short periods of time various directors have held staunchly to a particular viewpoint on a question as to what was best for the future of the company. That Panagra's directors and personnel have in the past not always agreed as to what was the best equipment to buy, where a route should go, or how a particular policy should be implemented is a good thing, not a bad thing. These questions have been discussed, ironed out and settled, Panagra benefiting by the discussions. Indeed, Mr. Roig, Panagra's President, points with pride to the fact that healthy discussion of important matters before the company is encouraged.

Nor is there anything unusual in the fact that Panagra is a fifty-fifty company. This form of corporate organization is well-known throughout American business, particularly in the transportation field (Tr. 573-4). Corporations having two shareholders who each hold an equal amount of stock have prospered in the past and will prosper in the future. There is nothing mysterious or improper about such a company, and we feel certain that the Board at no time intended to say that a fifty-fifty ownership of an airline was undesirable or "inherently bad".

(B) Docket 779 does not support the claim that the Through Flight Agreement is unworkable.

For some reason which we are unable to fathom, intervening airlines contend that Panagra and PAA have entered into the Through Flight Agreement in a state of hopeless [fol. 296'] despair, with no intention of carrying it out and in full agreement in advance that it is unworkable. The contention is made (again with great force but with no

factual support) that the parties have previously taken the position in their discussions that an agreement of the type here proposed is unworkable. This is absurd, as is reflected by other arguments of Intervenors themselves, who in other sections of their brief point with horror to the serious competition which the successful functioning of the agreement will create in the future.

What are the facts with respect to past interchange discussions as clearly shown by Docket 779? Simply and succinctly they are these: Mr. Roig in the past repeatedly refused even to give serious consideration to a Pan American proposal of mere equipment interchange arrangement under which PAA's planes would also fly over Panagra's routes, a proposal which was indefinite as to starting date or the nature and extent of services to be rendered, which was purely optional and placed no obligations upon either party, and which provided no basis for Panagra sending its crews to the United States or establishing training and maintenance facilities there (Docket 779, Exhibit G58, Tr. 934-937 and Docket 2423, Tr. 266-269). Such an agreement was never entered into in the past and would not be entered into today (Tr. 269). It would be unsuitable under many headings, it would not dispose of the basic extension question and would be wholly unworkable, but such an agreement is not the agreement before the Board. In fact a straight interchange arrangement was not even suggested during the negotiations leading to the Through Flight Contract (Tr. 590-91).

Mr. Roig clearly explained the substantial differences between earlier proposals and that embodied in the Through Flight Agreement (Tr. 266-269).* The agreement before the

* * * * * * *

* The testimony of Mr. Roig in Docket 779 quoted at page 37 of Eastern's Brief is incomplete and as a result wholly distorted as Mr. Roig himself demonstrated (Tr. 263). This is a revealing example of Eastern's unprincipled use of the Docket 779 record.

[fol. 2966] POINT III

Old Controversies Between Pan American and Grace Referred to in the Record in Docket No. 779 Do Not Make the Contract Contrary to the Public Interest.

Eastern argues that previous difficulties between Panagra's parents render the contract adverse to the public interest (Eastern's Br., pp. 35-39). This argument is not sound either as a matter of fact or of logic.

By culling bits and pieces from the record in Docket No. 779, Eastern seeks to convey the impression that there have always been numerous serious controversies between Panagra's parents as to the conduct of its affairs. Such an impression is wholly contrary to the fact. Docket No. 779 was a keenly contested proceeding, but it is apparent even from the record there that the one basic controversy between Panagra's parents related to the question of extending Panagra to the United States. Thus, Mr. Trippe testified in that proceeding that during Mr. Roig's tenure as President of Panagra, the only issues upon which the parents had differed to any considerable extent were:

(1) The extension of Panagra to the United States including the related interchange question, and

(2) Whether Panagra should have five or three DC-4's (Docket No. 779, pp. 2167-2169).*

In the present proceeding, both Mr. Roig and Mr. Friendly have testified that, except as to the extension issue, the parents have successfully and effectively worked together on innumerable Panagra problems. In fact, it is this that has made possible the growth and development of Panagra into [fol. 2967] a vigorous and successful airline operation over one of the most difficult routes in the world. The testimony of these two witnesses leaves no doubt that the contract settles the only basic difference between Panagra's parents,

* In Docket No. 779 witnesses both for Pan American (Trippe, pp. 1558-1559) and for Grace (Roig, p. 754) testified that the other parent had made invaluable contributions to Panagra.

and thus gives assurance of harmonious relations between them in the future (Roig, pp. 441-442; Friendly, pp. 537-538).

Quite apart from the uncontradicted evidence in this case that the contract settles this controversy between the parents and that no others exist, the whole of Eastern's argument that the contracts are against the public interest because controversies may conceivably arise between Grace and Pan American in the future is beside the point.

Eastern's contention on this score comes in the end to the proposition that no contract settling the Panagra problem can be in the public interest because of a possibility of disputes between Panagra's parents in the future. This implies that no compromise can be effective merely because it is a compromise. The fallacy is apparent.

Moreover, even if there were present, as there is not, some basis from which it could be contended that disputes affecting Panagra may arise in the future between Pan American and Grace, this would not be any reason for disapproving these contracts now when admittedly no such controversies exist. Assuming for the sake of argument that, as Eastern contends (Eastern's Br., pp. 35-39), past disputes between Panagra's parents have been adverse to the public interest, it would necessarily be in the public interest that such disputes should be settled. Whatever its conclusion might be, continuance of the litigation in Docket No. 779 affords far less prospect of a healthy and workable arrangement than a compromise which the parties have voluntarily made. Finally, if it should appear at any time that differences have arisen between Pan American and Grace that jeopardize the public interest either in the through flight service provided by the agreement or in any other way, the Board can withdraw its approval of the contract.

MEMORANDUM

TO Vice President Balluder

DEPT. OR DIV. Executive

LOCATION New York

FROM Vice President

DEPT. OR DIV. Latin American

LOCATION Miami

DATE: February 27, 1947

SUBJECT: DISTRIBUTION OF ARGENTINE COMPANY EXPENSE BETWEEN PAA AND PANAGRA

REFERENCE:

The attached analysis is a breakdown of the January 1947 expenses of the Argentine company, showing the allocation of the expense between Panagra and PAA following more or less the formula proposed by Mr. Smith, but with additional refinements, in view of the substantial sum involved.

The payroll was broken down into the various sectional functions which exist in the organization so that the work performed for each of the PAA and Panagra physical locations could be distributed on the basis of the payroll. The expense of each payroll section was distributed to the four physical locations, i.e., work performed by the Argentine company for PAA and Panagra outside of Buenos Aires, which is charged directly to each company, work performed for the Moron Airport charged to Panagra for sharing under the Joint Facilities arrangement, and the balance of the work performed exclusively for the Argentine company, which is actually the revenue producing expense.

The following is the basis which was used for the distribution of each sectional expense:

1. The Administrative and Legal sections were both distributed on Mr. Smith's determination of the equitable percentage attributed to the four physical locations.

2. The Personnel and Payroll sections were distributed on the basis of the number of employees assigned to each of the physical locations. The work of these sections is directly in proportion to the volume of personnel on the payroll.

3. Accounting and General employees were distributed on the basis of the total expense, which was developed for each expense center as their work is directly dependent upon the dollar volume handled.

4. The Moron Airport and Passenger Service sections were directly assigned to Moron expense for further proration under the Joint Facilities arrangement.

5. The Asuncion section was likewise directly charged to PAA, and the four Panagra Argentine agencies were directly charged to that company.

[fol. 2969] 6. The Invoice Control, Customs Brokerage, and Purchasing sections were distributed on Mr. Smith's evaluation of the services performed, which was 90% to Moron and 10% to the revenue producing section.

7. Revenue Accounting, Traffic and Sales, Express, and Publicity and Advertising were assigned 100% to the revenue producing expense section together with the direct expense which could be determined entirely for this section.

Under this formula the percentage of the net Argentine company expense (after deducting Panair do Brasil's commission) for PAA will be approximately ~~43.70%~~ 43.70 as compared to 55.21% and 59.28% under the respective proposals of Messrs. Smith and Brock.

The reduction in the PAA percentage is attributable to the allocation of the direct expense to the account of PAA and Panagra, and the transfer of the Ticket Office cashiers from the Accounting Department to the revenue producing expense as these employees work exclusively in the Ticket Office and the allocation of the expense to the Moron Airport to cover work performed by the Argentine company for that location which is shared by PAA under the Joint Facilities arrangement. The allocation to the Moron Airport should be divided between PAA and Panagra on the ton landings without any overhead being allocated by either company.

DISTRIBUTION OF ARGENTINE COMPANY EXPENSES

Your memo of February 27th to V. P. Balluder
Your letter of March 18th to V. P. Balluder

Panagra has agreed to your proposal for prorating expenses with the following understanding, to which Mr. Balluder agrees:

That part of the expenses which is prorated according to sales will be prorated each month according to the actual transportation provided by each company that month, exclusive of mail. In other words, PAA sales will include transportation from Balboa north on PAA. Mail pay should be left out of the sales figures.

The percentages used for direct PAA, direct Panagra and Moron expenses may be revised, should there be any major change in the business done by the Argentine company. However, it is expected that these percentages will be satisfactory for some time to come.

H. Brock

SUBJECT: ADVERTISING AND SALES POLICY FOR ARGENTINA.

REFERENCE:

With reference to the above subject I am enclosing herewith an outline of the advertising and sales policy for Argentina which was tentatively agreed upon at our recent meeting in Havana. If this agreement appears satisfactory to you, I suggest that you have it formalized by addressing an official communication to the General Traffic Manager of Panagra in New York and to this office.

While on this subject, as you know, Panagra is sending a special Traffic Representative to Buenos Aires who will direct their advertising and sales activities. Unquestionably this representative will do a good deal of direct selling and thereby gain an advantage over Pan American unless we follow the same tactics by assigning a Pan American Traffic Representative to Buenos Aires.

If you have any further thoughts on this subject, please let me have them at your earliest convenience.

ADVERTISING AND SALES POLICY
FOR ARGENTINA.

1. That both companies will continue with the joint DC-6 advertising campaign as outlined by the New York agreement.

2. That each company will advertise independently according to the needs of the moment and without restriction of any kind on the part of the other, including DC-6 through-flight service and United States destinations.

3. That each company will be allowed to advertise any or all its services without restriction of any kind on the part of the other, including DC-6 through-flight service and United States destinations.

4. That all sales or solicitation personnel of the Argentine Company will impartially sell the services of both companies.

5. That it is agreed that no unduly competitive or sharp practices will be used either in the sales or advertising effort to the detriment of either company.

Note: The above policy was tentatively agreed upon at a meeting held in Havana, Cuba, on August 21st, which was attended by the following:

Mr. Willis Lipscomb—Vice President—
Traffic and Sales

Mr. John E. Muhlfeld—Traffic Manager—LAD
Mr. Christopher de Groot—General Traffic Mgr—Panagra

INTRODUCING "THE INTERAMERICAN"

On October 11th Pan American World Airways and Pan American-Grace Airways will introduce to the public the new DC-6 Express Flight Service between Miami, Balboa, Lima, Santiago and Buenos Aires which will be named "THE INTERAMERICAN" (El Interamericano). The purpose is to establish in the public's mind the leadership of the Pan American companies on the western route between the United States and Argentina, and to demonstrate the unanimity of purpose and practical working partnership of Pan American World Airways and Pan American-Grace Airways.

Plans have been completed by both companies for public christening ceremonies to be held in Miami and Buenos Aires, the terminal points, with complimentary ceremonies in Santiago, Lima and Balboa for launching the first flight of THE INTERAMERICAN. As the initial northbound flight will be on October 12th, Columbus Day, it provides the opportunity for making THE INTERAMERICAN an

important feature of many official and cultural programs scheduled for that day in all the Pan American Republics.

All offices are fully acquainted with the DC-6 operation flights #301 and #302. This is an extra fare service operated with DC-6 equipment and offers sleeping accommodations. It is a service which is superior to anything which competition can offer today on the West Coast route between Miami and Buenos Aires and we are confident that you will be able to do a bang-up job for both companies provided you capitalize fully on the publicity which will be forthcoming on October 11th and 12th.

By copy of this memorandum to the Public Relations Department in New York, I am requesting Mr. Player to see that you are supplied with full details concerning inauguration of THE INTERAMERICAN. It is my suggestion that you play up this inaugural to all travel agents and commercial firms in your territory and also to any other groups which may be directly interested in this high-speed service.

AGREEMENT BETWEEN PAA, INC. AND PAN AMERICAN-GRACE AIRWAYS, INC.—
JULY 30th, 1946

It is extremely important that you and the District Sales Managers under your jurisdiction become thoroughly acquainted with the agreement which was signed on July 30th, 1946 by Pan American Airways, Inc., and Pan American-Grace Airways, Inc., and which pertains to the operation of Panagra aircraft by PAA between the Canal Zone and the United States. As you know, at the present time, Panagra aircraft are operating on charter to PAA between Balboa and Miami and both companies have worked up a special advertising and publicity program to introduce this service in the United States and South America as "The Interamerican".

Concerning the United States, PAA will continue to act as general sales agent for Panagra with a right to appoint sub agents and in addition, appoint at least one responsible employee who will work full time in the District Sales Offices of New York, Chicago and Washington for the purpose of promoting the sale of Panagra traffic and for facilitating and improving the handling of such traffic. Also, PAA shall use its best efforts to promote and develop traffic for Panagra in the United States without discrimination and on the same basis which it promotes its own traffic.

I have already written you concerning the Panagra display for ticket offices and under separate cover, I am advising you today of Mr. Nicholas Craig's forthcoming trip to all District Sales Offices in the United States. During his visit,

he will no doubt discuss the various aspects concerning promotion of sales over Panagra as related to this agreement. Therefore, it is important that you carefully read the attached agreement and make certain that you and your District Sales Managers fully understand it, particularly the portion affecting the DSO's.

If there are any questions, please advise me.

Gentlemen:

I am enclosing herewith confirmation of my resignation as Vice President in Charge of Commercial Operations in Colombia and as Director of your Corporation, effective July 31, 1947.

You have stated that you are disposed to pay me $15,000 dollars, which sum not only satisfies in full my claim under Colombian law to severance pay (cesantia), but also compensatory vacation pay at the rate of fifteen working days for each year of service and payment for work on Sundays and holidays and for overtime. This same amount also includes a special and additional separation allowance, which said total sum would be in full satisfaction of all claims and demands of any character which I may have against your corporation, its officers, directors and stockholders. Your offer being satisfactory to me, I hereby accept the same, and I agree, upon receipt of $15,000 from you to execute and deliver to you a general release of all claims in such form as your corporation may consider appropriate.

If this is in accordance with our understanding, please note your approval in the place indicated below.

Very truly yours,

/s/ GONZALO MEJIA
Gonzalo Mejia

Mr. E. Balluder
Vice President
Pan American Airways
135 East 42nd Street
New York 17, N. Y.

Dear Mr. Balluder:

Dr. Uribe Holguin is holding the general release signed by Mejía and attested by the Consul in Medellin. I have in my own possession the other three documents signed by Mejía in identical form as prepared in New York. Mejía

wired me yesterday that he has not yet received confirmation from the bank.

In this connection I thought you might be interested in the following extract from a confidential report submitted by our representative in Medellin:

"From sources which have our complete confidence, we have been able to ascertain that Gonzalo Mejia is an important stockholder of SAM, although he does not appear directly as holder of the shares nor as acting member of the Board."

SAM, or Servicio Aero de Medellin, is one of the principal freight carriers in Colombia. Its head is Arthur Taylor, a long-time American resident of Colombia.

Very truly yours

Dr. Paulo Sampaio, President
Panair do Brasil
83 Av. Rio Bronco 85
Rio de Janeiro, Brasil

Dear Dr. Sampaio:

I have received your very nice telegram of December 19, in connection with the passing of control of Panair do Brasil to Brasilian nationals. The year end activities and my absence from New York have delayed my answer, but I want you to know that I share your sentiments of satisfaction in seeing this important move accomplished.

I realize that the shift in ownership will increase very considerably your responsibilities in order to produce for Panair do Brasil, as a national Brasilian enterprise, continued successful and prosperous results. However, you may rest assured of the full-hearted support of all of your friends in Pan American Airways. The efforts of our organization will be to continue to assist your company in every possible way and to reaffirm this example of successful cooperation between our two countries.

With best wishes for your continued success and a happy and prosperous New Year.

Sincerely,

Signatory J. T. TRIPPE

February 3, 1948

MEMORANDUM OUTLINING PANAGRA ARRANGEMENT WITH PAA CONCERNING THE SERVICES WHICH PAA WILL RENDER IN CONNECTION WITH TRAFFIC, PUBLICITY, AND ADVERTISING IN 1948

1. PAA will act as General Sales Agent for Panagra in the United States, Europe, Asia, Africa, and Australia, for which services it will receive General Sales Agent's commission prescribed by IATA.

2. In accordance with paragraph 10-C of the Through Flight Agreement dated July 30, 1946 and in order effectively to carry out the functions of General Sales Agent, PAA will set up the following methods and procedures which Panagra desires to have established by PAA:

   (a) PAA will supply Panagra each week with sales figures (not necessarily accounting figures) showing the volume of sales made the previous week by Pan American's District Sales Offices in the United States and by sub-agents in the territory of each of these offices.

   (b) The General Traffic Manager of Panagra or the Traffic employee of Panagra designated by him shall, with the full cooperation of the PAA Sales organization, make periodic visits to the various Sales offices in the United States, and to travel and cargo agents, and to prospective passengers and shippers for the purpose of acquainting the Sales office staffs, agents, and others with information and special features pertaining to Panagra and to countries served by Panagra, as well as to study and report to the Vice President & General Traffic Manager of PAA and to the Vice President and

General Manager of Panagra the effectiveness of the sales efforts at any given office or area, together with his suggestions for steps to be taken to improve or intensify such efforts.

(c) It will be the obligation of PAA and of its offices in the United States and abroad to make known promptly to the appropriate Traffic officials of Panagra any special movement of passenger, cargo, or other traffic involving points on Panagra's routes, or which may be moved expeditiously via Panagra's routes, in order that the Panagra Management may promptly consider special arrangements to handle or solicit same.

(d) PAA will make an immediate and intensive study in collaboration with Panagra's General Traffic Manager, or his designee, of ways and means to [fol. 2089] expedite the carriage of cargo from points of origin in the United States to points on Panagra's routes and vice versa, including study of simplification of documentation and transfer between U. S. domestic airline aircraft, PAA aircraft, and or Panagra aircraft, in order to avoid existing documentation and handling dela which adversely affect Panagra's competitive position on cargo vis-a-vis foreign airlines operating through aircraft between Panagra points and points in the United States.

(e) PAA will publicize appropriately the fact that they are General Sales Agents for Panagra and, in accordance with paragraph 11-B of the Through Flight Agreement dated July 30, 1946, PAA shall promptly place on display and hold out to the public in all of its city ticket offices in the United States the name "Panagra" in such form and reasonable quantity as may be requested from time to time by Panagra's General Traffic Manager.

3. PAA, by one or more qualified employees, shall continue to act as tariff and schedule publishing agent for Panagra. It is understood that at such times as PAA

may be studying proposed regular or special tariff or schedule changes affecting Panagra, PAA will advise the General Traffic Manager of Panagra at the outset of such studies in order that Panagra may have an ample opportunity to study the matter from its own angle and make known its views and desires in the early stages of discussion of the matter.

4. PAA will advise Panagra periodically—at periods not exceeding one month—trend of traffic conditions and steps being taken to effect sales.

5. While the TFA calls for a so-called Panagra expert only in the PAA offices in New York, Washington, and Chicago, PAA will appoint such a man in all DSO offices in the United States. As a part of their indoctrination, these men will be sent on a familiarization trip over Panagra.

6. (a) PAA agrees to advertise Panagra destinations in its System advertising without charge to Panagra in view of the offsetting expense incurred by Panagra for advertising primarily in South America for its own account which benefits the System as a whole. It is understood that the System advertising aforementioned as far as the Western Hemisphere is concerned will include Panagra destinations in proportion to the number of points involved.

(b) In accordance with Paragraph 14 of the Through Flight Agreement, PAA and Panagra will work out for 1948 a program for advertising the Through [fol. 2990] Flight Service similar to that worked out for 1947, the cost of which PAA and Panagra will share in proportion to the estimated revenues accruing to each from such service.

(c) In the Through Flight Agreement it was apparently considered that advertising for such Through Flight Service would be carried out principally on the Eastern Seaboard or that area of the United States which Miami serves as a gateway. It is now realized that a considerable amount of the traffic which uses the Interamericano comes from

the middle and western parts of the United States from whence passengers journey to Balboa, the connecting point with the Interamericano, via other gateways than Miami. It is therefore felt desirable that some method be worked out for extending so-called Through Flight advertising to the middle and western parts of the United States on a basis similar to that for advertising for the Miami gateway, i.e., using the revenue division corresponding to the middle and western gateway routes to proportion the costs to be paid for such advertising by PAA and Panagra.

March 19, 1948

Memorandum to Mr. Erwin Balluder

Further to Mr. Vidal's memorandum of February 16 on the subject of Panagra Through Flight advertising, we wish to confirm the arrangements so far agreed upon for this item.

1947 (termination) U.S. Total $25,000 (Panagra $17,125 & PAA $7,875)
1948 United States Total $146,000 (Panagra $100,000 & PAA $46,000)
1948 Argentine Total $36,000 (Panagra $24,660 & PAA $11,340)

This leaves pending only the Through Flight advertising at line points other than Buenos Aires, which last year was set up at $12,000. If that figure is agreeable to you, we will set up the same for 1948 and the share pertaining to PAA of such amount would be $3,780.

The summary of the above figures gives a total appropriation for Through Flight advertising under the 1948 heading of $194,000 (Panagra $132,380 and PAA $61,120) with a carry over from 1947 of $25,000 (Panagra $17,125 and PAA $7,875).

Will you kindly signify your conformance with the above.

SALE OF PANAGRA PASSENGER AND CARGO TRAFFIC

Last July Vice President Lipscomb visited each office and outlined the policy which was to be followed in the promotion and sale of passenger and cargo traffic for Panagra.

This subject was again covered at great length during the General Sales Meeting in New York and since then I have visited all offices and once again reaffirmed this policy.

Not withstanding all of the above, we continue from time to time to receive information which indicates quite clearly that some of our sales people are not adhering strictly to Company policy of voluntarily quoting Panagra's services, both passenger and cargo, when prospective passengers and shippers contact District Sales Offices by 'phone, by correspondence or in person.

I request that you hold a staff meeting immediately with all of your personnel and point out to them once again that, as General Agents for Panagra in the United States, we are responsible for the promotion and sale of Panagra traffic and must voluntarily offer and quote Panagra's services to the travelling and shipping public, and in particular to those interested in transportation to Buenos Aires. In other words, DSO personnel are expected to offer both East Coast and West Coast services in an impartial manner and without exception.

It is essential, also, that you make certain that all new employees are properly indoctrinated on this policy, from now on, for we are determined that it shall be carried out. I am confident that, if you follow this procedure, there will be no further cause for question of the manner in which we promote and sell Panagra.

I am sending a copy of this letter to the Division Traffic (Sales) Managers with the request that they make certain that this policy is adhered to strictly by all Division Offices and General Agencies. After receipt of this letter please confirm to me in writing your understanding of this policy, and that all personnel have received complete instructions.

[fol. 2995] Within the very near future you will receive quick reference information concerning Panagra's services which we have asked their New York Office to prepare for us and which will be incorporated into the Quick Reference Information now being compiled as a part of

the new program to indoctrinate sales personnel in selling passenger and cargo traffic in the U.S.A.

In compliance with your request we confirm to you that each of us in the Philadelphia office understand the importance of solicitation of Panagra passenger and cargo traffic.

Recently we had the benefit of a very nice visit from Nick Craig, and he—together with the writer—visited the principal agents in the Philadelphia territory. We also held

a staff meeting, and all the features of Panagra, both passenger and cargo, were discussed at great length.

You may be assured that the Philadelphia office is keenly aware of the responsibilities to Panagra, and all our activities are directed to this end.

July 16, 1948

Mr. Erwin Balluder
Pan American Airways, Inc.
Chrysler Building
New York, New York

Dear Mr. Balluder

The three-cornered management service agreement between Pan American Airways, W. R. Grace & Co. and Panagra

provides that Panagra will continue to receive sales and other services jointly with Pan American Airways from Cia. de Aviacion Pan American Argentina and the same method for determining joint reimbursement as is now in effect will continue and will be applied in the light of conditions existing from time to time. It is understood that the following arrangements will constitute part of such reimbursement and will continue for the same term as the three-cornered agreement. Sales commissions of one-half of one percent have been paid by both Pan American and Panagra to the Argentine company. The commissions paid by Panagra have later been credited in full by Pan American to Panagra as reduction of the management fee and this practice will continue. However, effective January 1, 1947, Panagra shall participate through direct payments to Pan American in the charges against the Argentine company, not otherwise allocated to Panagra, representing taxes and other similar expenditures as well as a return of ten percent on Pan American's investment in the Argentine company. Panagra will share in the foregoing charges in the same ratio as it shares with Pan American in the other expenses of the Argentine company after crediting receipts from others.

For the foregoing purpose, it is agreed that Pan American's investment in the Argentine Company is $62,380 and that this figure will continue to be used for this purpose until changed by mutual agreement in light of investment requirements of the Argentine company.

Please sign a copy of this memorandum confirming the foregoing understanding.

Very truly yours,

G. Vidal
Vice President

[fol. 3006]

UNITED STATES OF AMERICA
CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

Docket No. 3272.

PAN AMERICAN AIRWAYS, INC.,
AND
URABA, MEDELLIN AND CENTRAL AIRWAYS, INC.

Recommended that the application of Pan American Airways, Inc., and Uraba, Medellin and Central Airways, Inc., for acquisition by Pan American Airways, Inc., of all of the property of Uraba, Medellin and Central Airways, Inc., and for the transfer to Pan American Airways, inc., of the certificate of public convenience and necessity of Uraba, Medellin and Central Airways, Inc., be approved.

Appearances:

J. Howard Hamstra, for Pan American Airways, Inc.; Pan American Airways Corporation, and Uraba, Medellin and Central Airways, Inc.

Thomas J. McDermott, Public Counsel.

REPORT OF EXAMINER RICHARD A. WALSH

This proceeding involves the joint application of Pan American Airways, Inc., and Uraba, Medellin and Central Airways, Inc., hereinafter referred to as Pan American and UMCA, respectively, under sections 401 and 408 of the Civil Aeronautics Act of 1938, as amended, for the acquisition by the former of all of the property of the latter and for the transfer to Pan American of the certificate of public convenience and necessity of UMCA authorizing the transportation by air of persons, property and

mail between the terminal point Cristobal, Canal Zone, the intermediate points Balboa, Canal Zone and Turbo, Colombia, and except with respect to mail, the terminal point Medellin, Colombia.

[fol. 3007] Pursuant to section 801 of the Act a copy of the application was transmitted to the President of the United States and after due notice to the public and to all interested parties a public hearing was held in Washington, D. C., on April 26, 1948. Subsequent to the hearing each of the parties filed with the Examiner statements of proposed findings and conclusions together with supporting reasons.

The issues in this proceeding arise under section 401(i), 408(a) and 408(b) of the Act. Section 401(i) provides that no certificate shall be transferred unless approved by the Board as being consistent with the public interest. Section 408(a)(2) makes it lawful unless approved by the Board for any air carrier, any person controlling an air carrier, any other common carrier, or any person engaged in any other phase of aeronautics, to purchase, lease or contract to operate the properties, or any substantial part thereof, of an air carrier. Section 408(b) requires the Board by appropriate order to approve such purchase, lease, or operating contract unless it finds that such transaction will not be consistent with the public interest or that the conditions of this section will not be fulfilled; with the provision that the Board shall not approve such purchase, lease, or operating contract if it would result in creating a monopoly, or monopolies and thereby restrain competition or jeopardize another air carrier not a party thereto.

Pan American, a wholly owned subsidiary of Pan American Airways Corporation, is a certificated air carrier authorized to engage in international air transportation of persons, property and mail between the United States and [fol. 3008] nearly every part of the world. UMCA is a Delaware corporation organized by Pan American Airways Corporation for the purpose of operating the route here in question and in order to provide representation for the minority interest of Mr. Gonzalo Mejia who held the con-

cession for that part of the route extending into the Republic of Colombia.

Mr. Mejia, a Colombian citizen, obtained the concession for the Turbo-Medellin portion of the route from the Colombian Government in January, 1931. The concession was granted for a term of 15 years effective from the date of inauguration of service thereunder. Negotiations were thereafter entered into between Mr. Mejia and Pan American with a view to placing the route in operation but since satisfactory arrangements could not be worked out for the operation of the route by Pan American directly the parties decided to organize a separate corporation. Accordingly, UMCA was organized on August 24, 1931 and the concession for the route was transferred to it on September 10, 1931. This assignment was approved by the Colombian Government on January 11, 1932. Pan American's interest in this route arose from a desire on it part to carry traffic into Colombia and to have the route serve as the first link in a shortcut route across South America to Buenos Aires and Rio de Janeiro. Inasmuch as Colombia was too large a country to fly over with the short-range aircraft then available it allegedly presented a serious obstacle to the further expansion of Pan American's service in South America. Operations under the concession commenced on July 12, 1932 and were continued until the expiration of the concession on July 12, 1947. The concession has since not been renewed.

[fol. 3009] UMCA's articles of incorporation authorized the issuance of two classes of capital stock, preferred having a par value of $100 per share and no par common stock. There were issued 1500 shares of preferred stock and 3,000 shares of common. Pan American acquired all of the preferred and 1500 shares of the common. Mr. Mejia received the remaining shares of common stock as consideration for the transfer of the route concession to UMCA. Inasmuch as both classes of stock have equal voting rights Pan American has had two-thirds of the voting power in UMCA since its incorporation. Mr. Mejia subsequently transferred 500 shares of his stock to another Colombian citizen which were later acquired by Pan American in exchange for 100

shares of the latter's stock. On November 7, 1947 Pan American purchased the remaining 1000 shares from Mr. Mejia and since that date has been the sole owner of UMCA.

Although UMCA's affairs have always been dominated by Pan American it is noted that from 1938 to November 7, 1947, all of the members of its board of directors with the exception of Mr. Mejia were either officers or employees of Pan American and since the latter date all of its officers and directors have been either officers or employees of Pan American.

During the early years of operation UMCA owned and operated its own aircraft and provided its own ground facilities at Medellin and Turbo for sales, aircraft dispatch and the handling of passengers. The operation was inaugurated with combination land-amphibious type S-38 aircraft transferred to UMCA by Pan American which landed on the water at Turbo and on land at Medellin. Pan American provided all of the necessary ground facilities in the Canal Zone and Panama and because UMCA lacked the [fol. 3010] necessary facilities for the overhaul and maintenance of aircraft this service was provided by Pan American at its bases in the Canal Zone, Brownsville or Miami. However, since July 1941, Pan American has been operating the route for UMCA on a charter basis with its own aircraft and flight crews. The aircraft and crews used in the operation were obtained from Pan American's pool of aircraft and crews used for its Latin American services. When flying the route Pan American's identification markings on the aircraft remained intact so that as far as the general public was concerned it appeared that the operation was actually that of Pan American, instead of the operation of UMCA. In the succeeding years Pan American assumed all of the remaining functions incident to the operation of the route until at the time of hearing UMCA was an air carrier in name only and with only one person in its employ.

On November 29, 1937 Pan American was granted a contract by the Postmaster General to transport mail over

foreign airmail route No. 5 between Cristobal and Turbo. Pursuant to section 401(e) of the Act, Pan American was granted a "grandfather" certificate authorizing it to engage in air transportation with respect to persons, property and mail between the above named points.[1] In a subsequent proceeding decided November 4, 1940 UMCA was granted a certificate under section 401(d) of the Act authorizing [fol. 3011] it to engage in the air transportation of persons, property and mail to and from Balboa and of persons and property only between Turbo and Medellin. In the same proceeding the Board approved the transfer to UMCA of Pan American's grandfather certificate under section 401(i) of the Act authorizing the transportation of persons, property and mail between Cristobal and Turbo. This route segment together with that granted to UMCA forms this carrier's present route.

Although UMCA is authorized to carry United States mail over the Cristobal-Turbo segment of the route it has never been designated by the United States Government for the carriage of mail. The mail dispatched from the United States to Colombia has been carried by Pan American to Barranquilla and transferred at that point to a Colombian carrier for transportation into the interior of Colombia. However, UMCA has been acting as agent for Pan American in the carriage of intercountry dispatches betwen Colombia and Central America and Mexico which it exchanges with Pan American at the Canal Zone for transportation to and from Turbo. UMCA has also been carrying mail for the Colombian Government between Turbo and Medellin for which it is paid at the rate of $4.00 per kilo. The evidence shows that UMCA is no longer operating between Cristobal and Balboa and its authorization to serve Turbo has not been renewed by the Colombian Government. By order of the Board dated September 15, 1947 (Orders Serial No. E-798) UMCA was authorized to sus-

[2] *Uraba, Medellin, Central Airways, Canal Zone-Colombia Op.*, 2 C.A.B. 334 (1940).

pend service at Turbo and to operate nonstop between Panama or the Canal Zone and Medellin. Pan American asserts that from a traffic standpoint service to Turbo is [fol. 3012] not particularly desirable but irrespective of this it believes that Colombia will never again grant permission to a foreign carrier to serve that point. Accordingly, all that remains of the route as far as operability is concerned is the portion thereof between Balboa and Medellin. For these reasons Pan American believes that there is little likelihood of the route being designated for the carriage of mail.

As has been previously stated herein the concession granted to Mr. Mejia by the Republic of Colombia expired on July 12, 1947, and it is the opinion of Pan American that it will not be renewed. Pan American has had no negotiations with the Republic of Colombia for the transfer of the concession and in view of the negotiations now pending between Colombia and the United States concerning reciprocal air transportation rights between the two countries it considers that any action on its part toward renewal of the concession would, at this time, be inappropriate. Since the expiration of the concession UMCA has been temporarily authorized by Colombia to operate between Balboa and Medellin until the end of the year 1948. In the event the proposed transfer of the certificate is approved by the Board Pan American will seek a renewal of the temporary permit from the Colombian Government to continue operations between these points.

According to the record UMCA carried 3,361 passengers between Balboa and Medellin during the year 1947, and during the first seven months of the same year it carried 1,113 passengers between Turbo and Medellin and 710 passengers between Balboa and Turbo. Service between these points has been conducted on a frequency of five round trips per week with DC-3 aircraft having a daily utilization of approximately five hours while in service of UMCA. The average load factors between these points were shown as [fol. 3013] 33.5 percent between Balboa-Medellin, 54.5 between Turbo-Medellin, and 31 percent between Balboa and

Turbo. These load factors ranged from a low of 13 per cent in July 1947 from Turbo to Balboa to a high of 86 per cent in April 1947 from Turbo to Medellin.

The record also shows that during the year ended June 30, 1947 approximately 2,803 beyond terminal passengers were carried over UMCA's route. The majority of these passengers were exchanged with Pan American at the Canal Zone and either originated at or were destined to points in Central America, Mexico and the United States. Medellin was the principal point of origin or destination of these latter passengers. During the years 1942 through 1947 UMCA also exchanged approximately 10,713 pounds of air mail with Pan American at the Canal Zone. This mail consisted of inter-country dispatches between the Republic of Colombia and points in Central America and Mexico.

UMCA's balance sheet for the year ended December 31, 1947, discloses assets of $32,703.79 and liabilities, exclusive of long term indebtedness to affiliates, of $40,049.66. The carrier had a net operating loss in 1947 of $55,731 and a net cumulative loss of $259,406 during the entire period of operation. The company's balance sheet shows a figure of $89,693 representing the balance due Pan American on inter-company accounts since the beginning of the operation. The value of UMCA's capital stock, of which Pan American is the sole owner was reflected on the latters books as of December 31, 1947 at $158,500.

Upon dissolution of UMCA as a corporate entity Pan American will take over all of that company's assets and assume all of its liabilities of record on the effective date of dissolution. The long term indebtedness will be written off by Pan American as a bad debt and charged to the lat-
[fol. 3014] ter's surplus account. The item of $7,348.87 representing the excess of liabilities over assets will also be charged to surplus and the item of $158,500 representing the book value of the capital stock will be treated as an operating loss. A witness for Pan American disclaimed any intention of placing a purchase value on UMCA's certificate or of capitalizing any of the company's losses for rate making purposes. Pan American, however, re-

serves the right to request mail pay for any operations performed over the route after the transfer of the certificate.

Pan American represents that for the reasons hereinbefore set forth the elimination of UMCA as a corporate entity would require practically no changes in operation. It asserts that the route would be operated with the same Pan American aircraft and flight crews; and the ground facilities, traffic and sales will be supplied either by Pan American or its affiliate AVIANCA.[3] The latter company has for several years been providing all of these services for UMCA at Medellin and is now in the process of acquiring all of that company's facilities and personnel at Turbo. UMCA's only employee who is stationed at Turbo will be transferred to the payroll of AVIANCA. Pan American points out that UMCA has for many years used standard Pan American tickets and other traffic forms and that Pan American is named as a party in all traffic agreements between UMCA and other agencies. Thus, Pan American [fol. 3015] concludes that UMCA's operation has been so integrated into Pan American's system that the elimination of this carrier as a corporate entity is a mere formality which has as its purpose the simplification of Pan American's corporate structure.

Pan American cites many advantages that will result from the approval of the acquisition. Important among them are the elimination of separate legal representation in behalf of UMCA before the Colombian Government; the elimination of separate directors and stockholders meetings; the elimination of the allocation of expenses and charges of Pan American aireraft to UMCA; the elimination of separate income tax reporting to the Colombian

[3] AVIANCA, a Colombian carrier, is the holder of a foreign air carrier permit from the Board, authorizing the air transportation of persons, property and mail between Bogota, Colombia and Balboa, Canal Zone with or without intermediate stops in Colombia and between Barranquilla, Colombia and Miami, Fla., without intermediate stops. The permit was granted in the proceeding entitled *Colombian Airlines, Air Carrier Permit*, 7 C.A.B. 149 (1946). Pan American is the owner of 48 percent of AVIANCA's outstanding capital stock.

Government; the elimination of periodic reporting to the Securities and Exchange Commission by Pan American as owner of UMCA's capital stock; and the elimination of the requirement with respect to Board approval of interlocking directorates and inter-company contracts. In addition to the savings that allegedly will result from the elimination of the foregoing functions Pan American asserts that the approval of the acquisition and transfer of the certificate will also preserve for it the revenue derived from the beyond terminal passengers interchanged with UMCA at the Canal Zone for transportation to and from points in Central America, Mexico and the United States.

In spite of the losses sustained by UMCA in its operations Pan American believes that the public interest requires the continuance of the operation because of the close business relationship that exists between the United States and Medellin area and because of the outlet which the service will provide to Medellin to other parts of the world through the Canal Zone. With respect to UMCA's losses Pan American believes that they are relatively small es- [fol. 3016] pecially when it is considered that throughout its entire period of operation the service has been conducted without the benefit of mail pay by the United States Government. On the other hand Pan American contends that losses attributable to UMCA have been offset in certain respects by benefits to Pan American. Thus, Pan American charges UMCA a ten percent commission on sales and with a portion of its overhead expenses for maintenance of the latter's aircraft even though no additional personnel or facilities are required on the part of Pan American to perform the service. The record shows that the approval of the transaction proposed herein will have no effect whatever on the competitive situation between Pan American and other carriers operating in that area.

CONCLUSIONS

While section 401(i) requires an affirmative finding that the proposed transfer will be consistent with the public interest and section 408 requires a negative finding that it will not be inconsistent with the public interest, the dis-

tinction between affirmative and negative findings is unimportant since the public interest is the primary consideration in either of them. Public Counsel contends that the statement in the *Mayflower case*,[4] "In considering the transfer of a certificate the Board must consider along with the advantages of improved service lower costs and other factors affecting service, safety, and economy, the question of whether the proposed transfer will assist in effectuating the overall transportation policy of the Act and thereby be consistent with the public interest.", is the test which governs the instant proposal. Public Counsel contends [fol. 3017] that the evidence does not show that this transaction meets the above tests. It is asserted that the transaction will not provide improved service to the travelling public since Pan American has been operating the service for years, that it will not result in any change of personnel responsible for operation of the existing service, and that as a result the transfer of the route cannot be based upon better service to the public.

On the other hand, Pan American asserts that the case cited by Public Counsel is not pertinent to the instant proceeding as it is a case where the Board was asked to pass upon the proposal to effectuate changes in the air transportation pattern by approving the transfer of certificates from one entirely independent carrier to another. Pan American argues that the Pan American Airways, Inc., et al., merger case[5] and the Pan American Airways acquisition of China National[6] are the only cases ever decided by the Board which are directly in point with the instant proposal. In the first case, Pan American sought approval for simplification of its corporate structure by transferring certificates from various subsidiaries, this to be followed by dissolution of the subsidiaries whose certificates were to be transferred. The transaction was ap-

proved upon a finding that it would simplify intercorporate relationship, effect savings by eliminating additional taxes which result from carrying on operations through separate corporate entities, simplify the keeping of accounts and records and the making of reports to governmental bodies, [fol. 3018] coordinating supervision of operations and simplify certain details of operations. The second case involved the acquisition by Pan American of the stock of China National Aviation Corporation, theretofore owned by Pan American's wholly owned subsidiary China Airways Federal, and the further transfer of China National's stock to be so acquired by Pan American Airways to Pan American Airways Corp. The evidence shows that the proposed transaction would simplify intercorporate relationships, would eliminate the necessity of holding separate directors' and stockholders' meetings, keeping of various accounts and records, would effect tax savings since the maintenance of CMCA as a separate corporate entity requires payment of state franchise taxes, would eliminate the keeping of accounts and records and making out reports to the Board, the Bureau of Internal Revenue, Securities and Exchange Commission, and other governmental bodies, would simplify the work of administering the operation by permitting Pan American's management to take direct action without having to go through the formalities of securing authorization from the CMCA Board of Directors, and would simplify certain details of operations such as time tables, tickets, traffic documents and inter-line traffic agreements.

The argument between Public Counsel and Pan American as to which of the above cases is in point with the instant proceeding becomes largely academic with the statement by Public Counsel that if the issue of financial support was not present he would favor approval for while there is no substantial evidence to affirmatively support the transaction, there is no substantial evidence against it. Public Counsel views the real crux of the transaction to be the question of financial support for a Canal Zone-Colombian operation by the Federal Government through mail pay compensation. The net loss of CMCA for the year

ending December 31, 1947, was approximately $55,000. [fol. 3019] Public Counsel asserts that it is clear from the record that Pan American intends to seek financial support for the continued operation of the Balboa-Medellin service through the inclusion of the operation in the consideration of future mail rates for its Latin American division. Public Counsel contends that although this route has never been certificated for mail service, the Board would be legally bound under its decision in the Chicago and Southern rate case[7] to consider these operations in determining the mail rate for Pan American. The Board has refused to compensate Pan American for schedules on its Alaskan-Fairbanks-Bethel route[8] which was not certificated for mail. However, it is pointed out that the non-mail operation there involved was a grandfather operation, while the Canal Zone-Medellin certificate here involved was granted after hearing and a finding that the route was required by the public convenience and necessity.

Pan American agrees that under the Chicago and Southern case it could ask the Board to consider whether the results of operation between the Canal Zone and Medellin could be taken in account in determining its mail pay needs, that the Board has held that the objectives of the Act require it to consider such questions but they do not dictate the results of such consideration. It points out that the assumption of Public Counsel that if the route is transferred to Pan American it would result in imposing upon the government the burden of a route which last year lost [fol. 3020] $55,000 is not necessarily correct. It contends that on an added cost basis the route did not sustain the loss, that with the introduction of more efficient twin-engine equipment the entire cost picture will be changed.

It may be assumed that some saving will be effected by Pan American through the elimination of the duplicating functions performed in behalf of UMCA and the simplifica-

[8] *Pan Am. Airways, Inc., Alaska Mail Rates*, 6 C.A.B. 61 (1944).

tion of its corporate structure. During its 16 years of operation, UMCA operated without the benefit of mail pay at an average net loss of about $16,000 per year. Potential economies which Pan American points out would result if UMCA should be absorbed into the Pan American system, may substantially reduce or entirely eliminate these losses. It would appear therefore that at the most there is only a remote possibility that the continuance of this service by Pan American may result in higher mail pay to that carrier. Moreover, the transfer of the route does not impose anything on the government except an obligation to consider the question of whether the Balboa-Medellin operation performed such functions that mail pay ought to be accorded in the public interest: Whether the Board should compensate Pan American for operations over this segment under the doctrine of the Chicago and Southern case or should disregard them as it did Pan American's Fairbanks-Bethel segment is a question which properly belongs to a mail rate proceeding. It may be that the circumstances surrounding operation of the route by Pan American, especially the fact that the operation which the Board found required by the public convenience and necessity was Balboa-Turbo—not Balboa-Medellin and that there is no mail authorization for the Turbo-Medellin segment, present a situation so different from that in the Chicago and Southern case that the principles enumerated therein would be inapplicable in this instance.

[fol. 3021] It is suggested by Public Counsel that there may not be any Colombian permit by the end of the year and that perhaps the application herein should be denied without prejudice to a renewal after the conclusion of bilateral negotiations between the United States and Colombia. However, it should be pointed out that the Board has held in a number of cases that the issuance of a certificate is not dependent upon a showing either that foreign operating rights have been obtained or can be obtained and the Board has issued a number of certificates for which operating rights were yet to be obtained.* Under this above theory,

---

* *Northeast Air, et al., North Atlantic Routes*, 6 C.A.B. 319 (1945). *Latin-American Air Service*, 6 C.A.B. 857 (1946).

the Board would scarcely ever be in position to approve the transfer of a certificate to engage in international transportation as operating rights in most such cases are subject to termination by the action of a foreign government.

The transaction involves no specific purchase price; the consideration is only the assumption of UMCA liabilities which include $89,693 owed to Pan American in return for operation of the route for UMCA by Pan American, and $7,348 of excess liabilities over assets exclusive of the debts to Pan American. In addition, Pan American will lose its investment in UMCA now carried in its books at $158,500. Thus, in effect Pan American will be paying approximately $250,000 for the certificate of UMCA. However, the situation in the present transaction involves nothing more than a bookkeeping transaction. The $90,000 investment will be lost to Pan American whether it continues to operate UMCA, transfer the certificate to itself, or dissolve the corporation and abandon the route. A more seri- [fol. 3022] ous question presented is whether or not these losses will be transferred to the government and the travelling public which could result if Pan American were able to either charge the losses off as operating expenses or to capitalize them and put them into its investment base for mail rate purposes. Pan American's officials testified that the investment and UMCA's past operating losses will be treated for accounting and tax purposes as operating losses, that both will be charged to surplus, and that the Board will not be requested to consider them in any rate proceeding. While accepting Pan American's statements in this respect, nevertheless, for the benefit of the public which may not be familiar with Pan American's balance sheet, it is recommended that the Board follow the same procedure as used in the Western-United Route 68 transfer case[10] and attach a condition that Pan American charge the $255,000 amount involved to surplus.

There is nothing of record which would warrant a finding that the transfer of UMCA's property and certificate to

[10] United-Western, Acquisition Air Carrier Property, 8 C.A.B. 298 (1947).

Pan American will result in a monopoly within the meaning of section 408, which would thereby restrain competition or jeopardize another air carrier not a party to the transaction.

On the basis of all of the foregoing considerations and all of the facts of record, it is recommended that the Board find that the proposed acquisition by Pan American of all the property of UMCA and transfer to Pan American of the certificate of public convenience and necessity of UMCA is consistent with the public interest within the meaning of sections 401(i), 408(a) and 408(b) of the Act, and that both transactions be approved.

[fol. 3023]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 273

J. P. G. JR.
TRIP SERIES No. 47

Lima, December 5th., 1948.

Mr. H. J. Roig,
W. R. Grace & Co.
New York.

PANAGRA

Dear Mr. Roig:

I wanted to wait until the last day of our trip to write you concerning my impressions, ideas, suggestions, etc., concerning Panagra garnered while flying up and down the West Coast for the last six or seven weeks.

In the first place, I would like to say without any reservations that I have never tasted such good food as I have on the various trips I have made on Panagra this trip. In my opinion (and it is shared by all of the passengers with whom I have talked) Panagra does the best job of any commercial airline either in or outside of the U.S. on the food that it serves its passengers.

In the second place, Panagra service both on and off the airplanes appeared to me to be tops. Stewards and stew-

ardesses who have travelled with us have been extremely solicitous of the passengers' wants in every respect and that did not just include our party—as far as I could notice, we happily, received no favoritism.

There are two subject however, concerning which I would like to give you my views and suggestions for whatever they are worth. These are:

1) The subject of delays

2) The question of more and more evidence south of Balboa that we are an appendage of Pan American World Airways.

With respect to (1), the following shows a rough tabula-[fol. 3024]tion of my own travels on Panagra/P.A.A. and Avianca:

First trip: Miami/Lima DC 6—Panagra	—Left and arrived two hours late— Reason given passengers—maintenance
Second trip: Lima/Santiago DC 6—Panagra	—Left and arrived (one motor coughing part of the way) over three hours late. Reason given—maintenance
Third trip: Santiago/Balboa DC 6—Panagra	—Left an hour late and arrived about two hours late Reason given—headwinds
Fourth trip: Balboa/Quito DC 3—Panagra	—Left and arrived on time
Fifth trip: Quito/Cali DC 3—Panagra	—Left and arrived on time
Sixth trip: Pereira/Bogota DC 3—Avianca	—Left and arrived on time

Seventh trip: Bogota/Barranquilla DC 3—Avianca	—Left and arrived on time
Eighth trip: Barranquilla/Balboa Convair 240—P.A.A.	—Left and arrived 15 minutes late No reason given
Ninth trip: Balboa/Lima	—Left and arrived 2½ hours late, arrived with one motor stopped because of suspected fire. Reason given for original delay—maintenance
Tenth trip: Lima/Miami DC 6—Panagra	—Have not started yet but scheduled to leave 20 hours late, which means that will arrive Miami at 2 or 3 o'clock in the morning with no connection to N.Y. until 8:30 a.m. and with another DC 6 coming in, if on time, total passengers on the two DC 6's, over 80, many of whom will be trying to connect and quite a few will not be able to. Reason given: Cylinder change—9 hrs. until bad weather set in over Tucuman and until it was dark in the Mendoza pass and southern pass [fol. 3025] will not be authorized for night flying for another three or four days.

In addition to my experiences on the DC 6 chronicled above, Flatow arrived in Santiago 15 hours late on a Panagra DC 6.

Every DC 6 that I have been on, or had anything to do with, on this trip (with the exception of Andrew's northbound trip Santiago/Lima which left Santiago on time) has been anywhere from 2 to 20 hours late.

I know that you are thoroughly cognizant of the problems we are having with the DC 6's, but it really seems a lot more serious when you get down on the Coast and go through experiences such as ours. The inconvenience caused the travelling public is of course making a lot of enemies for the company since most of the passengers are not being given information as detailed as we are receiving and are thus standing around airports and waiting in hotel rooms getting worked up.

We, of course, have heard a lot of complaints and use the standard argument that it is better to take off late with good maintenance than on time in an unsafe airplane. But, of course, the sore passenger is left with the feeling that he doesn't experience delays in anything like the percentage he experiences on Panagra when he travels on U.S. certified airlines in the U.S. and he presumably is just as safe.

It might be said here that of course the competition is taking full advantage of the Panagra delay situation by spreading stories (exaggerated in many instances of course, but with foundation in many others) of delays in EL INTERAMERICANO. We are informed that this propaganda takes the form of referring to EL INTERAMERICANO as "El Interrumpido").

[fol. 3026] The reasons for all this are, of course, obvious and in our view are two fold:

1) Due to the relatively small size of Panagra in number of planes, i.e., only five DC 6's and due to the relatively large number of route miles covered and the tremendous distance between the two terminals, if anything goes wrong with the plane at one of the terminals, say B.A., nothing can be done about it except to wait. In the case of the large U.S. lines (we notice both T.W.A. and American are running excursion tours around Los Angeles every evening with dinner served aloft) they have sufficient alternate planes to call upon by just substituting a plane scheduled to take off later for the plane requiring maintenance. Panagra can't do this and if the maintenance is 20 hours, everybody waits 20 hours with consequent increase in expenses, upsetting of plans,

frayed tempers, etc. Unfortunately, the public does not know enough about the air transport business to appreciate the problems peculiar to Panagra.

2) We have seen no figures on Panagra maintenance delays on DC 6's vs. other U.S. certificated airlines maintenance delays on their DC 6's, but we have the very definite opinion that Panagra is experiencing many more delays percentwise than the other airlines. Maybe this is due to the Panair maintenance at Miami, but whatever it is due to, in our opinion, now that the rate case is pretty well along the line, *this problem represents the most serious problem that Panagra is faced with today*, possibly other than getting through to New York since the extra speed of the DC 6's vs. PIA's DC 4's and Braniff's cut-rate DC 4's is largely being off-set by these consistent and serious delays.

There is obviously only one solution to the problem raised in No. 2 above and that is to concentrate the best brains in the company right in Miami until this situation can be remedied. Every maintenance delay should be catalogued with the details of the time consumed, reason for the delay, work done, etc. Detailed information should be obtained on the experience of other U.S. certificated airlines with DC 6's as up to the minute as possible so that Pan American can be put on notice of the deficiency in their maintenance and so that Pratt and Whitney can bring us up to the other airlines' standards.

If it turns out that we are going to have to live with the DC 6's with anything like their present record, we strongly recommend that we explain to the CAB and get them to in- [fol. 3027] clude in our mail pay sufficiently more money to amortize, maintain, etc. buy two more DC 6's, to be kept at either end of the line so that we can put another plane in when these two, five, ten, twenty-hour delays come along. Other airlines can substitute a plane for one delayed by maintenance—even National, with its five DC 6's shuttling between New York and Miami is in a much more flexible position than Panagra and the CAB should recognize this.

Unless we take some definite constructive steps to remedy this situation in a really important manner, Panagra will not stand up well in the public's mind when compared to other airlines. Delays down here now are so numerous that an on-time departure is the exception rather than the rule and one hears comments such as, "the Miami plane northbound left on time tonight" mentioned in surprised tones by even the Panagra staff.

The second basic subject that we wanted to take up with you as mentioned on Page 1 is the increasing evidence of Pan American World Airways' intervention in Panagra's activities on every Panagra plane one travels on.

This is really serious but it can be remedied overnight if everybody will pitch in and do a job to preserve the identity of Panagra as such. We know that there is no one connected with Panagra or Grace who wants to keep Panagra as an independent entity both actually and in the public's mind more than you. You have fought this battle for years and against great odds. With this in mind, we feel that you would be shocked by what we have come across on this trip and we propose to catalogue what we have seen below:

[fol. 3028] 1) We arrived in Miami six weeks ago tomorrow and were greeted at the Eastern Airlines gate by both Burke and Greenfield and personally escorted to the Pan American counter to be checked in for the EL INTERAMERICANO flight scheduled to depart about an hour and a quarter later. When we arrived at the Pan American counter every counter had a sign on it indicating that *only* those passengers travelling to Havana on the Panamerican flight departing one-half hour before the EL INTERAMERICANO could check in.

Burke went up and whispered something to a counter clerk and we were taken care of at one of these counters immediately—obviously as a special favor. We have absolutely no complaint on the way in which we were treated. Burke made sure that everyone knew who we were. But what concerned us were those passengers

who didn't know Burke or Greenfield and had to wait until the Havana plane took off before they could be checked in, i.e. they had to wait about half an hour.

No Panagra identification was seen the entire evening on any of the Pan American counters although later a sign went up "EL INTERAMERICANO" which in the public's mind therefore was a Pan American flight (which it is) but it was our definite recollection that P.A.A. agreed in the contract with W. R. Grace & Co. to place at all of their counters serving Panagra or Pan American passengers suitable identification either Panagra or Pan American Grace Airways. When we spoke to Shannon about this he said that Burke told him that they just didn't happen to have them up that night. It's obvious, of course, that they didn't pick the one night I was coming through not to put the signs up and it follows that when the signs are up, if ever, it is the exception rather than the rule.

The above indicates to us that our Miami personnel is either unaware of or doesn't care about enforcing the agreement reached between W. R. Grace & Co. and Pan American Airways which states that Panagra must be always identified at the counters where passengers going out on Panagra planes are handled. We feel that this is an important condition and must be lived up to.

2) As soon as we got on the plane and started off we pulled out the Pan American folder at the seat which listed the following items as being available simply for the asking:

[fol. 3029]

Gin Rummy Board
Non-skid checkerboard
Writing Portfolio
Playing cards
Magazines
Newspapers
Post Cards
Aviation Guide
(schedules and tariffs on all Airlines)
Hotel Red Book

Book Matches
Chewing Gum
Kleenex
Medical Kit
Benzedrine Inhalers
Trinesium (for indigestion)
Ammonia
Air-sick tablets
Aspirin
Mouthwash
Electric Razor

I rang the bell and asked the stewardess for the non-skid checkerboard. She said she was sorry that it was not on the plane—I asked, why not? She said that the Panagra planes didn't carry non-skid checkerboards (or any kind of checkerboards for that matter) and that the list that I had in my hand was a Pan American list and that it did not tie in with the inventory of articles carried on Panagra planes. She said that in addition to not having the non-skid checkerboard, she didn't have the Gin Rummy Board, *the playing cards, the post cards, the Hotel Red Book, Trinesium** and last (and probably least) the mouthwash. (She also informed me that although Panagra planes do carry electric razors, through an oversight they did not have on board the electric razor which was being repaired and which had not been replaced by an alternate.)

We are sure that you would not want any such sloppy handling as outlined above to exist and someone should be detailed to eradicating this situation immediately.

Also in the Pan American envelope is a copy of the Pan American World Airways System Timetable. As you know, Panagra's main services are all thrown in together on part of a page, which also includes Cubana services, Aviança services and, of course, Pan American Services—the Miami Kingston Barranquilla service. Although Aviança connects with Panagra, to our knowledge neither Cubana nor the PAA Miami Kingston Barranquilla service connect with any Panagra service. We

*Above material in italics, handwritten addition.

feel that Panagra should have a page all to itself for the above reasons and because the putting of these extraneous services on the same page with Panagra necessitates showing Panagra's domestic service in Ecuador eight pages further along on Page 15.

[fol. 3030] (3) At one's seat on Panagra planes *south of Balboa* one finds a booklet entitled "South America a World for Play, Just a Day Away". In this booklet mention is made of a larger pamphlet available if the Panagra passenger will "ask his travel agent or get in touch with his nearest Pan American World Airways office". For the sake of Panagra prestige and in order that Panagra does not look like the merest appendage to PAA, wouldn't it be well to also say "or get in touch with his nearest Panagra office in South America" just so that everyone knows that Panagra does have an office?.

(4) As soon as we left Balboa on the Panagra plane—this time a Panagra flight—we were served orange juice in cups marked with the blue PAA markings, in other words, with Pan American equipment. The next morning with our very good breakfast we were served cheese sandwiches (as stated above the breakfast was swell but I think that cheese sandwiches are an unnecessary addition to a breakfast) and these cheese sandwiches were wrapped in PAA envelopes with the familiar blue markings—we were then almost in Lima.

South of Lima, lunch was served with Pan American napkins, butter containers, salt and pepper containers and with Pan American silver, all with the prominent and familiar PAA markings.

South of Balboa, no one had bothered to take off the Pan American Clipper folders and there they were just as you find them on the Clippers containing all the Pan American propaganda and, of course, still with the phoney list of items available to passengers, which weren't available. We had thought these folders were to be removed at Balboa.

Worse than any of the above in our opinion from a technical viewpoint was the prominent display on the three airplanes we travelled on all *south of Balboa* of the following sign:

> "This aircraft is owned by Pan American Grace Airways, Inc., (Panagra) and is being operated by Pan American World Airways, Inc., pursuant to an agreement between Panagra and Pan American World Airways, Inc., approved by the Civil Aeronautics Board."

Being Grace men and Panagra men, this was about the pay-off and we went right after the people in Lima about this. We found that the stewards and stewardesses are not allowed to either remove or turn this sign to the wall but that it has to be done by the *operating people* in Balboa. The result is that the operating people forget, but they only forget south of [fol. 3031] Balboa, never north, and with the added result that the passengers are informed on DC-6's at every point of Panagra's line that the flight is a Pan American flight. This, of course, must be stopped and someone should look into the ridiculous rule that only the operating people can touch the sign.

(5) The pay-off of our finding evidence of Pan American intervention in our business south of Balboa came on Thanksgiving Day when the purser on the Panagra DC-3 came to me between Cali and Quito and showed me a Pan American World Airways menu signed by Capt. W. R. Sripps (a Panagra pilot) wishing us all a happy Thanksgiving Day and listing 21 items of the unusual lunch we were to be served. The purser said that he didn't have all of the items listed on the menu and he asked me if I thought he should distribute the menu. I asked him how many of the 21 items he did not have and we counted 11 items not on the plane. I attach the menu hereto for your ready reference and the items listed on the menu and not on the plane are as follows:

Martinis
Queen Olives
Hearts of Celery
Fresh Cranberry and Orange relish
Essence of Tomato
Salted Wheatsworth Wafers
Grapefruit and Red Apple Salad
Linga French Dressing
Frozen Rum Custard
Brown Sugar Cookies
Mints

Naturally, with more than 50% of the items listed on the menu not on board the plane, Jim Magner and I advised the purser not to distribute the menu and disappoint the passengers.

You will note that Pan American Airways sticks out all over the menu.

(6) On the same Panagra DC-3 flight Balboa Quito), the coffee cup, the envelope for the sandwiches and all of the packages of granulated sugar were marked "Pan American World Airways"—no mention of Panagra. This situation should be remedied immediately as the net of our contract is to put Pan American on every Panagra plane anywhere north or south of Balboa whether the airplane be a DC-3 or a DC-6, or so it seems from what we have observed.

(7) When the Thanksgiving Lunch (missing the 11 items shown above) was finally served, we were greeted with Pan American salt and pepper containers, more Pan American sugars envelopes, a Parker House roll wrapped in an envelope marked Pan American World Airways, Inc., a cup for our wine marked Pan American World Airways, Inc., a fruit cup dish enclosed in a Pan American World Airways cup, and all of these [fol. 3032] items prominently displayed the distinctive blue and red coloring of Pan American and none of the green of Panagra.

(8) With our Thanksgiving lunch we received a bottle of wine, marked "Private Stock PAA" and further stating

"Bottled and Sealed at our Winery in California for Pan American World Airways (signed Cañuco Vineyards Company, Fresno, California.") The wine was not as good as Chilean wine which we could easily have bottled for the "Panagra private stock". The label on the wine bottle was in the familiar blue and red of Panair with the familiar Pan American emblem on the label.

(9) I attach hereto a copy of letter received by Colina, the head of our Insurance Department here in Lima, from Porter Norris, Manager of Traffic, Pan American World Airways System, Miami, Florida, which, as you will note, apologizes in Spanish for the delay in the recent "Clipper Flight to Lima". Obviously Colina did not fly by Pan American Clipper to Lima. Inasmuch as these were Panagra passengers (i.e., the business really was originated by Panagra) and since Colina is a Peruvian with whom Panagra must keep on good relations, it seems to us that it would be far better for these letters to go out from the Panagra organization here and not from Pan American in Miami. Evidently, Mason does write such letters also but in this case Colina didn't hear from Mason and only heard from Pan American. It seems this ought to be stopped.

I don't know whether or not you will agree with the statement in the Pan American letter which says that Pan American ". . . . nos ha hecho lograr una seguridad en nuestros vuelos que no ha sido igualada en la historia de la aviacion internacional." The statement seems a little broad to us particularly since Pan American has cracked people up recently, witness Shannon, Lisbon, etc.

As Jim Magner said while we have been on this trip there is far more evidence today of Pan American all over Panagra's route than there was in 1943 when he was last down here. It was very noticeable to him everywhere. When we signed the now famous contract with Pan American we all realized we were losing our identity north of Balboa (i.e., losing any identity we might have had had

we could [illegible] could even tooted but no one ever thought that we would gradually and in an ever increasing manner lose our identity south of Balboa, i.e., on the routes that we [fol. 3033] have operated for 20 years.

While in Quito we visited our Quito office and the most prominent Panagra sign was a huge picture of New York with Pan American Constellations flying over the Brooklyn Bridge. Bourne told us in Cali that this was a Pan American advertisement we purchased and over-printed with Panagra's name, but couldn't eliminate the Pan American planes, with the familiar three-pronged Constellation tail. Unless the purchase of this was made at a tremendous saving percentagewise, we question the advisability of it.

To get back to the question of the tremendous delays and interruptions on the DC-6 flights with one general comment before closing, we feel that some disinterested executive with an entirely fresh viewpoint (not pro Pan American and not anti-Pan American) should investigate the Pan American maintenance situation in Miami. Undoubtedly since Kirkland's transfer some improvement has been made, but not enough. The situation is still serious. In July of this year Jimmy Walker stated outright, according to Moore, that PAA was giving undue preference to maintenance of PAA equipment to the prejudice of Panagra work. Moore questioned Shannon about it when they were together in Miami on July 24 and Shannon categorically denied it. Nevertheless, it really seems that some disinterested executive should make a comprehensive report on this serious matter in view of the extent to which Panagra is being hurt, and severely hurt, with these delays.

I have undoubtedly taken up a lot of your time by going into such tremendous detail of everything that I saw and of everything that occurred to me during my trip. I have [fol. 3034] done so because I wanted you to see things as I saw them and because I wanted to give you visually the panorama as it unfolded before us during our travels.

I know your attitude and your personal pride in Panagra and I am sure that you will take immediate and effective steps to improve the situation outlined above.

Very truly yours,

JDG

NATIONAL AIRLINES
INCORPORATED

3240 N. W. 27th Ave.
Miami 37, Florida
December 15, 1948

Mr. Harold J. Roig
President, Pan American Grace Airways, Inc.
7 Hanover Square
New York, N. Y.

Dear Mr. Roig:

Passengers could travel by air without change of planes between the major cities served by our respective companies in North and South America if our companies entered into an equipment interchange agreement. Therefore, I am proposing to you that we interchange equipment at Miami so that thru-service can be operated without change of planes between New York, N. Y. and Buenos Aires, Argentina, via certain intermediate certificated cities. If you are interested, I shall be pleased to designate some one in our organization to sit down with your representatives to negotiate an agreement for submission to the Civil Aeronautics Board for approval.

For his information, I am sending a copy of this letter to Mr. Juan Trippe, President of Pan American Airways.

Awaiting your early reply, I am, with kind regards and greetings of the season,

Sincerely yours,

NATIONAL AIRLINES, INC.

[fol. 3037] PAA will purchase 174,000 shares of NAL's unissued stock for cash at $5.50 per share, or at a price per share equivalent to 90 percent of the average of the daily closing price of NAL on the New York Stock Exchange from January 1, 1948 to the day preceding the date of delivery and payment, whichever is the greater. Delivery and payment therefor is to be made as soon as a contract can be prepared and signed by PAA and NAL formalizing the following agreement:

(a) NAL to increase its authorized shares to 1,500,000. Subject to the approval of the CAB, PAA agrees to purchase additional shares of NAL, so that, including the 174,000 shares, it will own 45% of the total outstanding stock of NAL after such additional purchase. NAL now has pending an application for increased mail pay retroactive to July 14, 1947. On the

last day of the month in which the CAB shall finally determine said application and NAL shall accept such determination, the adjusted book value of NAL's stock shall be determined. In such determination, flight equipment, including spares, and real estate shall be valued at then current market values. If the parties cannot agree on market values, the same shall be fixed by arbitration. Said adjusted book value shall be arrived at within sixty days from the last day of the month in which NAL's pending mail pay application shall be finally determined and accepted. Within ten days after NAL's adjusted book value shall have been so determined, PAA shall make payment for said additional shares at a price per share equal to said adjusted book value either in cash or at the option of PAA [fol. 3038] by delivery to NAL of PAA shares at a price per share equal to 90 percent of the average daily closing price on the New York Stock Exchange for sixty days prior to the date of delivery.

(b) Subject to the approval of the CAB, interchange agreements between PAA and NAL, where the same shall be mutually advantageous; it is understood that such equipment interchange shall include Panagra.

(c) Subject to the approval of the CAB, agreements for the leasing of flight equipment, where the same shall be mutually advantageous.

(d) Joint use of facilities, where the same shall be mutually advantageous.

(e) On approval of the CAB, NAL agrees that five of its eleven Directors shall be nominees of PAA.

Mr. Douglas Campbell, Vice President
c/o Panagra
SANTIAGO

Dear Mr. Campbell:

This will serve to advise you that at a luncheon the undersigned had today with one of the American Embassy officials, the following points were mentioned:

Firstly: that Braniff is understood to be planning on extending its lines from Lima to Rio de Janeiro within the next 90 days.

Secondly: that Braniff is contemplating the inauguration of a shuttle service between Lima and La Paz.

Thirdly: that the Embassy has advised Mr. Bennett, in no uncertain terms, that he should be very cautious in his dealings with the Argentine Government officials. It would appear that the State Department has taken a similar action in Washington with Mr. Braniff.

Fourthly: the U.S. Embassy has been advised by the Argentine Foreign Office that their reply on the route pattern will be forwarded to them before the end of this month.

It will certainly not escape your attention that the above information should be regarded as confidential.

Very truly yours,

Confidential

In reply to your memorandum of February 9, same subject, I would like to call your attention to your third paragraph in particular. For an answer to Mr. Toomey's impression concerning "El Panamericano" advertising, I refer you to our memorandum to you of today's date. Regarding Mr. Toomey's impression relative to the *Pan American Airways System* (Not PAB's) Four Continent Excursion Rate, we would like to bring to your attention the following information:

1. The Pan American Airways System Four Continent Excursion Rate went into effect on December 4, 1948 with sale of this special excursion permitted up to and including February 28 *only*.

2. At the time of its announcement, this special excursion fare offered the best possibilities for drawing some revenue away from Panagra's El Interamericano and putting some passengers on PAA's trip 201 for the entire haul from New York to Buenos Aires.

3. At the time that this special excursion rate became effective, our peso collections for both Panagra and PAA were being blocked (as they still are) and the possibility of converting these into dollars was quite remote. We were the only ones to perceive that be selling these Four Continent Excursion Rate tickets here on PAB ticket forms we were able to remit cruzeiros to PAB for the entire circle trip involved and PAB, in turn, would be required to remit

much-needed dollars to Pan American Airways for their portion of the trip (55%).

4. By organizing the sale advertising-promotional efforts of this office and by generating a PAA-PAB special newspaper and direct mail advertising campaign during the month of January, we were able to sell more than 150 of these special excursion trips, many of which I can assure you were purely "created" sales involving a total *dollar* remitted revenue for PAA in the amount of approximately U$S 90,000.

Despite the above, please do not get the impression that the Four Continent Excursion Rate was all we had on our mind. As far back as January 10 I had talked to Mr. Campbell of Panagra about a joint PAA-Panagra direct mail folder to be printed and distributed here in Argentina with the theme "Sleep your way to the United States" and, as far back as January 14 I had requested your office to send me a mock-up of the sleeperette seat which could be used as a display in our City Sales Office. In addition, we received full coverage in all Argentine newspapers for our publicity releases and pictures on the new sleeperette service. I am still waiting for the mock up of the sleeperette seat but I am ready to proceed on the direct mail folder for which I have Panagra's full approval on text and diagram. The diagram will show a map of South America and the United States with Panagra's Interamericano route and PAA's El Panamericano route in heavy lines and other System lines in lighter print. On the Pacific side there will be sketch of the berth accomodations with full reference to guest houses availability. A copy of the text is attached and it is requested, if you find this acceptable, you wire your approval so that as soon as the printer's strike is over we can proceed with this item. The estimated cost for thirteen thousand copies (three thousand English and ten thousand Spanish) is m$n 1,800.00 to each company. I feel certain that you will be more than satisfied with this item and would like to proceed at once.

In closing I would like to point out that this office has a more or less equal responsibility to advertise, promote and

sell the service of the three carriers serving this area namely, Pan American, Panagra and Panair do Brasil. It will quite often happen that the representative of one of these companies will appear in Buenos Aires for a few days and depart with the feeling that someone else seems to be getting a better break on the advertising and promotion than his company. Unfortunately, Mr. Toomey did not discuss the matter with me at all and, in fact, when I explained to him what our plans were he seemed to feel that we were fully protecting PAA's interests here as well as doing a good job for the other two carriers. Mr. Toomey was especially impressed by the PAB poster contest which was an outstanding success in every way and about which I will write you later. Please rest assured that we are attempting, at all times, to use the men, materials and [fol. 3041] advertising budgets available to this station to the best advantage of the three companies we represent and constantly striving to put the name of Pan American World Airways System and its associated carriers in the eyes of the Argentine travelling public in every possible way and will continue to do so. I can assure you that at least once a month someone from one of the three companies we represent criticizes us for doing too much for one of the other carriers. Over the period of a year I am certain all of our promotional efforts balance out and at least we can console ourselves with the fact that the complaints received boil down to "too much for somebody else" rather than "nothing for anybody".

WINDOW DISPLAYS

The window display photograph attached to your memo of July 11 is all very fine but I would think that the subject involved "Los Campeones Viajan" would have lent itself admirably to dual signature display advertising "El Panamericano" as well as "El Interamericano".

Some time ago we made an agreement that the window displays appearing in the window with the permanent Pan American lettering would be PAA displays, those in the Panagra window would be Panagra displays, etc. I notice that this Panagra display is in the Pan American window and think it would be better to have put it in the Panagra window.

To make a long story short, I seem to have been seeing more window displays on Panagra and PAB than on PAA and the "El Panamericano"—also tourist service. How about pepping up the effort on PAA window displays?

COMPANIA DE AVIACION PAN AMERICAN ARGENTINA, S.A.

October 12th, 1949

Mr. H. W. Toomey,
Division Manager,
Latin American,
Miami.

Dear Mr. Toomey:

Yours of September 9th, to which was attached a copy of a memo addressed to you by Mr. Norris, on the subject of the Panagra Sales Office located at Buenos Aires.

Although there is no doubt a measure of truth in what Mr. Norris has to say regarding the advantages which the location of the Panagra Sales and Advertising Headquarters at Buenos Aires affords Panagra, vis-a-vis Pan American, it is my personal opinion that he has somewhat overstated the case.

Before the above office was moved from Lima to Buenos Aires, it was necessary for CAPAASA to supervise a great portion of the Panagra advertising in South America, this for the reason that no where else along the Panagra line was there a competent advertising agency. Not only did this supervision entail a great deal of work, including such tedious jobs as proof-reading time-tables, etc., but the arrangement gave rise to many exchanges, some none too pleasant when the work accomplished here did not correspond exactly to what some Panagra official in Lima had in mind. So far as most of us are concerned, I think I can say in all truthfulness that the removal of the Panagra office to this point, resulting in our being able to disassociate ourselves from a great part of the Panagra advertising chore, was acclaimed.

From the outset, it was fully understood that the Panagra staff here would undertake no direct solicitation work at this point, that job being reserved for the local company. In the main, I think that the agreement has not been flagrantly violated but it must inevitably be true that the Panagra people, living here, must have come to know a great many local people and I suppose they would hardly be quite human if, on occasion, they did not plug their line. By the same token, I am sure that they never miss an opportunity to plug the system, too. However, the fact is that the leading personalities involved, with the exception of the advertising manager, Earsman, spend a very great part of their time on the road, which is, of course, what they were hired to do in the accomplishment of their duties.

I think it true that Mr. Norris may be a bit overly concerned about possible direct solicitation undertaken here by these people. He certainly would not be able to offer any valid objection to personal calls on local agents and customers by these Panagra employees had they their homes in another city and paid us occasional visits, such as are sometimes, but rather infrequently, paid us by PAA sales representatives stationed at Rio, Miami, etc. The fly in the ointment would appear to be the fact that the Panagra people happen to live here and thus undoubtedly have more of a chance, directly or indirectly, at the local market than do their counter-parts in PAA. However, they must live somewhere, one supposes, and as far as I can see, the choice of Buenos Aires, by Panagra, was a very logical one for many obvious reasons. That the choice was not so happy from the PAA point of view is quite as easily understood for the reasons mentioned by Mr. Norris. However, when all is said and done, it seems to me that only two things can be done by PAA to remedy the situation, the first being to convince the Panagra powers that be to move the office, which is something which must be accomplished at the very highest levels, and secondly, to have some east coast sales people stationed here.

If the results of the operations of the two companies are compared, bearing in mind the peculiar characteristics of

the situation, such as differences in equipment, etc., I frankly do not see that there is much cause for alarm.

If there is anything you think I might do about this matter, please let me know.

Yours sincerely,

/s/ GEORGE P. SMITH,

cc: Mr. W. Morrison, VP, Mia.

[fol. 3045]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 280

PERSONAL

September 13, 1949

Mr. George P. Smith
General Manager
Cia. de Aviacion Pan American Argentina
Av. Roque Saenz Peña 788
Buenos Aires, Argentina

Dear Mr. Smith:

Your trip to Europe at this time caused some comment by Panagra in the nature of a complaint to Mr. Dean that the matter had not been previously cleared with the Panagra management.

Up here we had been under the impression that the matter had been cleared on the Toomey-Kirkland-Walker level and no further attention was paid to the subject. However, Mr. Campbell insists that the New York office of Panagra, or he personally if he is here, be consulted in advance with regard to absences of the General Manager of CA-PAASA from Buenos Aires. He says that there are too many matters of basic importance to Panagra in the Argentine to permit any other procedure and he has asked that I bring to your attention clause 10 of the so-called three-cornered agreement. I am now afraid that you never received information regarding this agreement, which was

signed in July, 1948 and makes provision for services to be rendered to Panagra by the parent company and compensation therefore. Since these matters are of no particular interest to the officers in the field, no distribution of the contract has been made, but it happens that this contract does include a paragraph dealing with CAPAASA, which I now quote for your information:

> "10. Pan American will cause its subsidiary Compania Pan American Argentina, S.A. to continue to render sales and other services jointly to Panagra and Pan American in Argentina, and the same method for determining joint basis of reimbursement of Compania Pan American Argentina, S.A. as is now in effect will continue and will be applied in light of conditions existing from time to time. Pan American shall regularly consult with Panagra regarding the joint activities of Compania de Aviacion Pan American Argentina, S.A. and with particular reference to sales policies, personnel, the annual budget, advertising programs and expenditures, subject to joint reimbursement."

[fol. 3046] In the light of the above you will understand Mr. Campbell's concern at not having been consulted regarding your proposed absences. Such incidents can be avoided easily in the future through proper coordination between yourself and this office and I will see to it that Panagra is kept duly informed.

Sincerely yours,

Erwin Ballnder

[fol. 3047]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 281

[Stamp—Received Jun 1 1950 Pan American Airways, Inc.—Traffic Manager—Latin American Division]

(Letterhead of Compania de Aviacion Pan American Argentina, S. A., Buenos Aires, Argentina)

Buenos Aires, May 29th, 1950.

Mr. Porter Norris
Division Traffic Manager
Latin American Division
MIAMI.

Private & Confidential

Dear Porter:

Before going into the details of the counter-Braniff advertising campaign as discussed by Mr. Foss in his memorandum of May 24, 1950, I would like to refer to the second paragraph on the second page of his memorandum, particularly his statement "every verbal conversation and every written communication that we have had with members of the Argentine office for quite some time has reflected a lack of hard-hitting sales policy for Pan American World Airways and something must be done immediately to reverse this trend".

These are extremely hard words and we consider Mr. Foss' statement *unwarranted, unfair* and one which we feel is very *difficult to substantiate* for the following reasons:

1. Our statistics show that in the year 1949 CAPAASA sold 1,085 tickets from Buenos Aires to New York via Pan American and 1490 tickets to New York originating via Panagra. The fact that Pan American continues to obtain 45% of the traffic to New York has been a cause of much concern to Panagra and their various vice-presidents have had all of us "on the carpet" frequently for explanation as they feel that they should be getting at least 75% of the business to New York with their superior equipment, faster service, etc. Only last month Willis Lipscomb had Juan Homs in his office to explain what the CAPAASA Panagra-Pan American competitive sales

policy was as John Shannon had accused Hoins of being partial to Pan American in his administration of CAPAASA's sales activities.

2. We can't deny that the Panagra Pan American statistics relative to sales made by this office to the rest of the United States look unfavorable to Pan American at first glance. The chief reason for this is that almost all the other destinations in the U.S. are best reached by north and west-bound connections out of [fol. 3048] Miami and Pan American has found it very difficult to compete with Panagra for this traffic. Your office has been receiving each month a map summary of comparative Pan American and Panagra sales made from Argentina to the USA and we attach the figures for 1949 showing total sales by destinations. During 1949 a total of 3,615 tickets were sold from Buenos Aires to the USA. As noted in No. 1 above, 2,575 of these tickets were for travel to the New York area, leaving only 1,040 tickets sold from Buenos Aires to "other" U.S. destinations. Panagra's percentage of these 1,040 tickets amounted to 81% chiefly because their service to Miami and the north and west-bound connections available permitted passengers, in almost all cases to arrive at their destination *almost a full day or night faster* than by connecting with Pan American's flight to either Miami or New York. As you well know our sales policy here has forced us to quote both Panagra and Pan American's connections to these U.S. destinations and permit the passenger take his choice of the services available without selling one service "against" the other. If Panagra sold 223 tickets to Miami in 1949 against 29 for Pan American it is almost entirely due to the fact that Panagra's passengers were able to leave Buenos Aires from one to four hours later than Pan American's passengers on the same morning and be taking a shower in the Columbus Hotel the following morning while Pan American's passengers are just landing at Port of Spain. This disparity of service applies in equal or greater measure to destinations such as Los

Angeles, Chicago, Houston, Detroit, etc. Even if the Panagra and Pan American sales offices were separated here it is doubtful if we would get many of these passengers away from Panagra until Pan American's service to these destinations is improved. It is not a question of Guest Houses, sleeperette seats, low level flying or anything else except "how many hours will it take me". Our passengers down here are almost all experienced business travelers and Americans returning to the USA for vacation or reassignment. They are not flying to the States for the thrill of being in the air, they want to get from here to there in the shortest possible time. This is elementary — you know it, I know it and Mr. Foss should know it. We are not making excuses for anything because I am convinced that under the existing circumstances we are doing the best possible job in Argentina for Pan American Airways.

[fol. 3049] 3. Referring again to Mr. Foss' very severe statement, I would like to point out that there is no one from Mr. Foss' office, including himself, who really understands the true position of this Company insofar as the Panagra-Pan American competitive position is concerned. He shows this by his reference to "selling against Panagra". There is no one in CAPAASA, including myself, who can sell "against" Panagra. Our policy is to sell "with" Panagra and you yourself know that it has had to be this way. If you think this a stalemate position just remember that if Pan American has not been able to sell against Panagra neither has Panagra been able to sell against Pan American, which situation, in my opinion, has been all in Pan American's favor during the past several years.

4. Although Mr. Foss has not been able to visit us here in Argentina during the past several years we have had various members of his staff here, namely Mr. Stoddard, Mr. Merrill and Mr. Cooper. Also we have been visited by Mr. Morrison, Mr. Toomey and yourself. We do not recall receiving anything but favor-

able reports on our sales and traffic effort and activities from any of these gentlemen and if Mr. Foss' "every verbal conversation and every written communication . . . . . for quite some time" have been so unfavorable, even overlooking his lack of understanding of the Panagra Pan American situation in Argentina, we feel that he should have let us know about this earlier.

In regard to the "counter Braniff" advertising campaign mix up, we would like to make the following comments:

1. The entire idea of a "counter Braniff" advertising campaign originated in this office. Our first letter to Miami on this matter was sent on March 31st. On April 14 Mr. Silvetti sent Mr. Foss the layouts on this campaign which were the result of the coordinated thinking of everyone concerned with Pan American's sales and advertising activities in Buenos Aires. The first insertions of these ads were scheduled for May 25th and it was not until May 16th that we received any further instructions from Miami on this special advertising campaign. On this date we received some "layouts" from Miami for the counter Braniff campaign. Mr. Silvetti brought them to my office and we immediately called a meeting with Mr. Scaramuzza, Mr. Doubell, Mr. Silvetti, Mr. Heras and myself in attendance. I am quite sure you have never seen these lay- [fol 3050] outs and I attach them for your information. Frankly, all of us were astounded, even the agency directors, at the extremely poor quality of the layouts and the *serious* errors and omissions in the copy. To begin with we have told Mr. Foss several times that "PAA" does not mean anything to the Argentine Spanish speaking public. The expression which comes closest to competing with the easy-to-say "Panagra" is "Pan American" and to substitute this for "PAA" in the Miami layouts would, as you can see, necessitate some serious changes in the construction of the ads. It is quite obvious that the copy prepared by Miami was done hastily. No mention

whatsoever is made of the tourist service and the statement "only PAA offers one-carrier service to the U.S.A." is *seriously incorrect on three points*. First—FAMA has a weekly DC-6 service to New York; Second—Panagra flies seven DC-6 flights and two DC-4 flights weekly—to the USA"; (As you know, in the eyes of the Argentine Aeronautical authorities Panagra is considered as having its northern terminal in Miami and if we had permitted this ad to be run as forwarded from Miami we would have been in serious difficulties with the DAC) Third—how can we say "only PAA offers . . . . travel via the fascinating coastline route" as written by Grant in Miami and forwarded to us through Mr. Foss' office. If we are talking of coastlines in general I am certain Panagra covers more coastline than anybody and if we mean Atlantic coastline FAMA more or less duplicates our route.

2. Also on May 16th we received definite word from Miami about inauguration of "El Presidente" services an event which gladdened the hearts of all of us for a number of reasons.

3. In view of the situation in Nos. 1 and 2 above I asked Mr. Homs to call Miami and suggest, (1) that Pan American's counter-Braniff campaign be reduced to $4,000.00 to permit us to spend more money making a big splash with the "El Presidente" promotion and that (2) certain changes in layout and copy be made in our advertising to give us a really finished product.

4. Following the phone conversation between Mr. Homs and Mr. Foss it was agreed by all here that Pan American's interests would best be served by adapt- [fol. 3051] ing the layouts prepared by Grant's—Buenos Aires rather than starting all over with the layouts sent from Miami. The first insertions in the counter-Braniff campaign were scheduled for May 25th, Argentina's day of Proclamation of Independence and we felt that the flag motif preserved our selling ideas and at the same time was much more

appropriate and artistic than the map of the USA. I think you will agree that the phrase, "20 years of regular flights between Argentina and the USA" is much more significant and no less salesmanlike for counter Braniff purposes "than fly PAA to the USA". In addition, we have corrected the direct sales copy sent from Miami and added mention of the *very important* LAD tourist services and Pan American World Airways System's world-wide routes and connections. We attach a copy of the ad as it appeared in the English papers and we only ask that you compare it with the layouts sent from Miami.

5. The radiogram 23205 sent from Miami over your signature arrived on May 24th after the material for the attached ad was delivered to the newspapers for printing and it was my decision to let it run instead of cancelling it as I was certain it was in Pan American's interest to do so.

6. The above matters were discussed with Mr. Martinez and we are awaiting your answer to his cable of May 26th. We feel certain you will agree that the combined efforts of the Pan American and Grant personnel in Argentina will result in an advertising program well suited to conform with the peculiarities of the Argentine market and the Argentine press restrictions. I do not believe that the attached ad that was run in the Argentine press on May 25th can be classed as either "institutional tripe" nor as "straddle the fence" ad. I believe that it *sells* Pan American in the best possible way and presents those points which will best permit us to sell the pants off of Braniff or any other competitor.

7. As General Manager of Pan American Argentina I feel that it is both my duty and authority to make whatever changes are considered necessary in advertising layouts and copies sent us from Miami to adapt this material to the Argentine market, especially when the material is as poorly conceived and executed as [fol. 3052] the Miami counter-Braniff campaign which

is attached. If I do not have this authority I suggest that in the future all layouts and copy be sent directly to Grant-Buenos Aires for direct submission to the local newspapers.

As a matter of fact, Porter, we feel that the procedure to be followed in the future on this special advertising will be for your office to lay down the fundamental requirements of each program to be adapted and incorporated by Grant and ourselves here into layouts and copy for the full program subject to final approval from Miami. We believe that this System will result in the greatest benefit and least friction for all concerned. We feel that we are best qualified to prepare advertising material for special campaigns such as that for "El Presidente" and others in Argentina. We feel that when you have read this letter you will agree.

Sincerely,

/s/ G. P. Smith

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 282

August 21, 1950

Note to Mr. Toomey—

I realize an equitable solution to the Pan American-Panagra situation in Buenos Aires is a difficult one but it seems to me the results of the conference, as outlined in the attached, merely further increases the one-sidedness of the situation in favor of Panagra.

Under the arrangement outlined, Panagra will have access to all PAA passengers leaving Buenos Aires in advance including information covering those who have regularly travelled to the East Coast. Assuming that CAAPSA will continue its neutral policy of not favoring one line or the other, Panagra will have a distinct advantage under the arrangement proposed.

Possibly our inter-company relationship requires this substantial concession however I believe it should definitely be pointed out that the results of the deal will be entirely one-sided unless Mr. Smith has been instructed to sell Pan American to offset the sales effort which will now result from the Panagra action. In my opinion most of this arrangement merely formalizes a situation which already existed with the additional factor that there will be another sales representative in addition to the so-called "Advertising Staff" to solicit business for Panagra. In case the situation cannot be rectified, I would recommend that Pan American also put out on the street a salesman who will solicit business for Pan American only.

PAA (Emblem) MEMORANDUM

FOR USE BY ADDRESSEE

[Stamp—Received—Date Illegible—PAA—Sales Advertising, LAD, Miami]

SEND ORIGINAL BY COMAIL

TO	Division Sales Advt. Manager	FROM	Regional Traffic Manager
DEPT. OR DIV.	Latin American	DEPT. OR DIV.	Latin American
LOCATION	Miami	LOCATION	Rio de Janeiro

DATE June 11, 1950

SUBJECT: BUENOS AIRES ADVERTISING.

REFERENCE:

Dear Ernie:

Sorry that things are happening so fast around here that I haven't had times to write you and Porter concerning the subject squabble.

Referring particularly to your memo to me under date of June first which reached me yesterday, I must frankly say that the best means of *not* getting the hard-hitting support of the Buenos Aires Sales and Advertising representatives —and George Smith thrown in for good measure—is to continue expressing and implying that they are not pro-PAA or that they are pro-PANAGRA.

I say this after arriving in Buenos Aires a week ago and finding the sickest bunch of fellows you ever imagined after receiving Porter's radio 232025 to be followed by the knock-out punch contained in your memorandum of the 24th to Homs. By now you will have received the impact through

the letter that Smith was writing at the time I left. Therefore, I will omit reviewing it here.

From the sideline I view the jobs of everyone in Buenos Aires as perhaps the most thankless ones in the System for when they are not getting hell from us they are getting it from the other side of the family. Now that Texas Tom is in Argentina and that we will be operating EL PRESIDENTE services they will get a little rest from PAA but God help them at the hands of Panagra.

As explained in my cable of the 26th the master institutional ad had already been run so that for continuity the indication was to follow through with the shirt-tail series they had worked out. Otherwise, in view of the impending Boeing program, it might perhaps be better to discard the remainder of the program entirely AND START ALL OVER AGAIN. I do not know what you fellows decided on this.

[fol. 3056] The whole mess, in part, seems attributable to the time element as will be found if the matter were analysed in retrospect. That is why I urged that Buenos Aires be allowed to send in their ideas for your consideration and possible inclusion in the Boeing program. Frankly Ernie I feel that the boys down there, right on the spot, must know what their requirements are and therefore should have the opportunity of voicing their opinion and I sincerely hope that you will review the matter in this light.

[Stamp—Received—Aug 24 1953—Pan American Airways, Inc.—Vice President]

Mr. Douglas Campbell, Vice President
Pan American-Grace Airways, Inc.
NEW YORK

Dear Doug:

There seems to be a tendency among some of the Panagra people along the line and in New York to deal directly with the Panagra Sales Representative, Roger Rowe, when treating with routine traffic matters, completely by-passing CAPAASA and the dedicated individuals in CAPAASA. A case in point which we might cite concerns an enquiry made by our cargo department to Lima concerning the possibility of handling a considerable quantity of fresh meat from Buenos Aires to La Paz. A copy of the enquiry was sent to Mr. Mason in New York. The answer, in the form of a cable was directed to Rowe, who, it so happens, had no previous knowledge of the matter as it was merely a business possibility which had been unearthed by our cargo solicitors and was being developed by that department in a strictly routine manner. There was no question of keeping Roger out of the picture, but at the then stage of the game, there was, likewise, no particular reason to bring him in any more than he would be brought in on any odd bit of routine business which comes to light in the normal course of events. In like manner, I think you will agree that any reply to our enquiry should have been directed to CAPAASA. Copy Rowe, by all means, if desired or considered necessary, but please give us, your agents, a chance to develop your business in a normal, proper, and, we hope, an unfettered way.

Similarly, the cargo people along the line are addressing radios, and possibly correspondence, about the handling of cargo shipments to Adolfo Cosentino rather than to our cargo department. The chances are very great that the very information Cosentino is receiving is information the Cargo people urgently require in their dealings with the consignees. There is no point whatsoever in bringing in Cosentino or any of the others at the airport as they are not and will not be in touch with the clients and would only confuse matters if they got in touch with them. Besides, of course, delays in handling must invariably occur if important information is routed all around the mulberry bush before finally reaching the party who needs it.

[fol. 3058] I would highly appreciate your finding some means to remind your people to follow a routine course in dealing with the Argentine traffic matters which it is the responsibility of CAPAASA, and as far as I know, CAPAASA only, to manage.

Sincerely yours,

George P. Smith
General Manager

Mr. James T. Scholtz, Regional Manager
Pan American-Grace Airways
LIMA

Dear Jim:

Mr. Campbell quoted to me your recent letter to him which came as a result of my complaining—not too bitterly, I hope—of several cases when Panagra people along the line had communicated directly with airport personnel, by-passing CAPAASA on matters which were really the concern of the agency. I quite appreciate that these instances come under the heading of errors, and the only reason for my letter was simply to try to put an end to them before some serious damage occurred.

In connection with direct communications with Mr. Cosentino on split shipments, it may be true that Mr. Cosentino was one of the people treating with the authorities on this and similar "Facilitation" problems. However, his activities in this respect are those pertaining to his position as representative of all of the IATA carriers here, not as a Panagra man. I went to the greatest lengths to have him appointed to this job by JURCA, which as you know is our local IATA panel as I definitely did not want the job turned over to some Aerolineas man who would, I was sure, do nothing. Quite a fight developed at the corresponding JURCA meeting, but we finally prevailed. It should be remembered that Cosentino in this work, is dealing with an entity known as the "Inter-ministerial Committee", which is composed of designated officials from all of the interested Ministries, such as Customs, Public Health, Immigration, Police, and so forth, not with the Jefe of Customs at the airport, although, of course, Cosentino knows him well. The point is that the Cargo Department of CAPAASA,

which is in touch with the committee—not Mr. Cosentino—must most definitely be let in. In fact, all communications of this nature should be sent to Cargo. Then if they need any special help from Mr. Cosentino, they can get in tough with him.

[fol. 3060] I repeat that Mr. Cosentino's special activities to which you refer are in representation of all IATA carriers on general problems and have nothing in particular to do with any individual shipment. I thought maybe you might like to know this. I gather from your letter to Mr. Campbell that you perhaps didn't have the whole story.

In any case, all we are after is that the work proceeds smoothly and that nobody who should be receiving routine information is left out of the picture.

Sincerely yours,

George P. Smith
General Manager

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 289

Exhibit No. P-37

EXECUTIVE COMMITTEE

December 19, 1939.

"The meeting thereupon considered the question of whether a general reserve for contingencies should be set up. The officers were requested to discuss this question with the Company's counsel and accountants and with officers of Pan American-Grace Airways, Inc. and to report back to the Executive Committee at its next meeting."

EXECUTIVE COMMITTEE

February 6, 1940.

"The meeting, after consideration, adopted a recommendation to the Board of Directors that a year-end bonus of not in excess of $50,000 be distributed among employees selected by the management, excluding the President, participants under the Management Stock Purchase Plan, and employees of China National Aviation Corporation, SCADTA and Pan American-Grace Airways, Inc."

EXECUTIVE COMMITTEE

December 30, 1940.

"Mr. C. V. Whitney referred to a proposal which had been offered by Mr. Harold J. Roig, of W. R. Grace & Co., relating to the filing of an application for a certificate of convenience and necessity betw a New Orleans and the Canal Zone. Upon the invitation of the Committee, Mr. Roig entered the meeting, and outlined a proposal that this Company acquiesce in the filing by Pan American-Grace Airways with the Civil Aeronautics Board of an application for a certificate of convenience and necessity on the aforementioned route, or the filing of such an application by a new company to be organized, two-thirds of the capital stock of which would be owned by Pan American-Grace

Airways, Inc. and one-third by Eastern Airlines, Inc. Mr. Roig was informed that his proposal would be given consideration, and that he would be advised of the Company's action with respect thereto at a later date. Thereupon, Mr. Roig withdrew from the meeting."

EXECUTIVE COMMITTEE

January 6, 1941.

"A discussion thereupon ensued regarding the proposal made by Mr. Harold J. Roig, of W. R. Grace & Co., relating to the filing by Pan American-Grace Airways, Inc. of an application to the Civil Aeronautics Board for a certificate [fol. 3066] of convenience and necessity between New Orleans and the Canal Zone, or possibly the filing of such an application by a new company to be organized which would be jointly owned, one-third by Eastern Airlines and two-thirds by Pan American-Grace Airways, Inc. The Committee was of the opinion that this Corporation should not approve the organization of such new company, and that in no event should the pending application of Pan American Airways, Inc. for a certificate of convenience and necessity on this route be withdrawn. No final action was taken on the question of whether this Corporation should acquiesce in the filing of such an application by Pan American-Grace Airways, Inc., inasmuch as the Committee desired to consult counsel for the Company and to give the matter further consideration."

BOARD OF DIRECTORS

January 7, 1941.

"A discussion thereupon ensued regarding a proposal to have Pan American-Grace Airways, Inc., or another company in which it would be interested, apply for authority to operate between New Orleans and the Canal Zone. It was the sense of the meeting that such proposed action should be opposed."

EXECUTIVE COMMITTEE

January 14, 1941.

"The meeting proceeded to consideration of a proposal made by Mr. Harold J. Roig, of W. R. Grace & Company, that the Corporation should acquiesce in the filing by Pan American-Grace Airways, Inc. of an application for a certificate of convenience and necessity between the Canal Zone and New Orleans, Louisiana, and of a notice of a meeting of the Board of Directors of Pan American-Grace Airways, Inc. which had been called for the afternoon of January 14, 1941, to consider the same matter. Mr. Henry J. Friendly, of Root, Clark, Buckner & Ballantine, counsel for the Corporation, was invited to enter the meeting at this point. Mr. Friendly presented a legal opinion rendered by his firm and participated in the discussion. After full consideration, it was, upon motion duly made and seconded, unanimously

> RESOLVED, that the Corporation, as owner of half of the stock of Pan American-Grace Airways, Inc., should decline to acquiesce in the filing by Pan American-Grace Airways, Inc. of an application for a certificate of convenience and necessity between the Canal Zone and New Orleans, Louisiana, and that the representatives of the Corporation upon the Board of Directors of Pan American-Grace Airways, Inc. should [fol. 3067] not attend the meeting of such Board of Directors called for the afternoon of January 14, 1941, to act upon such proposal, or any adjournment thereof, and, except upon further instructions from the Executive Committee or the Board of Directors, should not attend any other meeting of the Board of Directors of Pan American-Grace Airways, Inc. at which action is to be taken upon the subject matter above described.

It was further determined that the proper officers of the Corporation should promptly communicate with Mr. Roig, and discuss the matter with him so that the position of the Corporation might be fully understood. A form of letter to be addressed to Mr. Roig, in the event that, after

such conversations, he was neverthless determined to proceed with the meeting of the Board of Directors of Pan American-Grace Airways, Inc., was approved."

EXECUTIVE COMMITTEE

January 28, 1941.

"Mr. Trippe reported to the meeting on a conference which had been held with Messrs. Garni and Roig relative to the filing of an application by Pan American-Grace Airways, Inc. for a certificate of convenience and necessity on a route between the Canal Zone and New Orleans, via Guatemala."

EXECUTIVE COMMITTEE

June 24, 1941.

"Mr. Trippe read to the meeting a copy of a letter dated June 19, 1941 written by Mr. Geo. L. Rihl, a Vice-President of the Corporation, to Mr. Harold J. Roig, relating to a special meeting of the Board of Directors of Pan American-Grace Airways, Inc. which had been called for June 18, 1941, and which had been adjourned to June 20, 1941, for the purpose of considering a proposal that Pan American-Grace Airways, Inc. extend its route from Cristobal and/or Balboa to New Orleans and an application to the Civil Aeronautics Board for the necessary certificate of convenience and necessity. Such letter was approved, as being in line with the previous position of the Company, and ordered filed with the Secretary's records."

BOARD OF DIRECTORS

July 1, 1941.

"Mr. Trippe reported to the meeting on developments to date in connection with a proposal submitted by W. R. Grace & Co. relating to an extension of the operations of Pan American-Grace Airways, Inc. from the Canal Zone [fol. 3068] to New Orleans, and the filing of an application with the Civil Aeronautics Board for a certificate of convenience and necessity on such route. He referred to the

special meeting of the Board of Directors of Pan American-Grace Airways, Inc. which had been called for June 18, 1941 to act upon such proposal, and the subsequent adjournments of such meeting. Mr. Trippe pointed out that in January, 1941 a meeting of the Board of Directors of Pan American-Grace Airways, Inc. had been called to act upon the same proposal, and recalled that the Board of Directors of Pan American Airways Corporation, as also its Executive Committee, had determined that the Company should decline to acquiesce in such proposal, and that the Executive Committee had issued instructions to the representatives of Pan American Airways Corporation on the Board of Directors of Pan American-Grace Airways, Inc. not to attend any meetings of the Board of Directors of Pan American-Grace Airways, Inc. at which such proposal was to be acted upon. He also stated that, at the request of Pan American Airways Corporation, a special meeting of the stockholders of Pan American-Grace Airways, Inc. had been called to be held on July 2, 1941, at which it was intended that a statement would be submitted on behalf of Pan American Airways Corporation setting forth its position with respect to such proposal, and that it was expected that the representatives of W. R. Grace & Co. at such stockholders' meeting would submit a statement on behalf of that Company respecting such proposal.

At the conclusion of the discussion which ensued, the Board reaffirmed the position which had been previously taken by the Board and the Executive Committee that it would not be in the interest of Pan American Airways Corporation or of Pan American-Grace Airways, Inc., or in the public interest for Pan American Airways Corporation to acquiesce in the proposal.

Upon motion, duly made and seconded, the following resolution was adopted:

> RESOLVED, that the President, or any Vice-President, of this Corporation be, and each of them hereby is, authorized and empowered, in the name and on behalf of this Corporation and under its corporate seal or otherwise, to execute and deliver a proxy in

favor of Geo. L. Rihl, John C. Cooper or J. Clawson Roop, Vice-Presidents of this Corporation, whereby the said Geo. L. Rihl, John C. Cooper or J. Clawson Roop will be authorized to attend a special meeting of the stockholders of Pan American-Grace Airways, Inc. to be held on July 2, 1941, or at any meeting of such stockholders adjourned therefrom, and to vote the shares of stock held by this Corporation in said Pan American-Grace Airways, Inc. at such special meeting to be held on July 2, 1941, and at any meeting adjourned therefrom, and that the Secretary, or any Assistant Secretary, of this Corporation be and each of them hereby is authorized and empowered to affix the seal of this Corporation to such proxy so executed and to attest such seal so affixed."

[fol. 3069]

EXECUTIVE COMMITTEE

July 21, 1941.

"Mr. Trippe submitted to the meeting a copy of a letter dated July 18, 1941 to Mr. C. V. Whitney, from Mr. D. Stewart Iglehart, of W. R. Grace & Co., together with the copy of a proposed letter from W. R. Grace & Co. to the Civil Aeronautics Board, enclosed with the above-mentioned letter from Mr. Iglehart, relating to the proposed filing with the Civil Aeronautics Board of an application by Gulf & Caribbean Airways, Inc., a wholly owned subsidiary of W. R. Grace & Co., for a certificate of convenience and necessity on a route between New Orleans and the Canal Zone. Also attached to the letter from Mr. Iglehart of July 18, 1941 was a copy of certain minutes of the Board of Directors and stockholders of Pan American Grace Airways, Inc. At the conclusion of the discussion which ensued, Mr. Whitney was requested to telephone Mr. Iglehart and propose that before the above-mentioned letter is filed with the Civil Aeronautics Board, Mr. Iglehart, or he and his partners and associates, meet with the Executive Committee for the purpose of discussing the matter, or in the event Mr. Iglehart were not agreeable to such proposal, for Mr. Iglehart to meet with Mr. Whitney as provided in paragraph 4 of the letter agreement of February 14, 1939

between W. R. Grace & Co. and Pan American Airways Corporation relating to arbitration under such agreement. Mr. Whitney telephoned Mr. Iglehart while the meeting was in session, and submitted the above-mentioned two proposals to him. He reported back to the meeting that Mr. Iglehart had stated that he did not wish personally to attend a meeting of the Executive Committee, and suggested that Mr. Roig and Mr. Garni come up and meet with the Executive Committee, should they agree to do so after discussing the matter with Mr. Iglehart. The Committee did not feel that anything would be accomplished by a meeting with Messrs. Roig and Garni, and that under paragraph 4 of the above-mentioned agreement it was necessary that Mr. Iglehart be present. Mr. Whitney thereupon telephoned Mr. Iglehart again informing him of the decision of the Committee, and at the conclusion of the conversation stated to the Committee that Mr. Iglehart repeated that he could not personally attend any such meeting. During the last telephone conversation Mr. Whitney reiterated that Mr. Iglehart and anyone else he selected meet with us, and offered to meet with Mr. Iglehart in connection with arbitration as provided for in paragraph 4 of the above-mentioned letter agreement of February 14, 1939. At the conclusion of the telephone conversation, Mr. Whitney [fol. 3070] stated that Mr. Iglehart had promised to call him back during the day with respect to such meeting."

EXECUTIVE COMMITTEE

July 22, 1941.

"Mr. Trippe reported to the meeting on the conference which had been held today between Messrs. Roig and Garni; representing W. R. Grace & Co., and Mr. Evan E. Young and himself, relating to the proposal that Pan American Grace Airways, Inc. apply to the Civil Aeronautics Board for a certificate on a route between New Orleans and the Canal Zone, or that, in the alternative, an application be filed with the Board by W. R. Grace & Co., through Gulf & Caribbean Airways, Inc., a wholly owned subsidiary of W. R. Grace & Co., for such certificate. At the conclusion of the discussion which ensued, the officers

were authorized to forward to W. R. Grace & Co. immediately a written communication confirming the telephone request which Mr. Whitney made to Mr. Iglehart yesterday that an arbitration be held under the conditions of paragraph 4 of the letter agreement of February 14, 1939 between W. R. Grace & Co. and the Corporation with respect to the matters involved under such agreement."

EXECUTIVE COMMITTEE

July 29, 1941.

"Mr. Trippe submitted to the meeting a copy of a letter which had been written under date of July 22, 1941 by the Company, signed by its Secretary, addressed to W. R. Grace & Company, referring to the proposal of the latter Company to extend operations to the Canal Zone, and confirming the request which Mr. C. V. Whitney had made on July 21, 1941 to Mr. Iglehart that, in line with the agreement of February 14, 1939, between W. R. Grace & Company and this Corporation, arbitration be held at once with respect to the matters involved. Upon motion, duly made, seconded and carried, such letter was ratified.

Mr. Trippe reported to the meeting that on July 24, 1941 Mr. Iglehart had met with Mr. C. V. Whitney at 230 Park Avenue, New York City, and that it had been decided to defer the filing with the Civil Aeronautics Board of the application of Gulf & Caribbean Airways, Inc. for a certificate of convenience and necessity on the proposed route between New Orleans and the Canal Zone, and the proposed letter to the Board from W. R. Grace & Company accompanying such application. Mr. Trippe also stated that a meeting had been held later between Mr. Roig and Mr. Whitney at 230 Park Avenue, New York City.

[fol. 3071] Mr. Trippe read to the meeting a memorandum addressed to him by Mr. Whitney, dated July 25th, setting forth a further proposal on the part of W. R. Grace & Company relating to operations on this route, and reported upon the conference which he had had with Mr.

Roig on July 28, 1941 regarding such proposal. A lengthy discussion thereupon ensued, at the conclusion of which the meeting expressed the opinion that such proposal should not be accepted.

"Mr. Trippe then outlined to the meeting a proposed arrangement between Pan American Airways, Inc. and Pan American-Grace Airways, Inc. suggested by representatives of W. R. Grace & Co. relating to the interchange of equipment. After consideration, the officers were authorized to discuss the arrangement further with such representatives."

EXECUTIVE COMMITTEE

October 14, 1941.

"Mr. Trippe reported upon a suggestion made by the management of Pan American-Grace Airways, Inc. that the capital of that Corporation be increased by a transfer thereto of a portion of its earned surplus. The meeting requested that a detailed proposal be submitted to the Executive Committee at a latter meeting."

EXECUTIVE COMMITTEE

October 28, 1941.

"The meeting considered, and discussed, a recent exchange of correspondence with W. R. Grace & Co."

BOARD OF DIRECTORS

April 28, 1942.

"The meeting took under consideration, and discussed, the proposed filing by W. R. Grace & Co. of a petition with the Civil Aeronautics Board requesting that Pan American Airways Corporation be required to divest itself of the ownership of certain shares of the capital stock of Pan American-Grace Airways, Inc. Mr. S. Sloan Colt reported to the meeting on a telephone conversation which he had had with Mr. Harold J. Roig, of W. R. Grace & Co., in connection with this matter."

[fol. 3072] BOARD OF DIRECTORS

May 5, 1942.

"The Chairman reported to the meeting on the status of the petition which had been filed by W. R. Grace & Co. with the Civil Aeronautics Board requesting that Pan American Airways Corporation be required to divest itself of its ownership of certain shares of the capital stock of Pan American-Grace Airways, Inc."

EXECUTIVE COMMITTEE

May 14, 1942.

"The meeting took under consideration the petition which had been filed by W. R. Grace & Co. with the Civil Aeronautics Board requesting that this Corporation be required to divest itself of ownership of certain shares of stock of Pan American-Grace Airways, Inc. The representatives of this Corporation on the Board of Directors of Pan American-Grace Airways, Inc. were authorized to approve the full co-operation by that Company, in carrying out such undertakings in furtherance of the war effort as may be requested by the War Department."

EXECUTIVE COMMITTEE

May 26, 1942.

"The meeting took under consideration a revised draft (draft of May 25, 1942) of a proposed reply, to be filed with the Civil Aeronautics Board, to the petition heretofore filed with the Board by W. R. Grace & Co. requesting that Pan American Airways Corporation be required to divest itself of the ownership of certain shares of capital stock of Pan American-Grace Airways, Inc. The meeting approved such proposed reply with certain suggested changes, and authorized the officers to discuss with Government officials concerned the question whether the reply should be filed, the officer to abide by the decision of such officials."

EXECUTIVE COMMITTEE

June 2, 1942.

"The meeting discussed the desirability of submitting to the Civil Aeronautics Board the Corporation's reply to the petition filed with the Board by W. R. Grace & Co. requesting that the Corporation be required to divest itself of the ownership of certain shares of the capital stock of Pan American-Grace Airways, Inc.

[fol. 3073] The meeting considered a letter from Mr. Ingleheart of W. R. Grace & Co. referring to the annual report of the Corporation and its subsidiaries for the year 1941."

BOARD OF DIRECTORS

June 2, 1942.

"The meeting discussed the desirability of submitting to the Civil Aeronautics Board a reply by the Corporation to the petition heretofore filed with the Board by W. R. Grace & Company."

EXECUTIVE COMMITTEE

June 16, 1942.

"Mr. Trippe reported to the meeting on the status of the petition filed by W. R. Grace & Co. with the Civil Aeronautics Board that the Company be required to divest itself of the ownership of certain shares of stock of Pan American-Grace Airways, Inc. The meeting further discussed a form of reply to such petition."

EXECUTIVE COMMITTEE

June 29, 1942.

"The meeting took under consideration a communication from the Civil Aeronautics Board relating to the petition filed by W. R. Grace & Co. with the Civil Aeronautics Board that this Corporation be required to divest itself of the ownership of certain shares of the capital stock of Pan

American-Grace Airways, Inc. Action with respect to such communication was deferred."

EXECUTIVE COMMITTEE

July 7, 1942.

"Mr. Trippe reported to the meeting on the status of the petition filed by W. R. Grace & Co. with the Civil Aeronautics Board requesting that the Corporation be required to divest itself of ownership of shares of stock of Pan American-Grace Airways, Inc."

[fol. 3074] EXECUTIVE COMMITTEE

July 15, 1942.

"The meeting considered the show cause order issued by the Civil Aeronautics Board to Pan American-Grace Airways, Inc. in connection with proceeding for the fixing of rates for the transportation of mail by that Company."

EXECUTIVE COMMITTEE

August 11, 1942.

"Mr. Trippe reported to the meeting on the decision of the Civil Aeronautics Board relating to the Pan American-Grace Airways, Inc. rate case."

EXECUTIVE COMMITTEE

September 22, 1942.

"Mr. Trippe reported on meetings held on August 25, 1942 and September 21, 1942 of the Board of Directors of Pan American-Grace Airways, Inc. He stated that at the latter mentioned meeting the question had come up relating to the designation of counsel to represent Pan American-Grace Airways, Inc., which had been made a party in proceedings before the Civil Aeronautics Board under Docket No. 779, and also the question of the filing of an application by Pan American-Grace Airways, Inc. in proceedings before the Civil Aeronautics Board under Docket No. 778 relating to temporary Caribbean service. It was

the sense of the meeting that with respect to the proceedings under Docket No. 779 there was no reason for Pan American Airways Corporation to vary from the position previously taken, and as to the proceedings under Docket No. 778 Pan American-Grace Airways, Inc. was in no position to undertake temporary service by reason of the necessity for preparing to meet its commitments under the arrangement with the Air Transport Command of the Army Air Forces covered by exchange of letters between that Company and the Air Transport Command dated July 21, 1942 and July 22, 1942, and by reason of necessity for increasing service on Panagrace's own route."

[fol. 3075]. EXECUTIVE COMMITTEE

September 29, 1942.

"Mr. Trippe reported to the meeting on the action taken at recent meetings of the Board of Directors of Pan American-Grace Airways, Inc. in connection with proceedings before the Civil Aeronautics Board under Docket Nos. 778 and 779."

EXECUTIVE COMMITTEE

October 13, 1942.

"The meeting took under consideration the position to be taken by the Company in connection with the petition filed by W. R. Grace & Co. with the Civil Aeronautics Board requesting that the Company be required to divest itself of the ownership of certain shares of stock of Pan American-Grace Airways, Inc. At the conclusion of the discussion which ensued, the Committee expressed the opinion that Pan American Airways Corporation should take the initiative in these proceedings and file a petition with the Civil Aeronautics Board requesting that W. R. Grace & Co. be required to divest itself of the ownership of stock of Pan American-Grace Airways, Inc., rather than limit the Company's action to the filing of a reply to the petition of W. R. Grace & Co."

BOARD OF DIRECTORS

December 1, 1942.

"Mr. Trippe reported to the meeting on the letter written under date of November 11, 1942 to the representatives of W. R. Grace & Co. on the Board of Directors of Pan American-Grace Airways, Inc."

EXECUTIVE COMMITTEE

December 8, 1942.

"The meeting discussed the financial position of Pan American-Grace Airways, Inc., including the declaration of a dividend by that Corporation which was to be considered by its Board of Directors."

[fol. 3076]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 290

Exhibit No. P-37

EXECUTIVE COMMITTEE

April 21, 1937.

"The meeting ratified an agreement between W. R. Grace & Co., Pan American-Grace Airways, Inc. and this Corporation relating to intercompany transfer of position on Buenos Aires-Salta route."

EXECUTIVE COMMITTEE

November 16, 1937.

"The meeting thereupon considered and authorized, new operating schedules of the Eastern and Western Divisions of this Corporation and of Pan American-Grace Airways, Inc. to become effective December 1, 1937."

BOARD OF DIRECTORS

June 28, 1938.

"Mr. Trippe reported to the meeting on the following:

. . . . . .

(c) Loss of Douglas transport by Pan American-Grace Airways, June 20, 1938."

EXECUTIVE COMMITTEE

July 7, 1938.

"Mr. Trippe reported to the meeting on the following:

* * * * * * * *

(b) Negotiations with United States Post Office Department relating to authorization of second weekly direct service between Miami and Cristobal to further improve connecting service between the United States and Cristobal destined to points served by Pan American-Grace Airways, Inc."

EXECUTIVE COMMITTEE

August 23, 1938.

"The meeting thereupon considered a proposal submitted by the President of W. R. Grace & Company."

[fol. 3077] EXECUTIVE COMMITTEE

September 8, 1938.

"The meeting thereupon considered a conference which had been held with officials of W. R. Grace & Co."

EXECUTIVE COMMITTEE

September 20, 1938.

"The meeting considered the following:

* * * * * * * *

(c) Series of conferences with W. R. Grace & Co., including their proposal relating to extension of Pan American-Grace Airways, Inc. beyond its territory to New Orleans, the request that the management of Pan American-Grace Airways, Inc. be transferred to W. R. Grace & Co. and the offer of that Company to supply additional capital for the suggested extension thereby assuming voting control of the Company."

EXECUTIVE COMMITTEE

October 4, 1938.

"Mr. Trippe reported to the meeting on the following:

* * * * * * * * *

(e) Further conferences with officials of W. R. Grace & Co."

BOARD OF DIRECTORS

December 28, 1938.

"Mr. Trippe reported to the meeting on the status of negotiations with W. R. Grace & Co. It was the sense of the meeting that it would not be in the interest of our stockholders for our directors to authorize an application by Pan American-Grace Airways, Inc. to extend north of Cristobal in competition with Pan American Airways, Inc."

EXECUTIVE COMMITTEE

January 17, 1939.

"The meeting thereupon considered a memorandum prepared by Messrs. Iglehart and Whitney. A discussion [fol. 3078] ensued of the differences of opinion between the parties as to whether the proposed arbitration clause covers paragraph II. The meeting disapproved the proposed arrangement and granted authority to negotiate a standard of connecting service required of this Company under paragraph II., with definite provisions for arbitration."

EXECUTIVE COMMITTEE

January 23, 1939.

"The meeting considered a supplemental memorandum drawn by Messrs. Iglehart and Whitney. No action was taken thereon, and the matter was referred by the meeting to the Board of Directors for consideration."

EXECUTIVE COMMITTEE

February 7, 1939.

"The meeting authorized the President to execute a proposed arrangement with W. R. Grace & Co. in the form submitted to the meeting."

EXECUTIVE COMMITTEE

September 12, 1939.

"Mr. Trippe stated that two DC-3 airplanes had been ordered for Pan American-Grace Airways, Inc."

EXECUTIVE COMMITTEE

October 31, 1939.

"Mr. Trippe thereupon outlined to the meeting the terms of the Company's option from Pan American-Grace Airways, Inc. to purchase an S-43 airplane. After consideration thereof, authority was granted to the officers to exercise such option upon receipt from Pan American-Grace Airways, Inc. of the notice required under the provisions of such option to be given to Pan American Airways, Inc., at the then option price."

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 291

Exhibit No. Con. 19
CAB Docket No. 3500

STATEMENT LISTING DATES AND SUBJECT MATTER OF NEGOTIATIONS PERTAINING TO THE AGREEMENTS BETWEEN NATIONAL, PAN AMERICAN, PANAGRA, AND GRACE

(The following is based on the best recollection of the parties concerned and upon such records as are available).

In the summer of 1948 the purchase by Pan American of a substantial amount of National's stock and a possible interchange between National and Pan American were dis-

cussed briefly by Mr. Baker and Mr. Trippe in New York. There were no further meetings resulting directly from this conversation.

December 15, 1948	Letter from Baker to Roig proposing interchange. Similar letter sent to all carriers with which National connects.
January 6, 1949	Letter from Roig to Baker indicating willingness to discuss matter, without prejudice. Letter presented to meeting of Panagra Board of Directors.
January 14, 1949	Letter from Baker to Roig suggesting further discussions.
January 17, 18, 1949	Baker and Scott met in New York with Trippe, Dean and Friendly to discuss prospect of Pan American interchange. Mr. Thomas (NAL director) and Mr. Fell of Lehman Brothers were also present.
January 21, 1949	Luncheon of Roig and Baker in Washington, at which Baker advised he had been talking with Trippe concerning interchange and sale of National stock.
January 21, 1949	Luncheon of Trippe and J. P. Grace, Jr. in New York, at which Trippe advised he had been discussing with National the acquisition of a stock interest in National and interchange.
January 24, 1949	Letter from Scott to Trippe enclosing memorandum outlining proposed arrangement for sale of stock, interchange, etc.

January 26, 1949	Meeting of Dean, Friendly, Roig and Shea, at which Dean said Panagra's interests in connection with the operation of a through service would be protected in any arrangement made by Pan American with National.
January 27, 1949	Meeting of Baker, Scott, Roig, Grace and Shea at which Baker indicated he felt Panagra should have some stock interest in National.
January 27, 1949	Meeting of Baker, Scott, Trippe, Dean and Friendly at which division between Pan American and Panagra of stock interest in National was discussed.

[fol. 3080]

January 27, 1949	Meeting of Trippe, Dean, Friendly, Grace and Roig. Pan American took position that Panagra stock interest in National should be over and above that which had been offered by National to Pan American.
January 27, 1949	Further short meeting between Trippe, Dean, Scott and Baker at Baker's hotel.
January 28, 1949	Meeting of Trippe, Dean, Friendly, Baker and Scott—breakoff of negotiations.
January 28, 1949	Meeting of Grace, Shea, Baker and Scott.
Week of February 14	Several meetings of Baker, Scott, Roig, Grace, and Shea in New York—Discussion of matters, leading up to letter of February 28.

February 26, 27, and 28	Meeting in Miami of Baker, Scott, Roig, Grace and Shea—Negotiations culminating in offer of February 28.
March 2	Meeting of Grace and Trippe, advising him of purchase of National stock by Grace.
Week of March 21	Meeting of Dean, Friendly, Roig and Shea—Discussion of February 28 proposal, Dean indicating Pan American's interest in securing additional stock interest.
Week of March 21	Telephone conversation Grace and Baker, passing on information re talk with Pan American.
March 25	Meetings of Grace, Shea, Baker and Scott in Miami to discuss three-party agreement. Telephone conversations Roig and Dean and Friendly concerning Miami discussions.
March 29	Meeting of Grace and Trippe prior to scheduled meeting of Directors of Panagra in New York. Decision not to hold Directors' meeting and to carry on negotiations in Washington with National.
March 29, 30, 1949	Negotiations in Washington culminating in March 30th Memorandum of Understanding—Attended by: Trippe, Friendly, Dean, Grace, Shea, Roig, Gesell, Baker, and Cross.

Throughout April and up through May 11, 1949, there were frequent meetings between various representatives of Na-

tional, Pan American, Panagra, and Grace, for the purpose of working out details of the various agreements which culminated in the signing of the formal agreements on May 11, 1949.

MESSAGE OF TRANSMITTAL

To the Congress of the United States:

I am submitting herewith the report of the Federal Aviation Commission appointed by me last summer by direction

of the Seventy-third Congress. The Commission has made a diligent study of the broad subject of aviation conditions here and elsewhere and emphasizes the excellent American progress in this new form of transportation. The Commission has also studied problems of national defense, of procurement, policies, and of the extension of air transport services. I invite your attention to these comprehensive surveys.

As I have suggested on many occasions, it becomes more and more apparent that the Government of the United States should bring about a consolidation of its methods of supervision over all forms of transportation. When the Interstate Commerce Commission was created in 1887 the railroad was practically the principal method of rapid interstate transportation. Since that time this monopoly of transportation enjoyed by the railroad, to a very important degree, has been limited by the development of the automobile and good interstate roads. Recently water transportation by lake, by river, by canal, and by ocean has, largely through the construction of the Panama Canal and our inland waterways, definitely brought ships and shipping into the general interstate field. More recently still air transportation has become an element. All of these developments have changed the general problem of transportation and the concern of the Government with them. A number of valuable reports have been prepared on these related questions. The report of the Federal Coordinator of Transportation has already been submitted to the Congress by the Interstate Commerce Commission. The report deals with the many problems relating to busses, trucks, water carriers, and railroads. Other reports of departmental committees on ocean mail subsidies have been completed. This present report on aviation is a similar source of information and advice concerning transportation by air. I earnestly suggest that the Congress consider these various reports together in the light of the necessity for the development of interrelated planning of our national transportation. At a later date I shall ask the Congress for general legislation centralizing the supervision of air and water and highway transportation with adjustments of

our present methods of organization in order to meet new and additional responsibilities.

There are detailed questions, however, that require early action. Our extended mail contracts with air lines expire on or about March 1, and existing legislation dealing with primary and secondary routes should be revised before that time. The Commission suggests that the Interstate Commerce Commission be given temporarily the power to lower or increase air-mail rates as warranted in their judgment after full investigation. The purpose of this is to pre-
[fol. 3088] vent the destruction of any efficiently operated part of the present system pending suitable consideration by the Congress of what permanent measures should be taken and what amendment, if any, the present general transportation policy of the Government should undergo. I concur in this recommendation of the Federal Aviation Commission provided always that the grant of this duty to the Interstate Commerce Commission be subject to provisions against unreasonable profits by any private carrier. On account of the fact that an essential objective during this temporary period is to provide for the continuation of efficiently operated companies and to guard against their destruction, it is only fair to suggest that during this period any profits at all by such companies should be a secondary consideration. Government aid in this case is legitimate in order to save companies from disastrous loss but not in order to provide profits.

The Commission further recommends the creation of a temporary Air Commerce Commission. In this recommendation I am unable to concur. I believe that we should avoid the multiplication of separate regulatory agencies in the field of transportation. Therefore in the interim before a permanent consolidated agency is created or designated over transportation as a whole, a division of the Interstate Commerce Commission can well serve the needs of air transportation. In the granting of powers and duties by the Congress orderly government calls for the administration of executive functions by those administrative departments or agencies which have functioned satisfactorily in the past and, on the other hand, calls for the vesting of

judicial functions in agencies already accustomed to such powers. It is this principle that should be followed in all of the various aspects of transportation legislation.

FRANKLIN D. ROOSEVELT.

THE WHITE HOUSE, *January 31, 1935.*

[fol. 3090]

(24) No changes should henceforth be made in the existing foreign air-mail contracts except with the approval of the commission hereinafter proposed.

There is at the present time a legal and financial structure of foreign air-transport which includes a number of air-mail contracts that have some five years yet to run. Though we are proposing a change in the form of administration of new foreign routes, and in the financial relationship of their operators with the government for the future, we accept the present contracts not only as legally binding but as a legal foundation for a highly important and continuously functioning service. We should consider it most unfortunate if they were to undergo any sudden disturbance.

We therefore propose that they be left undisturbed, and that existing services continue under the direction of the Post Office Department and be compensated by the Post Office appropriation unless and until a new commission

shall have been established and new arrangements without definite term of expiration arrived at by joint agreement between present operators and the commission.

[Vol. 3091]

(25) The governmental administration of foreign air transport should as far as possible be kept similar to that of the domestic air line system, but with such modifications as may be clearly necessitated by a fundamentally different political, legal, and operating status. The status of American air transport in foreign fields competing with foreign owned air lines should in general not be one of competition between American lines, but of carefully-controlled regional monopoly. The general powers of the commission hereinafter proposed in connection with foreign air transport should be essentially similar to those which it enjoys in the domestic field, and the commission should have the additional power of stipulating for fixed periods certain minimum and maximum conditions of service and of governmental aid in the interest of stability of the undertaking and of encouragement of large investment in ground facilities.

We have already explained the general mechanism that we have in mind for the supervision of air lines by a commission. The system suggested is, we believe, capable of adapting itself from domestic to foreign routes without fundamental change, but there are some points of difference that must be taken into account. Foremost among them are that an air line operating internationally has to be a self-contained enterprise and provide its own facilities to a much greater extent than any domestic line is required to do, and that it has to meet foreign competition. If American air lines are to compete with lines under foreign direction it would be an obvious absurdity to divide the American strength by competition among a multiplicity of American-flag enterprises. The aid that is appropriated for foreign air transport in any particular part of the globe

ought not to be squandered by dividing it among two or more competitors who will use government-provided funds to duplicate each other's facilities. The spur to progress that only competition can supply should be adequately furnished by the foreign competitor, coupled with the constant watchfulness of American governmental authorities over the standard of service rendered and with their periodic specification of standards as high as the commercial importance of the line may justify.

The fact that the foreign lines are necessarily self-contained has also to be reckoned with. No government can engage in great engineering undertakings outside its own borders. It is impossible for the Department of Commerce to set up lights and radio stations in Central America or the Orient, and in many cases the countries concerned have found no adequate reason to provide facilities themselves. [fol. 3092] It has been necessary for the air lines to build their own landing fields, provide their own meteorological service, maintain their own communications systems, and install their own lights if night flying were to be attempted. All that has been supplementary to the development of operating and traffic organizations, and the maintenance of offices in many lands and working in many languages, and the establishment of good standing with the governments and peoples through whose territory the lines must pass. It is impossible that all that should be done, involving as it does a very heavy capital outlay, without some definite assurance of a continuance of governmental aid over a considerable period.

That has been fully recognized, and the present device is the award of a ten-year contract, fixing the rates of compensation over that period. European governments have generally followed a corresponding course except that in some cases their contracts have been for much more than 10 years. The fixed-term contract works well during the first few years of its existence. After that, it seems to be the case that it will generally work progressively worse until as the expiration date approaches affairs become calamitous and emergency measures have to be taken. No one in the world has ever been wise enough to estimate at

any time what air transport will be doing, or what kind of equipment it will be using, or how much assistance it will be needing, ten years from that date. Any rigorously fixed arrangement runs the risk either of appearing as manifestly excessively generous or of becoming so inadequate as seriously to handicap the development of the service long before its term is run. Even with that difficulty surmounted, it would still be necessary to anticipate a violent disturbance near the end of the contractual period. Either the management of an air line will succeed in digging themselves in so firmly during the period of their first contract that they can rely on getting a renewal virtually on their own terms, which is plainly unfair to the government, or they will feel that they have no assurance of renewal and in that case will be under a strong temptation to avoid new capital expenditures and let everything deteriorate in the last years in order to get their investment out by attrition by the time the contract expires. We have found no evidence on America's foreign lines of any disturbing effect of the prospective expiration of the contracts yet having been manifest, but we suggest that the possibility should be foreseen and a better and more flexible arrangement be introduced before the present one winds itself up in accordance with its present terms.

There must be some assurance of reasonable stability in the relations between the government and the foreign airlines. On the other hand, the fixed-term contract has the dangers and involves the disturbances that we have discussed. We then recommend only that the commission [fol. 3093] regulating the financial affairs of air transport in its relations to the government should have the power to make certain definite commitments.

It might be desirable, for example, that if at a given time it appeared necessary to make grants of direct aid in the amount of $1.05 per mile over a route where two schedules were maintained every week the commission might give assurance, subject to the availability of appropriations, that the number of schedules would not be reduced without two or three years' notice and that the amount of aid given and the rate of mail payment would not be de-

creased by more than one-third or some other suitable fraction within a two- or three-year period. Rather than set a fixed term, which comes ultimately to an expiration, we suggest that it would be better to give the foreign lines a permanent assurance of reasonable notice of any change in their relations to the government which might fundamentally affect their ability to continue operation. They might then feel assured of having the substantial period provided by the notice to dispose of their equipment or otherwise to get their capital out if continued operation appeared impossible, and they would be justified in making an investment that they could not reasonably venture without some such guarantee.

The figure just mentioned in an illustrative example may seem startlingly high. It is of course necessary to make much larger direct payments on foreign lines than on domestic ones because of their necessity, already mentioned, of providing their own ground and navigational facilities. The present maximum of payment under the Foreign Air Mail Act is $2 per mile, of which some thirty or forty cents on the average may be considered as commercial payment for handling of the United States mails, while another like amount is returned to the Treasury by the line from its receipts for the carriage of foreign mail back to the United States. If the carriage of mail were put on a purely commercial basis, we would not anticipate that the additional sums given in direct aid ought ever to have to exceed $1.25 per mile flown with equipment now current. The introduction of aircraft of much larger capacity and consequently higher total operating costs might make further increases in that figure necessary on certain routes.

The total net outlay of this government on foreign air transport at present, above the fair commercial charge for carrying the mails, is approximately $5,000,000 per year. Though these services, like the domestic ones, are making a gradual progress towards a reduction of dependence upon governmental help, and though the present system could be maintained at a gradually diminishing net expense, we believe that the present total will need to be increased if American-operated routes are to be extended as we are convinced that they should be.

* Excluding Mexico.
** Not available.
[1] The part of the West only. That there is little aviation travel except via this port, however, is evidenced by the following comparison of civilian aviation travel to all areas except Canada and Mexico via the port of New York and via all ports, respectively: 1932, 68,173 and 68,973; 1933, 55.5% and 59.7%.
[2] Not shown separately. Included in Other West Indies.
[3] Excluding travel known solely destined to Mexico, part of which may be en route to other Latin American destinations.
[4] Approximate figure.
[5] In addition, there were recorded 15 persons designated as returning from overseas by air.

(Prior to July 1, 1941 (except for two months 1940) passenger traffic statistics reflected in this exhibit were compiled on the basis of flight coupons used to stop-over points or division junctions. The same trip of the same passenger may therefore be shown several times. Since July 1, 1941, passenger traffic statistics reflected in this exhibit have been compiled to show origin and destination on Pan American Airways, Inc. regardless of stop-overs.)

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 299

AVIATION CORPORATION OF THE AMERICAS

Minutes of Special Meeting of Executive Committee
February 27, 1930

"Mr. J. T. Trippe thereupon submitted to the meeting an outline of the terms and conditions of a certain contract relating to the acquisition by this Company of shares of the capital stock of the Corporation therein referred to, and at the consideration therein stated. After full discussion by the Committee, said contract was, upon motion, duly made, seconded and carried, approved."

Minutes of Regular Meeting of the Board of Directors
April 17, 1930.

"Mr. Trippe thereupon read a letter reciting the terms and conditions of the contract which had been unanimously approved by the Executive Committee at a special meeting held on February 27, 1930. Upon motion, duly made, seconded and carried such action of the Executive Committee was ratified, approved and adopted."

Minutes of Regular Meeting of Board of Directors
March 31, 1931

"Mr. J. T. Trippe, Vice-President of the Corporation, reminded the Board that, commencing in January, 1930, the officers of the Corporation had been engaged in negotiations with Dr. Peter P. von Bauer for the acquisition of in excess of 80% of the capital stock of the Sociedad Colombo-Alemana de Transportes Aereos, a Colombian corporation, commonly known and hereinafter referred to as Scadta; that on February 15, 1930, Mr. Trippe had executed on behalf of the Corporation a contract for this purpose with Dr. von Bauer; and that the execution of this contract had been unanimously approved by the Executive Committee at a meeting held on February 27, 1930, and had been approved and ratified at a meeting of the Board of Directors held on April 17, 1930.

"Mr. Trippe reported that on the occasion of Dr. von Bauer's visit to New York in January, 1931, he had executed on behalf of the Corporation two agreements with Dr. von Bauer dated respectively January 19, 1931 and January 30, 1931, both modifying the agreement dated February 15, 1930, in a sense favorable to the Corporation, and that, since Dr. von Bauer's return to Colombia, it had become necessary to execute another agreement postponing certain of the dates in connection with the closing fixed in the foregoing agreements; and that April 8, 1931 had been set as the date for such closing.

"Mr. Trippe then presented to the meeting copies of all the agreements referred to above, which he had executed on behalf of the Corporation, such agreements being dated, respectively, February 15, 1930, January 19, 1931, January 30, 1931, and March 20, 1931.

"Mr. Trippe explained that, according to cable advices from Colombia, the net effect of the foregoing agreements would be that, out of the total of 20,000 shares of the stock of Scadta outstanding, the Corporation would acquire a total of 16,884 shares, as follows:

[fol. 3108]

No. of Scadta Shares		Cash	No. A Shares
12,000	Von Bauer	$233,900	21,570
2,500	Scadta Employees	99,900	1,430
2,384	Public	111,489.37	
Totals 16,884		$445,289.37	23,000

"Mr. Trippe reminded the Board that, for some time prior to the negotiation of the above mentioned agreements, the operating companies of the Pan American Airways System had enjoyed the cooperation of Scadta, and that this cooperation had been of the utmost value in securing operating rights for Pan American Airways, Inc. on the north coast and for Pan American-Grace Airways, Inc. on the west coast of Colombia; that Scadta was the oldest

successful commercial air transportation company in the world, having been established in 1921; that throughout its operation it had made a remarkable record as to earnings; that it enjoyed to a marked degree the confidence and the cooperation of the Colombian Government and people; and that it operated its own air mail service in Colombia and between Colombia and certain adjacent countries, held long term air mail contract with the Colombian Government under which it enjoyed the right to sell its own stamps, as well as mail contracts with the governments of Panama, Ecuador and Venezuela, and had recently been recognized as the official Colombian air mail administrator. Mr. Trippe further stated that the initiation of operations in the interior of Colombia would consolidate the operations of the Pan American System in the northern part of South America, and that it was eminently desirable that such extension of operation should take place through the acquisition of an established company rather than through an attempt to inaugurate competition with a successful company already established. Mr. Trippe also stated that Mr. J. H. Johnston, the Comptroller of Pan American Airways Inc., who had recently examined the property and income accounts of Scadta, and Mr. A. A. Priester, the Chief Engineer of Pan American Airways, Inc., who had recently examined the equipment and property of Scadta had concluded that the net worth of Scadta as of December 31, 1929, was at least $1,400,000, and that operations during the year 1930 had resulted in a small profit after payment of dividends aggregating $48,000. Mr. Trippe further stated that the officers of the Corporation felt that, in connection with the proposed Colombian operations, it was important to have the benefit of the services of Dr. von Bauer, and that the report which he had heretofore made as to the long experience of Dr. von Bauer in Colombia and his good standing in Governmental circles had been confirmed by Messrs. Johnston and Priester, and by other persons familiar with conditions in Colombia.

"Mr. Trippe further stated that Mr. David E. Grant, of the law firm of Schuster & Feuille, had proceeded to Colombia to examine the validity of the organization of Scadta,

of its Governmental concessions and mail contracts and of the titles to its property, and had reported to the Corporation that, in his opinion, Scadta was a corporation duly organized and existing and in good standing under the laws of Colombia, that its Colombian concessions and air mail contracts were valid and contained no onerous conditions, and that, with certain possible exceptions, Scadta had good title to the various pieces of property reflected in the financial statements which Dr. von Bauer had delivered to the Corporation. Mr. Trippe also said that Mr. Grant had advised the Corporation that there was nothing in the organization papers of Scadta or in the laws of Colombia which would interfere with the complete control of Scadta by a person owning a majority of the capital stock.

[fol. 3109] "Mr. Trippe further stated that Messrs. Johnston and Priester had proceeded to Colombia to examine the books of account and the physical equipment of Scadta, and thus to determine the accuracy of the financial figures which Dr. von Bauer in the agreement of February 15, 1930, had warranted to be correct; that, in general, their report had been favorable, but that certain allowances for depreciation appeared to be inadequate and that liabilities amounting to some $70,000 had apparently been omitted from Dr. von Bauer's figures, although, on the other hand, independent appraisers had valued the land and buildings at Barranquilla at figures higher than those submitted by Dr. von Bauer. Mr. Trippe said that in view of these possible discrepancies and the difficulties in regard to certain titles of Scadta which Mr. Grant had pointed out, the officers of the Corporation might think it wise to demand that Dr. von Bauer consent to a reduction in the consideration to be received by him under the agreements or that part of such consideration be withheld until the difficulties in regard to titles had been removed.

"A general discussion of the agreements submitted then followed. Thereupon, on motion duly made and seconded, the following resolutions were unanimously adopted:

"RESOLVED, that the action of Mr. J. T. Trippe, Vice-President of this Corporation, in executing and deliv-

ering in the name and on behalf of this Corporation agreements between Aviation Corporation of the Americas and Dr. Peter P. von Bauer, dated respectively February 15, 1930, January 19, 1931, January 30, 1931 and March 20, 1931, copies of which have been submitted to the meeting, be and the same hereby is approved, ratified and confirmed as the act and deed of this Corporation; and

"RESOLVED, that the President and or the Vice-President of this Corporation be and they hereby are authorized and empowered in the name and on behalf of this Corporation, to take all such action as may be deemed appropriate in order that such agreements, with such modifications, if any, as such officers and or officer may, by their execution of the same, approve, may be performed by this Corporation.

"The Chairman suggested that formal resolutions be adopted with respect to the issuance of shares of the capital stock of the Corporation pursuant to the above agreements and such modifications thereof, if any, as might be agreed upon.

"Thereupon, on motion duly made and seconded, the following resolutions were unanimously adopted:

"RESOLVED, that upon delivery to this Corporation of shares of the capital stock of Sociedad Colombo Alemana de Transportes Aereos, a Colombian corporation, in accordance with the agreements dated February 15, 1930, January 19, 1931, January 30, 1931 and March 20, 1931, previously ratified at this meeting, and such agreement or agreements, if any, modifying the same as the President and or Vice-President may execute, the proper officers of this Corporation be and they hereby are authorized and directed to issue and deliver in exchange for such shares of capital stock the number of full paid and non-assessable shares of the capital stock of this Corporation without par value not in excess of 23,000, called for by such agreements; and

"RESOLVED, that the fair value of the shares of the capital stock of said Sociedad Colombo-Alemana de Transportes Aereos to be received by this Corporation [fol. 3110] as provided in said agreements is at least equal to the amount of cash to be paid by the Corporation and the value of the stock of this Corporation authorized by the foregoing resolution to be issued in exchange therefor; and

"RESOLVED, that The Chase National Bank of the City of New York, as Transfer Agent for the capital stock of this Corporation, be and it hereby is authorized and directed to record, countersign and deliver for registration to The New York Trust Company, as Registrar for the capital stock of this Corporation, and upon the redelivery thereof to it, to deliver to or upon the instruction of a proper officer of this Corporation certificates for a number of shares of the capital stock of this Corporation to be specified by said officer but not to exceed 23,000; and

"RESOLVED, that The New York Trust Company, as Registrar for the capital stock of this Corporation, be and it hereby is authorized and directed, upon receipt of such certificates from said The Chase National Bank of the City of New York, as Transfer Agent, to register and countersign such certificates and redeliver them to said Transfer Agent.

"The Chairman suggested that application be made for the listing on the New York Curb Exchange of the additional shares of the capital stock of this Corporation to be issued in connection with the agreements heretofore ratified by the meeting and or such modifications thereof, if any, as might be agreed upon.

"Thereupon, on motion duly made and seconded, the following resolutions were unanimously adopted:

"RESOLVED, that this Corporation make application to list on the New York Curb Exchange not in excess of 23,000 additional shares of the capital stock of this Corporation; and

"RESOLVED, that the proper officers of this Corporation be and they hereby are authorized and directed, for and in behalf of this Corporation, to appear before the Committee on Listing and Securities of the New York Curb Exchange, to submit such papers to such Committee, and to take any and all such action as such officers may deem necessary or appropriate in connection with such application.

"Mr. Trippe suggested that the officers of the Corporation be empowered to take all steps necessary to vote the shares of stock of Scadta acquired or to be acquired by the Corporation. He explained that the stock of Scadta was bearer stock; that stockholders desiring to vote their stock at a stockholders' meeting must prove their ownership at least two business days prior to such meeting; that such ownership might be proved by presentation of the shares themselves, by a certificate of deposit of such shares in a bank established in Colombia, or by a notarial instrument; that a stockholder, desiring to vote his stock by proxy might do so, but that the proxy, together with the stock certificates or proof of ownership thereof, must be exhibited to the company at least two days before the stockholders' meeting.

"Thereupon, on motion duly made and seconded, the following resolutions were unanimously adopted:

[fol. 3111] "RESOLVED, that the President or any Vice-President of this Corporation be and he hereby is authorized and empowered, in the name and on behalf of this Corporation, to take all such action as he may deem necessary or appropriate in order to exercise or cause to be exercised the voting power of this Corporation with respect to shares of the capital stock of Sociedad Colombo Alemana de Transportes Aereos, a Colombian corporation, acquired or to be acquired by this Corporation; and

"RESOLVED, that, without limiting the generality of the foregoing resolution, the President or any Vice-President of this Corporation be and he hereby is au-

thorized and empowered to cause certificates for any shares of the stock of said Sociedad Colombo Alemana de Transportes Aereos acquired or to be acquired by this Corporation, to be deposited in a bank established in Colombia, and or to execute any declarations before notaries public, consuls or other officers, and to sign any letters, proxies or other documents which he may deem necessary or appropriate in order to exercise the voting power of this Corporation with respect to such shares.

"Upon motion, duly made and seconded, the following resolution was adopted:

"RESOLVED, that the proper officer or officers be and they hereby are authorized to cause to be prepared a form of stock certificate of this Corporation, with a design of vignette, and with a distinctive engraved border, and with engraved type, and upon the completion of such form to submit the same to this Board of Directors for consideration.

"There being no further business, upon motion, duly made, seconded and carried, the meeting thereupon ADJOURNED

(S.d) H. Preston Moore
Secretary."

Minutes of Regular Meeting of Board of Directors
April 28, 1931

"Mr. Trippe thereupon reported to the meeting on the closing under the agreement between the Corporation and Dr. Peter von Bauer for the acquisition by this Corporation of certain Shares of the capital stock of Sociedad Colombia Alemana de Transportes Aereos (Scadta).

"Mr. Trippe also reported to the meeting on the proposed agreement between The Colombian Postal Administration for Air Mails and the United States Government relating to the exchange of international air mails."

Minutes of Special Meeting of Executive Committee
May 6, 1931

"Mr. Trippe reported on the following matters:

"(b) Progress made in negotiations for airmail contract between The Colombian Air Mail Administration and the United States Government."

[fol. 3112]

PAN AMERICAN-WORLD AIRWAYS, INC., EXHIBIT 300

Exhibit No. P-37

EXECUTIVE COMMITTEE
MARCH 16, 1937.

"The meeting thereupon took under consideration the matter of authorizing Pan American-Grace Airways to operate on Buenos Aires-Salta-Yacuiba route, including the report on negotiations between Pan American Airways and Pan American-Grace Airways."

EXECUTIVE COMMITTEE
APRIL 21, 1937.

"Mr. Trippe reported to the meeting on the position of Pan American Airways and W. R. Grace & Co. in Colombia, and the complications likely to arise in connection with SCADTA and Pan American-Grace operations, and on the current negotiations with representatives of W. R. Grace & Co. and discussions to date with such representatives. Mr. Trippe stated that he pointed out in such discussions that he felt there might be a material conflict in the future between SCADTA and Pan American Grace Airways if the officials of the Colombian Government should insist that SCADTA operate a commercial service to Quito, Ecuador, and that it is in the interest of American aviation and the United States Government, that American interests should hold an important position in SCADTA, and that this was particularly important because of the proximity of SCADTA operations in the Canal Zone; that Pan American Airways as a stockholder in SCADTA, was opposing this proposed extension to Quito, but that SCADTA might be

forced by pressure from the Colombian Government to make such extension of service, and that he felt the situation might be harmonized if Pan American Grace Airways became an equal owner with Pan American Airways of the stock of SCADTA; that Pan American had advised Pan American Grace Airways that if SCADTA should be required, against our desires as a stockholder, to operate a commercial service to Quito that we would agree to support SCADTA designating W. R. Grace & Co. as agent in Ecuador.

Mr. Trippe reported that representatives of W. R. Grace & Co. (Messrs. Roig and Gainer) at a meeting last week stated that they did not look with favor upon Pan American Grace Airways acquiring a 50% interest in SCADTA or (regardless of whether Pan American Grace Airways purchases such stock) serving as agent for SCADTA in Ecuador in the event Pan American Grace Airways operated a commercial service to Quito.

Upon motion, duly made, seconded and carried, the officers were authorized and directed to offer to Pan American Grace Airways up to 50% of this Company's holding of stock in SCADTA at cost to this Company or, at the option [fol. 3113] of W. R. Grace & Co. (as one-half owner of Pan American Grace Airways) at a price to be arbitrated, and to advise W. R. Grace & Co. in this event that we would be agreeable to have as arbitrators an arbitration panel of the New York Bar Association or the American Arbitration Society."

EXECUTIVE COMMITTEE
APRIL 27, 1937.

"The President thereupon reported to the meeting that a proposal had been submitted to the representatives of W. R. Grace & Co. on the Board of Directors of Pan American Grace Airways, for the sale to Pan American Grace Airways of one half of the holdings of Pan American Airways in SCADTA at cost or a price to be arbitrated, but that such proposal had been refused by such representatives.

The meeting considered the proposal of W. R. Grace & Co.'s representatives on the Board of Directors of Pan American Grace Airways that fees be paid the nominated Directors representing W. R. Grace & Co. and Pan American Airways on the Board of Directors of Pan American Grace Airways, and that more frequent scheduled meetings of the Board of Directors of Pan American Grace Airways be provided for. The Committee felt that it would be unwise to provide for fees and more frequent meetings, and that this point of view be made known to the representatives of W. R. Grace & Co., with the suggestion that if they did not agree thereto with the matter be referred back to this Committee at a future meeting.

BOARD OF DIRECTORS
MAY 7, 1927

"Mr. Trippe thereupon reported to the meeting on Congressional action relative to a second East Coast trip to Rio and additional services between Rio, Sao Paulo, Asuncion and Buenos Aires, and on the West Coast between Arequipa, La Paz, Salta, Cordova and Buenos Aires, and between Juneau and Whitehorse in Alaska.

The meeting granted authority to proceed with the organization of the Rio-Sao Paulo-Asuncion-Buenos Aires route by Pan American Airways, Inca and of the Belo Horizonte and Sao Paulo route by Panair do Brasil, S. A.".

[fol. 3114]

EXECUTIVE COMMITTEE
AUGUST 3, 1927.

"Mr. Trippe reported to the meeting on the following matters:

(a) Accident to Pan American Grace Airways' plane near the Canal Zone on August 2, 1927.".

"The President stated to the meeting that certain problems had arisen in connection with the ownership by the Corporation of a majority of the stock of Sociedad Colombo-Alemana de Transportes Aereos, a Colombian corporation,

commonly known as "Scadta". The Colombian government was anxious that Scadta should extend its services to points in Ecuador. Such an extension would result in competition between the services of Scadta and of Pan American Grace Airways, Inc. By continuing its control of Scadta the Corporation was thus being placed in a position where any action that it might cause Scadta to take or refrain from taking might be prejudicial either to the minority stockholders of Scadta or to the associate of the Corporation in the ownership of Pan American Grace Airways. The President stated that there were other circumstances that made it seem desirable that control of Scadta be placed ultimately in a group of native Colombians."

BOARD OF DIRECTORS
AUGUST 31, 1937.

"The President stated to the meeting that certain problems had arisen in connection with the ownership by the Corporation of a majority of the stock of Sociedad Colombo Alemana de Transportes Aereos, a Colombian corporation, commonly known as Scadta. The Colombian government was anxious that Scadta should extend its services to points in Ecuador. [Handwritten notation: 2-13-48 S]

PAN AMERICAN AIRWAYS, INC.
ACQUISITION OF PROPERTY AND CERTIFICATE OF URABA, MEDELLIN AND CENTRAL AIRWAYS, INC.

BRIEF HISTORY OF THE OWNERSHIP AND CONTROL OF UMCA BY PAN AMERICAN

UMCA (the abbreviation for Uraba, Medellin & Central Airways, Inc.) is a Delaware corporation which was organized by Pan American Airways Corporation and which has always been controlled by that corporation or by Pan American Airways, Inc., its subsidiary. UMCA was established as a separate corporate entity for the purpose of giving representation to a minority interest which arose out of the obtaining from the Colombian Government of the concession for the route which it has operated. That concession and the minority interest have now lapsed and accordingly there is no reason for UMCA's continued existence.

The following summary demonstrates that UMCA has always been primarily an instrumentality of Pan American.

A. *Reasons which Pan American organized UMCA.*

When Pan American commenced operations in Latin America, it had to obtain for itself the operating concessions needed for operation through each country. It experienced particular difficulties in securing concessions from the Republic of Colombia where the local airline, [fol. 3116] SCADTA, had a virtual monopoly. This was a serious obstacle to Pan American's further expansion since Colombia was too large to overfly with aircraft then available. One of the routes which Pan American was interested in was a route from the Canal Zone to Medellin and Bogota, both because of its immediate importance in the carriage of traffic into Colombia and because of its long range im-

portance as the first sector of a short cut route across the heart of South America to Rio and Buenos Aires.

A prominent Colombian citizen, Mr. Gonzalo Mejia, was also trying to obtain a concession from the Colombian government. His efforts began late in 1929 and were centered upon obtaining a Turbo-Medellin exclusive concession. A concession for the route was signed by the Minister of War and Telegraphs in September 1930 after Mr. Mejia had made assurances that the backing of American aviation interests would be secured in establishing and operating the route and this was expressly provided for in the concession. The concession was formally and finally approved by the Colombian Legislature after several weeks of debate in January 1931 (see Ex. 4 of Docket 28-401(B)-1).

Mr. Mejia commenced almost immediately thereafter discussions with Pan American looking toward implementation of the concession. After survey in May 1931 of the commercial and technical feasibility of establishing the route, Pan American decided that in view of the difficulty of securing other concessions from the Colombian Govern- [fol. 3117] ment the most practical approach was to assist Mr. Mejia to implement his concession.

Satisfactory arrangements could not be worked out with Mr. Mejia whereby Pan American could operate the route directly and it was decided to organize a separate corporation to be the assignee of the concession and to have the nominal responsibility for operating the route. Pan American organized CMCA, the name of which was suggested by Pan American's President Trippe, on August 24, 1931. The stock of CMCA was issued to Pan American and to Mr. Mejia, as more fully described in part B below. The Mejia concession was assigned to CMCA on September 10, 1931 and this assignment was approved by the Colombian Government under date of January 11, 1932 (see Ex. 4 in Docket 28-401(B)-1). It may be noted that in the instrument of approval issued by the Colombian Government, CMCA was described as a subsidiary of Pan American and Pan American's successful operating experience was relied upon as satisfying the requirements of the concession. It also recites that Pan American made the route surveys and

studies required to demonstrate the route's feasibility for commercial airline operation.

Operations under this concession were commenced by UMCA on July 12, 1932. Operations pursuant thereto were conducted for a period of 15 years thereafter and the concession expired on July 12, 1947 and was not renewed. Shortly thereafter, as more fully described below, Mr. Mejia disposed of all of his interests in UMCA to Pan American. Accordingly none of the reasons which prompted establish- [fol. 3118] ment of UMCA have any further significance.

B. *Ownership of UMCA stock.*

UMCA's Certificate of Incorporation provided for issuance of two classes of stock, Preferred Stock with a par value per share of $100, and Common Stock with no par value. There were issued 1,500 shares of Preferred Stock and 3,000 shares of Common Stock, with Pan American Airways Corporation acquiring all of the Preferred Stock and 1,500 shares of the Common Stock and the remaining 1,500 shares of Common Stock were issued to Mr. Mejia as consideration for assignment of the Colombian permit to UMCA. Since under the law of Delaware both the Preferred and Common Stock have equal voting rights, Pan American had from the outset two-thirds of the voting power and this was never relinquished.

Mr. Mejia subsequently transferred 500 shares of his Common Stock to a Colombian firm named Toro Hermanos which had assisted him in obtaining the concession. In 1934, Pan American acquired these 500 shares of stock from Toro Hermanos in exchange for 100 shares of Pan American stock. From 1934 until 1947 Pan American at all times owned all of the outstanding shares of Preferred Stock and 2,000 shares of the Common Stock of UMCA or 78% of the total voting power. The remaining 1,000 shares of Common Stock were at all times beneficially owned by Mr. Mejia but from Feb. 3, 1934 to Dec. 31, 1938 were under option to purchase by Pan American and were deposited in New York with an officer of Pan American, and even after expiration of the option the stock remained deposited with this officer.

[fol. 3119] On February 28, 1941 the shares of UMCA stock held by Pan American Airways Corporation were canceled and reissued in the name of Pan American Airways, Inc, after the necessary approval of the Civil Aeronautics Board had been secured for such transfer (*Pan American Airways, Inc., et al. Merger*, 2 CAB 502 (1940)).

On November 7, 1947 Pan American Airways, Inc. purchased the remaining 1,000 shares of Common Stock of UMCA owned by Mr. Mejia and since that date Pan American Airways, Inc. has been the sole and exclusive stockholder of UMCA.

C. *Directors of UMCA.*

As shown by the UMCA Certificate of Incorporation (Ex. 1 in Docket 28401 (E) 1), the original incorporators of UMCA were Evan E. Young, Alan F. Winslow and E. E. Wyman. All these gentlemen were officers or employees of Pan American.

The original Board of Directors consisted of J. H. Johnston, H. Preston-Morris, Alan F. Winslow, E. E. Wyman, Evan E. Young, and Mr. Mejia. All of these gentlemen were officers or employees of Pan American with the exception of Mr. Mejia. At all times the majority of the directors of UMCA have been officers or employees of Pan American and while between 1931 and 1939 there were Colombian nationals other than Mr. Mejia on the Board of Directors, they seldom, if ever, attended any of the directors' meetings and took no active part in the affairs of the corporation. Since 1939 all of the directors of UMCA, with the exception of Mr. Mejia, have been officers or employees of Pan American and with the resignation of Mr. Mejia from the UMCA Board of Directors, effective July 31, 1947, [fol. 3120] all seats have been held by Pan American.

D. *Officers of UMCA.*

The original officers of UMCA were Alan F. Winslow, President, H. Preston Morris, Secretary, J. S. Woodbridge, Treasurer, and Mr. Mejia, Vice President in Charge of Commercial Operations in Colombia. The President of

UMCA has always been an officer or employee of Pan American and all other officers of UMCA, with the exception of Mr. Mejia, have been officers or employees of Pan American. Furthermore, the scope of Mr. Mejia's powers and responsibilities was at all times restricted by the resolution adopted at the first directors' meeting which provided that Mr. Mejia was to concern himself only with the commercial operations of the company within the Republic of Colombia, it being understood that all other aspects of the company's business would at all times be handled by other officers representing Pan American's interest in UMCA.

E. *Flight equipment and crews of UMCA.*

Only initially did UMCA own and directly operate aircraft. It soon was found expedient for UMCA to obtain all flying equipment by charter from the pool of aircraft maintained for the Latin American services of Pan American Airways, Inc. Charters were on an hourly basis and none of the Pan American markings were removed or obliterated when in the service of UMCA. UMCA never had any facilities for the maintenance and overhaul of aircraft and planes were either maintained at Pan American's Canal Zone maintenance base or were rotated between the route of UMCA and the routes of Pan American so that they could be serviced at Pan American's Brownsville or Miami bases. [fol. 3121] Similarly, the flight crews who have operated the UMCA schedules have always been regular Pan American crews who initially worked the UMCA route on a loan basis and later on a rotational basis.

F. *Ground facilities.*

Pan American has always provided all ground facilities needed for the operation of UMCA in the Canal Zone and in Panama. During the early years UMCA operated its own facilities for aircraft dispatch, passenger handling, and sales at Medellin and Turbo. Pan American later arranged for a sharing of traffic, servicing, and communication facilities between UMCA and its affiliate Avianca at Medellin, while the Turbo station continued to be operated as an UMCA station with the limited amount of personnel

necessary carried on UMCA's payroll. Since June 3, 1941 Avianca has been responsible at Medellin for sale of all transportation over the lines of UMCA, receipt and dispatch of aircraft, cargo and passengers and related administrative matters.

G. *Employees of UMCA.*

The number of persons employed by UMCA has always been nominal since most functions of the company have been handled by Pan American or by its affiliated companies. This includes such matters as accounting, preparation, filing and publication of schedules and tariffs, engineering, communications and legal representation. Pan American has also assumed much of the administrative work and most matters relating to flight operations. All employees directly on the payroll of UMCA are regarded as employees of the Pan American Airways System and have [fol. 3122] the same privileges and benefits as other system employees.

H. *Pan American seeks transfer of a certificate which was in a large part initially its own.*

In the *Latin American Grandfather Certificate* case (2 CAB 111 (1940)), Pan American was issued a certificate of convenience and necessity to engage in air transportation between Cristobal and Turbo. Since this represented a duplication of the certificate which UMCA sought in its certificate proceeding (2 CAB 334), Pan American agreed to transfer its certificate to UMCA if the Board issued a Cristobal-Balboa-Turbo-Medellin certificate to UMCA, and this was done. If this corporate transfer to a subsidiary had not been made, Pan American would now hold directly about 60% of the route mileage which it seeks to recover in this proceeding.

[fol. 3123]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 302

Exhibit No. COX-24
CAB Docket No. 3500

STATEMENT OF NEGOTIATIONS RELATING TO AGREEMENTS BETWEEN NATIONAL, PAA, PANAGRA, AND W. R. GRACE & CO.

I. *Summer of 1948.*

During the summer of 1948 (probably in August) Mr. Baker of National had one or two talks with Mr. Trippe as to the acquisition by PAA of a substantial amount of the stock of National. It is Mr. Baker's recollection that he took the initiative in seeking out Mr. Trippe. Most of the discussion related to Pan American's acquiring sufficient National stock so that Pan American would own something like eighty percent (80%) of the stock of National. Along with this would come agreements for the operation of PAA and Panagra equipment over National's routes. There was a good deal of discussion as to whether payment for the National stock should be made in cash or in Pan American stock, and, if the latter, whether the Pan American stock should be taken at its book value, at its market value or at some intermediate figure. There was also question as to how the National stock should be valued. In general, Mr. Baker's position was that the National stock should be taken at its book value plus an allowance for certain assets which he believes to be undervalued on National's balance sheet, whereas the Pan American stock should be taken at or below its market value. Mr. Trippe, on the other hand, favored a book value basis for both sides. No conclusions were reached as a result of these discussions.

II. *December 1948 and January, 1949*

On December 15, 1948, Mr. Baker addressed a letter to Mr. Roig proposing an interchange of equipment between Panagra and National at Miami. (Exhibit NA-37, p. 1). A

[fol. 3124] copy of this letter was sent to Mr. Trippe. Similar letters were sent by Mr. Baker to several other airlines.

Mr. Roig discussed with the Pan American representatives on the Board of Panagra the response he proposed to make to Mr. Baker's letter to him. Mr. Roig's letter, dated January 6, is reproduced in Exhibit COX-20, p. 3. On January 5, Pan American made a response on its own account, referring Mr. Baker to the recommendation of the CAB Examiner that PAA be authorized to connect Miami with points in the Northeastern United States and emphasizing the Latin American points served by PAA itself through the Miami gateway for which through service was required.

Shortly after sending its letter of January 5, Pan American received Mr. Baker's telegram of that day reading:

"'Morrison tells me that you are willing to discuss possibility of interchange agreement.' When and where can we get together. Regards."

Mr. Trippe answered Mr. Baker's telegram as follows:

"Received your telegram after sending my letter January 5. Cannot believe that in view of our different routes radiating from Miami and other regions mere interchange agreement would in any way meet our problems. However, I am always glad to see you in New York for discussion any matters of mutual interest. Regards."

Mr. Baker's response to this telegram was a letter dated January 14, 1949, set forth in Exhibit COX-20, p. 6.

On January 17, 1949, Mr. Baker and Mr. Scott came to New York and met with Mr. Trippe at his home. This meeting was followed by two long conferences on the following day, January 18, one in the afternoon and another in the evening. Those conferences were attended by Messrs. Trippe, Dean, Friendly, Baker, Scott, Thomas and Fell. Mr. Thomas is a Director of National and both he and Mr. Fell [fol. 3125] are partners in Lehman Bros. which acted as underwriters in the public offering of National's stock. The

discussions included the operation of through and shuttle flights over National's route by Panagra and PAA equipment, and the purchase of a [illegible] stock interest in National by PAA.

PAA's general position was as follows:

1. The need for through service between the Northeastern United States and Latin America by way of the Miami gateway was not limited to the points on Panagra's route although it was clearly stated by PAA that any agreement must include an extension of the Panagra Through Flight Agreement, and that no agreement would be made by PAA without Panagra's consent), but included other areas in Latin America served by PAA. Such through service was required for the convenience of travelers and shippers, the development of traffic, and the meeting of foreign competition.

2. In addition to these through flights with Panagra and PAA equipment, PAA required, as a means of improving the economy of its operations, a facility for getting the planes based in New York to the Miami overhaul base without ferrying. This could not be done simply on international flights both because the number of such flights would not be sufficient (at least if Havana were excluded as a destination and particularly if the AOA acquisition was approved) and because the Boeing equipment was too large both trafficwise and airportwise for operation on certain of the Latin American routes through Miami.

3. The Miami New York operation [illegible] such a vital part of Pan American's business from both a traffic and an operation standpoint that it could not rely on a mere contractual arrangement with National. Pan American [illegible] fol. 3126] can felt it should have a sufficient interest in National so that its views with respect to management problems, while not controlling, would be given very great weight.

4. PAA insisted also that it was entitled to have weight given to its position in its Domestic Route Cases. Examiner Madden, the only disinterested person to review the question, had upheld PAA's position and had recommended that

PAA be certificated for operation over the New York-Miami route with a restriction confining such operation to flights "primarily providing international service." PAA took the position that in the long run it was not going to be blocked off at Miami from access to the true origin and destination of the bulk of the travel to Latin America and that if PAA was to make an agreement that would relieve National of PAA's competition between Miami and New York, it was fair that PAA should become a substantial owner in National. It emphasized also as a further reason for such stock participation that the Latin American traffic which would be handled by National under an interchange agreement would largely traffic which had been developed by PAA through its advertising and sales efforts, both in Latin America and in the United States and that PAA was entitled to profit therefrom.

National's position on these subjects was substantially as follows:

1. Mr. Baker questioned the volume of through traffic between the Northeast and Latin America moving through Miami, other than to points on Panagra's route. If there was enough such traffic, he would be willing to have through flights to handle it, but he was unwilling to make any commitment on the subject.

[fol. 3213] 2. Mr. Baker welcomed the idea of shuttle flights between New York and Miami with PAA equipment, notably the Boeings, during the high traffic season, but was unwilling to make any commitment with respect to the off-season.

3. Mr. Baker did not specifically oppose the acquisition by PAA of stock in National up to say 45% of the total stock. However, he insisted that the National stock should be appraised at book value plus an allowance for items which he believed would increase the book value, while, if payment was made in Pan American stock, this should be taken at market value with a discount in the approximate amount of the underwriting commissions which Pan American would have to pay on the sale of so large a block.

The meeting broke up in a friendly spirit, Mr. Trippe and Mr. Baker both proceeding to Washington to attend the Presidential inauguration ceremonies, but without any agreement having been reached. In the light of this, it was felt necessary to reply to Mr. Baker's letter of January 14, 1949, since it was believed that all these letters would go into the record in Docket 3500. This was done in a letter dated January 25, 1949, pointing out the volume of traffic between the Northeastern United States and points in Latin America other than those on Panagra's route.

On January 21, 1949, Mr. Trippe had lunch with Mr. Peter Grace and advised Mr. Grace of the negotiations which had been had with Mr. Baker. This talk and a simultaneous meeting which Mr. Roig had with Mr. Baker in Washington, in which Mr. Baker informed Mr. Roig of the National PAA Negotiations, led to a meeting on Wed-
[fol. 3128] nesday, January 26, 1949, between Messrs. Dean and Friendly on behalf of PAA and Messrs. Roig and Shea on behalf of W. R. Grace & Co. Mr. Roig began the meeting by stating that he felt that the delay in Pan American's Domestic Route Case arising from Docket 3500 called for the consideration of alternative methods of getting Panagra's through flight into New York. Dean and Friendly said that while they continued to believe that the acquisition of Miami-New York rights by PAA would be by far the most satisfactory method of solving PAA's and Panagra's problems, PAA likewise had recognized the desirability of exploring alternatives and, as Mr. Grace had been informed, had had talks with Baker which, if any progress had been made, would have been brought to Panagra for its consent. Mr. Roig approved the idea of negotiations with Baker but said he thought Panagra should have a seat at the table. Dean and Friendly said they could not see the merit of this position. Under the Through Flight Agreement, it was PAA's responsibility to do what it could to get the right to fly to New York. Once PAA had gotten such a route, Panagra would have had the right to have its airplanes flown over this route, but the entire financial interest in the rout was to be that of PAA and not of Panagra. If developments had made it desirable to explore alternative

arrangements for getting the right to operate between Miami and New York, which Mr. Roig agreed was the case. PAA's obligation was to see that Panagra was protected to the same extent as Panagra would have been had PAA gotten the route in its own name, but there was no obligation to allow Panagra or Grace any ownership interest in respect of the route. Dean and Friendly assured Roig and Shea that in any future negotiations between PAA and Baker, they would continue to insist on the operation of Panagra's aircraft between Miami and New York being provided for, [fol. 3129] and also that PAA would not enter into any such arrangement with National except after fully advising Panagra and making sure that Panagra was satisfied, but they were unwilling to go beyond this.

On January 24 Mr. Trippe was in telephone contact with Mr. Baker and, with Mr. Baker's permission, with Mr. Scott. These telephone conversations led to Mr. Scott's letter of January 24, 1949 stating that he would recommend to the Board of Directors of National an arrangement under which Pan American would acquire 174,000 shares of National stock for cash at $5.50 a share or a price equivalent to 90% of the average daily closing price of National stock from January 1, 1948 to the day preceding the date of delivery and payment, whichever was greater. National would also agree to sell additional stock to PAA sufficient so that PAA would own 45% of the total outstanding stock. In the case of this latter sale, the National stock was to be taken at book value plus upward adjustments and payment was to be made in cash or in PAA stock at 90% of its market value for 60 days prior to the date of delivery. This memorandum also called for interchange agreements "where the same shall be mutually advantageous," these to include Panagra, the leasing of flight equipment "where the same shall be mutually advantageous," and joint use of facilities "where the same shall be mutually advantageous." Mr. Trippe phoned Mr. Scott that this memorandum seemed to be a considerable advance toward an agreement and this, in turn appears to have led to Mr. Baker's wire of January 26:

"Talked with Scott. Suggest you forward memorandum of your proposal for discussion with our Directors Monday."

Shortly after this Mr. Baker and Mr. Scott arrived in New York. During the morning of January 27 they met (fol. 3130) with Messrs. Grace, Roig and Shea. Baker outlined the course of the negotiations with PAA and stated he believed it would be advisable for Panagra or Grace to have a stock interest in National. He felt that a financial interest on the part of all companies to the proposed interchange was essential to make the interchange work effectively. Grace, Roig and Shea agreed that such financial participation was desirable and various proposals were discussed.

Mr. Baker and Mr. Scott met with Messrs. Trippe, Dean and Friendly on the afternoon of the same day. They stated that they had come from a meeting with W. R. Grace and Co. and indicated that they were no longer willing to go forward on the basis outlined in Mr. Scott's memorandum of January 24. Their proposal was that some 48% of National stock should be acquired but that this should be divided approximately half to Pan American and half to Panagra, or in the alternative, somewhat more than half to PAA and somewhat less than half to W. R. Grace & Co. The PAA representatives said that this represented a complete change in the proposal, that they had no objection to W. R. Grace & Co. acquiring stock in National if such was desired, but that this should be over and above the 45% which it had been agreed PAA should have.

Late in the afternoon of January 27, Mr. Grace and Mr. Roig met with Messrs. Trippe, Dean and Friendly, who expressed the same view to them. The PAA representatives suggested that W. R. Grace & Co. acquire some 10% of National's stock, this to be outside the PAA 45%, but no understanding was reached. Trippe and Dean paid a brief visit to Baker and Scott at their hotel after this meeting.

Messrs. Trippe, Dean and Friendly met again with Messrs. Baker and Scott for lunch on the following day.

[fol. 3131] January 28. Baker declined to negotiate on the basis of PAA's acquiring a 45% stock interest and reverted to the formula of 48% with half going to Panagra or a small portion going to Grace. There was also more discussion about market price, book value, etc. The meeting broke up without any solution having been reached.

This was followed by more letters, namely, Mr. Baker's of February 10, Mr. Dean's of February 15, Mr. Baker's of February 24 and Mr. Dean's of February 28, as set forth in Exhibit No. COX-20, pages 9 through 12.

W. R. Grace & Co. were advised by both Mr. Baker and Mr. Friendly that the negotiations between PAA and National had broken off. In view of the importance which W. R. Grace & Co. attached to the development of an interchange for Panagra, the idea was developed that Grace might obtain an offer from National which would cover not only a stock interest for Grace and PAA, but also interchange agreements.

As a result of this decision by W. R. Grace & Co., a conference was arranged with Messrs. Baker and Scott who were in New York during the week of February 14. Several meeting were held, attended by Messrs. Baker, Scott, Roig and Shea. Considerable progress was made during these discussions which were aimed at reaching an understanding which could be presented to Pan American. No agreement was reached, however, and Messrs. Roig, Grace and Shea went to Miami on February 26 for a continuation of the talks. Following three days of negotiations, the National proposal of February 28 (Exhibit NAL-98) was developed.

This proposal was considered by the Directors of W. R. Grace & Co. and the decision reached to accept the stock purchase.

[fol. 3132] III. *March, 1949*

On March 2 the offer of stock of National was accepted by W. R. Grace & Co. (Exhibit No. COX-20, p. 22).

On the same day, Mr. Peter Grace called on Mr. Trippe and advised him of the execution of the agreement of Febru-

ary 28, 1949 between W. R. Grace & Co. and National, and of Grace's exercise of its option to purchase 174,000 shares of National's stock at $5.50 per share. The other terms of the agreement of February 28 were discussed briefly, and Mr. Trippe then stated to Mr. Grace that PAA would have to consider the situation thus created in the light of its own interests and the obligations of PAA and Grace under the Through Flight Agreement.

PAA decided that, before coming to any conclusion whether to endeavor to secure a modification of the February 28 agreement that would make this more acceptable from PAA's standpoint, the possibilities of an arrangement with Eastern should be fully explored and negotiations to that end were instituted.

Meanwhile, the month of March was passing. When PAA allowed the March 10 deadline to pass without taking any action, the Grace representatives indicated they would insist on the matter being considered by the Panagra Board prior to the Panagra deadline of March 30. A meeting was held about March 23 between Messrs. Dean, Friendly, Roig and Shea to discuss the matter. Dean and Friendly inquired, without committment, whether there would be any interest on the part of National and Grace in [illegible] 28 agreement in the following particulars:

1. The ratio of PAA's stock to Grace's stock should be 30-18, instead of 24-24;

2. PAA would have the right to acquire not merely the [fol. 3153] higher priced stock as provided in the February 28 agreement, but 30-48ths of the 174,000 shares which Grace had bought at $5.50.

3. The PAA-National interchange agreement should include, in addition to a through flight proceeding over one of PAA's international routes, twice daily shuttle flights between New York and Miami.

4. The term of the interchange agreements should be reduced from the 99 years provided in the Grace-National Agreement to July 1, 1953, subject to extension for seven

years, in the case of the PAA agreement if PAA exercised its option to purchase National stock, and in the case of the Panagra agreement if both PAA and Grace exercised their options. These options were to continue to July 1, 1953.

5. PAA was to have the right to pay for its optioned National stock in PAA stock at market value.

Mr. Roig characterized this as a constructive proposal and said they would talk about it with their associates and with National. Shortly after this, Messrs. Shea and Grace departed for Miami to negotiate with National. Commencing with the latter part of the week, there was a good deal of proposing and counter proposing as to various points.

A Directors' meeting of Panagra had been called for Tuesday, March 29. The parties were still apart on certain matters, such as who should have the right to determine whether Panagra would extend its interchange agreement, the length of the options, and National's demand that Pan American stock taken in payment for National stock should be valued 10% below market. However, after discussions on March 29 there appeared to be sufficient hope of reaching an agreement so that instead of holding the Directors' meeting, Trippe, Dean, Grace, Roig and Shea proceeded [fol. 3134] to Washington to meet with Baker, Cross, Friendly and Gesell. As a result of further negotiations, an agreement was signed early in the morning of March 30.

Subsequent to the execution of the March 30 agreement, counsel for the various parties set about the preparation of the detailed agreements to carry this out. A number of points of difficulty arose, such as the hours when schedules should be operated, the extent to which PAA and Panagra had the right to "put" schedules to National, the mechanics for making PAA stock available as payment of the purchase price in the event of the exercise of its option in a manner consistent with the provisions of the Securities Act, etc. After various meetings in New York, it was decided that the best way in which to bring matters to a conclusion was to have a general meeting in Miami. Accordingly, Messrs. Grace, Shea, Hayes, MacElwain, Dean and Friendly went to Miami early in May to meet with Messrs. Baker, Scott,

Cross and others representing National. As a result of three days work between May 5 and 7, substantially final drafts were prepared. These were taken to New York for printing and were executed on May 11.

UNITED STATES OF AMERICA
CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

At a session of the Civil Aeronautics Board
held at its office in Washington, D. C.
on the 5th day of June, 1945

Agreement C.A.B. No. 389

In the Matter of an agreement filed under section 412(a) of the Act by and between

A. B. AEROTRANSPORT and certain other foreign air carriers named therein

and

AMERICAN AIRLINES, INC., AMERICAN EXPORT AIRLINES, INC., BRANIFF AIRWAYS, INC., COLONIAL AIRLINES, INC., NORTHEAST AIRLINES, INC., NORTHWEST AIRLINES, INC., PAN AMERICAN AIRWAYS, INC., PAN AMERICAN-GRACE AIRWAYS, INC., TRANSCONTINENTAL & WESTERN AIR LINES, INC., UNITED AIR LINES, INC., WESTERN AIR LINES, INC., as active members

and

AEROVIAS PARAGUAYAS, S. A., and certain other foreign carriers named therein

and

ALL AMERICAN AVIATION, INC., DELTA AIR CORPORATION, EASTERN AIR LINES, INC., NATIONAL AIRLINES, INC., PENNSYLVANIA-CENTRAL AIRLINES CORPORATION as associate members,

relating to the Articles of Association of The International Air Transport Association (IATA) adopted at Havana, Cuba, April 19, 1945.

ORDER APPROVING AGREEMENT

Upon consideration of Agreement C.A.B. No. 38[illegible] between the above named carriers, filed pursuant to section 412(a) of the Act; and

The Board finding that said agreement is not adverse to the public interest or in violation of the Act:

[fol. 3136] IT IS ORDERED That said agreement be and the same is approved: *PROVIDED, That* the approval of the Board herein of the Articles of Association of the International Air Transport Association shall not be construed to constitute Board approval or disapproval of any subsequent contract entered into, or any specific action taken pursuant to said Articles of Association: *PROVIDED FURTHER, That* this approval shall not be effective as to any United States air carrier party thereto, and named therein, until such air carrier has accepted the Articles of Association and filed concurrence therein with the Board as required by Section 251.4 of the Economic Regulations.

UNITED STATES OF AMERICA
CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

At a session of the Civil Aeronautics Board held at its office in Washington, D. C. on the 19th day of February, 1946.

Agreement C.A.B. No. 493

In the Matter of an Agreement Filed Under Section 412(a) of the Act by and among

AMERICAN OVERSEAS AIRLINES, INC., TRANSCONTINENTAL & WESTERN AIR, INC. and certain other air carriers and foreign air carriers named therein,

relating to the establishment and conduct of regional traffic conferences of the International Air Transport Association.

ORDER APPROVING AGREEMENT

There having been filed with the Board pursuant to section 412 of the Civil Aeronautics Act of 1938, as amended, by American Overseas Airlines, Inc., and Transcontinental & Western Air, Inc., a resolution of the International Air Transport Association entitled "Provisions for the Regulation and Conduct of Traffic Conferences of the International Air Transport Association," adopted by unanimous vote of the members of the International Air Transport Association present at a meeting on October 18, 1945, and the filing of such resolution having been concurred in by American Airlines, Inc.; Braniff Airways, Inc.; Colonial Airlines, Inc.; Northeast Airlines, Inc.; Northwest Airlines, Inc.; Pan American Airways, Inc.; Pan American-Grace Air-

[fol. 3138] ways, Inc.; United Airlines, Inc.; and Western Air Lines, Inc.; and

The Board having, after consideration of the said Agreement and after hearing oral argument with respect thereto, issued its opinion containing its findings, conclusion and decision which is attached hereto and made a part hereof;

IT IS ORDERED That Agreement C.A.B. No. 493 be and it hereby is approved from the date hereof to and including February 28, 1947; *Provided*, however, that such approval is upon the following express conditions: (1) That it shall not constitute approval or disapproval of any action taken or agreement reached hereafter by any of the traffic conferences created and acting pursuant to said Agreement; (2) That it shall not constitute approval of participation by any United States air carrier in any traffic conference which reaches an agreement fixing rate or rates which are put into effect by such air carrier prior to submission to and approval by the Civil Aeronautics Board of such agreement; (3) That no agreement fixing a rate or rates for periods extending beyond the period of approval of Agreement C.A.B. No. 493 will be approved by the Board.

and

CERTAIN OTHER AIR CARRIERS AND
FOREIGN AIR CARRIERS

relating to the establishment and conduct of Regional Traffic Conferences of the International Air Transport Association (IATA)

ORDER AMENDING ORDERS APPROVING AGREEMENT

The Board, by Order Serial No. 4525, dated February 19, 1946, having approved for a temporary period to and including February 28, 1947, subject to certain conditions set forth therein, an agreement by and among American Overseas Airlines, Inc. and certain other air carriers and foreign air carriers, as evidenced by Agreement C.A.B. No. 493, providing for the establishment and conduct of Regional Traffic Conferences of the International Air Transport Association (IATA); and

The Board, by Order Serial No. E-269, dated January 31, 1947, having extended its approval of Agreement C.A.B. No. 493 for a period of one year from and after February 1947, to and including February 28, 1948, subject to certain conditions as set forth therein; and

[fol. 3140] There having been filed with the Board a resolution of the Eighth Meeting of the Executive Committee of IATA, adopting revised rules for the regulation and conduct of the Traffic Conferences of IATA, evidenced by Agreement C.A.B. No. 1175, and the Board by Order Serial No. E-706, dated July 21, 1947, having approved Agreement C.A.B. No. 1175 from such date to and including February 28, 1948, subject to the conditions set forth therein, except that portion of Part IV of said agreement which contemplated that Traffic Conferences of IATA should make recommendations as to rates for the carriage of mail by foreign air carriers; and

The Board, upon reconsideration of Agreement C.A.B. No. 493, as revised by Agreement C.A.B. No. 1175, having issued its opinion containing its findings, conclusions and decision on such reconsideration which is attached hereto and made a part hereof; and

The Board, not finding that extension of its approval of Agreement C.A.B. No. 493, as revised by Agreement C.A.B. No. 1175, except such portion of Part IV thereof enumerated above, for a period not extending beyond February 28, 1950 would be adverse to the public interest or in violation of the Act;

IT IS ORDERED THAT:

1. Agreement C.A.B. No. 493, as revised by Agreement C.A.B. No. 1175, except that portion of Part IV thereof, enumerated above, be and it hereby is approved for a period not to extend beyond February 28, 1950;

2. The approval granted herein is on the following conditions:

(a) Such approval shall not constitute approval or disapproval of any action or agreement reached hereafter by any of the Traffic Conferences created and acting pursuant to said agreement;

[fol. 3141] (b) No agreement fixing a rate or rates for periods extending for more than one year or beyond the period of approval of Agreement C.A.B. No. 1175 will be approved by the Board;

(c) Such approval shall not constitute approval of the participation of any United States air carrier in any agreement establishing any rate or rates which shall be quoted or charged any nation for the transportation of mail.

By the Civil Aeronautics Board:

/s/ M. C. MULLIGAN
M. C. Mulligan
Secretary

(SEAL)

[fol. 3142]

OPINION

BY THE BOARD:

On February 19, 1946, the Board approved, for a temporary period ended February 28, 1947, an agreement among certain air carriers and foreign air carriers relating to the establishment and conduct of regional traffic conferences of the International Air Transport Association

(IATA).[1] On January 31, 1947, the approval of this agreement was extended for an additional period ending February 28, 1948. Subsequently, a new agreement (C.A.B. No. 1175) was filed with the Board which effected certain changes in the organization of the traffic conferences and this agreement was also approved for a temporary period to and including February 28, 1948. We are now called upon to consider, under Section 412 of the Act, the extension of approval of Agreement C.A.B. No. 1175 beyond the latter date.[2]

During the past two years, the various traffic conferences of IATA have held twenty-three meetings and adopted several hundred resolutions which cover a wide range of matters, including rates, terms and conditions of carriage, reservations and booking procedures, relations between carriers and agents, and other cooperative working arrangements for the handling of traffic. In the non-rate field, [fol. 3143] the great majority of the resolutions so far considered by us reflect favorably upon IATA which has, in a relatively short time, succeeded in establishing procedures which will not only reduce operating problems of the individual carriers but which will directly benefit the public by facilitating the international movement of passengers and cargo. There appears to be no more effective way by which these desirable objectives could be accomplished than through the machinery of an organization such as IATA.

The principal issue in our consideration of the extension of the traffic conference machinery concerns, however, the

---

[1] *Agreement C.A.B. 1[illegible], IATA Traffic Conferences Resolution 6*, C.A.B. 639. These conferences provide the machinery for consultation and agreement between United States air carriers and those of other nations with respect to rate and traffic matters in international air transportation.

[2] Order Serial No. E-269.

[3] Order Serial No. E-706.

[4] Under Section 412, the Board is required to disapprove any agreement filed thereunder which is found to be adverse to the public interest or in violation of the Act. To the extent that the Board approves an agreement, Section 414 of the Act relieves the parties from liability under the anti-trust laws of the United States.

conferees' rate-making processes, particularly the character of economic data relied upon to support the individual rate resolutions concluded by them. In its initial approval of the conference method of rate-making, the Board set forth its understanding of the manner in which the individual Conferences would operate. Among other things it was pointed out that the Board's approval assumed "that after conference procedures have been complied with an open rate may, and indeed should, exist if the rate proposals advanced at any conference are unreasonable or economically unsound and are not properly related to the reasonably attainable costs of the air carriers."

The Board later disapproved rate resolutions of the first North Atlantic Traffic Conference, because of its failure to relate the rates specified therein to costs of operation, and stated its intention to require evidence that the Conference had acted in accordance with the basic tenets previously laid down. On this occasion we suggested that "it will be of great value if the Conference, in reaching rate agreements hereafter, will make a record of the data con- [fol. 3144] sidered by it and of the considerations which resulted in its conclusion that the rates fixed by it meet the required standards of economic soundness, and will make that record available to the Board, and to the appropriate aeronautical agencies of other nations which may undertake to review the Conference action on rates."

Two years have elapsed since the initial Board approval of participation by United States carriers in rate-making by the Conference agreement method. On a number of occasions during these two years, Conference rate resolutions have been submitted to the Board for its approval. The Board, however, is without advice that IATA has yet established measures for obtaining and transmitting to the Board, either directly or through the United States members of IATA, data in support of the rate resolutions which can be regarded as satisfactory evidence of their economic

---

Agreements C.A.B. Nos. 541, 556, and 585 to 602, inclusive. Resolutions of North Atlantic Traffic Conference Relating to Rates and General Conditions of Carriage, 6 C.A.B. 845.

soundness, or that such data have been given adequate consideration by IATA in its rate determinations.

The Board is not insensitive to the organizational difficulties associated with the assembly of such data by IATA and by those IATA members whose international operations are in an early developmental stage. The Board has not yet, however, received information on the operating revenues, expenses, or traffic experienced by any except the United States parties to the IATA resolutions submitted to it for approval.

The minimum character of information the Board deems necessary to discharge its statutory obligations in connection with IATA rate resolutions is that which IATA members are already committed to furnish to the International Civil Aviation Organization, as provided for by the Air Transport Statistical Reporting Forms of that organiza [fol. 3145] tion, specifically, Table T2 (Traffic Summary) and Table P2 (Operating Statement). The Board will regard as reasonable cause for prompt disapproval of rate resolutions the failure to support such resolutions with this minimum of information covering the operations of the principal carrier participants in the rates included in the resolutions, for not less than the most current half year preceding the adoption of the resolutions. It is our opinion that neither the members of IATA nor the reviewing agencies of their respective governments can adequately appraise the economic soundness of rate resolutions except upon consideration of such minimum data.

While the development of cost data has so far not been satisfactory, we recognize, as above indicated, the difficulties which have attended the efforts of IATA and its members to obtain more adequate data during the past experimental period. We understand, too, that IATA is making serious efforts to effect improvements in this respect. For these reasons, and in view of the significant accomplishments of the traffic conferences in respect to non-rate matters, we will approve the continuance of the conference machinery for an additional trial period not to exceed two years, which period should afford ample opportunity for a more definite

evaluation of the conference method of rate making than is possible on the basis of present experience. As pointed out in our initial approval of the IATA Traffic Conference machinery, however, we shall not approve any rate agreement hereafter submitted to us which does not include provision for termination within a reasonable time. Accordingly, we shall not approve an agreement fixing a rate or rates for periods extending for more than one year or beyond the period of approval of Agreement CAB No. 1175.

[fol. 3146] We do not find that an extension of our prior approval of Agreement CAB 1175 will be adverse to the public interest or in violation of the Act, and the agreement will, therefore, be approved for a period not to exceed two years from and after February 28, 1948. This approval will be subject to the conditions that it shall not constitute approval or disapproval of any action taken, or agreement reached, by any of the traffic conferences created and acting pursuant to said agreement, that no agreement fixing a rate or rates for periods extending for more than one year or beyond the period of approval of Agreement CAB No. 1175 will be approved by the Board, and that such approval shall not constitute approval of the participation of any United States air carrier in any agreement fixing a rate or rates which shall be quoted or charged any nation for the transportation of mail.

An appropriate order will be entered.

Ryan, Acting Chairman, Branch and Lee, Members of the Board, concurred in the above opinion.

[fol. 3147]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 306

Order No. E 9305

UNITED STATES OF AMERICA
CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

Adopted by the Civil Aeronautics Board
at its office in Washington, D.C.
on the 15th day of June, 1955

Agreement CAB No. 1175, as amended

In the matter of an extension of approval of an agreement filed pursuant to section 412(a) of the Civil Aeronautics Act of 1938, as amended, between

PAN AMERICAN WORLD AIRWAYS, INC.

and

CERTAIN OTHER AIR CARRIERS
FOREIGN AIR CARRIERS AND OTHER CARRIERS

relating to the Regulation and Conduct of the Regional Traffic Conferences of the International Air Transport Association (IATA)

ORDER

The Board, by Order No. 4525, dated February 19, 1946 approved until February 28, 1947, subject to certain conditions, an agreement (CAB No. 493) between various air carriers and foreign air carriers providing for the establishment, regulation and conduct of Regional Traffic Conferences of IATA. This agreement was later revised (CAB No. 1175) and subsequently approved by the Board in 1947, 1948 and 1952 for varying periods ending June 30, 1955.

The Board, upon reconsideration of the resolution, finds:

1. That extension of its approval beyond June 30, 1955 would not be adverse to the public interest or in violation of the Civil Aeronautics Act;

2. That a continuation of the conditions to approval of the IATA machinery as set forth in Order No. E-6390 of May 1, 1952, as amended by Orders Nos. E-7407 of May 25, 1953 and E-8023 of January 7, 1954 is necessary to the exercise of the Board's responsibilities; and

3. That the review of future filings of IATA resolutions will be facilitated by the inclusion in this order of certain general conditions normally inserted in each individual order issued on conference resolutions;

Accordingly, IT IS ORDERED THAT Agreement CAB No. 1175, as amended, be and it hereby is approved beginning July 1, 1955, subject to the following conditions:

[fol. 3148] 1. That the air carriers members cause all documentary materials distributed by IATA or any subgroup thereof, to the members of IATA or any such subgroup, to be transmitted to the Board at the time such material is distributed to said members; provided that the Board may waive this requirement as to any such documentary material for such period as it deems proper;

2. That such approval shall not constitute approval of any agreement, action, or recommended practice of any of the traffic conferences created by and acting pursuant to the agreement;

3. That the air carrier members submit to the Board for appropriate action all recommended practices, agreements, and resolutions adopted by IATA and each of its conferences;

4. That such approval shall not constitute approval of participation of any United States air carrier in any traffic conference which reaches an agreement fixing rates, fares, or charges that are put into effect by such air carrier prior to submission to and approval by the Civil Aeronautics Board of each agreement;

5. That no agreement fixing rates, fares, or charges for periods longer than one year will be approved by the Board;

6. That such approval shall not constitute approval of the participation of any United States air carrier in any agreement establishing rates or charges which shall be quoted or charged any nation for the transportation of mail;

7. That with respect to the provisions of Section XII of the agreement entitled "Breaches of Conference Action":

(a) the United States carrier members of IATA shall notify the Board of any fine or penalty assessed against them, with a brief statement of the reasons therefor.

(b) each United States carrier member of IATA shall authorize and instruct the Director General to furnish to the Board, upon request, a record of the fines or penalties assessed against it under IATA enforcement procedures.

(c) the United States carrier members of IATA shall furnish the Board with a copy of the summary of cases heard, as mentioned in Paragraph 13 of the above-mentioned Section.

8. That approval of any agreement embodied in a resolution adopted by IATA or any of its Traffic Conferences pursuant to the conference machinery approved hereby shall be subject to the following general conditions:

[fol. 3149] (a) Approval of any resolution shall not be deemed approval of the application to such resolution of any other resolution except to the extent permitted by any approval of such other resolution;

(b) Approval of any effectiveness resolution is limited to the extent that it provides effective dates for other approved resolutions;

(c) Approval of any resolution shall be subject to the condition that air carrier members of IATA file with the Board, 5 days from the date the notices are received or sent, copies of all notices rescinding or amending any of the provisions or modifying the period of effectiveness of any resolution under the provisions of any resolution or

portion thereof which permits such rescission, amendment, or modification;

(d) Approval of any amending or revalidating resolution shall not affect the applicability of any condition previously appended to the approval of the resolution being amended or revalidated;

(e) Nothing in an order approving a resolution shall be construed as waiving any provision of the Board's Economic Regulations relating to the construction, publication and filing of tariffs, unless expressly so provided;

(f) Approval of any fare by an order approving a resolution is given on the understanding that the fare so approved is a minimum and does not include the assumption of so-called passenger expenses at connecting points, except insofar as it is permitted under the terms of a valid resolution providing for such assumption of said passenger expenses.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 307

[Stamp—Library—Apr. 9 1959—Pan American World Airways]

Order No. E-13631

UNITED STATES OF AMERICA
CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

Adopted by the Civil Aeronautics Board
at its office in Washington, D. C.
on the 19th day of March, 1959

Docket No. 10002
Agreement C.A.B. No. 12883,
R-1, R-3 through R-40

In the matter of an agreement adopted by the Traffic Conferences of the International Air Transport Association relating to fares

---

ORDER

There has been filed with the Board, pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations, an agreement between various air carriers, foreign air carriers, and other carriers, embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA), adopted at the reconvened meetings held in Paris, France, during February 1959. The agreement has been assigned the above-designated C.A.B. Agreement number.

The agreement relates to basic fares and a limited number of special fares to be applicable for the year beginning April 1, 1959, in all areas other than transpacific routes and within the Far East where agreement had previously been reached at the Cannes meetings held during September-October 1958. Insofar as transportation to and from the

United States is concerned, increases in North Atlantic fares amounting to $5, one-way, in the base New York-London fares for economy, tourist, and first-class services and $15 in fares for deluxe class service are proposed, with corresponding increases on the Mid Atlantic route. First-class and tourist-class fares between the United States and points in the Caribbean and South America are maintained as currently effective.

The agreement further provides that jet services on the North and Mid-Atlantic routes, and between certain specified points within the Western Hemisphere will be assessed a surcharge. On the transatlantic routes the proposed charge is $15, one-way, on economy and tourist-class services, $20 on first and deluxe-class services. Within the Western Hemisphere the surcharge is limited to the New York-Port of Spain-Caracas-Rio de Janeiro-Buenos Aires route, where it is expected that jet aircraft will be introduced during the period in question, and amounts to $10, one way, except between New York, on the one hand, and Rio de Janeiro and Buenos Aires, on the other hand, where the charge is $20. In both cases, the resolutions in question provide that, upon notice given by any carrier involved between September 1, 1959, and February 1, 1960, the surcharge will be inapplicable after February 29, 1960, one month prior to the intended expiration date of the basic fares.

In view of the fact that the agreement is to be effective for a limited period, a year in which the major transition to jet operations should be accomplished, the present un-
[fol.3151] certainty as to the impact which jet services will have upon the industry, and the amounts of the proposed surcharges in relation to the basic fares to which they apply, the Board concludes that approval of the agreement would be consistent with the public interest. As we have previously pointed out, the Board presently has under study the entire question of pricing jet services. Accordingly, our action herein does not represent a final determination with respect to jet fares.

The Board would like to state once again its conviction that the future development of international air transporta-

tion will depend, in the last analysis, upon adequate availability of service priced at the lowest level economically feasible. This is particularly true with respect to the North Atlantic with its large tourist travel potential. To the extent that jet services prove themselves to be more efficient than operations with piston aircraft, as they show every likelihood of doing, we shall expect that the cost advantage accruing to the carriers be passed along to the passenger through reductions in fares, to the ultimate and mutual benefit of both the traveling public and the carriers.

The Board, acting pursuant to sections 102, 204(a), 412, and 414 of the Act, and subject to the general conditions set forth in Order No. E-9305, dated June 15, 1955, as amended by Orders Nos. E-10992 and E-12304, dated January 31, 1957, and March 31, 1958, respectively, makes the following findings:

1. The Board finds that the following resolutions do not affect air transportation within the meaning of the Act:

CAB No.	IATA No.	Title	Application
R-3	002b	Special TC2 Revalidation Resolution	2
R-4	003	Special TC2 Rescission Resolution	2
R-25	084b	Creative Fares	2
R-26	084f	Creative Fares, Persian Gulf India and Ceylon	2/3
R-27	084g	Creative Fares Board Europe (expedited)	2
R-28	084g	Creative Fares Board Europe	2
R-33	203a	Reduced Fares for Cargo Agents	2
R-34	203b	Group Education Trips for Passenger Agents	2

2. The Board does not find the following resolutions to be adverse to the public interest or in violation of the Act:

CAB No.	IATA No.	Title	Application
R-1	001b	Special Effectiveness Resolution	1/2
R-5	023a	Rounding-Off Passenger Fares	1, 1/2

CAB No.	IATA No.	Title	Application
R-6	051	Conference 1 First Class Fares	1
[fol. 3152]			
R-7	051a	Special Local Currency Fares and Rates	1
R-8	052	Conference 2 First Class Fares	2
R-11	054c	South Atlantic Normal First Class Fares	1 2
R-12	055	Joint Conference 2 3 First Class Fares	2 3
R-13	057	Joint Conference 123 First Class Fares	1-2 3
R-14	058	First Class Polar Fares	2 3, 1/2 3
R-15	061	Conference 1 Tourist Class Fares	1
R-16	062	Conference 2 Tourist Class Fares	2
R-17	064a	North Atlantic Tourist Class Fares	1/2
R-18	064b	Mid Atlantic Tourist Class Fares	1/2
R-19	064c	South Atlantic Tourist Class Fares	1/2
R-20	065	Joint Conference 2 3 Tourist Class Fares	2 3
R-21	067	Joint Conference 123 Tourist Class Fares	1/2/3
R-22	068	Tourist Class Polar Fares	2 3, 1/2/3
R-23	080	Excursion Fares	1
R-24	080f	Excursion Fares	1
R-29	090	Special Iraq-Persian Gulf-Europe Return Fares	2
R-30	100a	North Atlantic Tourist Type Service Economy Class	1/2
R-31	200	Free and Reduced Fare or Rate Transportation	1/2, 1/2/3
R-32	203	Reduced Fares for Passenger Agents	1/2, 1/2/3
R-35	204	Free or Reduced Fares for Tour Conductors.	1/2, 1/2/3
[fol. 3153]			
R-36	205	Free or Reduced Fare Transportation for IATA General Sales Agents	1/2, 1/2/3

3. The Board does not find the following resolutions to be adverse to the public interest or in violation of the Act, provided that approval thereof be subject to the condition that copies of all notices received and sent pursuant to each of said resolutions be submitted to the Board at the time of their circulation to the Members:

CAB No.	IATA No.	Title	Application
R 9	054a	North Atlantic First Class Fares	1 2
R 10	054b	Mid Atlantic First Class Fares	1 2
R 37	251	Seating Surcharge Mid Atlantic	1 2
R 38	251a	Deluxe Class Surcharge (Deluxe Class Fares) North Atlantic	1 2
R 39	252	Jet Surcharge North and Mid Atlantic	1 2
R 40	254	Jet Surcharge Traffic Conference 1	1

Accordingly, IT IS ORDERED THAT:

1. The Board hereby disclaims jurisdiction with respect to that portion of Agreement C.A.B. No. 12883 listed in finding paragraph 1 above, provided that the Board may, at any time, reassert jurisdiction with respect thereto.

2. That portion of Agreement C.A.B. No. 12883 listed in finding paragraphs 2 and 3 above be, and it hereby is, approved, subject to the general conditions set forth in Order No. E-9305, dated June 15, 1955, as amended by Orders Nos. E-10992 and E-12304, dated January 31, 1957, and March 31, 1958, respectively, and to the specific condition set forth in finding paragraph 3 above.

3. Any air carrier party to the agreement, or any interested person, may, within 15 days from the date hereof, submit statements in writing containing reasons deemed appropriate together with supporting data, in support of or in opposition to the Board's approval herein. Such statements should conform to the general requirements of the Board's Rules of Practice in Economic Proceedings. The Board may, upon consideration of any such comments

received, modify or rescind its approval by subsequent order.

[fol. 3154]

Pan American World Airways, Inc. Exhibit 308

C
O
P
Y

CIVIL AERONAUTICS BOARD
Washington 25

May 4, 1951

Mr. J. T. Trippe, President
Pan American World Airways, Inc.
135 East 42nd Street
New York 17, New York

Dear Mr. Trippe:

On April 4, 1951, a meeting was held between the Board staff and the United States Members of IATA, in order to ascertain the positions of the carriers with respect to agreements to be reached at IATA Traffic Conference Meetings beginning May 8, in Bermuda.

The Board has carefully considered the position of the carriers, the data bearing upon those positions, and their relationship both to the sound economic development of international air transportation and the level of mail pay requirements. Keeping in mind the objective of building a rate structure which will contribute most substantially to a prosperous industry through the broadening of the Air traffic base and the maximizing of carrier revenues, the

Board offers the following as its suggestions for the guidance of the U. S. flag carriers in the forthcoming IATA discussions. However, the Board recognizes that differences of opinion exist among the various international carriers, particularly with reference to tourist and special fares, and that therefore U. S. flag carriers must have some freedom of action in negotiating the various issues.

With respect to the North Atlantic structure, the Board believes that recognition should now be given to the ever-increasing demand for low cost transportation. In order to satisfy this demand and at the same time protect and improve the economic position of the trans-Atlantic carriers, the Board recommends the adoption, on an experimental basis, of a two-class fare structure consisting of the following:

A. An all-year standard fare of $395 one way and $711 round trip; representing a $20 increase over the present base level to London, with comparable increases to all other European gateways;

B. An all-year tourist service having the following conditions:

(1) A minimum tourist fare of $325 one way and $405 round trip to London with comparable fares to other European gateways, related to use of aircraft having effective seat densities (i.e., seats actually available for sale over the critical segment), as follows:

[fol. 3155]

(a) DC 4	60 seats
(b) Constellation and DC 6	65 seats
(c) Boeing 377	100 seats

If agreement can be reached only upon the basis of decreasing the seat densities given above, proportionate increases in the suggested fare should be made.

(2) Tourist service to be limited to one fifth the number of seats available in scheduled service during corresponding months of 1950, as reported to IATA, the AOA allocation to be split equally

between the two American carriers, with a minimum allocation of one round trip per week to each participating IATA carrier.

(3) No extra sections.

(4) No meal service except at compensatory charges and minimum passenger service.

The Board favors, as additional features of this structure, a sleeper surcharge of $50 single and $75 double and a sleeperette surcharge of $14 or more. It is believed that while these levels do not compensate fully for the sacrifice of revenue capacity, they do more in this direction than is presently true, and lessen the competitive pressure to install uneconomic configurations.

The adoption of this rate structure would contemplate the elimination of fare and one-third, fare and one-tenth, and combination on off season round trip fares. It should be noted in this connection that the Board cannot find convincing evidence that the experience with these fare levels has been of economic benefit to the industry. The Board also regards the proposals for a 30-day round trip fare and one-half, for the period November through March, and the TWA student fare proposal as superfluous if the above two-class fare structure on a year round basis is adopted.

Finally, the Board would favor an "escape" clause.

The Board has reconsidered its previous position with respect to tourist service for the on season of 1951 and now recommends the adoption of such a service for the 1951 on-season. If the carriers can agree on tourist service for this season, they are requested to expedite submission of the agreement to the Board so that it could be made effective at the earliest feasible date.

In connection with the position of Northwest that the introduction of Atlantic tourist fares would undercut westabout levels, the Board would favor a modification of IATA agreements so as to prevent the equalization of first class fares to the Orient westabout with eastabout fare constructions [fol. 3156] involving Atlantic tourist levels, but which will

permit westabout equalization with such fares for westabout travel, using domestic coach to the Pacific Gateway.

If the tourist service is not adopted, the Board would favor the following structure:

A. An all-year standard fare of $365 one way and $711 round-trip to London, with comparable fares to other European gateways;

B. A 30 day off season round trip fare at a level of one and one half that of the normal one way fare as the only reduced fare;

C. A shortening of the off season to the period November through March;

D. Sleeper and sleeper seat surcharges as indicated above; and

E. An "escape" clause.

With respect to North Atlantic cargo rates the Board favors an increase of 10 percent as consistent with increasing cost levels and as instrumental in easing westabout competition. It would not favor the PAA proposal for additional weight breakpoint, since the Board believes that this would unnecessarily depress the rate structure. However, the Board would be willing to approve a 34 cent per ton-mile rate for general commodity shipments of 1,000 pounds and over which would equate the competitive position of the IATA carriers with the irregulars for bulk carriage.

With respect to the Middle Atlantic levels, the Board favors raising those levels to a point which will eliminate absorption requirements on competitive routings via the North Atlantic.

With respect to Conference rates, the Board would favor closing all rates provided the following conditions are met:

A. Establishment of equitable selling and remittance rates in a rights drawn currency agreement;

B. Adoption, in general, of present first class and tourist levels;

C. Raising of BWIA rates to IATA levels or admission of that carrier as a member;

D. Elimination of the 5 percent differential being maintained by BOAC on first class service on combinations of Miami with Panama Lima Santiago;

E. Adoption of a 30-day "escape" clause.

[fol. 3157] With respect to the Trans-Pacific area, the Board believes that the static condition of overall Trans-Pacific traffic, the emergency existing the area, the relatively ineffective sea carrier competition, and the higher costs reported by the carriers warrant an increase of fares on Australasian routes up to pre Mexico City levels. However, the Board would favor maintaining present levels to Asiatic points where sea carrier competition is more effective.

With respect to Trans-Pacific cargo rates, the Board favors raising the rates to and from New York by 30 cents and the elimination of present common-rating except with respect to West Coast terminals. If this course cannot be effected because of lack of adequate increase in the east-about, it is recommended that the carriers common-rate only New York in addition to East Coast terminals and add rates from interior United States points over the lowest-rated gateway.

With respect to the sterling areas, the Board agrees with the carrier positions with respect to a 10 percent increase in fare and rate levels on the short haul and 15 percent on the long haul. The Board believes such increases consistent with reported increases in cost.

With respect to cargo rates on the London-Hong Kong combination, the Board recommends an increase of 30 cents a pound, if the 10 percent North Atlantic increase is not adopted; a 20-cent increase if it is.

The Board also suggests that authority be secured for westabout equalization of London, Auckland general commodity levels.

With respect to charter service, the Board believes, as it has previously indicated, that is essential to the orderly development of that service that the carriers sponsor the adoption of IATA resolutions fixing minimum rates for trans-Atlantic charter service for the transportation of passengers. The Board also favors small increases in present rates. In this connection, the minimum levels probably should not be less than the following rates per mile for the types of aircraft indicated.

	Full Load of Passengers	Ferry Flight
DC-4	$1.75	$1.50
DC-6 or Constellation	2.40	2.00
Boeing Stratocruiser	3.50	3.00

Finally, the Board believes that the U. S. flag carriers should sponsor the adoption of IATA resolutions to establish limitations on charter service comparable with those contained in Part 207 of the Board's Economic Regulations. The Board further believes that the IATA carriers should take primary responsibility to enforce compliance therewith.

Sincerely yours,

D. W. Rentzel
Chairman

New York 17, New York

Dear Mr. Trippe:

On November 9, the Board sent you a statement of its position regarding the issues expected to arise at the Nice meetings of the IATA rate conferences.

In view of the great importance of the specific North Atlantic issues and the extended controversy that these have engendered in the past, The Board deems it of the highest importance that the two United States carriers primarily involved in this area work closely together to obtain conference agreement on these issues.

Only through the closest cooperation between the United States carriers will it be possible to successfully achieve the necessary support for the United States position, as stated in the Board's letter of November 9.

Sincerely yours,

/s/ DONALD W. NYROP
Chairman

November 9, 1951

Mr. J. T. Trippe
President
Pan American World Airways, Inc.
135 East 42nd Street
New York 17, New York

Dear Mr. Trippe:

On November 6, 1951, a meeting was held between the Board's staff and United States members of IATA in order to ascertain the position of the carriers with respect to agreements to be reached at the IATA Traffic Conference meetings beginning November 27, in Nice, France.

The Board's firm position with respect to the various items which will be considered by the Conference is as follows:

North Atlantic tourist service:

1. The North Atlantic tourist service should be inaugurated prior to the 1952 summer season.

2. A New York-London one-way tourist fare of $265, with a 10 percent "on" season discount and a 25 percent "off" season discount for round trips, with Shannon as the gateway, is a sound fare structure. This fare structure will meet the break-even need and provide a reasonable element of profit for coach operations, on the basis of the representative costs of the IATA carriers (190 kilos per passenger) and an estimated year-round load factor of approximately 68 percent. The higher "off" season discount will, in the Board's opinion, tend to off set normal seasonal unbalance and facilitate attainment of the average load factor.

The proposed fare structure is therefore economically feasible, but at the same time low enough to provide for an adequate test of the untapped low-fare air traffic potential across the North Atlantic.

3. Tourist operations across the North Atlantic should be based upon the highest practical seating density from an operational standpoint.

[fol. 3160] 4. Meal service should be provided only on a compensatory basis, with minimum galley facilities which will not require significant displacement of seats or lift.

Fare and one-tenth for the winter season of 1952:

The Board believes that the economic soundness of the 17-day one and one-tenth round trip excursion fare is open to question. However, the Board recognizes that such a fare may serve some purpose as an interim measure pending inauguration of tourist service in the spring of 1952. Accordingly, the Board will not oppose a one and one-tenth 17-day excursion fare for the 1952 winter season, provided that the tourist service is inaugurated in the spring of 1952.

North Atlantic rates and fares—standard fares and freight rates:

The Board is in agreement with the general North Atlantic fare and rate levels adopted at Bermuda with these exceptions:

1. *Off-season and excursion rates:* With the adoption of a year-round low fare tourist service (North Atlantic tourist services, *supra*) the Board can find no justification for and will not approve the continuance of "off" season and short limit excursion fares on the standard service.

2. *Sleeper charge:* The Board reaffirms its previous position that the minimum sleeper charge for a single berth should be $50, and for a double berth $75.

The Board recognizes that the configuration of the Boeing 377 permits the addition of sleeper accommodations without the displacement of passengers, while the addition of sleeper service on other types of aircraft results in a loss of approximately 50 percent of the seating capacity. The advantages of the Boeing configuration, however, are more than offset by its high seat-mile operating cost. Therefore, the Board believes that it is not justifiable to establish a sleeper charge based upon cabin configuration without due consideration being given to these higher operating costs.

3. *Sleeperette charges*: The Board reaffirms its position that a sleeperette charge of at least $14 should be made.

The use of sleeperettes on aircraft flying the North Atlantic reduces the seating capacity of the aircraft approximately 25 percent or more and necessarily results in higher costs. Although a charge fully reflecting this increase would be so high as to be impracticable, [fol. 3161] some reasonable charge should be made to recover some of the costs and reduce the competitive pressure to extend this uneconomic type of service. A charge of $14 appears to be a minimum charge for this purpose.

Rates and Fares in areas other than North Atlantic:

The Board generally favors retention of the present rate structure in all other areas, except as indicated below. The Board is especially concerned that no change be made at this time in the rate structure in the Pacific and South and Middle Atlantic areas because of the anticipated possible effect of inauguration of a North Atlantic tourist service. It is recognized that this service may ultimately require some adjustment of the fare structure in the areas mentioned, but it is believed that a considerable period will elapse before this is true. Accordingly, it is believed that action at the Nice meeting should be confined to providing means for modification of the rate structure in these areas if and when it becomes evident that the North Atlantic tourist service is, in fact, substantially affecting services in these areas.

Sleeper charges: The Board believes, as in the case of the North Atlantic, that present sleeper charges in all other areas are lower than can reasonably be justified in view of the loss of seating capacity involved and should be substantially increased.

National, resident and regional carrier fares:

In view of the tendency to expand the application of special fares for nationals or residents of particular countries evidenced at the Bermuda meeting, the Board desires to reaffirm its previously stated position that such fares are unjustly discriminatory and inimical to a sound rate structure and that it will not be able to approve any new fares of this type.

The Board is even more concerned about the beginnings of a trend toward special fares for carriers of a particular country or region (regional carriers) first evidenced in the Conference 3 resolutions at and just prior to Bermuda. This is a type of discriminatory rate-making which the Board can, under no circumstances, approve.

Special problems:

At the meeting with the carriers, clarification of the Board's position with respect to two points was requested.

[fol. 3162] 1. *With respect to freight rates from the Orient over the Pacific to North American points*: The Board is of the opinion that the conditions imposed by Order Serial No. E-5754 on its approval of resolution JT31 (8) 056, Normal Pacific Fares and Rates, with respect to freight rates, to and from the Orient are proper even though they may, in some cases, require a departure from the so called "intermediate rule". Such departures may be justified on the basis of competitive considerations. The Board further believes that any new agreement in this area should follow the principles embodied in the above-mentioned conditions.

2. *With respect to "off" season fares, India, Pakistan, Ceylon, and Europe*: By Order Serial No. E-5754,

The Board disapproved paragraphs (c) and (d) of the Bermuda Resolution JT23 (S) 164(c) dealing with the above-indicated subject. Paragraphs (c) and (d) contained provisions limiting the fares to permanent residents of or persons engaged in business in particular countries. It was our intention to disapprove these paragraphs only insofar as they provided for this type of discriminatory fare. We see nothing objectionable in the other limitation in paragraph (c) as to the countries in which tickets may be sold.

Sincerely yours,

/s/ Donald W. Nyrop

[fol. 3164]

Board views on issues to be considered at Buenos Aires meeting of IATA Traffic Conferences

Sleeper and Sleeperette Surcharges

The dependence of the American Flag carriers on government subsidy makes it imperative that they exert every effort through the adoption of economic rate patterns to reduce the cost of their operations to the Treasury. The current level of sleeper surcharges in all areas and the general failure to assess any surcharge for sleeperette service despite the resulting decrease in capacity are outstanding examples of uneconomic rate policy which it is the duty of every American Flag carrier to exert its utmost efforts to correct. Except for operators of the basically high cost B-377 or a few operators on extremely thin routes, the provision of sleeper service results in the loss of revenue capacity which is not at all compensated for by the nominal charges now in effect. The substantial spread between tourist and standard fares increases demand for berths at a nominal $25 charge with resulting further loss of capacity and revenue. Until it is technologically possible to supply sleeper and sleeperette service without loss of capacity, rates for these services should be set high enough to discourage a high demand therefor and insure that the surcharge revenue more nearly meets the real costs of the service. At a minimum, sleeper charges should be increased to at least $50 for single and $75 for double occupancy and a charge of at least $14 should be made for sleeperettes.

[fol. 3165] *National and Resident Fares*

The Board reaffirms its previous position that discriminatory fares for nationals or residents of certain countries are undesirable and should be eliminated as rapidly as possible. The Board has approved some fares of this type because of the hardships which might have resulted if it insisted on maintaining an inflexible position on this question. However, the carrier members of IATA must adopt a more equitable solution to the problems raised by

currency devaluations and depressed economic conditions. Furthermore, the possibility of an early introduction of coach service in Europe should obviate the necessity for most of these inequitable fare arrangements.

Class-B and Regional Fares

The Board is concerned with the rapid extension of the so-called Class-B fares and fares favoring regional carriers. While recognizing that in certain situations there may be a basis for a fare differential related to differences in equipment, it would appear that to an increasing extent the Class-B fares are being used to give an improper advantage to the local carrier as compared to the long haul trunk carriers. When so used the Class B fares are open to the same objections as the special regional fares for local operators which the Board has previously rejected.

Permitting fare differentials over the same route on the basis of the carrier supplying the transportation is [fol. 3166] contrary to sound transportation practices, and the Board believes the American carriers should oppose extension or continuation of this type of discriminatory fare except insofar as clearly justified by equipment differences.

Free and Reduced Transportation

The sound economic development of an international air transport system requires that the giving of free and reduced rate transportation to particular persons or groups should be held to a minimum. It is the Board's opinion that it would not be desirable to broaden the scope of free and reduced rate transportation now authorized by IATA agreements. Specifically, the Board opposes the extension of gratuitous transportation for public relations purposes or free transportation based on the so-called "principal's privilege".

The present resolution with respect to free and reduced rates for IATA sales agents does not limit the total number of carriers from which a given agent may receive such transportation. Since there are nine carriers operating

across the Atlantic for example, an agent could conceivably receive as many as 18 free transatlantic trips a year. It would appear highly desirable through the medium of the IATA Secretariat, or otherwise, to arrange for allocating this type of transportation so as to effectively limit the total amount of free and reduced rate transportation available to sales agents for educational purposes to a reasonable total in any given period. It would not appear objectionable to allow general agents the same free and reduced transportation privileges as are allowed IATA sales agents.

[fol. 3167] The tour conductor resolution also appears to be too loosely drawn to permit effective policing to insure that the privileges thereunder are restricted to *bona fide* tour conductors. Unless effective steps are taken to counteract the abuses which appear to be developing under both the sales agent and tour conductor resolutions, the Board may find it necessary to reconsider its approval of these resolutions.

Charter Operations

The present IATA charter resolution does not provide effective control over the charter operations of the IATA carriers. The Board believes it would be highly desirable to modify this resolution along the lines of the Board's charter regulations, Part 207 of the Economic Regulations, adopted March 26, 1951. Since these regulations were submitted to most interested governments before their promulgation and were favorably received by them, an IATA resolution along the same lines would appear to be feasible. In addition, every effort should be made to agree on minimum charter rates, at least to and from the United States. However, in case of such a limited rate agreement adequate provisions against evasion by the use of separate charters beyond the European gateways should be incorporated in the resolution.

Frills and "Give-Aways"

It appears that the competition with respect to "give-aways" and reduction of seats on de luxe flights is rapidly

[fol.3168] reaching a stage where it may have serious economic consequences. The Board would favor a resolution restricting the value of "give-aways" on de luxe flights to the surcharge paid by the passenger, and strongly urges serious consideration of means of restricting the competitive reduction of seating densities.

Fare and Rate Levels

With respect to fares and rates in general the Board, with the exceptions indicated hereinafter, has no special comments to make, except to state that any changes in the general fare structure contemplated by the carriers should be adequately supported by pertinent financial and traffic data.

North Atlantic

The Board favors a substantial reduction in the number of specific commodity rates across the North Atlantic, a major part of which, according to available information, seem to be of little or no use. Furthermore, due to the fact that the specific commodity rates have more weight breaks than the general commodity rates, and since it is understood that a large portion of the North Atlantic cargo traffic moves at such rates, there seems to be no need at the present for further weightbreaks in the general commodity rate structure.

Conference 1

With respect to the fares in Conference 1, the Board wishes to express its concern over the extremely low yield for the carriers operating in South America. In that connection the Board would favor the elimination of a [fol.3169] substantial number of the so-called creative or excursion fares. There is no economic justification for the existence of year-round excursion fares which ultimately result in the destruction of the existing standard fare structure to the detriment of the carriers' already low revenues. Furthermore, it would seem imperative that the carriers agree on the adoption of some kind of circuity limitation within Conference 1. If this cannot be accom-

plished at this Conference, a working group to formulate recommendations on this point should be set up at this time. Similarly, steps should be taken to provide an adequate definition of tourist service in Conference 1.

Mid-Atlantic

With respect to the fare level in the Mid-Atlantic it is hoped that the IATA carriers will agree to raising the fares in that area to a more economically sound level for the benefit of both the Mid-Atlantic operators and the North Atlantic carriers competing with such services.

Pacific

While the probability of the establishment of a tourist class service across the Pacific is slight at the forthcoming Conference, the Board wishes to emphasize that present data do not seem to support the creation of such a service. Therefore, the inauguration of transpacific tourist class operations will not be approved except upon a convincing showing by its proponents that such a service is operationally and economically feasible.

[fol. 3170] *Procedural Matters*

Uniform Effectiveness Dates of Resolutions

The Board has noted that the carriers often submit to the Board resolutions with varying effectiveness dates, resulting in a reduction of the time provided for government action. This only adds to the Board's burden in trying to pass upon these resolutions with the least delay possible. When such variances are necessary, it would seem that the carriers should reduce the time allowed IATA for the promulgation of such agreements rather than to shorten the customary 45-day period provided to the governments.

Summary and Analysis of Resolutions

Paragraph 367 on page 71 of the Minutes of the Nice meeting of the IATA Conferences in December 1951, provides that the IATA Secretariat shall prepare after each

meeting a Post-Conference Resolution Analysis which is to include a brief general summary of the work accomplished at the meeting, an analysis of the new resolutions and the changes to any existing resolution. Should this summary be available at the time of the filing of the Conference Resolutions with the Board, it is requested that the United States carrier members of IATA arrange for the Board to receive copies of this summary at that time. However, in the event that this document should not be available at that time, the Board requests the United States carriers to prepare such an analysis for its use and to submit it to the Board together with the resolutions adopted at Buenos Aires.

COPY

CIVIL AERONAUTICS BOARD
Washington 25

Mr. J. T. Trippe
President
Pan American World Airways, Inc.
135 East 42nd Street
New York 17, New York

Dear Mr. Trippe:

On September 29, 1952, a meeting was held between the Board's staff and the United States members of IATA, in order to ascertain the carriers' respective positions on agreements to be sought at IATA Traffic Conference meetings, beginning October 21, in Cannes, France.

The Board's views on the principal issues to be considered at the Cannes meeting follow:

1. *Sleeper and Sleeperette Charges:* For the reasons it has previously set forth at length, the Board believes that every effort should be made to secure agreement on sleeper charges of at least $50 for

single occupancy, $75 for double and a minimum sleeperette charge of $14. The Board does not consider the increase in sleeper charges to $35 voted at the Buenos Aires meeting to be an adequate solution to the problem of uneconomic sleeper charges.

II. *Free and Reduced Fare Transportation*: The Board believes that the extension of free and reduced fare transportation is inimical to the sound development of air transportation, and specifically that such special privileges should not be provided for public relations purposes or on the basis of principal's privilege. As previously noted, the tour conductor resolution is so loosely drawn as to defeat adequate policing, and unless steps are taken to counteract the abuses developing thereunder, the Board's approval thereof may be withdrawn.

III. *Overnight and Connecting Expenses*: Resolutions 102 and 102a permitting the carriers to assume certain overnight and connecting expenses are so loosely drawn as to invite uneconomic competition between carriers. These resolutions should be tightened up with special attention given to sharply restricting or eliminating the payment of cash to passengers for such expenses, a provision which encourages illegal rebating.

[fol. 3172] IV. *National and Resident Fares*: The Board is unequivocally opposed to this type of fare and believes the American Flag carriers should exert every effort to insure that this discriminatory type of fare is not embodied in IATA resolutions.

V. *Regional Fares*: Permitting fare differentials over the same route on the basis of the carrier supplying the transportation is contrary to sound transportation practices and, if permitted, will eventually destroy the entire IATA fare structure. The Board cannot approve fare resolutions permitting this type of regional fare differential and believes that the American Flag carriers not only should oppose any attempt to introduce this type of discrimination into

IATA resolutions, but also should use their best efforts to have IATA take a firm position against the imposition of such fares by unilateral action of governments.

VI. *Passenger Fare Construction Resolution*: In the Board's opinion, the recent extension of the exemption from the 15% circuity limitation to fares in Joint Conferences 1-2, and 1-2-3 was a backward step in the development of a sound fare structure. Not only should the exemption for Joint Conferences 1-2 and 1-2-3 be reconsidered, but a serious attempt should be made to develop reasonable circuity limitations in Conference 1.

VII. *Agency*: The Board wishes to point out that its approval of the resolution providing for a 6% commission for travel agents for the sale of tourist class transportation was only on a temporary basis, and that it will not approve any extension of this resolution or the adoption of any new resolution providing different commission rates for the sale of tourist service and first class service, in the absence of a convincing showing that there is a cost basis for the difference in commission rates and the lower rate is fairly compensatory for the service rendered.

VIII. *Fare and Rate Levels*:

A. *North Atlantic*:

1. *Passenger Fares*: Since the North Atlantic tourist service program is in its experimental state, the Board favors the retention of the *status quo* in the passenger fare structure, especially as adhered to, it finds no objection to the sale of liquor and bar sundries on tourist flights.

[fol. 3173] 2. *Cargo Rates*: The Board favors the retention of the existing cargo rates and discount for shipments weighing over 45 kilograms, as well as a substantial reduction in the number of specific commodity rates, a

large number of which appear to be unnecessary. Furthermore, since specific commodities have more weight-breaks than the general commodity rates, and the bulk of North Atlantic cargo moves at specific commodity rates, there seems to be no need at present for further weight-breaks in the general commodity rate structure.

B. *Conference 1*: The Board is concerned with the need of the carriers operating in South America for greater commercial revenues and favors such changes in fares and rates as may reasonably be expected to increase overall revenues. The Board believes that the elimination of most of the so-called creative or excursion fares and adoption of some kind of circuity limitation within Conference 1 would tend to accomplish this result. Consideration might also be given to selected increases in below-average fares on the east coast of South America.

C. *Transpacific*: On the basis of the data available to it, the Board sees no economic or operational basis for the establishment of a transpacific tourist service at this time. It will not be able to approve an agreement for such service, except upon a full showing of its economic and operational feasibility.

Sincerely yours,

/s/ DONALD NYROP
Chairman

Dear Mr. Lipscomb:

On September 25, 1953, a meeting was held between the Board's staff and United States members of IATA, in order to ascertain the carriers' respective positions on agreements to be discussed at the IATA traffic conference meetings, beginning November 1, in Honolulu.

The Board's views on the main issues to be considered at the Honolulu meetings are set forth in the enclosed statement.

Sincerely yours,

/s/ OSWALD RYAN
OSWALD RYAN
Chairman

Enclosure

[fol. 3175]

I. ADMINISTRATIVE RESOLUTIONS—USE OF INTERLOCKING DEVICE:

The Board views with concern the trend to increase the use of type-A resolutions, of type-B resolutions with type-A paragraphs and of interlocking resolutions, which restrict the responsible government agencies to a choice between a

resolution which may be in part unacceptable or undesirable and an open-rate situation. The Board feels that, while certain rates are undoubtedly commercially interdependent under certain circumstances, the practice of adopting in an increasing number of resolutions restrictive features with respect to government action is contrary to the spirit in which the Board approved the IATA machinery. Furthermore, it would seem that, by thus restricting action by government agencies, the carriers incur the risk of seeing an ever-increasing number of resolutions disapproved by the interested governments. The unjustified interlocking of resolutions may well be a factor in determining whether certain agreements should be approved.

II. FRINGE ITEMS AND OTHER NON-TRANSPORTATION PROBLEMS:

For the past several years the Board has expressed concern over the increasing amount of fringe items included with the transportation of passengers, these incidentals becoming a more and more important factor in the overall cost of transportation. It would seem that in order to maintain an economically sound rate structure the carriers should check the trend of recent years to increase the number of give-aways, especially should this trend be carefully watched in tourist-class services where minimal differences in cost may spell the difference between success or failure of the mass transportation experiment.

[fol. 3176] The Board wishes to call the carriers' attention to the following points on which agreement among the carriers would seem imperative:

(1) *Connection expenses*: The absence of a resolution permitting the carriers to assume certain over-night and connecting expenses creates a confusing situation in which the carriers differ on whether they may or may not grant such expenses, and which leads to competitive practices which are not in the interest of the industry. The Board has refrained from a determination on this subject, in its consideration of the Cannes resolutions, in the hope that the carriers will be able to agree on a tightly worded con-

meeting expense resolution. However, in the absence of such an acceptable agreement, the Board may, in accordance with its statement contained in Order No. E-7210, of March 6, 1953, condition its approval of all fare agreements on the understanding that fare resolutions fix minimum fares, as provided by the I.A.T.A. rate making machinery, and therefore do not permit the assumption of over night and connecting expenses by the carriers.

In concluding, the Board would like to state that it hopes that resolutions on connecting expenses will be of a temporary nature, and that eventually the carriers will find it possible to do away with this sort of fringe item which is often misused by carriers to convert an uncompetitive position into a competitive advantage.

(2) *Charges for meals and liquors*: Related to the problem of so-called give-aways is the extent to which carriers will furnish meals and liquors, at nominal prices, especially on tourist services. The Board is of the opinion that the existing tourist service resolutions are too loosely drawn [fol. 3177] with respect to the furnishing of free "simple" meals and the sale of liquors. The carriers are strongly urged to agree on a definition of such "simple" meals and on a uniform minimum charge for liquors served aboard tourist flights which is reasonably compensatory. The absence of such an agreement will eventually result in reducing the difference in standards between first-class and tourist-class services, and results in the uneconomic assumption of such expenses without regard to the cost of furnishing these services.

(3) *Sleeper and Sleeperette charges*: Similarly connected with the problem of fringe benefits is the providing of sleeper and sleeperette service at uneconomically low charges. The Board's opinion is that the increase in sleeper charges to $35 per berth adopted at the Buenos Aires Conference, and maintained at Cannes, is not an adequate solution to the problem of the existing uneconomic sleeper charges. The Board reaffirms its belief that every effort should be made to increase the charges for luxury accommodations such as sleeper and sleeperette services to com-

pensate for the reduced capacity of the aircraft which their provision entails.

III. FARES AND RATES:

With respect to fares and rates agreements, the Board has only a few specific recommendations to make, but would urge caution in making any drastic changes in the IATA fare structure, and while costs are an important factor in fixing fares and rates, the carriers should resist major increases or reductions in fares unless clearly justified by the economics of air transportation.

(1) *Passenger fare construction resolution*: The Board has stated in its previous recommendations to the carriers [fol. 3178] that the extension of the exemption from the 15 per cent circuity limitation in Conference 1 to fares in Joint Conferences 1-2 and 1-2-3, which was adopted at Buenos Aires, does not promote a sound fare structure. The Board notes that this exception to the ordinary rules of fare construction as contained in resolution 014a has been maintained at Cannes. It would seem that not only should the carriers attempt to agree on limiting the effects of this exception, but should endeavor to eliminate it from the resolution, and attempt to develop a reasonable circuity limitation in Conference 1.

(2) *Cargo rate construction resolution*: It is noted that the provisions of paragraph 7 of the Cargo rate construction resolution (014b) of Conference 1 which permit combinations of specific commodity rates with other specific commodity or general commodity rates are of no effect in view of the Board's prohibition of such combinations in resolution 190-552b (Commodity Rates Board), as conditioned by finding paragraph 6 of Order No. E-7210, dated March 6, 1953. It would seem therefore logical to remove these provisions from the above-mentioned paragraph 7.

(3) *Combination aircraft*: Related to the fares problems is the trend among certain carriers to use combination aircraft carrying first class as well as tourist class passengers. When the Board approved the use of such type aircraft in connection with the North Atlantic Tourist Class

experiment, it understood this provision to be of a temporary nature, which would help the small carriers with one or two weekly frequencies to overcome their initial adjustment problems. The Board notes with concern that this [fol. 3179] exception, which it believed to be temporary and for the benefit of the above mentioned small carriers, has become a permanent fixture in all tourist-class resolutions, as a type A paragraph, disapproval of which would constitute disapproval of the whole resolution, and is being taken advantage of by some large carriers. The Board believes that the United States carriers, however, should oppose the use of this type of aircraft wherever possible.

The innumerable sales difficulties and possible adverse public reaction coupled with dubious economic results and extremely serious enforcement problems arising from use of combination aircraft would seem ample to deter the carriers from tolerating the use of combination aircraft, except where dictated by necessity. Thus, while certain local traffic characteristics may justify the use of combination aircraft, despite the objectionable features of this type of aircraft, it is the Board's opinion that this type of aircraft should not be permitted on key trunk routes.

(4) *North Atlantic Fares and Rates*: The Board has no particular problem with respect to the North Atlantic Rate structure as it exists at present. The carriers might find it advantageous to experiment with short-term excursion fares during the off-season, but it would seem advisable that drastic changes in existing structure not be effectuated before an additional period of experimentation has elapsed to give the carriers a full opportunity to determine the necessity of such changes.

(5) *Transpacific Fares*: There appear to be no major problems in connection with Transpacific first-class fares, although some upward adjustment in the South Pacific fares, to and from Australasia may be desirable.

[fol. 3180] With respect to the proposed tourist program, the Board has very little data before it on the proper basis for a reasonable tourist fare across the Pacific. However, it would seem advisable in the absence of experience, to avoid any cuts in the fares so drastic they may not be

overcome by the additional traffic generated. Therefore, the Board recommends that the carriers not go below the one-way tourist fare of $450 between Tokyo and the West Coast, and $308 between Hong Kong and the West Coast.

(6) *Conference 1:* With respect to Conference 1, the Board is seriously concerned over the absence of a tourist resolution adequately determining the conditions of furnishing tourist class service in that area. The lack of agreement on such a resolution has resulted in an increasing lack of differentiation between tourist-class service and first-class service. Such a situation cannot benefit the industry and should be remedied by adopting a tourist resolution patterned as much as possible after similar resolutions effective in the rest of the world.

IV. CURRENCY PROBLEMS:

The Board is aware of the difficulties facing the industry with respect to currency problems. As in the past, the Board will continue to lend all its support to the carriers' efforts to solve these problems. The Board strongly urges the carriers to agree, among other things, to a tightening up of the currency resolution (021 series), so as to insure that the carriers receive the true equivalent in local currency of the fares and rates adopted in basic currencies, especially by providing for some reasonable floor which shall be effective in case of failure to agree locally on the conversion rate of so-called "asterisked" currencies.

[fol. 3181] V. AGENCY:

When the Board approved, by Order No. E-7212 of March 6, 1953, the amendments to resolution 810 on Passenger Sales Agents, it was on the understanding that the carriers would exercise due diligence in improving the existing provisions for the cancellation of such agents, to provide adequate standards of procedure and of productivity for the retention of agents. The Board is disturbed by the carriers' apparent failure to take any steps in that direction. Continued failure to make appropriate improvement in the existing resolution may require the Board to reconsider its approval thereof.

VI. DISCRIMINATORY FARES AND OTHER RELATED PROBLEMS:

The Board notes with satisfaction that the IATA carriers have apparently checked the trend of adopting discriminatory fares, and that the number of such fares has been diminishing constantly in the past two years. However, certain problems have not yet been satisfactorily solved, and will be discussed below.

The Board is of the opinion that discriminatory fare arrangements will eventually disappear if the United States carriers present a solid front on this subject. Those fares are repugnant to the Act, and have been consistently condemned by the Board, and the Board expects that no American flag carrier will propose or support discriminatory fares within IATA.

(1) *Regional fares*: The Board reiterates its position that permitting fare differentials over the same route on the basis of the carrier furnishing the transportation is contrary to sound transportation practices and will eventually destroy the IATA fare structure. The Board cannot approve fare resolutions permitting such differentials and [fol. 3182] believes that the American flag carriers not only should oppose any attempt to introduce this type of discrimination in IATA resolutions, but should also use their best efforts to have IATA take a firm position against the imposition of such fares by unilateral action of governments.

(2) *Student fares*: The Board has noted that the number of IATA resolutions on student fares has been steadily reduced. Such action is in line with the Board's opinion that student fares are discriminatory and in violation of the Act. In line, however, with its policy not to interfere in fare arrangements completely outside air transportation, and recognizing the wide acceptance abroad of student discounts, the Board has, in the past, approved student fare resolutions. In two minor instances these fares are applicable in air transportation: one over the Mid Atlantic to and from Miami, and the over the Pacific to and from the West Coast. The Board is of the opinion

that these student fare resolutions should be limited at the coming Conference so as not to apply in air transportation. In the absence of such restrictive language in the resolutions, the Board will consider what appropriate action should be taken with respect to these agreements. In that connection, the Board also urges the carriers to restrict student fare resolutions outside air transportation so as to prevent, as effectively as possible, any combinations resulting in the application of these discriminatory fares from or to the United States.

CIVIL AERONAUTICS BOARD
Washington 25

September 23, 1954

Mr. Willis G. Lipscomb
Vice President - Traffic and Sales
Pan American World Airways, Inc.
135 East 42nd Street
New York 17, New York

Dear Mr. Lipscomb:

A meeting was held between the Board's staff and the United States carrier members of IATA on September 10, 1954 in order to ascertain the carriers' position on various agreements to be discussed at the forthcoming IATA Traffic Conference Meetings in Venice.

The Board's views on the main issues to be considered at the Venice meetings are set forth in the enclosed statement.

Sincerely yours,

/s/ CHAN GURNEY
Chan Gurney
Chairman

Enclosure

[fol. 3184] L. *Passenger Fares and Cargo Rates*

There are few recommendations that the Board has to make with respect to fare and rate agreements since it is understood that most carriers favor the status quo. The Board is aware of no basis for major changes in the existing levels of fares and rates. It desires to again emphasize that any major changes, especially increases, which are proposed should be clearly justified on the basis of cost and traffic data.

The Board believes that it would be economically unsound and destructive of a stabilized rate structure to attempt to establish any special class of fares based on the use of fully depreciated aircraft. The depreciation policies of carriers and the periods in which planes become fully depreciated vary so widely as to provide no sound basis for a special low fare structure based on the use of fully depreciated planes.

(3) *Passenger Fare Construction Resolution*

The Board urges that this resolution be tightened up to effectively control circuity beyond the 15 percent now permitted without fare adjustment and to remove the exemption from circuity limitations in Joint Conferences 1-2 and 1-2-3.

At the present time, due in large part to the fact that most first class fares are built on a distance curve whereby the rate per mile decreases with the length of the journey, there are a number of cases where a person traveling on a combination tourist first class service, for which the fare [fol. 3185] under the construction resolution is basically the sum of the sector fares, may have to pay as much for the combination service as he would for all first class service under agreed through fares. Those cases where a combination routing is the same as that permitted under a first class fare at or near the same level not only raise serious public relations problems, but also substantial questions of discrimination or undue preference or prejudice.

While we understand that consideration is being given to making provision for some adjustment in passenger fares

in those cases where through first-class passengers are involuntarily re-routed for part of the journey on tourist service, it does not appear to us that this is adequate to meet the problem. We believe appropriate steps should be taken to insure that on combination tourist first-class trips the fare reflects a reduction from the lowest first-class fare available between the same points over the same routing which is equitably related to the proportion of the journey which is performed on tourist service. On the other hand, in formulating a solution for the problem, care should be taken to avoid excessive reductions for the use of tourist service such as would apparently be possible in a number of cases under the proposal to reduce the first-class fares by the aggregate of the tourist-class first-class differentials on tourist service sectors.

(2) *Mixed Class Aircraft*

The Board notes with concern the desire of some carriers to relax the limitations applying to mixed-class aircraft [fol. 3186] craft. Many of the problems foreseen as arising from the use of such aircraft appear to have materialized. It is urged that a further attempt be made to limit the use of this type of aircraft to those routes of low traffic density where dual class service is practically feasible only on such planes. In any case, it would appear that further tightening, rather than relaxing, of the rules regulating mixed-class aircraft is necessary if the dual first-class tourist-class fare structure is to be maintained.

(5) *North Atlantic Fares and Rates*

A review of the North Atlantic traffic figures for the two years prior and two years after the institution of the North Atlantic tourist service appears to indicate that since the introduction of tourist service the extreme seasonality of the first-class traffic pattern has been substantially reduced both for the IATA carriers as a whole and for the American carriers individually. On the other hand, the figures appear to indicate that for the tourist service the seasonal traffic variations are even greater than was true for first-class service before the inauguration of tourist-class service.

Bearing in mind that to a large extent the price-conscious traffic which used to fly on first class service has already been diverted to tourist service, there appears to be a serious question whether or not the continuation of the presently sharply reduced off season fares or, for that matter, any off season fares on the first class service, is justified.

(fol. 3187) Although last year the relative reduction in the off season fares for tourist service was greater than on the first class service, it apparently was not great enough to significantly level off seasonal peaks and valleys in the traffic, whether by diverting seasonal travel to the off season or by generating substantial amounts of new traffic in the off season. It appears to us that in view of the foregoing, serious consideration should be given to providing tourist fares during the off season which are substantially lower than those which have been previously in effect. Sufficiently sharply reduced fares might not only succeed in diverting a greater part of peak season travel to the off season, but might well succeed in attracting to the scheduled service a good part of the traffic moving on charter services, as well as generating a substantial amount of short term vacation travel by lower and medium income groups. In order to minimize the diversion of tourist travel which would move at the regular tourist fare, it would appear desirable that the sharply reduced fares be offered in the form of short term excursions during the off season.

While sharp reductions in off season tourist fares appear economically feasible because of the large amount of unused tourist capacity in the off season, there appears to be no economic basis for reduced fare excursions in the on season where any additional traffic would require operation of additional equipment.

H. Carrier Problems

(fol. 3188) It is believed important that the carriers, in re-appraising Resolution 028a, maintain the principle of providing for some reasonable floor to be effective in case of failure to agree locally on the conversion rates of "asterisked currencies."

III. *Sleeper Surcharge*

The Board notes with satisfaction the present level of sleeper surcharge adopted by the carriers on a worldwide basis, which is much closer to what the Board considers a minimum economic charge for such service. It would appear from the consensus expressed by the carriers present at the recent staff meeting that the increase in sleeper surcharge has contributed to the increase of revenues of the carriers and there appears to be no valid basis for any reduction in the present minimum for sleeper surcharges.

It also appears desirable that the carriers agree on a minimum surcharge for sleeperette accommodations to compensate for the loss of revenue due to the lower density required by this type of seating arrangement.

IV. *Meals, Give-aways and Seating Densities on First-Class Services*

The Board is concerned with efforts of some carriers to relax the restrictions presently governing the serving of meals on tourist-class service. It appears imperative that these restrictions be maintained if a substantial distinction between first-class and tourist class services is to be preserved in the long run.

Another question of serious concern to the Board is the trend towards increasing the number of give aways on first-class, as well as on so-called de luxe services, while reduc- [fol. 3189] ing the seating density on these services. This type of uneconomic competition seriously threatens carrier revenues and ultimately results in higher fares or greater subsidy needs. It would appear highly desirable that the carriers take steps to effectively control this type of competition. It also appears important to agree on some effective regulation to reasonably relate the added services on de luxe services to the charge therefor.

V. *Charters*

In certain areas the present charter resolution, 045, in effect permits split charter practices contrary to the usual accepted commercial practices in this field. It is suggested

that clearer language be adopted in the resolution applicable in those areas where present provisions appear to permit groups chartering aircraft to further reduce the charge by permitting the carrier to sell the remaining seats at the full IATA fare.

VI. *Resolution 810—Cargo Consolidators*

There appear to be a number of cases in the cargo consolidator field where IATA cargo agents who consolidate under another firm name, or are participants in a consolidating group under a separate name with other IATA agents, receive commissions on the shipments made by such consolidators. This would appear to be in violation of Section 403 of the Act and it is believed that Section Q(6) of Resolution 810 should be revised to make it clear that commissions shall not be paid to an IATA cargo sales agent, not only on consignments consolidated by such agent, but also on consignments consolidated by any entity wholly or partially controlled by, controlling, or under common control with such agent or in which the agent has a beneficial interest.

CIVIL AERONAUTICS BOARD
WASHINGTON 25

[Stamp—May 16, 1956 Vice President—Rec'd New York
May 16, 1959—Traffic & Sales]

Mr. Willis G. Lipscomb
Vice-President—Traffic & Sales
Pan American World Airways, Inc.
135 East 42nd Street
New York 17, New York

Dear Mr. Lipscomb:

A meeting was held between the Board and the United States carrier members of IATA on April 17, 1956, at which the carriers presented their respective positions concerning various issues which are to be considered at the forthcoming IATA Traffic Conference Meetings in Cannes.

After careful consideration of the material presented by the carriers, as well as other relevant material available to it, the Board has adopted its position with respect to the major fare and rate problems which must be resolved at the conference meetings. This position is set forth in the enclosed statement, which should be considered in conjunction with the views previously expressed by the Board in Orders Nos. E-9969 and E-10017, adopted February 2 and February 20, 1956, respectively.

The Board understands that the United States carriers will support its position in their negotiations within IATA.

Sincerely yours,

/s/ JAMES R. DURFEE
Chairman

Enclosure

[fol. 3191]

STATEMENT OF BOARD POSITION WITH RESPECT TO THE MAJOR ISSUES TO BE CONSIDERED AT THE IATA TRAFFIC CONFERENCE MEETINGS, CANNES, MAY 29, 1956

I. *Tourist Services*

The paramount issue which will face the IATA Conference is undoubtedly the establishment of the proper level of fares and standards of service to be applicable on the North Atlantic route. The Board is convinced that a large potential exists for travel on the North Atlantic which cannot be reached by the tourist fares which are presently available. The development of this new market is important, not only to the air transportation industry and the ultimate interests of the carriers, but also to the various countries concerned, for whom the revenue from tourist travel is a major source of dollar income.

The Board is convinced that the introduction of a truly high-density low-cost service, substantially along the lines proposed by Pan American, merits emphatic support as the most satisfactory answer to the intent expressed by the Board in Order No. E-10017, dated February 20, 1956.

After careful study of all information available to it, the Board has concluded that operations in high-density configuration on the North Atlantic are both technically and economically feasible and, in conjunction with rigid standards of service, will permit a fare reduction to the $391.50 level proposed by Pan American between New York and London. The economic soundness and stability of such a service, however, is dependent upon strict adherence to the conditions suggested by Pan American, i.e. 20 kilos free baggage allowance, 34 inch maximum seat pitch, mandatory five-abreast seating, maximum of two cabin attendants, no liquor service, and modest meal service at the passenger's expense.

It is the Board's firm conclusion that adequate exploitation of the traffic-generating potentiality of this type of service is contingent upon the establishment of a basic New York-London round trip fare which is available year around at levels not in excess of $400. This represents an approximate 25 percent reduction from present tourist fares, a reduction which is clearly attainable without sacrifice to the present level of earnings, under the rigid specifications upon which the service is premised.

While the Board believes it desirable that low cost air service be made available to the public as early as possible, it would consider an inauguration date not later than April 1, 1957 as reasonable in view of the technical and promotional problems involved.

It is the Board's opinion that, with the operation of this new low-cost service, development of an adequate overall pattern of services requires that present tourist-class services continue as currently operated.

[fol. 3192] TWA has proposed to establish a special excursion fare for round-trip travel completed within an approximate 15-day period. In view of the fact that the present volume of such travel is extremely limited, such a proposal must be considered primarily promotional in nature, and not as an adequate solution to the basic problem. The Board would, however, endorse experimentation with such a pro-

gram provided it is additional to and not in place of a proper solution of the basic problem.

While the Board has indicated that its concern with the seating densities presently operated in tourist services extends equally to other areas, specifically the Latin American and the transpacific routes, it recognizes that certain operational factors peculiar to these areas may make it difficult to achieve a significant increase in the seating densities presently being operated. Moreover, because of the relatively thin traffic density in these areas, there is some reasonable doubt whether, even should an increase in seating capacity be possible, any significant increase in traffic would result, at this time, to justify the change. The Board, therefore, does not consider it urgent that this IATA Conference act to increase the minimum seating densities presently applicable in these areas. However, it is believed that the carriers involved should give careful consideration to the problem so that, within a reasonable period of time, standards for tourist service in these areas can be formulated which will provide a sound basis for appropriate future reductions in cost and fare levels.

II. *First-Class Services*

The Board can find no justification for the increases in the level of first-class fares which became effective April 1, 1956 on transatlantic and transpacific routes, and believes that a sound fare structure requires that these increases be rescinded, effective October 1, 1956. The present level of fares is not considered adequate to compensate for the displacement in available capacity occasioned by sleeper-seat service, nor, on the other hand, does it appear warranted for operations conducted in standard configuration. While there is no doubt that the provision of sleeper-seat accommodations entails higher costs, there appears to be no basis for charging any part of those costs to first-class travelers who do not utilize such luxury services.

The Board believes that a charge of $75 should be assessed for sleeper-seat service, in view of the additional space which is required, to be superimposed upon the first-

class fare level effective prior to April 1, 1956. Those who wish to sell or buy luxury accommodations will, as a result, be placed on a fair competitive basis with those who elect to sell or buy standard service, and the carrier which believes it economically sound to offer standard first class service will not be forced by competitive pressure to offer sleeper-seat service at a relative loss.

[fol. 3193] In the event agreement on a surcharge for sleeper-seats proves impossible, the Board believes that the establishment of specified maximum seat spacing, which will insure economic operations at the basic level of first class fares, is required.

III. *Berth Surcharge*

The Board recognizes that, in those areas where no sleeper-seat service is provided, the present berth charge of $55 may be compensatory in the case of upper berths, which do not displace saleable seats, and, in addition, for lower berths sold on a ship-side basis. However, it considers the higher value of service on these routes where a sleeper-seat surcharge is imposed requires a charge for upper berths of $100. A similar charge appears proper for lower berths if agreement is reached limiting sales to ship-side confirmation. In the event such an agreement is not concluded, however, the charge for lower berth accommodations should be at least $150.

IV. *Polar Route Fares*

The Board is fully aware of the basic problems inherent in the development of polar routings between Europe and the Far East which result in substantially reduced mileages as compared with the conventional routing via North America. However, it is of the strong conviction that, in view of the presently limited extent of operations over such routings, every effort should be made to proceed cautiously and to avoid unnecessary disruption of the existing world-wide fare structure.

It is believed that the impending operation of SAS between Europe and Asia, which will involve no traffic rights

in North America, but which will be somewhat shorter in mileage than the routing via India, justifies equalization of fares with those applicable on the via India routing.

There appears, however, to be no economic basis for a similar equalization of fares to be applicable on the CPAL routing via Vancouver, which is substantially longer than either the SAS route or that via India. In view of the fact that this routing involves some mileage reduction over the conventional routing via North America, there may be some basis for a limited differential from the fares applicable on the conventional North American routing. However, any such differential should be accompanied by a prohibition against the offering of stop-over privileges in North America. A restriction of this nature would limit the savings to Europe-Asia traffic, for which it is basically intended, and would minimize cumulative damage to the existing world-wide fare structure. The Board considers it extremely important that the level of fares presently applicable on the conventional routing via the North Atlantic and trans-pacific be maintained.

[fol. 3194] V. *Round and Circle-Trip Discounts*

There appear to be various proposals pending which contemplate the reduction or elimination of the 10 percent discount presently applicable to round and circle-trip travel, with respect both to tourist class and first class service. The Board takes no position as to the level of discounts which should apply to such transportation. However, inasmuch as the great majority of international travel is of a round or circle-trip nature, a reduction in the present 10 percent discount would amount to a substantially similar increase in the general fare level. The Board can see no justification for an increase in the general level of fares at this time and accordingly, believes that any reductions in the presently effective discount should be compensated for by a corresponding downward adjustment in the basic level of fares.

VI. *Specific Commodity Rate Structure*

The Board is seriously concerned with the specific commodity definitions currently effective with respect to North Atlantic traffic. It appears clear that the generic descriptions now applicable not only result in unnecessary dilution of revenue through the inclusion of high-value commodities in broad classifications which are rated on the basis of the lowest-valued commodity included therein, but facilitate further dilution in the adequate enforcement of proper application of rates is extremely difficult. Clearly, a system of loosely defined descriptions, subject to a wide latitude of interpretation, may, by its very nature, result in breakdown of the rate structure.

A number of instances have been brought to the Board's attention where high-valued commodities are being carried at rates substantially below those which could be charged by the carriers. The Board is convinced that the establishment of a sound rate structure requires delineation of commodity descriptions with sufficient clarity and detail to preclude the development of such situations. As the Board has stated on numerous occasions, and as the cargo development group of IATA has recognized, the unnecessary dilution of revenues which results from the grouping of many varied commodities, capable of moving at widely different rates, within one classification, inhibits the proper development of cargo transportation by destroying the economic basis upon which truly low rates can be offered to attract those commodities which are not presently moving by air. Although the present North Atlantic specific commodity rates generally do not expire until December 31, 1956, prompt steps should be taken to make all revisions necessary to correct such situations by September 30, 1956.

VII. *Resolution 102, Passenger Expenses en Route*

The Board has previously expressed its belief that some tightening of the provisions of this resolution is required to prevent unwarranted absorption of passenger expenses at over-night stops and connecting points, a practice which [fol. 3195] has apparently created the anomalous situa-

tion whereby through services, in certain areas at least, are becoming less attractive to the traveling public than connecting services.

Since it appears unlikely that any significant revision of the current resolution will result from the forthcoming conference, the Board believes it highly desirable that a working group be established to undertake a comprehensive study of the problem and to formulate a proposal which will restrict such practices as far as possible.

VIII. *Resolution 045—Charters*

In Order No. E-9969, the Board proposed restating the conditions on its approval of the charter resolution to clarify that under no circumstances shall the nature of the group be a valid criterion to evaluate eligibility for charter. Order No. E-10017 withheld making the change to provide an opportunity for a working group of IATA to explore the problem, and also affirmed the condition with respect to unused space on charter aircraft. We have received no material from IATA or any carrier which would indicate that the condition proposed in Order No. E-9969 with respect to the nature of the group, or that made final in Order No. E-10017 with respect to unused space on charter aircraft is not required in the public interest, and the carriers are urged to have such conditions embodied in the resolution.

IX. *Documentation*

The Board in disposing of certain IATA agreements adopted at the Miami conference, stated that, in the future, it would not consider as a valid argument for approval of an agreement which it finds to be adverse to the public interest the allegation that insufficient time would be available to the carriers in which to effect the necessary corrective action.

Although the submission of the resolutions themselves has been very prompt, there has been a lag of several months before the Board's staff has had available to it the full post-conference documentation, particularly the conference minutes. While recognizing the mechanical difficulties en-

countered by the IATA secretariat in processing and finalizing the minutes, the minutes are considered essential to an adequate appraisal and understanding of the action taken by IATA. Unless it proves possible to expedite substantially the submission of the minutes to the Board, it would appear that the IATA carriers should review the conference schedule so as to extend the length of time between the conclusion of the conference and the date upon which the agreements are intended to become effective. This interval of time must be sufficient not only to permit a careful appraisal by the Board of the substantive agreements, but also to afford adequate time to the carriers in which to take remedial action should any government disapprove a resolution.

[fol. 3196] The forthcoming IATA conference presents a particular problem due to the relatively short period between the conference meeting and the date upon which certain important fare resolutions must be acted upon. Should it prove impossible to accomplish the processing of the minutes in substantially less time than heretofore, it is believed the Situation Reports should be made available to the Board. This request should not be construed to represent a precedent for future conference meetings, but rather as an exceptional step necessitated by the unusual circumstances existing this year.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 315

Orders
Serial Number E 570

UNITED STATES OF AMERICA
CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

Adopted by the Civil Aeronautics Board
at its office in Washington, D. C.,
on the 5th day of May, 1947

Docket No. 2423

In the matter of an agreement filed under section 412(a) of the Act, and any other applicable provisions thereof between

PAN AMERICAN AIRWAYS, INC.,

and

PAN AMERICAN-GRACE AIRWAYS, INC.

relating to through service at Balboa

ORDER

A full public hearing having been held in the above-entitled proceeding, and the Board, upon consideration of the record, having issued its opinion containing its findings, conclusions and decisions, which is attached hereto and made a part hereof;

IT IS ORDERED:

1. That the motion of Eastern Air Lines, Inc., filed with the Board on November 6, 1946, to dismiss the petition of Pan American Airways, Inc., filed on August 5, 1946, be and it hereby is denied;

2. That the through flight agreement between Pan American Airways, Inc., and Pan American-Grace Airways, Inc.,

dated July 30, 1946, and the companion agreement between Pan American Airways Corporation and W. R. Grace & Co., dated July 30, 1946, be and they hereby are approved [fol. 3198] subject to the following terms, conditions, and modifications:

(1) That paragraph 13 of the through flight agreement is disapproved and shall be deleted from the agreement;

(2) That approval of the agreements shall be for a term of 3 years from the date of the Board's order, at which time the Board without further hearing, if deemed appropriate, may extend the approval for such period as may be desirable at that time;

(3) That any changes in accounting under the agreements even though considered minor by the parties shall be reported to the Board through the Economic Bureau in accordance with section 407 of the Act;

(4) That agreements in relation to compensation in regard to agency fees, training, or other matters not previously agreed upon in the through flight agreement shall be filed with the Board in accordance with section 412 of the Act.

By the Civil Aeronautics Board:

Wilbur LaRue, Jr., for Port of New York Authority, *amicus curiae*.

OPINION

BY THE BOARD:

This is a proceeding initiated by a petition of Pan American Airways, Inc., (Pan American) for approval under section 412 and such other sections of the Civil Aeronautics Act as may be deemed applicable of an agreement dated July 30, 1946, between it and Pan American Grace Airways, Inc. (Panagra), hereinafter referred to as "contract A" or the "through flight agreement". Panagra, by letter dated August 5, 1946, concurred in the filing of the agree- [fol. 3200] ment under section 412. An agreement between W. R. Grace & Co. (Grace) and Pan American Airways Corporation (Pan American Corp.), also dated July 30, 1946, hereinafter referred to as "contract B", or "parent company agreement", was not formally filed but was annexed to Pan American's petition because of its relationship to the through flight agreement.

Braniff Airways, Inc., Eastern Air Lines, Inc., Colonial Airlines, Inc., National Airlines, Inc., Chicago and Southern Air Lines, Inc., the Department of Justice and the New Orleans Airport Commission were permitted to intervene. After notice to all interested parties, a public hearing was held before Examiners Thomas L. Wrenn and Warren E. Baker. Pursuant to order dated October 11, 1946, (Serial No. E-36), the examiners certified the record of the proceeding to the Board for decision. Briefs were filed by Pan American, Panagra, Eastern, National, and Public Counsel, while Braniff filed a memorandum of position and the Department of Justice a letter withdrawing from further participation in the case. Oral argument was heard at which, in addition to the parties, the Port of New York Authority was permitted to appear *amicus curiae*.

Pan American, a wholly owned subsidiary of Pan American Corp., and Panagra, owned 50 per cent by Pan Ameri-

can and 50 percent by W. R. Grace & Co., operate an extensive system of air transportation in Latin America. The former operates between Miami, Fla., and the Canal Zone, and from New Orleans, La., and Houston and [fol. 3201] Brownsville, Tex., to the Canal Zone, making connections at that point with Panagra. It also operates between Miami and Buenos Aires, Argentina, by way of points in the Caribbean and on the east coast of South America. Pan American also has a route from New York, N. Y., to San Juan, Puerto Rico, connecting there with the Miami-South American route. Panagra operates between the Canal Zone and Buenos Aires via various points on the west coast of South America. It also operates local services in several South American countries, having a system of approximately 8,800 route miles. Since its incorporation in 1929, its commercial operations at all times have been confined to transportation between the Canal Zone and points in South America.

Traffic between the United States and points on the west coast of South America and Buenos Aires, which constitutes a substantial part of Panagra's total business, has been carried between the United States and the Canal Zone by other carriers, largely by Pan American, and at that point delivered to, or received from, Panagra for onward transportation. Most of the business interchanged by Pan American and Panagra at the Canal Zone is carried over Pan American's Miami-Canal Zone route, and originates on or is destined to the eastern seaboard of the United States.[1]

During the course of Panagra's history, differences have developed between the owners of Panagra, the Grace representatives on the board of directors of Panagra having urged that Panagra should apply for an extension to the United States, which proposal was not acceptable to the Pan American representatives. Since Pan American and Grace held equal stock-ownership and representation on

[1] For data on the volume of traffic see *Latin American Air Service*, 6 CAB 857 (1946). Supplemental Opinion Service issued concurrently herewith.

the Panagra board, the proposal of the Grace representa-
[fol. 3202] tives has always failed for lack of a majority. Such an extension of Panagra was the subject of an investigation by the Board which terminated in a dismissal on the ground that the Board was without power to accomplish the compulsory extension of Panagra to the United States.[1] The case was remanded to the Board by the Circuit Court of Appeals for the Second Circuit for further consideration.[2] The Supreme Court granted petitions for review of the Circuit Court of Appeals decision but upon request of the parties the case has not been docketed for argument, pending disposition of the instant proceeding. In the *Latin American* case, decided May 17, 1946, the Board again referred to the differences existing between the owners of Panagra.[3] Following the decision in that case, a meeting of the Panagra directors was held in order that the implications arising out of that decision might be considered. The agreement before us is the outgrowth of that meeting.

Before considering the agreement and the contentions of the parties in connection therewith, it is appropriate to set forth a summary of the principal terms of the agreement. The through flight agreement in substance represents an arrangement between Pan American and Panagra for providing through one plane service between the principal points on Panagra's routes and the United States. Briefly the component parts are:

1. A through flight agreement whereby Pan American will charter any aircraft operated by Panagra into the Canal Zone from Lima or points farther south for through operation in Pan American's scheduled services from the
[fol. 3203] Canal Zone to continental United States. The operation of Panagra aircraft and crews over Pan American routes north of the Canal Zone is under Pan American's responsibility and control and for its account, while the

[3] *Latin American Air Service*, *supra*.

operations south of Balboa are under the control of Panagra. The initial route over which through flights are to be operated is that of Pan American between the Canal Zone and Miami. However, under certain conditions, the agreement may be extended to include schedules over Pan American's route between Balboa and New Orleans, particularly if nonstop authorization is granted, and under certain contingencies to New York and to Chicago, Ill., provided Pan American is authorized to fly from Miami and New Orleans to those points.

2. An overhaul agreement whereby Pan American will overhaul at its Miami base Panagra's flight equipment, whether of the type chartered by Pan American under the through flight agreement or otherwise.

3. An agreement by Pan American to train Panagra pilots or other personnel, whether engaged in through flight service or otherwise, in any training centers operated by Pan American in the continental United States.

4. A modification of the agreement currently in effect whereby Pan American acts as general sales agent for Panagra in the United States.

5. Agreements, under certain conditions, to: (a) negotiate with the objective of entering into an agreement, subject to approval of the Board, for the sharing of revenues from the transportation of traffic between the United States and Buenos Aires and/or Montevideo; (b) negotiate for the operation of nonstop service between points on Panagra's routes and points on Pan American's routes, subject to Board approval; and (c) an agreement to arbitrate unsettled disputes between the parties which arise out of [fol. 3204] the terms of the contract, pursuant to the rules of the American Arbitration Association, such arbitration to be conducted in accordance with the laws of the State of New York.

6. The agreement contains miscellaneous provisions relating to contingencies which may arise such as provision for termination, and the designation of Panagra's president as the person to assert Panagra's rights under

the through flight agreement. The life of the agreement is 99 years subject to termination because of default, or through withdrawal of the Board's approval. The agreement also provides that if the Board imposes conditions upon its approval of the agreement, within the general framework of the agreement, the parties will undertake to negotiate in an effort to meet such conditions.

The parent company agreement is an agreement between Pan American Corp. and W. R. Grace & Co. which ratifies the through flight agreement between Pan American and Panagra. It continues under more explicit terms the existing arrangements under which one of the directors of Panagra nominated by W. R. Grace acts as president of Panagra, provides for the appointment of a vice president operations of Panagra, to be selected with the approval of Pan American, and provides for the disposition of pending litigation between the parties. Both agreements contain provisions vesting the president of Panagra with full authority to assert Panagra's rights under the through flight agreement. All questions as to any action taken by the president of Panagra are to be settled by arbitration if the parties are unable to reach an accord.

Section 412 of the Act, under which approval of the through flight agreement is requested, provides that any agreement between air carriers or other carriers affecting [fol. 3265] air transportation and providing for the pooling of services or equipment or for other cooperative working arrangements shall be filed with the Board. Paragraph (b) of that section provides that the Board shall disapprove any such agreement, whether or not previously approved, that it finds to be adverse to the public interest and shall approve any such agreement that it does not find to be adverse to the public interest.

The contention has been made that section 401 is also involved in this proceeding. Section 401 of the Act relates to certificates of public convenience and necessity and the specific references here involved provides that no air carrier shall engage in transportation unless there is in force a certificate issued by the Board after notice and hearing. It

is argued by some of the intervenors that under the through flight agreement Panagra would be engaging in air transportation between the United States and Balboa so that Panagra would be required to obtain either an amendment to its certificate under section 401 or a specific exemption to the extent necessary to perform the operations contemplated.

Paragraph 6 of the through flight agreement states that: "Pan American shall have full responsibility for and control over the operation of Panagra's aircraft over Pan American's routes as provided in this agreement. Pan American's responsibility for such operation without limiting the generality of the foregoing shall include responsibility for operation, dispatch, flight plane clearance, radio plane guard, and 'in-flight' instructions, and all communications, navigation, and weather facilities and services, and also for loading and discharge of airplanes, handling of traffic and passenger service". It appears from the testimony that Pan American will establish schedules north of the Canal; that it will inspect Panagra aircraft submitted for operation over its routes and can reject such aircraft if [fol. 3206] unsatisfactory; that the revenues received from the operation will be for Pan American's account, that Panagra crews will be qualified and included under the operations specifications of Pan American's Latin American Division and will utilize Pan American's route manual, operations manual, and aircraft manual; that Pan American will have authority to cancel a flight, turn it back, delay or reroute it for operational reasons; and that Pan American will perform all of the operations of the aircraft as a commercial unit from the landing of the aircraft northbound in Balboa to the completion of the flight southbound in Balboa. The evidence also shows that Panagra and Pan American will continue to use the same form of ticket which has been used in the past for passengers traveling between the United States and the west coast of South America via the routes of Pan American and Panagra. This ticket form, which is in evidence, shows a demarkation between the operations of Pan American and operations by Panagra. The agreement requires that an appropriate notice be

placed in the aircraft informing the public that the airplane is a Panagra airplane under charter to Pan American. In short, the evidence dispels any belief that the control and responsibility will be in Panagra under the agreement or that there will be a holding out to the public of Panagra as the carrier certificated to operate north of the Canal. Therefore, on the basis of the facts of record, we conclude that no amendment of Panagra's certificate under section 401 of the Act is required.

Applicants request approval of the through flight agreement but not of the parent company agreement, although it was annexed to the petition because of the relationship to the through flight agreement. The intervenors contend that the two contracts are part of one transaction and, as such, must be treated as one contract. While the applicants have stated that they do not believe that the statute requires filing of the parent company agreement, they have not [fol. 3207] challenged the Board's jurisdiction over the agreement at any subsequent time during the proceeding. On the contrary, they stipulated that the Board may consider the parent company agreement in determining any and all issues of this proceeding and that if the Board shall be of the opinion that the agreement requires formal approval, then it shall be deemed filed for such approval by Pan American Corp. and by W. R. Grace. Clearly, the parent company agreement relates to and implements the provisions of the through flight agreement between the operating companies. Moreover, the contracts have been submitted as settlements of controversies which existed primarily between the two parent companies. We have previously observed that if closely interrelated contracts were not regarded as one transaction where the facts of record so warrant, we would be sanctioning a device whereby provisions affecting air transportation which were adverse to the public interest could be shielded from appropriate regulation in evasion of the clear intent of the Act.[5] Under the circumstances, in view of the close relation be-

[5] United A. L., Operation of Catalina Air Transport, 6 C.A.B. 1041 (1946).

tween the contracts, we will consider them as parts of a single transaction.

The intervenors further contend that the provisions of both the through flight agreement and the parent company agreement involve section 408 of the Act inasmuch as there is an agreement on the part of one air carrier to lease and operate a substantial part of the properties of another air carrier. The only question raised is whether or not the amount of property involved is a substantial part of the properties of Panagra, within the meaning of section 408 [fol. 3208] (a) (2). At the beginning of the operations, the four-engine equipment which will be used will amount to approximately 3 percent of the present properties of Panagra. However, the provisions of the contract and the evidence introduced by the parties indicate that in the future additional equipment will be utilized which will increase this amount to about 7 percent of the properties of Panagra. Various contingencies under the contract contemplate possible expansion of the operation (if Pan American should be extended from Miami to New York and to Chicago), which would probably involve more substantial portions of Panagra's equipment. The word "substantial" is a relative term, the meaning of which is to be determined by all the circumstances concerning the transaction in which reference to the expression is used, and it has been held that proportions as low as 7 and even 2 percent are substantial.* Under the circumstances of the present case we conclude that the contract which contemplates the lease of Panagra's property in the amount of between 3 percent and 10 percent must be considered as involving a substantial proportion of the properties of that carrier, and we are therefore of the opinion that this provision of section 408 is applicable to the transaction.

It has been suggested that either Grace or Pan American Corp. has under the provisions of these agreements acquired control of the air carriers in a manner requiring

---

*United A. L.—Western A. E., Interchange of Equipment, 1 C.A.A. 723 (1940), and cases cited therein. Lockheed aircraft-acquisition of United Airports Co., 6 C.A.B. 328 (1940).

approval under section 408. This contention is unimportant for the purpose of bringing the transaction under the jurisdiction of the Board since we have determined that the provision relating to the leasing of equipment confers jurisdiction under section 408. However, it is contended that every party desiring approval of this lease or acquisition [fol. 3209] of control must apply for such approval and that Grace and Pan American Corp. are necessary parties to this transaction. Therefore, while the question of whether each one of the four parties here involved acquires control or leases property is unimportant from the jurisdictional standpoint, it is important from the technical standpoint since Grace and Pan American Corp. have not formally filed an application for approval of the parent company agreement.

The provisions of section 408(b) require that any party desiring approval of such matters as are set forth in section 408(a) shall file an application for approval which the Board after notice and hearing shall approve if found to be consistent with the public interest and disapprove if found to be inconsistent with the public interest. The section further provides that the Board shall not approve such transactions as would result in creating a monopoly, and thereby restrain competition or jeopardize another air carrier not a party to such transactions. It is further provided that if the applicant is a carrier other than an air carrier, the Board shall not approve such transaction unless it will promote the public interest by enabling such carrier other than an air carrier to use aircraft to public advantage in its operation and will not restrain competition. In comparing the tests set out above with those set out in section 412, it is apparent that the latter makes approval of an agreement filed thereunder dependent upon that agreement being consistent with the public interest. In substance, therefore, this test under section 408 and 412 is the same. However, matters under section 408 may not be approved which result in creating a monopoly and certain tests are also applicable when the party seeking approval is a carrier other than an air carrier.

[fol. 3210] Pan American and Panagra are both air carriers and under the agreement Pan American leases Panagra equipment. It is clear, therefore, that Pan American must obtain our approval under section 408. Grace and Pan American Corp. participate in this transaction only by virtue of the parent company agreement which is neither a lease, purchase, or contract to operate equipment. The only question in relation to these parties is whether they acquire control of an air carrier. Grace and Pan American Corp. acquired their respective 50-percent holdings in Panagra 9 years before the enactment of the Civil Aeronautics Act. By virtue of the fact that the ownership of Panagra is evenly divided, each held a certain amount of negative control.[7] We have heretofore stated that section 408 does not apply to the continuance or maintenance of a control relationship created prior to the effective date of the Civil Aeronautics Act and existing unchanged from that date forward, but that section 408 does apply in a case where the extent or effectiveness of control has increased.[8] We are unable to find that either Grace or Pan American Corp. acquires any additional control over Panagra under the provisions of the parent company agreement. On the contrary, to the extent that the negative control of either company is now subject to arbitration under the parent company agreement, there may be a decrease in the control previously held since it cannot now be exercised arbitrarily but only in accordance with the provisions, the intent, and purposes of the parent company agreement. Therefore, we conclude that neither of these companies is required to seek approval of its relationship to the agreement.

Eastern has contended that the proceeding lacks essential parties. This is based on an argument that the transaction involves acquisition of control of Panagra by Pan American, Pan American Corp., and Grace, subject to section 408 of the Act, and that none of these corporations [fol. 3211] has filed a formal application for Board approval pursuant to that section. We have already found

---

[7] *Panagra Terminal Investigation*, supra.

[8] *Railroad Control of Northeast Airlines*, 4 C.A.B. 379 (1943).

that the only element in the transaction that brings it within the scope of section 408 is the lease by Pan American of a substantial part of the properties of Panagra. This would eliminate any necessity for an application under section 408 by any corporation other than Pan American. The petition filed by Pan American in this proceeding, dated August 1, 1946, would appear to constitute a sufficient application for that purpose. All parties and interveners, including Eastern, were clearly on notice that the proceeding involved a determination of whether the transaction should be approved under section 412 of the Act and that the evidence in the hearing might show that approval was also required for Pan American's lease of Panagra aircraft under section 408. Consequently, no question can be raised as to sufficiency of notice and hearing.

A question has also arisen with respect to admission in this proceeding of certain portions of the record from the *Panagra Terminal Investigation*, Docket No. 779. At the hearing Eastern during cross examination submitted some of this material, which was admitted by the examiner over the objections of counsel for Pan American and Panagra. Thereafter, counsel for all parties, interveners, and public counsel agreed to a stipulation by which all of the material of record in Docket No. 779 was stipulated into this proceeding subject to right of renewal of objection by Pan American and Panagra. On briefs and argument before the Board various counsel relied upon portions of the record in Docket No. 779 to show the background of the transaction now before us, and its effect upon the public interest. Pan American and Panagra have renewed their objection to the admission of such evidence. We believe that our decision in this proceeding requires review of all issues with respect to the public interest raised by any of the interveners. Consequently, although some of the matter [fol. 3212] from Docket No. 779 introduced into this record has only slight materiality, we believe that it should be available for consideration of the arguments made by the applicants and the interveners.

Under the terms of sections 408(b) and 412(b), two issues are presented for decision: (1) whether or not the

agreements are adverse to or inconsistent with the public interest, or will violate any of the conditions of section 408, and (2) whether or not the agreements will result in creating a monopoly and thereby restrain competition or jeopardize another air carrier. The routes of Panagra south of the Canal Zone and those of Pan American north of the Canal Zone are essentially complementary. While each provides a great amount of local service, much of their total revenue is obtained from through traffic interchanged at the Canal Zone. Panagra and Pan American compete for traffic at only two South American points, namely, Buenos Aires and Montevideo. Clearly the agreement would not, in any way reduce the quantum of competition. On the contrary, the improvement of service which may result under the through flight agreement enhances Panagra's ability to compete effectively for traffic between the United States and Buenos Aires via the west coast of South America, as against Pan American's service down the east coast of South America. Braniff Airways has been authorized to provide a direct service from Houston to South America via Havana and the Canal Zone, and by connections with National at Havana Braniff provides a two-carrier service from Miami to the Canal Zone and west coast points. Admittedly, a through flight agreement of this nature will enable these two carriers cooperatively to compete more effectively with other carriers performing similar service. We have previously indicated in the *United Western Interchange Agreement, supra*, that the restriction in section 408(b) against creating a monop-
[fol. 3213] oly is inapplicable to mere improvements in existing service whereby connecting service is better able to compete against one-carrier or other connecting services. It is clear in this instance that the competitive situation is not changed in such a way as to result in the creation of a monopoly.

The remaining issue insofar as section 408 is concerned is whether the transaction is consistent with the public interest. Insofar as the public interest is concerned, the expressions "adverse to", as used in section 412, and "not

consistent with", as used in section 408, have essentially the same meaning.

Major reasons advanced by the applicants why the agreement is in the public interest and should be approved are: (1) it will eliminate the inconvenience to passengers, mail, and cargo arising from the necessity of changing planes at Balboa; (2) it makes available to Panagra Pan American's maintenance, training, and sales facilities in the United States; and (3) it will enable the Panagra-Pan American service to develop traffic between the United States and South America and to compete more effectively with other carriers—American and foreign flag—operating over this route.

With respect to the first point, the evidence shows that during the first half of 1946, about 1,250 passengers a month travelled between the United States and points on Panagra's route south of Balboa. These passengers now change planes at Balboa. The through flight agreement would eliminate this transfer for passengers through the Miami gateway, who comprise about 60 percent of the total. The applicants point out that the present schedules must be set up to provide time for connections at the transfer point, Balboa, and that 1 hour 30 minutes on southbound and 1 hour 45 minutes on northbound flights are now allowed as compared to maximum layovers of 20 to [fol. 3214] 30 minutes that would be scheduled under the through flight agreement. Under present arrangements, passengers, mail, and cargo must be transferred from the plane of one carrier to that of the other, and the delay and expense are greatly increased when connections are missed. The evidence shows that the distances covered by the connecting services north and south of Balboa and the conditions of climate and terrain make these flights much more subject to delay than is the case on connecting services within the United States and that about 25 percent of the connections are missed. It is asserted that the relatively thin traffic potential over the routes both north and south of the Canal Zone does not permit the operation of

---

United A.L.—Western A. E. Interchange of Equipment, supra.

a large number of schedules, and therefore the penalty for a missed connection is much greater than in the United States and generally involves at least an overnight delay at the Canal Zone. In the past when connections have been missed passengers have usually had to remain for several days awaiting an empty seat to permit onward passage. The evidence shows that during the period of 1½ years preceding the hearing, a great amount of time has been lost by passengers, and that a passenger's out-of-pocket living expense in the Canal Zone approximates $20.00 per day.[10] On the basis of traffic for the first half of 1946, an average of 23 passengers a day were subjected to the possibility of a missed connection. It appears from the record that missed connections are also costly to the carriers, since the aircraft that proceeds without being able to wait until the delayed ship arrives usually has many empty seats due to the fact that the space cannot be resold on short notice at Balboa where little traffic is generated.

[fol. 3215] The applicants point out that the difficulties of connecting service at Balboa will become more acute as schedules are speeded up by use of larger and faster equipment, and that this situation will become particularly aggravated when DC-6 sleeper planes are put into operation in 1947. It is asserted that the result in passenger inconvenience of a change of planes at Balboa would make sleeper service useless. However, these difficulties will be eliminated by the through flight service which will also avoid crowded conditions at Balboa, and eliminate the necessity for passengers passing through medical, immigration, and customs inspections, and the documentation required for clearing aircraft.

Only 4.5 percent of Panagra's passenger revenue is attributable to passengers between the United States and Buenos Aires who might possibly be attracted to Pan American's east coast service. With this exception Pan

[10] The expense estimate does not take into account the expense to the travelling public from business time lost and from the disruption of arrangements based upon the scheduled arrival time at destination.

American has every motive to promote Panagra's service not only because of Pan American's position as a connecting carrier but also because of its substantial stock interest in Panagra. The evidence shows that Panagra's traffic procedures have been in part handled by Pan American; that the two companies use the same ticket, the same airway bill, and the same tariff provisions; and that Panagra uses the same operations form of flight forecast, flight plan, and log as does Pan American.

The applicants estimate that the maintenance agreement whereby Pan American will do Panagra's maintenance work, will effect savings of about $380,000 annually to Panagra and at the same time permit a further spread of overhead costs by Pan American. Panagra officials testified that its higher cost of maintenance at Lima has been the result of a number of factors, including its distance from sources of supply, requiring maintenance of abnormally large inventories. The cost of those inventories is substantially [fol. 3216] increased by the necessity of transporting materials from the United States. While the labor rate is less expensive than in the United States, Panagra's experience has shown that the per hour productivity is not comparable to that of United States' labor.

The record indicates that the situation as to training personnel is comparable to that in the field of maintenance, and Panagra estimates that this feature of the agreement will save it about $150,000 a year. Panagra must now recruit many of its personnel in the United States, which problem has been made more difficult by the necessity of having all indoctrination and training in South America. It has been Panagra's experience that some men for one reason or another do not qualify for productive employment after their training period and it costs Panagra approximately $3,500 per man to transport and train a new employee to South America and return him to his home when he proves unsatisfactory during the training period. By sharing training with Pan American at its base in Miami, Panagra will be assured that its personnel will be acceptable and ready immediately to commence employment when sent to South America. In addition, Panagra will be able to

bring its flight personnel into more direct contact both by initial training and by refresher courses with CAA radio range and standard domestic airline procedures. Panagra is of the opinion that a training program at Miami making possible more frequent visits to the United States will aid in the retention of its personnel and in the improvement of morale.

From its inception, Panagra has utilized the services of Pan American as sales agent in the United States. The agreement provides for the continuance of this arrangement and contemplates that Pan American and Panagra will undertake joint programs for the advertising of their respective routes and services. Panagra will receive adequate display of its name and routes and also have a voice in the [fol. 3217] formulation of the program. Provisions are made for designating specific individuals in the branch offices of Pan American to handle traffic on Panagra's routes and affirmative steps must be taken by Pan American to correct any complaints by Panagra. It is asserted that this feature of the agreement is in the interest of Panagra because, with the limited scope of its business, Panagra could not afford a sales coverage of anything like the same extent as that which Pan American can provide and at the same time that the arrangement is advantageous for Pan American since it provides a further volume of business over which the cost of maintaining facilities can be spread.

Concerning the competitive considerations, reference was made to the Crozier report[1] which shows that total traffic between all parts of the United States and the Canal Zone is about 46 passengers per day in each direction over the sector north of the Canal Zone. The applicants point out that they are now confronted with competition by Braniff and with a Braniff-National connecting service, and in addition that they are faced with competition by at least six foreign-flag carriers, namely, British Overseas Airways, FAMA, Peruvian International Airways, a

[1] "Overseas Air Traffic Pattern, Transcaribbean and Offshore-Island Areas" prepared by F. H. Crozier, Chief, Research and and Analysis Division, Civil Aeronautics Board, August 1944.

Chilean airline, Taca de Colombia, and Avianca. Panagra points out that the through traffic represents at this time 51 percent of its passenger revenue, that there is every reason to believe that this through traffic will increase, and that the relative importance of the through traffic to it will be further enhanced by developments in Latin America, [fol. 3218] which over a long term period seem destined to divert local South American traffic from it to local, national and European competitors. In this connection, attention is also directed to recent developments restricting Panagra's right of cabotage in South American countries. Panagra points to the fact that the total population of all the cities it serves is about 6,500,000, of which about 3,500,000 are in Buenos Aires, that it must maintain its position over an 8,800-mile route thinly populated in competition with Braniff and South American and European carriers, and that virtually every important city served by it is also served by local or foreign competitors.

The evidence of record is convincing that passengers between the United States and points on Panagra's routes are greatly inconvenienced both in time and expense by the necessity of changing planes at Balboa. The proposed through-flight service would eliminate immediately that inconvenience for all traffic using the Miami gateway—about 60 percent of the travel during the first half of 1946 between the United States and points on Panagra's route. The convenience to passengers will increase in the future with the use of larger and faster equipment and especially sleeper equipment. In addition, the participating carriers would derive substantial benefit and economies from the arrangement. Panagra, from the use of Pan American's maintenance bases and training facilities, and more extensive use of Pan American's sales organization and advertising coverage; Pan American will profit by the mainte- [fol. 3219] nance of Panagra aircraft permitting a further spread of overhead costs, while both will benefit from the improved service enabling them to develop more traffic and to compete more effectively with other carriers operating in the area.

The applicants represent that the agreement settles outstanding difficulties between the parties, which created an unhealthy condition in the internal affairs of Panagra, and which have been of concern to us.[12] Some of the interveners contend that the agreement is not the best solution, and that it is not possible to resolve these difficulties under the agreement. The question presented to us in this proceeding is whether this agreement is adverse to the public interest; not whether it or some possible future proposal is the preferable method of resolving a controversy. The applicants express themselves as satisfied that the controversy has been resolved and urge approval of the agreement as a settlement of their difficulties.

The contrast between conflicting views and actions of these parties in the *Panagra Terminal Investigation*, the record of which is admitted into this proceeding, and their espousal of this agreement as a satisfactory solution of their difficulties, is impressive as to their intent to resolve the controversy. We cannot, as the interveners urge, disregard such a manifestation and conclude that the agreement is not a settlement and will not work because an internal conflict has heretofore existed. Any action eliminating conflict and looking toward harmony is an improvement over the past situation and as such is beneficial to the public.

[fol. 3220] Upon the basis of the foregoing considerations and the benefits and economies which will result from the agreement, weighed against the consideration advanced by the interveners, we conclude that the general purpose and intent of the agreement is consistent with the public interest. However, there are certain specific provisions ancillary to the general agreement and which do not affect its general substance that require the imposition of terms and conditions or some statement of our views with respect thereto, in order that there be no misunderstanding of our action in approving the agreement.

Paragraph 13 of the through flight agreement contains provisions to negotiate agreements, the first of which re-

---

[12] *Panagra Terminal Investigation*, *supra*, and *Latin American Air Service*, *supra*.

lates to pooling of revenues from traffic between Buenos Aires and Montevideo and the United States. Such an agreement by its terms would be subject to the Board's approval. Pooling agreements like other agreements which tend to eliminate competition generally are contrary to the public interest, except in unusual circumstances. No unusual circumstances have been alleged in this instance and we do not deem it appropriate to take any action at this time which would indicate approval, even in principle, of pooling agreements before there is a specific factual situation presented to us. The provisions of the same paragraph relative to agreements for nonstop services between points on two different routes of the two carriers present a similar situation. In this proceeding no evidence of a need for nonstop services between routes of these carriers has been presented to the Board so as to warrant approval of this phase of the agreement even if only in principle.

[fol. 3221] Rather than indicate a tacit approval and perhaps lead to confusion in the minds of the parties here as well as of other members of the air transportation industry, we deem it desirable to disapprove paragraph 13 of the through flight agreement. The parties have made it clear that approval of the agreement is not contingent upon the approval of the principle of pooling and that this particular provision can be disapproved without affecting other phases of the agreement. During oral argument, counsel stated that there is no certainty that any agreement of this nature will ever be made but that it was inserted as a matter of full disclosure with the thought that if such agreement were later to be made and submitted, the parties would not want the Board to feel that there has been any lack of candor as to their intentions. In view of these circumstances, our approval of the through flight agreement is subject to the condition that paragraph 13 of that agreement shall be inoperative and deleted from the agreement.

During the hearing it was developed that there may be occasions when it will be necessary because of equipment damage or illness of crews for a Pan American plane to be flown by a Panagra crew or a Panagra plane to be flown

by a Pan American crew. Some concern was expressed regarding the safety aspects in such case, but witnesses for the applicants testified that the 4-engine equipment of each company which will be used is identical, having identical cockpit arrangement and instrument panels, with the exception of more oxygen outlets and a greater number of frequencies on radio equipment in the Panagra planes used in the southern portion of its South American route. The applicants' technical witnesses stated that it is desirable that the arrangement of the instrument panels and controls [fol. 3222] should be identical in all equipment used under this arrangement. In view of their expression and the fact that the occasions upon which this substitution of equipment or crews will be limited, we do not deem it necessary to require a condition that identical equipment be used. However, we will assume and expect that the parties will continue to require such uniformity of equipment in conformity with their testimony.

The through flight agreement contains a provision giving through traffic precedence over other traffic to be carried by the aircraft through the means of blocking off a specific number of seats and designated amount of mail and cargo capacity which will be designed to accommodate the through traffic. We recognize that this is an attempt to place in effect on a two-carrier operation a reservation system somewhat similar to that used by most carriers within their own route structure. It is possible that through the blocking off of an excessive number of seats on through schedules operated under the agreement and a reduction of the number of local schedules operated by Pan American between the Canal Zone and the United States, adequate service might be denied local passengers. Pan American under its certificate authorizing service between the United States and the Canal Zone is obligated to provide adequate service to passengers between those points, and its witnesses stated that it had no intention of neglecting or curtailing service for these passengers. If Pan American maintains sufficient schedules for local passengers, there may be no necessity for many local passengers to travel on the through schedules operated pursuant to this agree-

ment. However, the parties have indicated that it will be necessary to carry local passengers on some through schedules. Whether such a system will result in unfair discrimination against local traffic and inadequate service for [fol. 3223] such traffic can only be determined in the future. Therefore, our approval of this agreement is not to be construed as a specific approval of the preference provisions for the through traffic contained in the through flight agreement. Should discrimination against local traffic occur, the Board can upon complaint or upon its own motion investigate and remedy such practices.

The agreement is for a term of 99 years from the effective date, subject to termination under certain conditions. Counsel stated that the term was selected because it is typical of an agreement intended to be permanent. Air transportation in South America is undergoing changes through inauguration of additional services both by nationals and outside countries and the service pattern is not yet complete. It may well be that within a few years conditions will be entirely different from those present under which the agreement is being approved. In order to afford the greatest latitude in adjustment, if necessary, we will approve the agreement for a period of 3 years from the date of our order herein, at which time the Board with or without further hearing, if deemed appropriate, may extend the approval for such period as may be desirable in view of the circumstances at that time.

Paragraph 17 of the agreement contains provisions for payment for services performed by each party under the agreement. While rather detailed provisions have been set forth covering Panagra's compensation for flight equipment and crews furnished for operations under the agreement, the provision for payment by Panagra to Pan American for training and other services performed are not so definite. The agreement states that the parties will from time to time establish the amount of such payment as may be appropriate. Moreover, some of the accounting provi- [fol. 3224] sions designate terms and classifications without clear definition giving an elasticity which permits different interpretation. In view of these facts, it appears that the

public interest will be served by the parties reporting any changes in accounting under the agreement to the Board in accordance with the provisions of section 407 of the Act. Accordingly, the submission of such changes will be made a condition of approval of the agreement.

Upon the basis of the foregoing considerations and all the evidence of record, we find that the transaction consisting of a through flight agreement between Pan American Airways, Inc., and Pan American-Grace Airways, Inc., and the parent company agreement between W. R. Grace & Company and Pan American Airways Corporation, dated July 30, 1946, is not adverse to or inconsistent with the public interest, that such transaction does not result in creating a monopoly and thereby restrain competition or jeopardize another air carrier not a party thereto, and we therefore approve the agreements under provisions of sections 412 and 408 of the Civil Aeronautics Act subject to the following conditions:

1. That paragraph 13 of the through flight agreement is disapproved and shall be deleted from the agreement;

2. That approval of the agreements shall be for a term of 3 years from the date of the Board's order, at which time the Board without further hearing, if deemed appropriate, may extend the approval for such period as may be desirable at that time;

3. That any changes in accounting under the agreements even though considered minor by the parties shall be reported to the Board and directed to the Economic Bureau in accordance with section 407 of the Act;

[fol. 3225] 4. That agreements concerning agency fees, training, or other matters not previously agreed upon in the through flight agreement shall be filed with the Board in accordance with section 412 of the Act.

An appropriate order will be entered approving the agreements subject to the above conditions, and denying

the motion of Eastern Air Lines, Inc., that this proceeding, Docket No. 2423, be dismissed.

Landis, Chairman, Ryan, Branch and Lee, Members of the Board, concurred in the above opinion. Youngs, Member, did not take part in the decision.

WASHINGTON, D. C.

Adopted by the Civil Aeronautics Board
at its office in Washington, D. C.,
on the 4th day of May, 1950

Docket No. 3787

In the Matter of the Application filed by

Pan American Airways, Inc.

for a modification of the Board's Order Serial No. E-570 approving an agreement between Pan American Airways, Inc., and Pan American-Grace Airways, Inc., and a companion agreement between Pan American Airways Corporation and W. R. Grace & Co.

Docket No. 4329

In the matter of the petition of

Councils 10, 17, 26, 30, 36, 37, 53, 56, and 61, Air Line Pilots Association International (AFL)

ORDER EXTENDING APPROVAL OF AGREEMENT

The Board by Order Serial No. E 570, dated May 5, 1947, having approved for a term of three years from the date of such order an agreement between Pan American Airways, Inc. (Pan American), and Pan American-Grace Airways, Inc. (Panagra), known as the "Through Flight Agreement," relating to through one-plane service between the United States and certain points in South America, together with a companion agreement between Pan American Airways Corporation and W. R. Grace & Co.;

[fol. 3228] Pan American having filed an application seeking extension of Board approval of said agreements, as amended, for a period to July 1, 1960; and the Board having consolidated said application into the proceeding, known as the *National Route Investigation Case*, Docket No. 3500, for hearing and determination;

Petitions having been filed in Docket No. 4329 on behalf of Councils 10, 17, 26, 30, 36, 37, 55, 56, and 61 of the Air Line Pilots Association International (ALPA), requesting expeditious action and withdrawal of approval of the said Through Flight Agreement and denying further approval for any period subsequent to May 5, 1950, and in the alternative if the Board does not so act, pending the ultimate decision in Docket No. 3500 that the Board require that Pan American adequately compensate the Pan American pilots adversely affected by the operation of the Through Flight Agreement, and a petition and answer having been filed on behalf of Councils 38 and 83 of ALPA, requesting extension of the said Through Flight Agreement; and these petitioners having been granted leave to intervene in the *National Route Investigation Case*, Docket No. 3500, by Order Serial No. E 4088, dated April 20, 1950;

Panagra, on April 17, 1950, having filed in Docket No. 3787 an application for extension of the Pan American-Panagra Through Flight Agreement, pending the decision of the issues relating to that agreement in Docket No. 3500;

The Board, upon consideration of said application by Panagra, the various petitions and answers of the pilot

groups, and the Pan American-Panagra Through Flight Agreement, finding that:

[fol. 3229] (1) The issues raised by the petitions of the ALPA pilot groups in Docket No. 4329 will be fully heard and determined in the proceeding in the *National Route Investigation Case*, Docket No. 3500;

(2) The public interest requires that operations pursuant to the said Through Flight Agreement should not be suspended prior to such time as the Board has had an opportunity to consider and adjudicate the issues raised in the pending proceeding and any such suspension would result in hardship to the parties thereto, their employees, and the public;

(3) The consideration and adjudication in said issues will not be completed prior to May 5, 1950;

(4) The petitions do not set forth sufficient grounds to warrant the Board granting the requested relief of imposing conditions upon Pan American for the protection of Pan American pilots during operations under the Through Flight Agreement pending disposition of the issues raised by that agreement in Docket No. 3500.

IT IS ORDERED THAT:

1. The petition of Councils 19, 17, 26, 30, 36, 37, 55, 56, and 61 of ALPA in Docket No. 4329, be and it hereby is denied;

2. The approval granted to the agreement between Pan American and Panagra by Board Order Serial No. E-570, dated May 5, 1947, known as the Through Flight Agreement, together with a companion agreement between Pan American Airways Corporation and W. R. Grace & Co. be and it hereby is extended from and after May 5, 1950, until such time as the Board enters an order approving or disapproving the application of Pan American for the extension of said agreements, as amended, to July 1, 1960;

[fol. 3230] 3. The temporary approval granted herein relates only to the two agreements as approved by Order Serial No. E-570, dated May 5, 1947, and not to any sub-

sequent amendments thereto on which the Board has not yet acted and is subject to all the terms and conditions of said prior order.

Docket No. 3787

In the matter of Agreements filed pursuant to section 412(a) of the Civil Aeronautics Act involving

Pan American Airways, Inc.

and

Pan American Grace Airways, Inc.

relating to through service at Balboa

ORDER APPROVING AGREEMENTS

The Board by Order Serial No. E-570, dated May 5, 1947, having approved for a term of three years from the date of such order an agreement between Pan American Airways, Inc. (Pan American), and Pan American-Grace Airways, Inc. (Panagra), known as the "Through Flight Agreement" relating to through one-plane service between the United States and certain points in South America, together with a companion agreement between Pan American Airways Corporation and W. R. Grace & Co.;

Pan American having filed an application for modification of the Board's Order Serial No. E-570 and seeking therewith an extension of Board approval of said agreements, as amended, for a period to July 1, 1960; and the Board having consolidated said application into the proceeding known as the *National Route Investigation Case*, Docket No. 3500, for hearing and determination;

Panagra having filed an application for extension of the Pan American-Panagra Through Flight Agreement, pending the decision of the issues relating t[o] that agreement in Docket No. 3500; and the Board by Order Serial No. E-4130, dated May 4, 1950, having extended the approval granted by Order Serial No. E-570 from and after May 5, 1950, until such time as the Board enters an order approving or dis- [fol. 3232] approving the application of Pan American for modification of Board Order Serial No. E-570 and extension of said agreements, as amended, to July 1, 1960; and

There having been filed with the Board pursuant to section 412(a) of the Civil Aeronautics Act and Part 261 of the Board's Economic Regulations certain additional amendments to the Pan American-Panagra Through Flight Agreement identified as Agreements C.A.B. Nos. 727 A, 727 A-2, 727 A-3, 727 A-4, 727 A-5, 727 A-7, and 727 A-8;

The Board, upon consideration of said amendments to the Pan American-Panagra Through Flight Agreement, not finding them to be adverse to the public interest or in violation of the Civil Aeronautics Act

IT IS ORDERED THAT:

Agreements C.A.B. Nos. 727 A, 727 A-2, 727 A-3, 727 A-4, 727 A-5, 727 A-7, and 727 A-8 be and they hereby are approved until such time as the Board enters an order approving or disapproving the application of Pan American for the modification of Board Order Serial No. E-570 and extension of the Pan American-Panagra Through Flight Agreement, as amended, to July 1, 1960; provided that the rates, charges, and allocations prescribed therein are subject to review by the Board for rate making purposes.

ORDER APPROVING AGREEMENTS

A public hearing having been held on the applications for approval of the subject agreements, and the Board, upon consideration of the record, having issued its tentative opinion containing its findings, conclusions and decisions which is attached hereto and made a part hereof;

[fol. 3234] IT IS ORDERED THAT:

1. The Agreement in Docket No. 3785 between National Airlines, Inc. (National) and Pan American-Grace Airways, Inc. (Panagra) for the interchange of equipment be and it hereby is temporarily approved pending disposition of the proceeding in Docket No. 4882;

2. The Agreement in Docket No. 3787 between Pan American World Airways, Inc. and Panagra, known as the Through Flight Agreement, and a companion agreement between Pan American and W. R. Grace & Co. be and they hereby are temporarily approved pending disposition of the proceeding in Docket No. 4882;

3. The approvals granted herein are subject to the following terms and conditions:

(1) The through service provided pursuant to the agreements shall be one plane service, except in cases of emergency, on both northbound and southbound flights;

(2) Paragraph 14 of the National-Panagra agreement is disapproved and the approval of the financial provisions of said agreement is predicated on a rental charge to National for the lease of Panagra equipment based upon National's available seat mile costs for the type of equipment involved;

(3) The approval extends to the operation of the through flight known as the El Inter Americano between New York City, Washington, D. C., Miami, Florida and the cities on Panagra's routes listed in the proposed schedules submitted for the record; additional through service schedules shall be filed with the Board and served on each carrier serving a point on such proposed schedules 15 days in advance of the effective date of such schedules and operations under such schedules be not permitted until after they have been approved by the Board, such approval to be granted with or without hearing, as the Board may determine;

(4) The carriers shall comply with the "Requirements for Air Carrier Equipment Interchange" contained in Civil Air Regulations Draft Release No. 50-8, dated October 2, 1950, section 40.168, and any amendments thereto;

(5) The parties thereto should render adequate through service to each city to which service is rendered pursuant to said agreements;

(6) No operations under the agreements shall be discontinued without prior application to the Board and decision thereon, with or without hearing at the Board's discretion; provided that this condition does not apply to mere revisions of schedules which do not eliminate through service to any point for which it has been approved;

(7) The approval of the agreements granted herein shall terminate if at any time the Board finds that the continued

operation of the parties under said agreements or under any of their provisions would be adverse to the public interest, or in violation of the Civil Aeronautics Act of 1938, as amended, or of any rule, regulation, or order of the Board, now or hereinafter in effect;

[fol. 3235] (8) No through-plane operations other than those approved by the Board shall be conducted under the agreements and that, for this purpose, a flight with the same plane between any two points shall be deemed to be a through-plane operation between those points unless there is a layover at an intermediate point between said two points, such layover to be 1½ hours after scheduled arrival time or 1 hour after such actual arrival time, whichever is later;

(9) Board approval herein shall not be deemed a determination for rate-making purposes of the reasonableness of any of the costs or charges claimed by any carrier under the terms of the interchange agreement;

(10) All agreements modifying or supplementing the basic agreements approved herein shall be filed for Board approval at least 20 days prior to the proposed effective date of such modifying or supplementing agreements;

(11) The Board retains jurisdiction of this proceeding for the purpose of imposing from time to time such further terms and conditions as it may find to be just and reasonable and for the further purpose of requiring the submission of such special reports on the financial and operating aspects of the operations as the Board may from time to time order;

4. All parties and interveners may file exceptions and supporting briefs to the tentative opinion and order issued herein not later than 30 days after the date of service of this order;

Alexander G. Hardy, and *Frederick W. Bechtold*, Public Counsel.

OPINION

BY THE BOARD:

This opinion involves our consideration of two agreements which would provide through service between New York and South American points over routes of National Airlines, Inc. (National), Pan American World Airways, Inc. (Pan American), and Pan American-Grace Airways, Inc. (Panagra) utilizing aircraft of Panagra. Herein we will set forth our tentative findings and decision with respect to the approval of these agreements on the basis of the records certified to us pursuant to the opinion in Docket No. 3500 and accompanying Order Serial No. E-5205, dated March 18, 1951.[1] Before issuance of a final de- [fol. 3238] cision on this issue we shall give all the parties who were formal interveners in the consolidated proceeding in Docket No. 3500 the opportunity to except to these tentative findings and to file briefs in support of such ex-

[1] The opinion and accompanying Order Serial No. E-5205 set forth in detail the interveners and the various procedural steps in the consideration of these agreements.

ceptions. Such exceptions and briefs are to be filed within 30 days of the date of service of this tentative opinion and order.

The first agreement (Docket No. 3785) is an arrangement between National and Panagra providing for the lease of Panagra planes to National for operation over the routes of the latter between Miami and New York. The second (Docket No. 3787) is the agreement between Pan American and Panagra for the amendment of the contract (known as the *Through Flight Agreement*) under which through one-plane service is provided with Panagra aircraft over the routes of the two carriers between Miami and South American points. The latter, in order to provide through service between New York and South America, also provides for the operation of Panagra aircraft over the routes of National pursuant to the agreement in Docket No. 3785. Both agreements as hereinafter determined require our approval under section 408 and section 412 of the Act.

Application of Sections 408 and 412 to the Agreements:

Section 412 of the Act is clearly applicable to both agreements. They meet the jurisdictional tests of that section as to parties, subject matter, and effect on air transportation. In addition, the parties have sought approval under this section. Such section requires us to approve the agreements unless we find them to be adverse to the public interest or in violation of the Act.

[fol. 3239] Section 408(a)(2) of the Act provides that it shall be unlawful unless approved by the Board:

> "For any air carrier . . . to purchase, lease or contract to operate the properties, or any substantial part thereof, of any air carrier."

An agreement between air carriers providing for interchange of air craft for through-plane operations over each other's routes constitutes a lease of properties within the meaning of this paragraph. *TWA-Delta—Interchange of Equipment*, 8 CAB 857 (1947). The term "substantial part"

is relative and its content must be governed by the circumstances of each particular case. *United-Western-Interchange of Equipment*, 1 CAA 723, 726-727 (1940). In *Capital-National—Interchange of Equipment Case* (Docket No. 3291), the Board held that the leasing, at the outset, of 3 per cent and 6 per cent of the total assets of Capital and National, respectively, constituted a substantial portion of the properties of both carriers within the meaning of section 408. Likewise, in the *Delta-American-Interchange* case (Docket No. 3369), the Board held that a lease of 5 and 1 per cent of total assets constituted a substantial portion of the properties of the respective carriers involved. It appears in this case that a substantial part of the properties of Panagra will be leased and that approval of the agreements under section 408 is required. More than 3 per cent of Panagra's total assets will be involved and aircraft valued at 17 per cent of its total aircraft.

Under section 408(b) of the Act, the Board shall approve the agreements unless it finds that the transactions will not be consistent with the public interest or that they would result in creating a monopoly or monopolies and thereby restrain competition or jeopardize another carrier not a [fol. 3240] party thereto.

It is clear from Board precedent that the test of the public interest to be applied under both sections 408 and 412 of the Act is the same. In each case, the standard has reference primarily to the policy objectives of the Act laid down in section 2. It thus makes no difference with respect to the test of the public interest that the Board has jurisdiction of the agreements under two sections of the Act.

At the outset, we can dispose of two of the statutory issues raised by sections 408 and 412 of the Act. The first of these is the issue of monopoly. This has reference to a degree of control of air transportation within a given area. Undoubtedly, approval of the agreements before us would give Panagra an advantage in control of traffic moving between New York and South American points. However, we do not believe that this advantage would go so far as to create a monopoly within the meaning of section 408

which would restrain competition or jeopardize another air carrier. This is particularly true in the light of the fact that we are considering approval of the agreements only for a temporary period and have instituted an inquiry to work out a more long-range program of through service in the area.

The second such issue is the requirement of section 412 that the agreements not violate the Civil Aeronautics Act. We find nothing in the agreements in violation of the Act.

Benefits to the Traveling Public:

The merits of through-plane service have been recognized and approved by the Board in a number of previous deci- [fol. 3241] sions.[1] This is the first time, however, that through plane service by means of interchange of equipment via an international gateway has been before us for consideration.

The problems of government clearance encountered at international gateways obviously affect to some extent the advantages of through service by interchange which have been previously found to exist in domestic travel. Clearly, the mere fact that through service is available does not reduce the time required at the gateway for the passengers to disembark and go through health, immigration, and customs checks. This is true even if a customs arrangement for sealing through baggage is obtainable, since a customs check of personal baggage must be made in any event. However, these factors merely tend to diminish to some extent the advantages which such service provides in domestic situations. They do not eliminate the advantages. There is still a definite benefit to the traveling public in removing the possibilities of missed connections flowing out of connecting service and assuring passage to an ultimate destination. The parties here also believe that they will be able to cut down on the layover time at Miami which exists with the present connecting service. In addition, there can be no

---

[1] Pan American-Panagra Agreement, *supra*, TWA Delta Equipment Interchange, *supra*.

question that there is a strong public desire for through service at the Miami gateway. This fact was reflected in the spot traffic surveys included in the record of the proceeding. Thus, a through-plane operation such as here involved not only furnishes the public with a type of service it desires, but also provides the carriers with a good advertising medium which will tend to stimulate through traffic between Latin America and the east coast of the United States.

[fol. 3242] The record indicates that there is a substantial volume of traffic to benefit from such a through-plane service. During the period June through October 1949, an average of 70 passengers per day moved between Miami and Balboa on the Pan American Panagra through flight. Of that number 49 passengers per day were destined to or moved from New York and Washington, D. C. In the light of the fact that the Panagra Pan American through flight arrangement between Latin America and Miami has shown a 20 per cent increase in traffic over the prior connecting service, it is reasonable to forecast that the Panagra-National interchange would carry in excess of 58 passengers daily in the near future.

Although the applications on file with the Board state that the parties seek to provide through one-plane service, the proposed schedules and equipment utilization charts submitted during the hearing reflect no through one-plane service northbound. In support of these proposed schedules, however, the parties seek to emphasize that through service with two aircraft is as equally effective as a through one-plane service. We are unable to agree with this contention. In our opinion the advantages of through plane service at an international gateway are considerably lessened if that service is to be provided with two aircraft rather than by a single aircraft. Therefore, we conclude that it would be in the public interest for the parties to provide through one-plane service in each direction, under the agreements.

Effect on Other Carriers:

In certificating Braniff to provide service between the United States and South America, the Board stated that Braniff would also connect with National at Havana and thus provide an excellent connecting service for traffic from the eastern part of the United States which would compete [fol. 3243] directly with the service of Eastern and Pan American connecting at Miami. The Havana connection is important to Braniff from a traffic standpoint. The record shows that for the six months period April through September 1949, Braniff received, as its share of the traffic connecting at Havana, revenues in the amount of approximately $196,000. This constituted 16.7 per cent of Braniff's total Latin American revenue during that period. Hence, the approval of the interchange operation contemplated by the agreements before us upon a long term basis would imperil this important source of Braniff's revenue, thus seriously affecting Braniff's ability to compete with Panagra for traffic between Latin American and the northeastern areas of the United States.

In view of the foregoing, it may not be in the public interest to approve the proposed agreements upon a long term basis without providing Braniff with adequate access to the traffic involved. For that reason, in Order Serial No. E-5205, we instituted a proceeding to consider the possible extension of Eastern or Braniff between Miami and Havana and an interchange operation involving those carriers which would provide through service over their routes between New York and Latin America. We further consolidated into the proceeding the applications for approval of the present agreements except for the issue of temporary approval now before us. This proceeding will go forward immediately and will be expedited toward a decision. In the meantime, we believe that the advantages flowing from temporary approval of the present interchanges would more than offset any temporary injury to Braniff that may result.

[fol. 3244] Eastern also claimed a substantial diversion in its passenger revenues resulting from approval of these

agreements. The estimate which it gave in the record amounted to more than $5,000,000 annually. However, this estimate was predicated upon an approval of not only the present agreements but also the proposed through service agreement between Pan American and National and the local service agreement providing for flights between Miami and New York with Pan American aircraft. These other possibilities are now moot, so that the potential diversion from Eastern would be substantially less than that forecasted.

Moreover, in the proceeding commenced by Order Serial No. E-5205 cited above, we will consider the Braniff Eastern interchange operation which would operate competitively with the National Panagra Pan American interchange and which would give each group of carriers an equal opportunity for the New York Latin American traffic. Eastern has also filed for approval of an agreement between it and Pan American which would provide a through service between the same areas. That application will be heard simultaneously with the other interchange issues. In the meantime, we do not believe that the record will support a showing of substantial injury to Eastern arising out of a temporary approval of the present agreements.

Safety of the Proposed Operation:

The record indicates that the through service operation under the two agreements meets the requirements of section 2 with respect to safety in air transportation. The Pan American Through Flight Agreement has been in operation for a substantial period of time, and experience thereunder confirms the safety of such an operation.

[fol. 3245] To further insure the highest degree of safety in air transportation we shall provide as a condition of approval of the agreements that the carriers conform to the requirements of the proposed section 40.168 of the Civil Air Regulations relating to air carrier equipment interchanges, and any amendments thereof.

---

[1] Civil Air Regulations Draft Release No. 50-5, October 2, 1950.

Financial Provisions:

The charges to be paid Panagra by National for the lease of the latter's aircraft are based upon Panagra's cost for operating such aircraft. In addition, National will pay Panagra a rental based upon a fair and reasonable return on its investment for such equipment. National's treasurer emphasized that the cost of operating DC-6's and DC-4's under the interchange would be about 15c to 20c a plane mile higher than the cost National would incur in operating its own equipment of the same type over the same routes. It is National's opinion that the charge to National for flying Panagra's aircraft over National's routes should be based on National's costs. It was on this basis that National approached the negotiations. The latter expressed the willingness to agree to a charge based on the domestic average cost of the type of equipment involved. However, Panagra would not agree to this. The only argument that National now makes for seeking approval for these high costs is that they have made a deal with which they intend to abide.

We do not believe that it would be in the public interest in the circumstances of this case to approve an operation [fol. 3246] over National's routes based upon a charge to National other than its own costs to operate the same type of equipment. National is a low-cost operator. To now permit it to fly Panagra's equipment at greatly increased cost might have a serious effect upon its financial future. Moreover, approval of this type of agreement might establish a precedent whereby a high cost operator would always tend to impose its costs upon a low-cost carrier in any interchange agreement. Such a result would not lead to the fostering of sound economic conditions in the air transport industry in accordance with the mandates of section 2 of the Act.

We will approve the agreement on the basis of charges reflecting National's costs. These should be available seat-mile costs because of the differences in the available seats on each carrier's equipment. Panagra's DC-6's have 52 seats and its DC-4's have 46 seats as compared to National's 58 seats in each type of aircraft.

Under their original agreement National and Panagra agreed to submit to the Board any unresolved questions between them as to the terms of the agreement for binding determination in such manner as the Board should direct. This provision had reference primarily to the rate of return to be paid by National to Panagra for lease of the latter's aircraft. There was subsequently submitted an agreement signed by the presidents of the two companies providing for a rate of return equaling 10 per cent of the gross passenger revenue accruing to National with certain ceilings thereon. There is also a provision that if in a mail rate proceeding the Board should disallow National all or any part of the payments to Panagra for a return on investment, the amount so disallowed shall be refunded. The practical effect of this agreement would be to leave to appropriate mail rate proceedings the final adjustment of [fol. 3247] the amounts paid under this category. Such an approach to the problem is within the requirements of the public interest. Pending such a final determination we cannot find that the rate provided in the supplementary agreement is unreasonable.

Other Provisions:

Paragraph 14 of the National-Panagra Agreement restricts the right of each carrier to enter into interchange arrangements with any other carrier without the written consent of Panagra or National. We have consistently found restrictive provisions in contracts between carriers to be contrary to the public interest and so find with respect to this provision.

The proposed schedules contemplate one daily DC-6 flight (El Inter Americano) in each direction between Buenos Aires and New York. Panagra is also entitled under the agreement to *require* National to charter its aircraft for such additional number of through flights as may be "reasonably needed" for the convenient handling of through traffic (Panagra interchange agreement, paragraph 2(a), p. 4). Panagra can require National to continue to operate the additional through flight schedules with Panagra equip-

ment at load factors which National would consider uneconomic (Panagra interchange agreement, p. 6) by merely reimbursing National for the excess direct flying cost (including rental) and out-of-pocket in-flight cost on any such schedule over the revenues received by National from such schedule (Id., p. 6). In the alternative, Panagra may withdraw such schedule. So long as its own schedules shall be operating, National shall be obligated to operate the initial through flights specified by Panagra (Id., paragraph 2(a), p. 5). Under this language, the record shows that National could be forced to cut down schedules on its New [fol. 3248] York-Miami route, operated with its own equipment, and substitute therefor Panagra equipment (Trippe, Tr. p. 3638).

These provisions could make National a mere conduit for Panagra equipment to be flown by Panagra crews from Miami to New York. They could cause the immobilization of a number of National aircraft now operating on Route 31 if such aircraft could not be absorbed on other segments of National's route pattern. The cost crediting arrangement does not remove the vice of these provisions. It simply determines the price National will get for surrendering its right to schedule its own equipment over its own route. Such consequences could be adverse to the public interest and could have a drastic effect on National's mail pay need.

Therefore, we believe that we should retain sufficient control of the situation to prevent the development of the possible results cited above. To this end we find that Panagra and National should submit to us for prior approval proposed through service schedules in addition to the El Inter Americano flight. This would not apply, of course, to extra sections or additional schedules of an emergency nature that were intended to operate only a few times.

We further find that the conditions which are normally applied to our approval of interchange operations should also be applied to the proposed operation here.

The Air Line Pilots Association (ALPA) has appeared to oppose approval of the two agreements on the ground that they do violence to the employment contracts between

the pilots and the carriers and cause injury to some pilot [fol. 3249] groups. A study of the record would indicate that this position is based primarily on the Panagra crews flying the Panagra equipment over the routes of Pan American and National. On the record before us we are not prepared to find that such procedure is in violation of any collective bargaining agreements outstanding. Nor does it appear to produce any inequities which offset the advantages of such procedure from an operating standpoint. Finally, the ALPA witness testified that there were no difficulties present which could not be settled by direct negotiation with the carriers. Under these circumstances we find that there is nothing in the ALPA position which warrants our disapproval of the agreements.

On the basis of the foregoing and all the facts of record, we find that approval of the National Panagra interchange agreement and the amended Pan American-Panagra Through Flight Agreement, pending disposition of the proceeding in Docket No. 4882, is in the public interest, is not in violation of the Civil Aeronautics Act, and will not create a monopoly or monopolies and thereby jeopardize another air carrier not a party thereto. Accordingly, the agreements are temporarily approved, subject to the modifications and conditions set forth herein. The same findings are applicable to the agreement between W. R. Grace & Co. and Pan American, which is a part of the Through Flight arrangement.

An appropriate order will be entered.

Rentzel, Chairman, Ryan, Lee, Adams, and Gurney, Members of the Board, concurred in the above opinion.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 230

Order No. E-9130

UNITED STATES OF AMERICA
CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

Adopted by the Civil Aeronautics Board
at its office in Washington, D. C.
on the 25th day of April, 1955

Agreement CAB No. 8841, *et al*

In the matter of Agreements filed pursuant to section 412(a)
of the Civil Aeronautics Act involving

United Air Lines, Inc.

and

Western Air Lines, Inc.
Various Other Air Carriers and Other Carriers

relating to intercompany arrangements

ORDER APPROVING AGREEMENTS

There having been filed with the Board pursuant to section 412(a) of the Civil Aeronautics Act and Part 261 of the Board's Economic

Regulations certain agreements between various carriers as indicated below:

CAB No.	*Parties*	*Subject*
8841	United Air Lines, Inc. Western Air Lines, Inc.	Use of power rectifier, Cheyenne, Wyoming
8842	Pan American World Airways, Inc. Aerovias Nacionales de Colombia, S. A.	Interline traffic
8732-A1	American Airlines, Inc. Trans World Airlines, Inc.	Remote transmitter site, Phoenix, Arizona
8843	American Airlines, Inc. United Air Lines, Inc.	Sanitary facilities Cleveland, Ohio
5601-A1	United Air Lines, Inc. Trans World Airlines, Inc.	Sublease of hangar space Washington National Airport
8844	National Airlines, Inc. Aerovias Panama, S. A.	Interline traffic

[fol. 3269]

4617-A2	Capital Airlines, Inc. American Airlines, Inc.	Emergency maintenance, Charleston, West Virginia
7616-A2	Capital Airlines, Inc. Allegheny Airlines, Inc.	DC-3 maintenance, Buffalo, New York
8845	Pan American World Airways, Inc. Southwest Airways Company	Employee vacation fare discounts
6268-A4	Trans World Airlines, Inc. El Al Israel Airlines, Inc.	Ground transportation between Tel Aviv and Lydda Airport
8846	Northwest Airlines, Inc. United Air Lines, Inc.	Public address system, Spokane, Washington
3148-A4	Northwest Airlines, Inc. United Air Lines, Inc.	catering service, Spokane, Washington

CAB No.	Parties	Subject
3387-A3	Pan American World Airways, Inc. American President Lines, Inc.	Interline passenger traffic (air sea).
8847	Delta Air Lines, Inc. United Air Lines, Inc.	Acceptance of Burroughs Ticketeer tickets
8848	United Air Lines, Inc. Pan American World Airways, Inc.	Employee vacation fare discounts
2006-A2	Delta Air Lines, Inc. Capital Airlines, Inc.	Ramp services, Atlanta, Georgia
8849	Delta Air Lines, Inc. North Central Airlines, Inc.	Use of baggage conveyor, Detroit, Michigan
	Air Cargo, Inc. with the following:	
5780-A2	S. O. Gourley, Individual and two air carriers	Pickup and delivery, Austin, Texas
3834-A1	Burch Transfer Co. Continental Air Lines, Inc.	Salina, Kansas
4508-A1	Union Truck & Storage Company American Airlines, Inc.	Jackson, Michigan
6741-A2	Emmerson Truck & Storage Co., Inc. American Airlines, Inc.	Battle Creek, Michigan
8850	R. E. Nichols, Individual Eastern Air Lines, Inc.	Lake Charles, Louisiana
[fol. 3270]		
	Slick Airways, Inc. with the following:	Airfreight agency
8851	El Camino Travel Service	San Clemente, California

CAB No.	*Parties*	*Subject*
8852	R. M. McGrath	Philadelphia, Pennsylvania
8853	Eastern Trucking Co.	East Hartford, Connecticut
8854	Commercial Motor Freight, Inc.	Cleveland, Ohio
8855	Niels C. Hansen	San Francisco, California
8856	Yale Transport Corp.	New York, New York
8857	Berens Express	Waukegan, Illinois

The Board, upon consideration of said agreements, not finding them to be adverse to the public interest or in violation of the Civil Aeronautics Act:

IT IS ORDERED THAT the Agreements listed above be and they hereby are approved.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 331

Order No. E-9481

UNITED STATES OF AMERICA
CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

Adopted by the Civil Aeronautics Board
at its office in Washington, D. C.,
on the 10th day of August, 1955.

Docket No. 4882 *et al.*

In the matter of the

REOPENED NEW YORK-BALBOA
THROUGH SERVICE PROCEEDING

ORDER APPROVING INTERCHANGE AGREEMENT

On August 4, 1955, there was filed with the Board a joint application by National Airlines, Pan American-Grace Airways, and Pan American World Airways for approval of (a) an agreement for the provision of through-plane service between New York and Miami on National's route No. 31, Miami and Balboa on Pan American's Latin American route, and Balboa and points on Panagra's route, and (b) an amendment dated July 30, 1955, to the Through Flight Agreement between Pan American and Panagra. The carriers request approval of the agreements under section 412 of the Act and, if required, under section 408, except that, if the latter is required, it is requested that the Board exempt the parties from the hearing requirements of section 408 in order to permit the agreement to become effective immediately.

There was also filed with the Board on August 4, 1955, a superseding amendment to an earlier filed agreement be-

tween National and Pan American.[1] The amended agreement would provide for through service between New York and Miami on National's route No. 31, and Miami and Balboa on Pan American's route. The agreement also indicates that one or more intermediate points may be served, and that other routes of Pan American beyond Miami may also be added by mutual consent. The parties seek immediate approval of this agreement without formal hearings thereon.

[fol. 3272] Insofar as the proposed three way interchange between National, Panagra and Pan American is concerned, we find that the service which it would establish is responsive to our decision in the *Reopened New York-Balboa Through Service Proceeding*, Orders Nos. E-9109 and E-9110, dated November 23, 1954, in which we invited the carriers concerned to submit a voluntary proposal for a three way interchange between South America and New York, and made the entering into such an agreement a condition precedent to approval of the Pan American-Panagra Through Flight Agreement.[2]

We have reviewed the agreement and find that it does not contain any provision which is contrary to the public interest or violates the Civil Aeronautics Act.[3] Therefore,

---

[1] The original agreement was filed on June 30, 1955. On July 5, 1955, Eastern Air Lines filed a letter with the Board stating its objection to approval of such agreement without further hearing thereon. On July 18, 1955, National filed a request for an exemption from the hearing requirements of section 408 to permit immediate consideration and approval of the agreement. On July 28, 1955, Eastern filed an answer opposing National's exemption request.

[2] We also there indicated the other conditions which we would impose upon approval of the Through Flight Agreement. See pages 36-37 of the mimeographed opinion.

[3] However, it is to be noted that for various reasons the financial terms are of greater significance, insofar as the public interest is concerned, than in the usual interchange agreement. These reasons include the fact (a) that the agreement involves a self-sufficient carrier, National, and two other carriers whose costs are substantially higher than National's and whose operations still require subsidy assistance, and (b) that, at least initially, only

approval of the agreement, subject to the usual terms and conditions placed upon interchange service would not be adverse to the public interest or in violation of the Act and should be approved under Section 412.

Although a hearing may be technically required for this type of situation on the ground that the agreement is subject to Section 408, it is our judgment that the circumstances of this case call for an exemption therefrom pursuant to our powers under section 416. It is clear that no useful purpose can be served by a hearing on the agreement. The principal matters which would be in issue under section 408 have already been tried in the *New York-Balboa Case*, *supra*, upon which the Board and the parties have already spent several years. Therefore, a hearing would be of little, if any substantial benefit, would impose an undue burden on the parties, and would unduly delay a service found to be in the public interest.

[fol. 3273] We have also considered the provisions of the Through Flight Agreement, as amended by Supplement Numbers 8 through 16, and Number 18, which we have numbered Amendments A9 through A18, and find that it does not contain any provision which is contrary to the public interest or violates the Civil Aeronautics Act. Therefore, approval of the Through Flight Agreement, subject to the usual terms and conditions imposed upon interchange service, as well as the conditions described in Order No. E-9109 dated November 23, 1954, pp. 36-37, would not be

---

Panagra's equipment will be used in the interchange service. Accordingly, we expect the parties to review from time to time the effect of these terms on their financial position and to take appropriate steps, as provided under the agreement, to revise such financial terms, if they appear to impose unfairly upon any of the parties. It should also be made clear that the Board in approving the interchange agreement, is not in any manner making a determination for rate making purposes of the reasonableness of any of the costs or charges claimed by any carrier under the terms of the agreement.

[4] E.G., Order No. E-8759, dated Nov. 10, 1954, Order No. E-5337, dated May 1, 1951.

[5] The carriers have not filed with the Board any Supplement No. 17.

adverse to the public interest or in violation of the Act, and should be approved under section 412.6.[*]

We turn now to the National-Pan American agreement. The applicants point out that in the opinion in the *New York-Balboa Proceeding*, *supra*, we indicated that "we would look with favor upon proposals submitted by National and Pan American" designed to meet the demonstrated need for through plane service between the northeastern United States and "those points sought to be served in the Caribbean area * * * by the 'Nassau', 'North Coast' and other interchanges included in the Eastern-Pan American agreement." The applicants argue that, although technically the *Balboa Case* did not include any issue with respect to a National-Pan American interchange, there was evidence and argument in the proceeding directed to that possibility, and that the record contains ample data upon which the Board could make the necessary findings for approval of the agreement without further hearing. Eastern, on the other hand, strongly opposes approval of the agreement without further hearing. Not only does the carrier rely on the fact that there has been no hearing on issues relating to a National-Pan American interchange service, but it is also pointed out that the applicants have made no specific proposals with respect to the service which would be provided, and thus are, in effect, asking for a blank check.

We have considered the matters set forth on behalf of the applicants, as well as other matters, and have concluded that it would not be in the public interest to ap- [fol. 3274] prove the National-Pan American agreement

[*] In reaching our decision, we have given due consideration to the request of the Airline Pilots Association that we take no action herein which would adversely affect the Association's efforts to resolve satisfactorily certain employee problems which have been a source of friction under the Through Flight Agreement. We have not been specifically advised of the means proposed by the Association to resolve these difficulties, or what action on our part is, or is not necessary with respect to the Association's plans. Nor do we see where the action which we are here taking, which is consistent with that which we have followed in other cases, without objection by the Association, would prejudice the effort of the Association to solve the problems involved.

without affording an opportunity for further hearings thereon.

On the basis of the foregoing, we find that:

1. The National-Pan American-Panagra interchange agreement, and the Pan American Panagra Through Flight Agreement, as amended by Amendments Nos. A9 through 18, are not adverse to, and are consistent with the public interest, subject to the conditions hereinafter proposed, and are not in violation of the Civil Aeronautics Act.

2. Enforcement of section 408 of the Act with respect to the National-Pan American-Panagra agreement would be an undue burden on such carriers by reason of unusual circumstances affecting the operations of these carriers and is not in the public interest.

3. The National-Pan American interchange agreement should not be approved without further hearing thereon.

IT IS ORDERED THAT:

1. The record in Docket No. 4882, et al., be and it is hereby reopened, to the extent necessary to receive the National-Pan American-Panagra agreement dated August 4, 1955, and supplement No. 18 to the Through Flight Agreement, dated August 4, 1955.

2. The agreement between National, Pan American, and Panagra dated August 4, 1955, for through service between New York and Miami on National's route No. 31, Miami and Balboa on Pan American's route, and Balboa and points in South America on Panagra's route be, and it hereby is approved subject to the conditions set forth in paragraphs 5 through 15 below.

3. The Through Flight Agreement between Panagra and Pan American, as amended by Amendment Nos. A9 through A18, be and it hereby is approved subject to the conditions set forth in paragraphs 4 through 15 below.

4. Approval of the Through Flight Agreement shall be for a period terminating December 31, 1960; *Provided*, That if the antitrust proceeding which is currently pending against Pan American, Panagra and W. R. Grace & Co.,

is finally concluded prior to 1960, such approval shall terminate 90 days after the effective date of a final order (other than an order of dismissal) disposing of the antitrust litigation, and *Provided further*, That upon the effective date of such final order (other than an order of dismissal) the proceedings in Docket No. 4882 et al., shall thereupon be reopened without further order for the purpose of determining whether approval of the Through Flight Agreement should be extended, modified or terminated.

5. The initial interchange schedules and all subsequent changes therein shall be filed fifteen days in advance of the [fol. 3275] proposed effective dates thereof, and operations shall not be permitted thereunder until after they have been approved by the Board, such approval to be granted with or without hearing, as the Board may determine: *Provided*, That the approval of the Board under this provision shall not be required for revisions which merely change the time of service to a point or points in schedules previously approved by the Board.

6. Fifteen days prior to the date of commencement of operations, the parties shall file with the Board a complete supplementary contract covering any matters left to subsequent agreement under the interchange agreement, including a specific provision with respect to the division of revenues from the interchange service.

7. The parties to the agreement shall comply with the requirements of section 6 of the Railway Labor Act and existing collective bargaining agreements to resolve any conflict arising out of operation of the agreements.

8. The carriers shall comply with the requirements for air carrier equipment interchange contained in section 40.365 of the Civil Air Regulations or any amendment thereto.

9. No operations under the agreements shall be discontinued without prior application to the Board and decision thereon, with or without hearing at the Board's discretion.

10. The approval of the agreements granted herein shall terminate if at any time the Board finds that the continued

operation of the parties under said agreements or under any of their provisions would be adverse to the public interest, or in violation of the Civil Aeronautics Act of 1938, as amended, or of any rule, regulation, or order of the Board, now or hereafter in effect.

11. No through plane operations other than those approved by the Board shall be conducted under the agreements, and for this purpose a flight with the same plane between any two points shall be deemed to be a through-plane operation between any two points unless there is a layover at any intermediate point between said two points, such layover to be one and one half hours after scheduled arrival time or one hour after such actual arrival time, whichever is later.

12. The approval granted herein shall not be deemed a determination for rate-making purposes of the reasonableness of any of the costs or charges claimed by any carrier under the terms of the interchange agreements.

13. All agreements modifying or supplementing the basic interchange agreement herein shall be filed for Board approval at least twenty days prior to the proposed effective date of such modifying or supplementing agreements.

[fol. 3276] 14. The Board retains jurisdiction of this proceeding for the purpose of imposing from time to time such further terms and conditions as it may find to be just and reasonable and for the further purpose of requiring the submission of such special reports on the financial and operating aspects of the operations as the Board may from time to time order.

15. The parties to the agreement shall render adequate through service to each city to which service is rendered pursuant thereto.

16. National, Pan American and Panagra be, and they hereby are exempted from the requirements of section 408 of the Civil Aeronautics Act insofar as such section may be applicable to the agreements approved herein.

17. The National-Pan American application for approval of an agreement for interchange service filed June 30, 1955, as amended by the agreement dated August 4, 1955, be and it hereby is denied insofar as it requests approval of such agreement without further hearing thereon.

Pan American World Airways, Inc. Exhibit 332

Order No. E-9562

UNITED STATES OF AMERICA
CIVIL AERONAUTICS BOARD
WASHINGTON, D. C.

Adopted by the Civil Aeronautics Board
at its office in Washington, D. C.
on the 12th day of September, 1955.

Agreement CAB No. 9205-A1

In the matter of a supplemental agreement filed pursuant to section 412(a) of the Civil Aeronautics Act of 1938, as amended, between

National Airlines, Inc.
Pan American World Airways, Inc.

and

Pan American-Grace Airways, Inc.

relating to interchange service between New York, New York and Balboa, Canal Zone and points in South America via intermediate points.

ORDER

On August 10, 1955 by Order No. E-9481, the Board approved an interchange agreement between National Airlines, Inc., Pan American World Airways, Inc. and Pan American-Grace Airways, Inc. (Panagra) providing for through one-plane service between New York, New York and Balboa, Canal Zone and points in South America on the routes of Panagra, which agreement was responsive to the Board's decision of November 23, 1954 (Orders Nos. E-9109 and E-9110) in the *Reopened New York-Balboa Through Service Proceeding*, Docket No. 4882, *et al.* As a condition to approval, the Board directed the parties to file, fifteen days prior to commencement of service, a supplementary contract covering any matters left to subsequent agreement, including a specific provision covering the division of revenues from the interchange service.

The parties having complied with the Board's order and the Board finding that the supplemental agreement of August 22, 1955 between the parties is not adverse to the public interest nor in violation of the Civil Aeronautics Act;

It is ORDERED THAT the supplemental agreement of August 22, 1955 between the parties be and it hereby is approved, subject to the terms and conditions of the Board's order of August 10, 1955, Order No. E-9481.

RECAPITULATION OF EXHIBIT II—ESTIMATED ANNUAL OPERATING COSTS

Executive and General (incl. Accounting)	$79,020.
Traffic	86,320.
Operations	1,467,553.
Airways	67,160.
Bus Transportation and Trucking	83,276.
Interest	19,572.
Amortization	168,999.
TOTAL OPERATING COST PER YEAR	$1,971,900.
OPERATING COST PER ONE WAY TRIP	$6,320.
OPERATING COST PER SHIP-MILE	$1.69

[fol. 3297]

EXHIBIT III

ESTIMATED ANNUAL REVENUE

Airway Mileage	3400
156 Southbound trips per year	530400 miles
U. S. Foreign Mail Contract—Rate per mile	$2.00
Estimated Revenue this Source	$1,060,800.

Note:

No allowance made for other Revenue which might accrue from Passenger and Express Traffic on Northbound run; or from intermediate Air Mail, Money Order business, Special Flights, Photographic Work and similar sources.

A conservative estimate of this revenue after allowance of 5% commissions to Agents, including W. R. Grace & Co., on an estimated 30% of the total business would be $1.00 per flying mile.

[fol. 3298]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 336

PAN AMERICAN-GRACE AIRWAYS, INC.

No. 2.

Cristobal, Canal Zone,
June 21st, 1929.

Mr. J. D. MacGregor,
Vice President & General Manager,
Pan American-Grace Airways, Inc.,
c/o W. R. Grace & Company,
Lima, Peru.

Dear Mr. MacGregor:

This will serve as a memorandum of matters discussed with you and Mr. Harris in connection with the preparation of an operating budget for our Company.

PERSONNEL:

Mr. Harris will be in charge of operations of the entire Line with headquarters at Cristobal. The Line will be divided into three divisions:

No. 1—from the Canal Zone to Guayaquil in charge of Mr. Gillespie as Flight Superintendent.

No. 2—covering the Line in Peru in charge of Mr. Travis as Flight Superintendent.

No. 3—covering the Line in Chile and an extension to Argentine in charge of Mr. Williams as Flight Superintendent.

It is estimated that we will require three Pilots in Chile including the Flight Superintendent, three in Peru including the Flight Superintendent, and two in the Canal Zone including the Flight Superintendent. We will require six mechanics to travel with the planes, that is, one with each Ford and one with the Sikorsky. It is, of course, understood that not all of these will be required until all of the Fords are in operation. There will also be required two or three wasp mechanics for shop overhaul work and about

[fol. 3299] fifteen assistant mechanics and miscellaneous laborers.

OVERHAUL SHOPS:

These are suggested at Lima, Santiago and at the Canal Zone, although at the latter point we may be able to make some arrangements to share at least some of the facilities of the Pan American Airways. It was suggested that shop buildings would cost about $5,000, and the equipment about $15,000, at each point. The shop building item, however, is to be omitted at least for the present and we will use space in the rear of the hangars. The item of $15,000, for equipment is believed to be unnecessarily high and the actual cost of this item should work out substantially less. You indicated that the shop equipment required would consist of Universal metal work machinery, lathe, shaper, drill press and wasp repair equipment.

W. R. Grace & Company, as you know, controls the International Machinery Company, which has offices in Lima and Santiago, and which will be in a position to quote prices on shop equipment, and I think prices should be obtained from them as well as the Pan American Airways, and purchase made where they can be made the cheapest.

HANGARS:

These were suggested for Lima and Santiago and perhaps at one other point to be decided upon.

At the Canal Zone it is [illegible] that we will be able to arrange for space in the Pan [illegible]jean hangar.

Size of the hangar proposed [illegible]' by 100' by 18'. On the basis of a price which you [illegible]ured from Rieter and Pineus of £575—CIF Callao, for a hangar 55' by 75' by 18' [fol. 3300] and price of $24,000, at which the Peruvian Government was negotiating for two hangars 100' by 200', it would seem as if we should be able to arrange for these at a cost of not over $12,000, erected. It was suggested that some saving in the original cost and maintenance might be effected by using adobe side walls. Before contracting

hangars I think we should obtain competitive prices in the United States, England and Germany. W. R. Grace & Company, as you know, has the agency for Milliken Brothers, and I believe we could secure foreign prices thru our subsidiaries, The British Foreign Machinery Company, London, and Kiefer Helmke & Company, Hamburg. In case the U. S. price is practically the same as foreign prices, it should, of course, have the preference; if, however, there is a substantial difference, we should endeavor to use the less expensive equipment provided we can do so without violation of our Mail Contract.

FLYING FIELDS:

Guayaquil—It is understood that we can use the Government field by incurring a few minor expenses.

Peru—It is understood that we can use the Government fields and arrange to have them under our control by small expenditures on the fields not exceeding an average of $500. per field. A field of 140 acres at Lima can be purchased for about $20,000., but we are to endeavor to avoid this capital investment as long as possible.

Chile—We are to use the Government fields as long as possible, in the meantime, Mr. Hoyt, Mr. Trippe and I decided before I left New York that we would ask Mr. Metzner to quietly investigate available locations in such a way that it would not appear that either Pan American [fol. 3390] Airways or Grace were interested parties in order to get in hand, when needed, some suitable field near Santiago at a reasonable price. I would suggest that you discuss this with Mr. Metzner, and the same procedure incidentally might be followed with Mr. Redshaw in Lima.

PASSENGER AND SHORT STOP ACCOMMODATIONS:

At fields where short stops are made it was suggested that a Milliken portable sheet metal house, obtainable from local offices of W. R. Grace & Co., or a small thatch building, each costing about $500, be arranged. It was indicated that 10 or 15 of these would be required. They would be

as small as practicable to provide minimum passenger accommodations and storage for gasoline, oil and supplies. A watchman at a salary of $20. per month may be required at each of these places and it was suggested that he might live in the building. In that case, it may be necessary to provide outside under-ground gasoline storage and I think it will also be necessary that we find watchmen with little or no family.

At Lima and Santiago better passenger accommodations will probably be required, but here again we are to adhere to strictest economy. While it will, of course, be a short-sighted policy to have our accommodations too small, I believe it will be equally bad policy to be too far-sighted in this matter. Our passenger movement is not going to assume enormous proportions over night and we cannot afford to provide accommodations too far ahead of the trade. If we proceed on a moderate basis, I believe by the time larger passenger accommodations are required, our original facilities will be written off and we will; in the meantime, have saved interest and maintenance charges on idle [fol. 3302] capital for a period of years, and when larger passenger movement comes, we will have the income to provide better accommodations. You considered that at Guayaquil in addition to some passenger accommodations you would probably require a ramp to bring planes ashore which might cost as much as $5,000.

MOTOR CARS:

It was stated that you would require a Ford station wagon costing about $1200. at Guayaquil and Talara and perhaps a car at Lima. My feeling is that we should only purchase cars where absolutely essential and then only when we have actual figures showing the comparative cost of owning cars and paying hire. As long as we have only a weekly service we are not going to have much active service for a car in most places. We will never-the-less have the constant expense of paying some one to run the car while interest and depreciation at a heavy rate will be adding materially to our operating cost.

It is my experience that when actual comparisons are made between the cost of owning a car and hiring one, it is surprising to find how often the figures strongly favor the latter course.

GENERAL:

It is understood that upon completion of this survey you and Mr. Harris will submit to the Directors a complete detailed budget showing total capital investment required for the service and an operating budget. It is likely that Mr. Vidal will be in Lima upon your return from Chile, and if so, you will, I take it, find it convenient to avail of his assistance in preparing your actual budgets. These figures should be prepared on the ground so as to avoid any mis- [fol. 3303] understanding between you and Harris, and in order that points of doubt, which always arise at the last moment, may be immediately straightened out. No commitments are to be made until we have this complete picture, because if we go about it piece-meal, we are not only likely to get a non-standardized miscellaneous lay-out, but we are very likely to spend in the aggregate much more than originally contemplated. Moreover, it will be necessary to go over the whole lay-out with Mr. Trippe before going ahead, as it was impossible to do so before you left.

We should not, therefore, start in on any program covering the matters mentioned in this letter until the Directors have the whole program before them in its entirety so that they can decide how much is to be appropriated for the entire operation.

Yours very truly,

/s/ Harold J. Roe

HJR CAM

[fol. 3304]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 337

SANTIAGO, 5th December, 1930.

D. S. Iglehart Esq.,
W. R. Grace & Co.,
NEW YORK.

Dear Mr. Iglehart,

I have yours of November 11th. The concession matter is going rather badly, and the battle is not made any easier by the fact that such indifferent support can be counted on from our associates in the rear. The withdrawal of my No. 69 was to prevent what looked like an impasse on the Board and to endeavour to force our associates to contribute something constructive to this negotiation, and, in so doing, appreciate my position. So far, except for Ribl whose assistance and cooperation were splendid, our associates have not contributed a single idea, and I cannot understand why they should continue a purely negative or at best indifferent attitude in the face of the very serious situation confronting the Company. Their idea of letting matters drift until June, if there is the slightest chance of reaching any reasonable practical settlement now, cannot be justified on any sound consideration based on the interest of Panagra. I think that somehow back of their attitude is the idea, which I know that Trippe and MacGregor have, that Grace is getting some collateral benefit from the payment to the Government. Nothing, of course, could be further from the facts, and no more disinterested service than is being given by the Grace managers here can be even imagined. You might talk this point over with Patchin, however, and it may be necessary for you to clear it with Boyt.

The Postmaster's announcement that all necessary South American airmail routes are now operating, except the line to La Paz, and that his recommendation of a second trip on the East Coast has been rejected, must leave our friends in an extremely tight position, as I assume that in view of the Government deficit it is hardly likely that even Bruce Bar-

tion will be able to persuade Congress to reverse this position. One trip a week on the East Coast is going to mean an out and out loss of from 30¢ to 5¢ per mile for every mile flown. Failure to extend the line to Buenos Aires means that their investment at that point becomes a loss, or worse if they try to salvage it by local operations. But even more important, the investment made to bring about the NYRBA merger, which was only justified at all if it insured their getting a satisfactory East Coast contract to Buenos Aires, now turns out to be a most doubtful investment. It seems to me quite in the cards that this combination of circumstances may precipitate a serious crisis on 42nd Street, especially if anyone ever takes the trouble to really look into the way that business is run. Unless the company has done more new financing since I left, I believe they would be in a really precarious position already were it not for the fact that [illegible] the heavy depreciation and obsolescence reserves provide cash for working capital for a long time.

A corps of lawyers is still working here on the Cosgrave law suit, and Mr. Chandler, the City Bank financial observer, is still here. He was announced about the other day that the financing had been accomplished. I doubt if anyone expects seriously that the original plan will be carried out, but it is still generally felt that a plan on a reduced scale will somehow be carried out.

Mr. Culbertson mentioned to me yesterday that you had sometime ago proposed him for membership in India House, but that he had never heard anything further about it. He said he understood that he was proposed for membership in some class where prompt action was to be expected. I told him I would mention it to you. I do not think he is at all anxious to have the matter pressed at this time, and I would suggest that nothing be done to press it without consulting him first. It might be well, however, to see just how the matter stands and keep him in line.

Very sincerely yours,

H.H. FL.

TRIPPE

[fol. 3310]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 339

Minutes of a special meeting of the Board of Directors of Pan American-Grace Airways, Inc. held at the office of Pan American Airways, Inc., 122 East 42nd Street, New York, N. Y. on the 28th day of January, 1931 at 4 o'clock in the afternoon.

PRESENT:

Messrs. W. F. Cogswell
R. F. Hoyt
R. H. Patchin
H. J. Roig
J. T. Trippe

being a quorum of the Board.

Mr. J. D. MacGregor, Vice President and General Manager of the corporation, was also present.

Mr. Hoyt called the meeting to order and on motion duly made and seconded was appointed Chairman of the meeting. Mr. Cogswell, Secretary of the corporation, acted as Secretary of the meeting.

Mr. MacGregor reported that the matter of the Chilean concession had now been arranged in accordance with the authorization of the Board at the last meeting and that pursuant to the understanding reached we should accordingly make payment of 500,000 Chilean pesos in settlement of the controversy under the old decree. On motion duly adopted, the officers were directed to make payment accordingly and to express to the American Ambassador in Chile the Company's appreciation of his services in bringing about this settlement.

[fol. 3311] It was the sense of the meeting that the bills of Pan American Airways, Inc. and W. R. Grace & Co. for services up to and including December 31, 1930, should be settled as soon as possible. Messrs. Trippe and Patchin were requested to endeavour to settle all of such bills on or before February 15th and, if there should be any items on which they should not be able to agree by that date, to

report the same to the Board of Directors, which thereupon would appoint an independent auditor as arbitrator. In respect to the expenses of Mr. Summers at Buenos Aires, it was decided that his account should be audited by a representative of the Pan American Airways, Inc. and Mr. Vidal, representing this corporation.

Mr. MacGregor was instructed to confer as soon as possible with W. R. Grace & Co. and Pan American Airways, Inc. and prepare form of agreements with such companies for services commencing January 1, 1931.

On motion duly adopted, Mr. MacGregor was authorized to retain Price, Waterhouse & Co. to audit the accounts of the corporation and its subsidiaries at New York, Cristobal, Lima and Santiago for the year 1930 at a charge of $2,000.

Mr. MacGregor reported to the meeting that the present space occupied by the corporation in the Chanin Building was inadequate and, on motion duly adopted, was authorized to lease, in the name and on behalf of the corporation, additional space in the Chanin Building provided the [fol. 3312] total rental, including that payable under the present lease, should not exceed $5,000 and provided further that the lease of the additional space should expire at the same time as the present lease.

Mr. MacGregor reported to the meeting that the Scadta Company had discontinued its service between Buenaventura and Guayaquil and that we were at present accepting mail from Scadta at Buenaventura for delivery at Guayaquil under a temporary arrangement, whereby we receive 10¢ U.S.G. per 20 grammes. It was decided that the Scadta Company should be advised that the charge for such mail would be $6.00 per lb. so that it would be in line with our other airmail charges; also that an endeavour should be made to make an arrangement with Scadta whereby they should agree not to turn over their Ecuadorian concession to the Latecoere.

The question was then considered as to what action should be taken by the corporation in reference to application by Latecoere for the right to carry Peruvian air mail to Bolivia, Paraguay and Brazil on the ground that this corporation

was not at present supplying an airmail service to those countries. On motion duly adopted, it was resolved that the proper officers of the corporation should advise the Latecoere that we would be willing for the present to turn over to it Peruvian airmail for Bolivia at Arica and for Paraguay and Brazil at Buenos Aires.

It was reported to the meeting that Mr. Harris proposed, [fol. 3313] applying for radio rights in behalf of this corporation in Peru. On motion duly adopted, it was resolved to instruct Mr. Harris to take no steps in this direction pending the adoption of a radio program.

There being no further business, the meeting adjourned.

/s/ Richard F. Hoyt
Chairman of the Meeting

/s/ W. F. Cogswell
Secretary

[fol. 3314]

Pan American World Airways, Inc. Exhibit 340

TO THE DIRECTORS OF PAN AMERICAN GRACE AIRWAYS, INC.:

New York, N.Y.
March 4, 1931.

Gentlemen:

The attached statements show that our estimated loss for the period 1929-1930 will be approximately $112,000. These figures were arrived at after capitalizing $98,000 during 1929, and $62,000 during 1930, as per details shown on the attached statement.

It also includes all 1929 bills at face value, and $125,000 maximum amount to cover Pan American Airways overhead and Grace Agency fees in Peru and Chile during 1930. It does not include the payment of $60,000 made to the Chilean Government, because that payment was made in 1931.

Referring to the statement, you will notice we have taken as a charge to surplus $457,000 to cover two year obsolescence on aircraft and two year obsolescence on all motors, including spares. Inclusion of the above figures, you will

note produces an estimated deficit for tax purposes for the entire Panagra operations to date of $112,000. On this basis, by June of 1931 all aircraft with the exception of the Falcon, and practically all our motors will be wiped off the books. It is evident, therefore, that subsequent to June 1931 the current obsolescence charges will practically vanish, and we will be faced with the accumulation of a large surplus in the last six months of 1931, unless we purchase corresponding new equipment. The above deficit includes every conceivable class of airplane insurance on [fol. 3315] multi-motor equipment. We are rebuilding and overhauling planes as they require it, and when the planes are written off on the books, they will still be in excellent operating condition. It is evident also for tax purposes, we cannot continue obsolescence and include the amounts in our tax returns.

Under these circumstances, the management recommends that an adjustment of our depreciation and obsolescence reserves be made, retroactive to the beginning of operations.

Heretofore, we have followed the Panair rules for depreciation and obsolescence of aircraft, and in addition, our Directors decided to establish two-year obsolescence on all motors. Panair recently changed their bases to three years on Fords, Sikorskies and lesser aircraft, and 2000 hours on motors. The difference between our present basis and the new Panair basis you will note amounts to $193,000. Were we to use the Panair new basis, therefore, we would have a surplus of $81,000 at the end of 1930, instead of the present deficit of $112,000.

If the Directors consider that it would be unwise to show such a profit for the two year period, there is the alternative of going back to the old Panagra basis of two years obsolescence and 1500 hours life. This, you will note, would make a difference in our surplus account of $95,000, and would produce a deficit for the two year period of $17,000.

Respectfully,

/s/ J. D. MacGregor,
J. D. MacGregor,
Vice President & General Manager.

PAN AMERICAN-GRACE AIRWAYS, INC.
122 EAST 42ND STREET NEW YORK, N. Y.

CABLE ADDRESS
"PANAGRA"

[Handwritten notation—File for Tues. Am—Panagra Meeting—March 10th]

TO THE DIRECTORS OF PAN AMERICAN-GRACE AIRWAYS, INC.

NEW YORK,
March 6, 1931.

Gentlemen:

The Pan American Airways proposal for operating and maintaining a complete communications system for our operations, from Cristobal to Montevideo, consisting of two-way communication between ground and airplane and inter-airport communication for traffic and airplane control, was submitted to your Manager on March 3rd.

The proposal as submitted amounts to an undertaking on the part of Pan American Airways to operate and be responsible for an adequate and efficient communication system; including a guarantee that the equipment to be furnished would insure a reception and transmission exchange of 98%.

Pan American Airways undertakes not only to furnish the equipment, but to handle negotiations for us in Colombia, Ecuador, Peru and Chile, with a view to securing for us and in our name the necessary rights and permits to install and operate ground stations and plane sets. We are also permitted to avail ourselves of the rights already acquired by Pan American Airways in the Canal Zone, Panama, Argentine and Uruguay.

Pan American Airways also undertakes to handle for us all matters by which our radio service might be affected [fol. 3318] by reason of international regulations promulgated by the International Bureau of the Telegraph Union at Berne, Switzerland.

The project further provides for the furnishing of all plane and ground expert personnel and the assignment of a special radio expert in charge of communications along our route.

Provision is also made for Panagra to share, to the extent of 75%, in any income that might be forthcoming from the sale of the services of the communication system to outside parties, until the income thus derived equals the current bills passed to us by Panair for said services.

It is now a year since your Management first recommended the use of Pan American Airways' radio equipment for our entire operations in South America. That recommendation was based on a personal survey of the route and after thoroughly discussing the matter with Mr. Harris and with our pilots. During the year Mr. Harris has consistently urged that radio be installed wherever we carry passengers.

There are four vital reasons why we should not hesitate longer in taking immediate steps to give effect to the recommendations of our operating officials and flying personnel.

First. The safety of passengers and crew is greatly enhanced by the advantages of first class radio communication. It is true that since the beginning of operations we have carried passengers in Peru without radio, and without accident, and that radio communication would not necessarily prevent an accident, but if this Company is unfortunate enough to experience anything in the nature of injury to life and limb, in its operations, the primary criticism would be that the plane did not carry radio.

[fol. 3319] Immediate contact with ground stations is a moral support not only to passengers but to the pilot, the value of which should not be underestimated. Our pilots and a great number of our passengers know that Pan American Airways have an efficient system of radio communication, and are unable to understand why we do not avail ourselves of the equipment. The necessity for prompt receipt of meteorological information is vital all along our route for the safeguarding of the mails and passengers. The pilot is not left so much "on his own" when he can base his judgment upon known atmospheric conditions, and the passengers feel they have a link with mother earth.

Second. The operating efficiency of the line will be greatly increased. An immense amount of unavailing flying will be obviated.

On the 3rd of June I sent to the Directors a copy of a letter received from Mr. Harris, dated May 26, 1930, in which he stated that on account of lack of radio a total flying distance of 1200 miles was necessary. The anxiety felt by everyone as to the whereabouts of two planes in bad weather could have been obviated had we been able to communicate with the planes. This is only one of many instances in which better operating efficiency could be obtained by the use of radio.

Third. By means of radio service it is evident that an appreciable reduction in cash disbursements in cable and telegraph tolls would be made. These expenses for 1930 have averaged approximately $1500 a month, or $18,000 annually. Not only would this expenditure be greatly minimized, but a great many other messages could be exchanged [fol. 3320] at no additional cost, which are not now exchanged because of costly telegraph and cable tolls.

For example, the cable rate to the Canal Zone is 30c per word, straight message, and 15c per word, deferred; to Peru the rate is 52c and 26c; and to Chile the rate is 42c and 21c. By means of radio communication our messages would arrive at the Canal Zone free of charge and would be transferred over Panair radio to New York at a cost, it is estimated, of not to exceed 2c per word. (There is, of course, at present, a toll of 6c per word at the Naval station at Balboa, but it is hoped that later arrangements will be made to obviate this charge.).

Fourth. We can expect competition from American and foreign companies during the period of our contract. The lack of radio communication, as well as other facilities, would enable these companies to compete with us at a minimum investment. The higher the rate of efficiency we demonstrate to the Governments and to the public, the less easy we make it for our prospective competitors, and the less likely we are to see those competitors gain equal rights. If these competitors do arrive, I consider they would rather pay us handsomely for the right to avail themselves of our

system of communication than to undertake the additional investment necessary to install and organize their own system.

Since your Management first recommended the use of Pan American Airways radio equipment for our entire operations in South America, various attempts have been made to secure from Radio Corporation, from All American Cables, and from International Telephone and Telegraph Company a proposition which would entirely meet our [fol. 3321] needs and carry with it an absolute guaranty of performance, but we have been unable to secure a similar proposition to that made us by Pan American Airways.

Your Management, therefore, again recommends that advantage be taken of this offer and that your Management be instructed to negotiate and execute a formal agreement for radio services along the lines set forth in the project and at the price therein mentioned.

In support of this recommendation your Management desires to point out that the inauguration of radio service will permit the carrying of international passengers in Chile and over the Andes from Santiago to Mendoza. It will also insure more efficient operations in Peru and the Argentine, and your Management is confident that in the next two or three years the additional passenger traffic thus obtained, plus the lower cost due to greater operating efficiency in performance and schedules, will at least equal the additional cost.

At the price quoted for a twice weekly operation, we would pay for the service in the neighborhood of $120,000 annually. It is interesting to note that the addition of one single through passenger per trip, at a tariff of 12c per mile, would amount to $112,000.

For the purpose of comparison the following quotations have been received from All America Cables, the Radio Marine Corporation, and the International Standard Electric Corporation.

In order to set forth the various quotations they will be treated as separate subjects, and on this basis a quotation received from the All America Cables, dated July 23, 1930,

offered facilities for twelve ground stations only, between [fol. 3322] Cristobal and Montevideo via Santiago. For these facilities they quote a charge of $89,692. per annum, without a performance guarantee, and a contract for a five-year period.

The Radio Marine Corporation quotation, dated November 5, 1930, covering sixteen airplane and seven ground stations, along the route from Cristobal to Arica, would amount to $58,100. for equipment only without the supervisory service of the installation engineers. There is no guarantee regarding performance of equipment and it would necessitate our Company paying the annual cost of operation, organizing the staff, and employing sufficient personnel to handle all operations.

The International Standard Electric Corporation in their letter dated November 13, 1930, offer to supply two ground stations and one airplane set operating exclusively on telephone, for $13,050. f.o.b. factory (Chicago), without guarantee of performance. This proposal was brought about through various discussions with the International Company, particularly referring to that section of the route between Santiago and Mendoza.

It must be remembered that most of the quotations were on the basis of delivery at New York or some point in the United States and do not cover the necessary freight and duties which would have to be paid in various countries of South America.

In connection with the general two-way communication in the United States, it is common knowledge that immense sums have been spent by operators in an endeavor to develop a satisfactory radio telegraph system of communications and that, so far, no striking success has been attained.

On the other hand, the Panair proposal not only relieves us of all expense and anxiety with regard to the availability [fol. 3323] and efficiency of the equipment, the acquisition of expert personnel, the patent situation, and the acquisition of rights in the countries mentioned, but also carries a guarantee of 98% efficiency with a penalty for services rendered below that efficiency point.

As a further justification of my recommendation I have had our Comptroller prepare an estimate of our operations, at present obsolescence, for a one-year period, on three bases, each of which bases carries an amount of $120,000. for radio operations.

Plan #1 contemplates the purchase of two multi motored ships for service in Chile. We have chosen the Curtiss Kingbird as being the only fairly low priced multi motored ship of sufficient range and speed with the operations of which we are familiar.

Plan #2 contemplates Sikorsky and Ford operations from Cristobal to Santiago, a Ford for the Andes, and single-motored flying equipment from Mendoza to Montevideo.

Plan #3 contemplates Sikorsky operations from Cristobal to Pimented and Ford tri-motor operations from Pimented to Montevideo, entailing the purchase of two additional Fords, now newly overhauled and available at Buenos Aires, for an estimated cost of $30,000. each.

Plan #1 shows an actual book profit, after providing for obsolescence at our present rate and for radio communication at the figure quoted. Plans #2 and #3 show small book losses on the same bases. I would respectfully draw the Directors' attention, however, to our estimated cash position. Even under Plan #3, the most costly, it would appear that our cash position would have improved by some $428,000. This amount added to the actual avail-
[fol. 3324] able cash on hand of $500,000. would make it appear that at the end of another year's operations, after the payment of all bills including radio, there should be approximately $1,000,000. in the bank.

I would respectfully request the Directors to consider this cash position in the light of my recommendation for the immediate acceptance in principle of Pan American Airways' offer for radio services.

Yours respectfully,

/s/ J. D. MacGregor
J. D. MacGregor.

[fol. 3328]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 342

CHARLES A. LINDBERGH
25 Broadway
New York City

March 11, 1931

Mr. J. T. Trippe, President,
Pan-American Airways Inc.,
122 East 42nd Street,
New York City.

Dear Mr. Trippe:

In regard to the Pan-American Grace air lines along the West Coast of South America and across the Andes, it has frequently come to my attention that these lines are not being operated in a manner which conforms to the standards of Pan-American Airways. It is my opinion that passengers cannot be carried over these lines with the maximum degree of safety without the use of multi-motored aircraft capable of maintaining flight with at least one engine stopped, and aircraft fully equipped for maintaining radio communication with ground stations at all times.

There is no doubt in my mind that the present operation of the Pan-American Grace system is not only detrimental to the reputation of Pan-American Airways, but that any accident on the Pan-American Grace lines will be con-

sidered by the public as an accident on Pan American lines, and consequently as detrimental to Pan American as tho it had occurred on one of the lines owned and operated by the Company. I believe it to be essential to the best interests of Pan-American Airways that all lines which in any way bear the name of the Company be operated according to the high standard which is maintained on routes completely controlled by the Company.

Sincerely,

s/ C. A. Lindbergh

CAL:ES

[fol. 3329]

Pan American World Airways, Inc. Exhibit 343

Minutes of a special meeting of the Board of Directors of Pan American-Grace Airways, Inc. held at the office of Pan American Airways, Inc., 122 East 42nd Street, New York City, N. Y. on the 18th day of March, 1931 at 3:45 o'clock in the afternoon.

PRESENT:

Messrs. W. F. Cogswell
R. F. Hoyt
R. H. Patchin
H. J. Roig
J. T. Trippe
C. V. Whitney

being all of the Board.

Mr. J. D. MacGregor, Vice President and General Manager of the corporation, was also present.

Mr. Hoyt called the meeting to order and on motion duly made and seconded was appointed Chairman of the meeting. Mr. Cogswell, Secretary of the corporation, acted as Secretary of the meeting.

The minutes of a special meeting of the Board of Directors held March 8th, 1931 were read and approved.

Mr. MacGregor reported to the meeting that contrary to expectations difficulty was being encountered in obtaining permission to carry cabotaje passengers in the Argentine in planes of American registry, but that Dr. Lopez was hopeful of being able to obtain such permission. On motion duly adopted, matriculation of planes of the corporation in the Argentine was authorized, provided it should be definitely established that it would not be possible to carry cabotaje passengers without doing so.

[fol. 3330] Mr. Hoyt presented to the meeting a letter signed by himself and Messrs. Trippe and Whitney, of which the following is a copy:

"March 17, 1931.

Board of Directors,
Pan American-Grace Airways, Inc.,
122 East 42nd Street,
New York, N. Y.

Gentlemen:

Referring to past discussions on the subject of providing adequate operating facilities for the route between the Canal Zone, Santiago, Chile, Buenos Aires, Montevideo, we wish to advise you of our position on this important matter.

1. We favor Pan American-Grace Airways, Inc., without further delay, supplying itself with an adequate radio communication system—a system that will permit its aircraft, while in flight, at all times to maintain regular two-way communication with one or more ground stations—a system that will provide Field Managers and flight personnel concerned with adequate meteorological information—a system that will permit of the prompt dispatch of aircraft arrival and departure messages so that operating officials concerned may receive prompt departure as well as "safe arrival" messages before leaving their post.

2. We favor Pan American-Grace Airways, Inc. providing, or otherwise arranging for, suitable passenger stations at all ports of call such passenger stations, at land airports, to include radio quarters, waiting rooms and comfort facilities for passengers, and accommodations for the Field Manager. The passenger station or utility building of the general type erected at other points of the Pan American System might serve as a model.

3. We favor Pan American-Grace Airways, Inc. inaugurating through passenger service to Santiago, Chile; and as soon as a formal survey can be made to justify it, extending passenger service across the Andes, at least during the period of good weather, to Buenos Aires and Montevideo. We favor operating only multi-engined equipment throughout the entire route, including that section between Montevideo and Mendoza (our approval was given some time ago to a [fol. 3331] temporary program involving carrying passengers across Argentine in single engined ships; in view of the fact that the single engined ships have now been practically written off our books, we favor the immediate installation of multi-engined equipment on this, as on all other portions of the route).

We feel that the cash position of the Company is now sufficiently strong to justify the immediate adoption of the above program. If the Board of Directors feel, however, that such is not the case, we would favor the Company securing any necessary additional cash to provide same; either in the form of a loan by its two stockholders, or by increasing its authorized capital stock and disposing of same to its two stockholders.

To summarize, we feel that the facilities outlined should be made available without further delay, not only in the interests of safety, but also to secure for Pan American-Grace Airways, Inc., as the American operating Company on the West Coast, that definite "prestige" and "standing"

which its U. S. mail contract warrants, and which we feel the Post Office Department naturally expects.

Sincerely,

(sd) R. F. Hoyt
(sd) J. T. Trippe
(sd) C. V. Whitney"

Mr. Roig summarized the views of the other directors on the points raised in this letter and stated that written reply would be made by the representatives of W. R. Grace & Co. on the Board.

On the question of radio Mr. Roig suggested that the proposal of Pan American Airways, Inc. be reduced to the form of a draft agreement which would clear up certain points not clear from the preliminary form of proposal and the matter then be considered in this form; that we be furnished with details of the 12½¢ charge in order to form our own opinion of its reasonableness as compared to the [fol. 3332] cost of providing the service ourselves or procuring it from outsiders, and that radio operation be limited at the outset to the runs between Cristobal and Guayaquil and between Arica and Mendoza with provision for extension to the rest of the line as circumstances might warrant. On motion duly adopted, Messrs. MacGregor, Cogswell and a representative of Pan American Airways, Inc. were authorized to prepare a tentative form of contract as a basis for further discussion.

On motion duly adopted, Mr. MacGregor was requested to prepare a program based on the operation of multi-motored equipment between Cristobal and Montevideo and also a report on the present facilities along the line and what additional facilities he would recommend.

(Statement from Mr. Hoyt to be inserted)

Mr. Roig made a statement substantially as follows: It is naturally the desire of this corporation to cooperate with Pan American Airways, Inc. at Buenos Aires, the best example of this being our appointment of Pan American Airways, Inc. as our agents there. While he considers it

better business for the Post Office and for Pan American Airways, Inc. to serve Buenos Aires by the present West Coast route, which is the shortest and cheapest, and does not consider the proposed extension necessary or desirable, these are questions beyond the control of this company. Pan American Airways, Inc. have an undoubted right to extend their service to Buenos Aires and to operate in the Argentine (except between Buenos Aires and Mendoza) [fol. 3333] if they desire. On the other hand, the funds for the extension should not be obtained from the Post Office Department at the expense of Pan American Grace Airways, Inc., for example, by retaining the reduced compensation of $1.60 a mile for the second trip after July 1, 1931 or by stopping operations of one trip at Santiago. No director of Pan American-Grace Airways, Inc. is at liberty to be a party to such procedure in any form directly or indirectly or to take advantage of his position or information obtained as a director of this company to endeavour to bring about the foregoing result. If there is at any time any disposition to provide the East Coast extension at the expense of our service, we shall of course take whatever steps are necessary to resist it and to protect the interests of this corporation.

There being no further business, the meeting adjourned.

/s/ Richard F. Hoyt
Chairman of the Meeting

/s/ W. F. Cogswell
Secretary

[fol. 3334]

Pan American World Airways, Inc. Exhibit 344

NEW YORK
April 11, 1931

Memorandum to the Directors,
Pan American-Grace Airways, Inc.,
New York City.

In accordance with your instructions, I hand you herewith statements prepared by our Comptroller covering estimated

yearly revenue and cost of operation between Cristobal and Montevideo on a twice a week basis, under five different plans.

Each plan includes as an item of expense the estimated annual cost of radio ($120,000.) and also a $100,000 reserve for Panair and Grace supervision, agency fees, etc. This reserve is set up in addition to bills paid currently, which are included in the expenses of the respective Divisions.

Yearly depreciation on possible future investments along the line is not yet available and has not been included in these figures.

The estimated revenue from passenger income between Cristobal and Arica (Divisions 1 and 2), as well as the revenue from all other mail and baggage income in all Divisions, is based upon the results for 1930.

Passenger revenue between Arica and Montevideo has been estimated on basis of one passenger per trip over the entire distance. Between Santiago and Montevideo one passenger per trip has been included under Plans 1 and 2, and two passengers per trip, under Plans 3, 4 and 5 (tri-motored operation).

Plan No. 1. This plan contemplates the use of three Sikorsky Amphibions between Cristobal and Talara, each flying approximately 900 hours per year. From Talara to Arica three Fords would be used, flying slightly under 1,000 hours each per year. Two Fairchilds would be held as spares in this section of the line.

Between Arica and Santiago two Kingbirds would fly slightly over 1,000 hours each, per year. There would be two Lockheeds held as spares. A Ford and a Falcon would be assigned to the Transandean run between Santiago and [fol. 3335] Mendoza. Three Fairchilds and one Loening would cover the distance between Mendoza and Montevideo.

The estimated profit under this plan is $196,500. per year. Additional aircraft required:

1 Ford (to replace the San Cristobal)
2 Kingbirds

Plan No. 2. This plan contemplates the extension of the Sikorsky run to Pimentel, with three Amphibions flying slightly over 1,000 hours each, per year.

The Pimentel Santiago section of the line would be covered by three Fords, two spare Lockheeds and two spare Fairchilds. Inasmuch as the total flying per year would be 5,000 hours, the three Fords could not do all the flying under this plan and we would have to rely upon the spare single motored ships doing part of the flying, in addition to emergency flights.

The Santiago Montevideo section of the line under this plan would be taken care of in the same fashion as under Plan No. 1.

The estimated profit per year would be $136,600. Additional aircraft required:

1 Ford (to replace the San Cristobal).

Plan No. 3. This plan is similar to Plan No. 2 except two tri-motored Fords would be added to the Santiago Montevideo Division, and the line placed on a multi-motored basis the entire distance between Cristobal and Montevideo.

The estimated yearly profit under this plan would be $111,000. Additional aircraft required:

1 Ford (to replace the San Cristobal)
2 Extra Fords.

Plan No. 4. Three Sikorsky amphibions would also be run to Pimentel under this plan. Between Pimentel and Arica three Fords would be used, each Ford flying about 800 hours per year. (Three Fairchilds would be in reserve).

[fol. 3336] Between Arica and Santiago two new Fords would be used with two Lockheeds and one spare Fairchild in reserve. Between Santiago and Montevideo three Fords, with one Falcon, one Fairchild and one Loening in reserve, would be available for the service, again making a complete multimotored operation between Cristobal and Montevideo.

The estimated loss under this plan would be $10,100. Additional aircraft required:

1 Ford (to replace the San Cristobal)
4 Extra Fords.

Plan No. 5. This plan provides for Sikorsky operation between Cristobal and Pimentel, Ford operation between Pimentel and Arica, Kingbird operation between Arica and Santiago, Ford operation between Santiago and Montevideo. Single motored equipment at present owned by the Company being used as spares.

The estimated net profit for the year under this plan would amount to $145,600. Additional aircraft required:

2 Kingbirds
3 Fords

* * * * * * * * * *

In connection with the additional aircraft required under the various plans, it has been assumed that we could avail ourselves, by purchase, of two newly rebuilt Panair Fords now located at Buenos Aires, at a very attractive price. The alternative would be to purchase the new Ford with high speed equipment at $50,000 f.o.b. Detroit, which could be placed in Chile for an additional $5,000.

I wish also to advise the Directors that, so far, I have been unable to secure the approval of Panair engineering department for the use of the Kingbird through Chile. The latest characteristic sheets for the Kingbird were supplied to me by the Curtiss Company last week and were sent immediately to Mr. Harris. I have not yet had time to receive his criticism and comments.

(s) J. D. MacGregor

P. A. American World Airways, Inc. Exhibit 345

[Handwritten notation—*WFC*—think we should (illegible) toward (illegible)—plus using supercharged Ford for Santiago Arica run as well.—(sgd) *RHP.*]

May 6th, 1931.

The most pressing question to be decided by the Board of Directors of Pan American-Grace Airways, Inc. is that of inauguration of passenger service between Arica and Buenos Aires. The Board has already authorized a service in the Argentine with single motor planes and a service over the Andes in a Ford provided it is equipped with radio. There has been no authorization as to the type of plane to be used in Chile.

Another question to be decided is the installation of radio over all or part of the line.

The representatives of W. R. Grace & Co. on the Board would like to see the following program:

1—Purchase of two Kingbirds (if assured that they meet the technical requirements for efficient operation) and the use of these planes between Arica and Santiago. If the Kingbirds are not technically satisfactory, the use of good single motor planes such as the Bellanca or Fairchild for this service.

2—The use of a Ford equipped with radio over the Andes.

3—The use of Fairchilds between Mendoza and Buenos Aires.

4—The purchase of three R.C.A. ground stations, one for Buenaventura, one for Guayaquil and one for Mendoza.

5—The purchase of sufficient R.C.A. plane sets for use on the planes in the Northern Division, planes in Chile and the Ford over the Andes.

The representatives of Pan American Airways on the Board favor revocation of the authority for operating single

motor planes between Mendoza and Buenos Aires and the operation of Fords between Arica and Buenos Aires, and the installation of radio throughout the entire system under [fol. 3343] a contract whereby it would be owned and operated by Pan American Airways.

Mr. Trippe's main argument is that we are buying for a three year operation and that if, we got, as we should, 5% of the business out of Buenos Aires to the United State we would require Fords to carry the load.

The answer to this is that we have no reason to believe that international business through Chile will be larger than can normally be carried in a Kingbird. It is more economical to run a smaller plane and occasionally turn away passengers than to run a larger plane for the sake of carrying an occasional capacity load. So far as the Argentine is concerned, it would seem to be clear that conditions are perfectly safe for a single motor operation. If it should turn out, say after a year's experience, that the Kingbirds are insufficient for the passenger business in Chile, then they might be used as spares where we are now using Fairchilds, and Fords purchased for this run.

Inasmuch as the views of the two sets of Directors seem irreconcilable on these questions, the following is submitted as a compromise:

1—Purchase the two Panair Fords now at Buenos Aires and use them together with two Fords we now own between Pimentel and Santiago.

2—Operate Fairchilds in Argentina.

3—Purchase R.C.A. radio equipment for installation on the northern and southern divisions of the line as outlined above.

It is assumed that the price that would have to be paid to Panair for the Fords, plus the cost of putting them into condition, would be very little in excess of the cost of the [fol. 3344] Kingbird landed in Chile. The above plan, however, has the disadvantage that the operating expenses of the Ford would probably be in the neighbourhood of 40c

a mile more than the Kingbird. It would have the advantage of relieving Panair of some of their excess equipment, which they were obliged to take over when they took over the Nyrba, and would enable us to ascertain definitely whether we could procure satisfactory passenger business with this type of plane. It has been suggested that once we start in Chile with Fords it would be difficult to stop and that therefore it would be inadvisable to start this service even if we could get second hand planes at a cheaper price. This would not seem necessarily the case, however, as a lack of business would seem ample reason for replacing the Fords when worn out with a smaller plane. In this connection, it should be noted that on our present schedule, and unless the number of stops are increased, the Kingbird can carry two or at the most three passengers after allowing for the weight of the Chilean pilot and his baggage and radio equipment.

If this compromise is made, it is essential that both the radio and the type of equipment be settled at the same time. The use of the Fords in Chile for passenger carrying would require the installation of the radio in the planes while the use of the Kingbird would not.

[fol. 3345]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 346

PERSONAL No. 73

NEW YORK,

May 13, 1931.

Mr. H. R. Harris,
Lima, Peru.

My dear H. R.:

Referring to your personal letter No. 315, I have not yet been able to get the details of the Panair investment per mile of airway, which you think is "incredible". I have, however, received a verbal explanation of what seems to me also a very high cost.

Panair, as you know, has extended very quickly, and, for one reason or another, has been forced to change its route and its flying schedules. This has meant that investments in airports, buildings and other facilities, which had to be made in order to carry out preliminary plans, were rendered almost entirely useless by a change of route or by a change of schedule. This is readily understandable and is something that we have avoided so far, but for which we have been criticized.

It must be remembered also that Panair's route, in a great number of places, is over territory almost totally destitute of population or economic value. I studied some of their problems before coming with Panagra and I could see where an attempt to put in adequate facilities would be at great cost. I have in mind Cozumel, Yucatan, Honduras, Costa Rica, in all of which places airports had to be literally hewn out of the jungle, and the cost of furnishing materials for the installation of facilities is, and will always be, prohibitive.

I am sorry to say that another Directors' Meeting has come and gone without a definite decision either as to radio or additional flying equipment and ground facilities. I have recommended again the acceptance of the Panair proposal for a guaranteed two-way radio communication. I have prepared figures showing that we could pay $120,000. a year for radio, pay all the Panair bills for co-operative supervision and Grace agency bills, and still make a large return on our investment, but, so far, have been unable to secure joint action by the Board.

Panair are willing to give me a free hand to work out our problems to the best advantage, but it is not so with the other interested parties. I spent an hour yesterday knocking over straw men with regard to the comparative values of operating Fords against Kingbirds, and with the Chairman of the Curtiss Company as one of the Panair Directors. I have prepared statements showing that the Panair proposal for radio is cheaper than purchasing equipment from R.C.A., or from anybody else, and operating it ourselves. My figures contained no provision for grief. As a matter of fact, I have provided so many figures

that I forget what has been provided, but of one thing I am sure, unless I am permitted to put in facilities that I know are necessary and indispensable, equip our planes with radio, and go after building up a transport system, steps will be taken before long in Washington to curtail our operations and possibly decrease our frequency.

Great pressure is being brought to bear on the Post Office to join up Santos with Buenos Aires on the East coast. The return to the Post Office from mail on the West coast is only about 16%. Some of Panair's routes return between 60% and 70% to the Post Office. Rightly or wrongly, Panair is spending a great deal of money in fa- [fol. 3346] cilities. That makes a hit with the Post Office, and when they see the West coast without hangars, without airport development, without radio, without passengers stations, they consider we are milking the contract on a ten-year basis. Frankly, I am getting a little disheartened because the longer this fight goes on, the longer it will delay my trip south.

This letter you will please destroy after reading.

With regard to Iquique, I was glad to get the information given in the last paragraph of your letter. I only wish I had had this information before. I can only get such information from you at long range by your constant writing. I write you very fully what I am doing and I should appreciate your giving me currently any information which can assist me.

Do you know that after operating two years I have not on file a single description of the airports at which we land. I do not know the dimensions of the fields, the length of the runways, the nature of the soil, whether approaches are clear or obstructed, or our outlay in development of airports, joint or otherwise. I wrote recently asking for photographs of the fields at which we land. I should never have had to write that letter. I cannot sell our ideas to the present Board of Directors without having a most intimate knowledge of every conceivable feature of our operations. The Grace section of the Directorate reads omnivorously and they expect me to be able to answer the innumerable

questions suggested by their reading. Not only, it seems, must I be prepared to answer questions about our own operations, but also about other items pertaining to the operations of our competitors, past, present and future. They seem to want to know what makes the wheels go 'round; why the S-41 crashed; what the sea was like; what structural failure caused the sinking of the plane. There is a certain amount of reason for their attitude. Did it ever occur to Robinson at Santiago that Panair had two of these planes on order and that Priester would be interested in receiving unbiased information as to the stability of the plane in the air or on the sea? Why did Robinson discontinue the weekly report that I asked for?

I have received no word from Santiago as to the developments at Cerrillos. I get from Webster whatever he cared to tell me. No photographs of the actual developments at Cerrillos have been sent. I have some photographs of our hangar with a Lockheed in front of it, but none of the other facilities. I understand a casino has recently been erected there. I have never seen it mentioned in letters. Such scraps of information as I get from Santiago come from Dagnino. Will you please take steps to see that this situation is remedied all along the line.

I have wandered along in this letter, and it may be rather disjointed, but as I said above I am a little disheartened, and the only thing that can raise my spirits is to feel that I am getting from my men in the field the whole story all the time. Help me out on this like a good fellow and I will do my part to see that your excellent operating record is recognized by additional facilities.

I was very much disturbed to hear about the state of Mrs. Harris' health. Please keep me currently advised, and if you should decide to send her back to the States this summer, please remember that I am here and shall feel extremely hurt if you do not give me the opportunity to do anything I can for Mrs. Harris and your family.

Very truly yours,

J. D. MacGregor.

JDM:Q

[fol. 3347]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 347

W. R. GRACE & CO.
NEW YORK

May 21st, 1931.

Harold J. Roig, Esq.,
c/o Grace Brothers & Co. Ltd.,
London, England.

Dear Roig:—

Confirming our cable #65 as follows:

"65: your 76 14th to 17th word as ford is in buenos aires our idea is to recondition at Lima price to be paid panair plus estimated cost reconditioning not to exceed 30,000 dollars united states gold"

I enclose herewith Vidal's estimate for the operation of the four Fords. This presents a very different picture. It is based on the present passenger and local mail revenue in Peru and one passenger per plane in Chile.

The only development in the radio situation is that Panair sweetened their proposition to R.C.A. by agreeing to buy about $50,000 worth of material and R.C.A. has, accordingly, agreed to issue a license for Panair and any company in which it has not less than a 50% interest. I was not entirely surprised at this. It deprives us of a prop but I am hopeful that we will be able to discourage Panair's insistence upon operating our radio and win them over to a plan for installation of radio on only the northern and Chilean sections.

Cogswell and I think that Panagra should have a radio engineer and that his initial work should be the training of flight mechanics and pilots in radio telegraphy and telephone so that we will not have to carry an extra radio operator.

[fol. 3348] Thomas S. McCaleb, who installed Panair's radio system in Mexico and who was let out in the last economy upset, has been to see us. The R.C.A. people think very highly of him and Boschke writes me from Mexico City that his late chief there speaks very highly of him. To test his quality I have asked him to make for Grace a report on the various radio telegraph, telephone, beam and beacon systems now actually in use. I thought we could afford to spend a little money to get more specific information in hand on this important and expensive subject.

Merino arrived here on Monday and MacGregor organized in his honor a dinner at the Hangar followed by a party at the Hollywood. Valverde attended and altogether it was a great success. Merino apparently had a good time and was most cordial. He is leaving for England about June 3rd. I hope and suppose you will cross him on the ocean.

At Washington there is no further development since my telephone conversation with you. Glover told me over the telephone today there had been no new development since Trippe was told that the extension to Buenos Aires would require a cut in his existing East Coast $2.00 rate. He is, characteristically, still at work, but my advices are that the Post Office will not make us cancel one trip south of Santiago. I fear, however, that the $1.60 rate on the second trip will stick, although the Postmaster General still seems [fol. 3349] somewhat openminded on the subject. White told me privately that it was his understanding that the Postmaster General had made up his mind. I enclose a clipping from this morning's paper which shows that the tide is strongly against us in this respect.

Faithfully yours,

/s R. H. Patchin

COPY

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 348

W. R. Grace & Co.,
New York

Robert H. Patchin

May 27th, 1931.

J. T. Trippe, Esq., President,
Pan American Airways, Inc.,
122 East 42nd Street,
New York City.

Dear Mr. Trippe:

It is our understanding that one of the Fords has now been equipped with superchargers and we accordingly consider that we should start passenger service south of Arica as soon as possible. We are advised that the operation of a supercharged Ford is not necessarily limited to the Mendoza Santiago portion of the route and we therefore suggest that Pan American-Grace Airways purchase one Pan American Airways Ford, now at Buenos Aires, provided it can be obtained at a reasonable price, and carry on the operation between Pimentel and Mendoza with four Fords.

As Pan American-Grace Airways is not permitted, however, to carry passengers in Chile in these planes unless they are radio-equipped, it is essential that arrangements first be made for the purchase of four plane sets for use thereon. It is evident from a careful study of the proposal of Pan American Airways to install and operate a system of radio communication over the lines of Pan American-Grace Airways that the practical working out of such an arrangement would be most unsatisfactory and difficult and, accordingly, we feel that Pan American-Grace Airways should operate its own radio system. Moreover, it is apparent that wherever possible it would be of advantage, from every consideration of economy and efficiency, to use combined telegraph and telephone sets. The operating conditions

between Mendoza and Santiago appear particularly to require radio telephone as an auxiliary to telegraph. We suggest, therefore, that Pan American Grace Airways purchase and ship immediately four combined telegraph telephone plane sets in order that we may start a passenger service in Chile without delay.

As we are strongly of the opinion that the radio system should be gradually developed by starting in places where it is most needed and later extending to the rest of the line as and when found necessary, and with equipment found by experience to be most effective, we suggest that, in addition to purchase of these four sets, Pan American-Grace Airways proceed as follows:

1. Engage the services of a competent radio superintendent to install, organize and take charge of the service. One of the duties of such superintendent should be to arrange instruction of the pilots and flight mechanics in the operation of radio telegraph and telephone so that the Company can ultimately dispense with a separate radio plane operator, thus saving both salary expense and pay load space.

[fol. 3351]

2. Obtain the necessary permit from the Argentine Government and purchase and install a telegraph-telephone ground set at Mendoza.

3. Obtain amplification of Pan American Grace Airways radio rights in Ecuador, if this should be considered necessary.

4. Purchase a new telegraph ground set capable of being economically amplified for telephone and install the same at Santa Elena or Guayaquil.

5. Purchase three radio plane sets for use on the northern division.

6. After the installation of the ground set in Ecuador, if the needs of the service appear to require it, purchase a similar ground station for installation at Buenaventura.

Mr. Cogswell and I should be pleased to discuss the foregoing with you at your convenience.

Very truly yours,

(Signed) R. H. Patchin.

cc Mr. MacGregor

[fol. 3352]

Pan American World Airways, Inc. Exhibit 349

May 29 1931

Mr. Robert H. Patchin,
W. R. Grace & Co.,
7 Hanover Square,
New York, N. Y.

Dear Mr. Patchin:

Receipt is acknowledged of your letter under date of May 27th regarding the proposed inauguration of passenger service by Pan American-Grace Airways in Chile, and referring to the matter of installing a communication system on the Pan Grace Lines.

I note that you have forwarded copy of your letter to Mr. MacGregor, although the original was addressed to me as President of Pan American Airways, and presumably as an individual Director of Pan American-Grace Airways.

My personal opinion, as well as that of Messrs. Hoyt and Whitney, on the advisability of the installation by Pan American-Grace, without further delay, of an adequate communication system over its entire line, and its inauguration of passenger service throughout its entire route in multi-engined planes as soon as possible, was outlined in detail in letter dated March 17th, 1931, addressed to the Board of Directors of Pan American-Grace Airways.

In order to fully cooperate in the early and efficient carrying out of this plan, Pan American Airways has sub-

mitted, on several occasions, proposals in the form of draft contracts, to Pan American Grace Airways, for the installation and operation by Pan American Airways of the requisite communication system. It was my understanding that the General Manager of Pan American Grace Airways stated to the Board of Directors that in his opinion the acceptance of the proposal of Pan American Airways would be not only the most efficient, but the cheapest method of providing Pan American-Grace Airways with an adequate communication system, but up to the present time the Directors have not approved or otherwise acted on the several proposals submitted, including that of Pan American Airways.

It would seem that the points raised in your letter as to a detailed method of procedure, are ones upon which the Board of Directors of Pan American Grace Airways should receive views and recommendations of the General Manager of that Company, who I understand has already made a careful study and analysis of the questions of efficiency [fol. 3353] and economy involved.

There is a Pan American-Grace board meeting scheduled for next Monday, and while the matter will unquestionably come before the meeting, I will be glad, if you and Mr. Cogswell so desire, to discuss the matter with you both informally, at your convenience, prior to the meeting.

Yours very truly,

J. T. Trippe.

JTT:B

cc: J. D. MacGregor

[fol. 3354]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 350

October 8, 1931

Honorable Chase C. Gove
Deputy Second Assistant Postmaster General
Post Office Department
Washington, D. C.

My dear Mr. Gove:

At our conference several days ago, you asked us to submit a letter outlining the several recently proposed changes on foreign air mail service.

The extensions and changes, four in number, are as follow:

1. An extension of route FAM #10 from Santos, Brazil, to Buenos Aires, Argentina, effective with the southbound trip leaving Paramaribo November 5, and with the northbound trip leaving Buenos Aires November 2. Effective November 1, 1931, the sum of 20c per mile would be waived on the contract rate of FAM Contract #10.

A formal waiver to this effect, duly executed by us, has been forwarded you today under separate cover.

2. Effective December 1, Tela to be omitted as a port of call on FAM #5, and Merida, Yucatan, and Puerto Barrios, Guatemala, to be included on this route. Service between Miami and Havana, and also between Merida and San Salvador, on this route to be reduced from two round trips per week to one round trip per week.

It is believed that the elimination of Tela and the inclusion of Puerto Barrios and Merida on this route, together with a reduction in service on certain sectors thereof, as outlined above, will not only result in the estimated annual saving of $129,584, but will, at the same time, considerably enhance the trade and postal value of the route in question.

[fol. 3355] The reduction on the through service to San Salvador to one trip a week should not impair the present

postal service to Central America, inasmuch as the schedules hereafter proposed, also to become effective on December 1, will permit of one through trip per week to Central America via Kingston. Scheduled mail arrivals to points between the Canal Zone and Salvador under this schedule would be Sundays and Tuesdays; outgoing mail schedules would be Saturdays and Wednesdays. All flights in both directions would be uniform in that from two and a half to three days would be required between Florida and points in Central America, whether scheduled via Kingston or via Merida.

The reduction in service between Merida and Salvador to one trip per week should not impair the value of the foreign air mail service over route #5, inasmuch as British Honduras would be the only country reduced under the proposed program from a twice a week to a once a week schedule. The mail actually carried to and from Belize now averages but 3.2 pounds per trip. Trade between British Honduras and the United States is relatively small compared to other countries served by the United States foreign air mail lines.

The reduction in service between Salvador and Puerto Barrios from twice to once a week should result in improved service on the Brownsville-Canal Zone route, inasmuch as operating conditions across the Central American mountains are often bad and frequent delays are apt to occur, necessitating holding the through ships between Brownsville and the Canal Zone for the connection at Salvador.

The schedules proposed hereafter will also eliminate Cozumel Island as a port of call, considerably improving the trade value of this route, inasmuch as passengers have sometimes been embarrassed through having to remain overnight at that point, where no suitable accommodations are available. The possibilities of delays in the through service on account of connections at Salvador will be greatly reduced by the shortening of the day's flight that crosses the mountain section. This has been reduced from the Havana-Salvador distance to Merida-Salvador, which makes it possible to cross the mountains earlier in the

afternoon than is now the case. Safety of operation on this section of the route, considered one of the most dangerous on our lines, would also be improved.

The proposed second scheduled trip per week between [Fol. 3356] Havana and Merida would connect at Havana with FAM =4, thereby providing twice a week service between Florida and Yucatan, an important trade route, inasmuch as a substantial business is carried on between points in Florida and Yucatan and Mexico. Both of these scheduled trips would make direct connections at Merida with services operated by our Mexican affiliate, Compania Mexicana de Aviacion, which serves the most important cities in Yucatan and eastern Mexico. Two day service between Florida and Mexico City and intermediate points would thus be available.

The parallel service on FAM =5 between Miami and Havana has been reduced under the proposed schedule from twice to once a week. The one a week service would be required in order to provide proper maintenance at our Miami base for aircraft serving this route. If we were to overhaul this equipment at Havana, considerable additional expense would be incurred, and work would be performed in a foreign country which under the proposed plan would be done in the continental United States.

If at least one trip per week between Salvador and Florida did not originate and end in Florida, the section between Miami and Havana would develop into a "bottleneck". This is particularly the case since the second trip per week between Havana and Merida, under the proposed schedule, connects with FAM =4 at Havana. It was planned on this trip to route any passengers desiring transportation between Cuba and Mexico only, including American travellers wishing to stop over in Havana. This plan leaves the entire capacity of the second trip to Yucatan and Central America available for passengers en route to and from the United States.

3. It is proposed, as of December 1, to increase service between Barranquilla and Maracaibo from one round trip per week to two round trips per week. This increase in

service is desirable not only on account of the extra heavy air mail service to Venezuela, the revenue from which to the United States Government is now estimated as $6,280 per month, but also because of a very substantial air passenger service which has developed between the United States and Venezuela, and between the Canal Zone and Venezuela. We are planning to put our new four engined flying boats into service between Florida and Barranquilla about December 1. The additional capacity thus made available between that point and Florida will provide adequately for the additional passengers coming from [fol. 3357] Venezuela as a result of the two services per week between Barranquilla and Maracaibo.

4. We are submitting herewith the new schedule which we propose become effective December 1. This schedule is a great improvement over the present schedules of the system. All points served by the through east coast service, including Rio, Montevideo and Buenos Aires, and all intermediate points, would receive at least one day faster mail service from the United States and two days faster service as soon as proper connection is made by the Domestic Air Mail Service at Miami.

The "bottle-neck" between Porto Rico and Miami, now existing on the East Coast Service as a result of the limited capacity of the land type Fokker tri-motors now in service, would be eliminated, inasmuch as the new schedule contemplates flying boat operations on the through trips to Brazil between Florida and Porto Rico. The flying boats will have a capacity on this route at least double that of the present Fokker tri-motor land types, and adequate to take care of the very considerable through traffic already developed to points south of Porto Rico.

You will note that the schedule as herein enclosed also gives effect to the various improvements suggested by yourself and Mr. Grayson during our recent conference. The southbound Brownsville scheduled departures have been changed to Mondays and Fridays; the northbound arrivals to Sundays and Wednesdays. The scheduled arrivals and departures in Central America are much bet-

spaced than the schedule submitted at the conference above referred to. Four separate receipts and dispatches between the Canal Zone and the United States are provided.

The new schedule herein proposed affords direct connections, both north and southbound, at Trinidad. Direct connections are also made twice a week on the Barranquilla-Maracaibo service with the Barranquilla-Miami trans Caribbean line. Continuous service across the north coast between Cristobal and Maracaibo is also available, and two day service is afforded between the Canal Zone and Trinidad, direct connections being made at Maracaibo with the once a week mail service scheduled between Maracaibo and Trinidad.

Southbound service at Miami is scheduled for 7:30 am, [fol. 3358] the latest possible departure time permitting second day arrivals at Trinidad, necessary if the extra day is to be eliminated on the entire east coast service. The southbound departure on the Miami-Kingston-Barranquilla route has been set at 9:30 am, the latest practicable time to leave Miami, taking into consideration the scheduled stop at Cienfuegos and the overnight stop at Kingston. The scheduled arrival at Barranquilla at noon on the second day will permit of arrival on schedule the second night, not only at Maracaibo, Venezuela, but also at Cristobal, Canal Zone, and all important points in the interior of Colombia.

As soon as the schedule of the connecting domestic air service between New York and Miami is modified so as to afford a reasonably close connection at the latter point, New York dispatches for Buenos Aires would be made on Saturdays and Tuesdays, arriving at Buenos Aires on Saturdays and Tuesdays. The east coast mails would leave New York Thursday evening, arriving at Rio de Janeiro Wednesday night and at Buenos Aires Friday afternoon.

The northbound departures from Buenos Aires would be Saturdays, Wednesdays and Thursdays, arriving at New York early in the morning on Saturdays, Wednes-

days and Fridays. The northbound scheduled departu from Rio de Janeiro would be Saturday morning, affor ing the best possible service to that city with the fr quency limited to once per week.

Awaiting your action in this connection, we remain,

Respectfully,

PAN AMERICAN AIRWAYS, IN

J. T. Trippe,
President.

ERNST EILERS

NEW YORK,

November 3, 1932.

Mr. H. R. Harris,
LIMA.

My dear H. R.:

I note Mr. Kirkland's letter to you #735 SAGO of Octo ber 24th with reference to Ernst Eilers.

I do not know what Mr. Kirkland has in mind when he says "should plans for Guayaquil mature, we would un doubtedly have a small staff of our own at that point", and by inference, one member of the staff would be a business man, a position which he thinks Eilers could fill. This is not at all in line with my own ideas and would certainly be opposed by the Grace Directors.

With the exception of Divisional Headquarters, the busi ness end of our operations is run by our agents, and I wish

you would warn Kirkland that letters of this kind will undoubtedly raise the question in the minds of the Grace people as to whether, in Guayaquil also, we intend to break away from our basic agreements and maintain our own business personnel in addition to the work performed for us by Grace Agents.

I do not know whether you have ever seen a copy of the original letter outlining the set-up for Pan American Airways, Inc. and Grace & Co. For your very confidential information, and to be kept in your private files, I hand you a copy of Mr. Cogswell's letter to the Aviation Corporation of the Americas, dated August 31, 1928. I draw [fol. 3360] your attention to the first paragraph of the second page, and especially to the statement that on the West Coast of South America Grace & Co. will be the agents of the Company, on a reasonable compensation basis, for a period to continue as long as the life of the transportation contracts are in effect. This is the broad basis of the understanding and there is nothing in the letter which would permit us to shop around for agents or appoint other agents where Grace & Co. has an agency, even although other Companies or individuals might offer us better terms than Grace would. The whole argument here has been over the words "reasonable compensation basis".

It is, therefore, not in order to take steps that might be construed as modifying the original agreement, unless Grace & Co. signify their entire conformity with such a plan.

J. D. MacGregor.

Re your letter No.

Subject: GRACE LINE MEETING

LIMA, February 17, 1933.

Mr. J. D. MacGregor, New York.

Dear Mac,

Yesterday I gave a luncheon for the Grace Line people now here, that is, Adams from the New York office, Robstock from Cristobal, Marshall from Buenaventura, Holguin from Guayaquil, Bush from Lima, Heavey from Valparaiso and Redshaw from Lima. I had the SAGO organization, consisting of Penrod and Litchfield from Traffic, Angus from Radio, Farris and French from Operations, Jardine from P.A.C. Operations, Matallana from P.A.C. Traffic, Thommen from P.A.C. and myself. The luncheon seemed to be satisfactory, and the only unfortunate part was the fact that Robstock was too ill to attend, his place being taken by Mr. Adams' secretary, Mr. Livingston. Incidentally, Mr. Adams gave me to understand that Robstock is being retired from the Grace Co. in the near future on account of health.

Adams told me that they were having a number of discussions in their meetings here about the position which a Grace agency should take with regard to Panagra. They have now come to the conclusion that they will charge a minimum of $10 for every unaccompanied baggage ship-

ment, in place of their previous charge of 1¢ gold per lb. weight, inasmuch as they view this unaccompanied baggage as being handled for Panagra passengers at a very low income to the Grace people, who are, of course, responsible for the baggage while it is in their possession. I can't say that I blame the Grace Line people for taking this stand, since they have a certain amount of justification in the lack of income to them in regard to a matter which is of great importance to passengers via Panagra.

Adams also told me that he felt our rates were now at too low a figure compared to the steamer rates; in other words that we were not on a reasonably competitive basis in that our operating costs should be much higher than steamer operating costs, and that consequently our tariffs ought to be much higher. I did not discuss this point with him, knowing that when the time came we could make as much or little of the economies as we cared to, depending upon the point to be gained.

I have arranged with Adams to allow me to talk to his group next Tuesday morning, and have also arranged to show them the airport at Las Palmas Tuesday afternoon; inasmuch as Marshall is leaving for Buenaventura by airplane Tuesday morning I took him out there yesterday afternoon together with Heavey. Las Palmas is not very large, but it is able to impress a visitor, properly shown around, with our ability to accomplish really important results in a small amount of space and with a minimum of expensive equipment. I believe that these people will be really impressed with what Panagra is and what it means, as a result of our Tuesday meeting.

PERSONAL 1393

NEW EQUIPMENT

New York,
October 19, 1933.

Mr. H. R. Harris,
LIMA.

My dear H. R.:

I had a long discussion with Mr. Trippe on the question of new equipment, and received the benefit of his views in light of the various quotations submitted by the Consolidated, Sikorsky and Douglas for the construction of specially fabricated amphibions. I think I told you in a previous letter that the quotations received were subject to an upward revision if the manufacturers incurred additional costs through the operation of the NRA.

Quotations received from Sikorsky were, in the main, lower than those received from the other competing Companies, but the entire engineering expense would have to be distributed over the five or six amphibions we could possibly use in the System, which would mean that each unit of a sixteen-passenger amphibion would cost, in the neighborhood of $120,000. Further, although the Sikorsky proposition is for a sixteen passenger plane, Mr. Trippe feels, and I think I agree with him, that the increase in mail and express service, together with the fact that undoubtedly before long we may have to increase the free baggage allowance to passengers, will have the effect of making this plane only a fourteen passenger plane, and to pay $8,000 a seat would seem altogether prohibitive.

[fol. 3363] On the other hand, Panair has, as you know, a firm contract with Sikorsky for the construction of several Clippers. The Clipper is a 32 passenger plane, and if, on the same theory of an increase in express, mail, baggage allowances, etc., we consider it a 26 passenger plane, the

price per passenger seat would be very appreciably less than the amphibion.

Mr. Trippe, therefore, thinks that it would be economically better for Panagra to charter a Clipper for the service between Cristobal and Guayaquil than to invest a minimum of $250,000 in building two planes. You, of course, realize there is no market for amphibions in the States, at least, of the size and performance we require for our operations. Mr. Trippe's suggestion, therefore, is that it would be more economical to start a Clipper from Miami and, if necessary, changing crews at Cristobal, fly it all the way to Guayaquil.

Naturally, this would entail an investment at Guayaquil, but you and I have already agreed that such an investment must be made. There would, of course, be no trouble in landing a boat of the Clipper size in the river, and I think it possible that we may be able to arrange a schedule which would permit the boat to be in the water only overnight, which would avoid the necessity of the tremendously large ramp with the additional handling expense involved in taking her out of the water.

I talked over this scheme with Kirkland who did not seem at all amazed at the size of the boat we might consider [fol. 3364] running in the Northern Division. He feels that we will be pleasantly surprised at the number of passengers we will have, especially if we can get "cabotaje" rights at Tumaco. Another thing to be taken into account is the fact that Cristobal Guayaquil is a bottle-neck not only for our passengers, but also for our personnel, of which the latter there seems to be a constant flow. If we are unable to afford our employees' accommodations on the plane, we would necessarily have to pay their fare by steamer, and if the steamer fare and other expenses were credited to the operation of the Clipper, the size of the plane would not seem so abnormally in excess of our present needs.

It may be that, in connection with the Ecuadorean Government, we shall have to arrange for some sort of slip to insure us a place to taxi to the bank of the river. There are other features which will undoubtedly occur to you,

but, in general, I am not horrified at Mr. Trippe's suggestion, nor do I think you will be. The Directors, I believe, will be willing to place a reasonably large investment at Guayaquil as it is inevitable that we must have the best facilities if we are to secure the passenger traffic, upon the revenue of which we shall have so largely to depend if our subsidy is curtailed or taken away.

In further connection with this matter, Mr. Trippe explains that it will be almost impossible for Panair to contemplate, at present, a less than two-day flying time between Miami and Cristobal, even with the Clipper cruising 150 miles air speed, which would be more likely 135 [fol. 3365] miles ground speed. He explains that E.A.T., during especially the winter season, arrives at Miami several hours late, over 75% of the time, and that train connections are not possible for passengers before 7:30 in the morning, and that, therefore, unless the planes are to leave Miami practically empty as far as close airmail and passenger connections are concerned, the planes cannot leave Miami until 9:30 in the morning. In addition, the Post Office is now insisting upon a stop at Havana so as to economize on the shuttle airmail service. This will make it impossible for Panair planes to get further than Kingston the first night out, and to Cristobal the second night. Even though it were possible to reach Cristobal in the early afternoon, it would not benefit Panagra service because the nearest place we could take our passengers to would be Buenaventura, and our Guayaquil passengers would again have to take two days to get to their destination.

In the light of the above, it would appear that, after all, Panagra would have to bear the brunt of any stepping up of the schedule, but, as this matter would seem now to be crystalizing, I think it would be advisable for you to prepare for me, and airmail to me as soon as possible, a Panagra schedule between Cristobal and Montevideo, taking the Clipper speed to Guayaquil, making that the first overnight stop; then taking a land plane of a cruising speed of say 175 miles an hour, between Guayaquil and Santiago; then the Fords over the Hump and into Buenos Aires and Montevideo. It may be that in making this schedule you might

find it possible to run from Guayaquil to Arica the second [fol. 3366] day, and from Arica to Mendoza the third day, which, in order to make a three-day schedule between Cristobal and Buenos Aires would entail night flying with mail and passengers between Mendoza and Montevideo. I think you would consider the night flying in the Argentine a fairly safe operation, if the necessary airport lighting were arranged and night flying instruments available.

The whole matter is very interesting and I should appreciate your advising me your ideas at the earliest opportunity.

Incidentally, I am still shooting for November 11th to start my trip south.

J. D. MacGregor.

JDM/Q

[fol. 3367]

Pan American World Airways, Inc. Exhibit 354

December 20, 1933

Memorandum to Mr. J. D. MacGregor
Vice President & General Manager

SIKORSKY S-38 vs S-42

The attached statement shows the estimated direct operating costs of our present S-38 Sikorskys and of the proposed S-42 Sikorsky Clippers.

It will be seen that the extra cost of operation of the S-42 appears to be in the neighborhood of $120,000. per annum. The available pay-load of this ship is practically 7,000 pounds as against the 1,200-pound maximum available pay-load of our present S-38 Sikorsky.

As between Cristobal and Guayaquil we receive an average of approximately 9¢ per passenger mile it is evident that every extra passenger we carry all the way between those two points throughout the year would yield in the neighborhood of $20,000. In other words, six passengers carried throughout the Division on each trip over and above

the number of passengers carried at present would just about cover the larger cost of operations of the S-42 Sikorsky Clipper.

[fol. 3368] As a matter of fact, this new plane having a capacity of 26 passengers as against a maximum of five in our present Sikorskys, it is certain that we would secure additional through passengers to and from Lima, Santiago, and Buenos Aires. This extra revenue could likewise be applied against the extra cost of operating the larger plane, particularly in view of the fact that they fly at the "bottleneck" of our line.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 355

(Letterhead of Pan American-Grace Airways, Inc.,
New York, N. Y.)

LETTER No. 342

SUBJECT VARIOUS

NEW YORK

~~FEBRUARY~~ 5, 1935
April

Mr. J. D. MacGregor
CRISTOBAL

BUREAU OF AIR COMMERCE

Further to my letter #338, George Rihl tells me that Mr. Trippe is endeavoring to have the conference scheduled to take place April 8 postponed for a few weeks in view of pressure of other business. It is proposed to have Andre Priester attend this conference, if necessary representing Panair and Panagra as an operating man.

We wrote to Director Vidal advising that you were at present in South America and that a copy of his communication has been forwarded to you.

EXTENSION TO BOLIVIA

Grace has approved the recommendations contained in your letter of March 25 with regard to the Tacna/La Paz service. Their only comments were of a relatively minor nature and pertain to the following two points:

1—They suggest that during the first few trips we arrange to have a portable radio set at the La Paz airport (similar to that installed at Cuzco or at the Cotabambas mine during the freight work) with a view to making doubly certain that the planes flying between

[fol. 3371] Tacna and La Paz will be able to establish radio communication with La Paz. While the service being rendered by Cia. Boliviana de Radio may be very dependable, it is felt that this extra precaution should be taken until tests have taken place in actual operation.

2—On Page 2 of your report dated March 25, the recommendation is made that the fare between Tacna and La Paz be established at $30. U. S. Currency or its equivalent in national currency *at the official rate of exchange*, the latter being accepted only from bonafide residents in Bolivia. It is assumed that when you refer to "official rate of exchange" you are speaking of the export rate which stands at about 17 Bolivianos per dollar. This assumption seems to be confirmed by other remarks subsequently made in the report. It is, of course, obvious that we could not afford to collect dollar rates in Bolivianos at the rate of 4 to 1, which appears to be the official rate established by the Banco Central in La Paz.

George Rihl is having Andre Priester study the operating angles of the report submitted. From a business standpoint, George Rihl has expressed the following views:

1—That if Cia. Boliviana de Radio accepts messages from the general public for transmission by radio, it would probably be a mistake for Panagra to make a deal with this station because that would establish a precedent which both Panagra and Panair have been trying to avoid during the last few years. All commercial radio companies established throughout the System would naturally want to handle our radio work, but the policy so far has been not to utilize their services but rather to install our own radio stations.

I discussed this point with Mr. Cogswell and after making inquiries he advises that the Cia. Boliviana de Radio seems to be owned about as follows:

Grace	25%
Government	10%
Banco Central	10%
Others	55%
Total	100%

[fol. 3372] Mr. Cogswell also advises that practically all of the income of the Company during 1934 was derived from broadcasts and from the sale of radio materials and that only a negligible part of the income originated in messages transmitted for the public. I have not as yet had an opportunity again to discuss this point with George Rihl and I do not know whether he still feels that we ought to establish our own station at La Paz regardless of the extra cost, in order not to create a bad precedent.

2—George Rihl thinks that the weight allowance should not be increased from 15 to 20 kilos as such action would also establish an undesirable precedent. It seems that only 15 kilos are allowed on the flights between Girardot and Bogota and between Tampico and Mexico City.

3—The depreciation on the automobile to be stationed at Tacna appears to have been charged entirely to the operation of the Tacna/La Paz service despite the fact that unquestionably the automobile will also be used in connection with other flights in and out of Tacna. This, however, is a minor point.

I expect to be able to cable you definitely with regard to the starting date of this service before this letter reaches you.

From your copy of our letter to SAGO 6296, you have learned that the Direction Finder supposedly shipped from Miami to Callao via New York around the middle of February was not forwarded and that it is not expected to be ready before the end of April and also that the additional

Direction Finder apparently will not be available much before June 1. I am assuming that if the Tacna/La Paz service is inaugurated on or about May 1, it will be possible to loan a Direction Finder to the Tacna radio station pending receipt of the ones now on order.

[fol. 3373] PARTY OF FRENCHMEN

I am attaching herewith copy of my letter to SAGO 6306 sago (originally numbered 6280). I cabled ~~Panagra~~ yesterday inquiring as to whether an S-40 could in their opinion make a round trip between Cristobal and Guayaquil, taking into account available operating facilities, and also as to whether Panagra could handle the French party in its own aircraft between Guayaquil and Buenos Aires.

A reply from Pansago received today indicates that the S-40 could make the trip from an operating viewpoint. George Rihl has intimated that Panair is planning to carry this party between Barranquilla and Cristobal in an S-40 and that, if we want the S-40 to continue to Guayaquil, he could make a charter rate of 1.80 per mile which would include crew's salaries and expenses and fuel, we to pay landing charges and other incidental expenses. It is understood that the plane would be manned by a regular Panair crew and that in the event of mishap the damage to the aircraft and the liability in connection with the crew would be for Panair's account. The passengers would be covered by our own liability policy.

As this proposed charter figure was given to me only this morning I have not as yet had time to study it. I want to point out that; as the passenger fare between Cristobal and [fol. 3374] Guayaquil is $110., the twenty Frenchmen would pay $2200. between these two points. We would in addition carry whatever other passengers might be available for the southbound and northbound trips. Another feature which should be taken into account is the possibility that unless we carry this party by air between Cristobal and Guayaquil they may not want to travel by air between Guayaquil and Buenos Aires.

In reply to our second inquiry, Pansago referred us to your letter to Cristobal dated March 20 in which you advised that it seemed ill advised to attempt transportation of 25 persons in one party along our route. I do not know whether, in view of the additional information now available, you are willing to consider this proposition at all.

EQUIPMENT FOR THE NORTHERN DIVISION

Mr. Roig has informed you with regard to the proposed arrangement under which Panagra would own one S-43 and Panair another for the purpose of operating the service between Guayaquil and Cristobal and a point beyond not yet determined on the Panair lines. The Panagra plane would fly right through into Panair territory and the Panair plane would fly into the Panagra territory at a charter rate and under terms and conditions to be agreed upon. It is believed that certain economies would be available to both companies under this plan.

[fol. 3375] In addition to the foregoing, Panagra would immediately charter one or two Commodores from Panair to operate one or both services between Cristobal and Guayaquil commencing at the earliest possible date at a charter rate and under terms and conditions to be agreed upon.

An agreement is now under study covering the Commodores as well as the S-43 charter. No additional details are available at this time.

STRIKE AND RIOT INSURANCE

In compliance with instructions contained in your letter #174, I am forwarding to Lima short-term Strike and Riots insurance rates to be kept in their files for possible use in emergencies.

I have so much that I would like to write about but must leave it until I get on the ship for Chile.

(Handwritten material in margin)

Since dictating this I have your letter about schedule and I am discussing it with Shea. It looks pretty good to me. I thoroughly agree about the purchase of the second S43.

Letter No. 15

(Trip series)

On board "Santa Lucia",
May 5, 1936.

H. J. Roig, Esquire,
New York.

Dear Roig,

PANAGRA—COLOMBIA

Referring to my cable on this subject and your reply, I want to make it quite clear to you that in suggesting that the S-43 should fly overland I do not mean to suggest that any unwise risks should be run but rather that we should make a very cautious approach to the solution of the problem.

I do feel that it is of the most serious importance for us to get Trippe to agree to our going into Cali and that some method should be discovered for putting pressure on him in order to obtain his consent. I rather think that the discussion of putting our ships into Miami north and southbound or to get a hookup of our own to Panama might conceivably be used as a lever to bring him into line on some of these matters. I am not at all sure that it is a practical thing to stop in Miami and I am not sure, even if we con-

template doing so, whether it suits you to talk about it much until we have a definite plan worked out. On the other hand, I feel that even if you find that it is not practical to do this, the idea might be played up in a way that would frighten him into giving us a better schedule to Panama or allowing us to go into Cali, or both.

I am very glad to learn from your cable that you are getting Allen and Campbell to work on the Colombian idea and I am sure you will also find the means of bringing Trippe into line in one way or another. I will await developments of all this with great interest.

Very truly yours,

/s/ D. S. Iglehart

PRIVATE Letter No Sago 7420

Subject: REQUEST FOR CAPITAL APPROPRIATION.

LIMA
August 29, 1936

Panagra,
NEW YORK.

Your attention is invited to your letter No. 4445-P of August 10, 1936, to W. R. Grace & Company, Lima, on the subject of "Request for Capital Appropriation." This letter is not sufficiently complete in that it does not cover special cases, or rather, it covers special cases but in a way which is not satisfactory.

A particular instance has just arisen where it has been decided to purchase Kollsman altimeters as standard equip-

ment for our various radio stations throughout the Panagra line. Under the pending instructions the local Grace office is supposed to approve an R.C.A. form to be made out for purchase of these altimeters. Mr. Shea, the Grace local manager, has failed to approve this R.C.A. form as yet due to lack of knowledge of the reason for which these altimeters are required. Very obviously Mr. Shea has no knowledge of the requirement of these special instruments, particularly for use outside of Peru, and in future cases of Sago requisitions of this nature no time will be spent in trying to explain these matters to the local Grace people, but requisitions and R.C.A. forms will be forwarded direct to you containing the Sago section head's signature and the signature of the undersigned.

It is not often that such global purchases are required, and usually, as you know, the present method of handling R.C.A. forms has proven to be reasonably satisfactory.

(COPY)

June 30, 1938

Mr. A. Garni
W. R. Grace & Co.
7 Hanover Square
New York City

My dear Mr. Garni:

I regret that I was engaged in a hearing when you called this morning. When I became available this afternoon your office reported that you had gone for the day.

I talked with Mr. Lamiell this morning concerning the proposed second direct air mail schedule between Miami and the Canal Zone. Frankly, this situation does not appear very encouraging.

In order to improve the service on the West Coast south of the Canal Zone we authorized the so-called La Paz "cut-off" several months ago, which entails an annual cost of about $261,000. In addition, we established a direct schedule from Miami to the Canal Zone, at a cost of about $228,000 per annum.

Notwithstanding these additional and expensive services there has been very little improvement in the schedules and practically no mail benefit. To authorize another direct service from Miami would cost approximately $162,000 a year additional; which would be offset to the amount of about $72,000 if the service now being maintained between the Canal Zone and Barranquilla is abandoned. Even with this offset of $72,000 a year the Department would be put to an additional expense of around $90,000 a year.

This, added to the $261,000 for the La Paz "cut-off" and the $228,000 for the one direct schedule from Miami to the Canal Zone, would make a total cost of $579,000 per year.

Unless some substantial benefits are to be obtained through a second direct schedule between Miami and the Canal Zone I doubt whether such an additional service, with the attendant cost, would be justified.

I am leaving tomorrow for a short vacation and I suggest you confer further with Mr. Lamiell concerning possible improvement in the service.

Sincerely yours,

Harllee Branch
Second Assistant
Postmaster General.

C. V. Whitney, Esq.,
Hobe Sound,
Florida

Dear Sonny,

I have just received your letter of yesterday.

I have been over the minor changes which Mr. Roig and Mr. Trippe suggested to the memorandum that you and I agreed upon. They seem to be in order and Mr. Roig is taking to Mr. Trippe a clause "5" which I have endeavored to revise, as per attached, in the sense of our telephone discussion. As you indicate, Mr. Roig will take this to Mr. Trippe as my final word in the matter, and I hope that now we may proceed to carry out the arrangement.

As I indicated to you on the telephone, we will consider the memorandum regarding adequate service, which Mr. Roig and Mr. Rihl had tentatively agreed upon, as merely an indication of a general viewpoint and neither will consider that it is to be followed to the letter.

The thing that pleases me in this whole matter is that your mind and my mind have met; that we understand

exactly what we are driving at; and, I feel entirely confident that we will see that all friction is eliminated and that everyone [illegible]nds his effort to constructive accomplishment, the results of which are bound to be successful.

Yours sincerely,

(sgd) D. S. IGLEHART

[fol. 3380] 5. Any disputes arising under this general plan and every phase thereof, including interpretation of "adequate direct connecting service" referred to in paragraph "2" above, which cannot be settled by the Board of Panagra, shall be determined by Messrs. D. S. Iglehart and C. V. Whitney. If they are unable to agree regarding interpretation of "adequate direct connecting service", Panagra may apply for the certificate referred to in paragraph "2" on the conditions therein stated.

(*Pencil note*: Arbitration clause submitted pursuant to Mr. Whitney's letter of January 17, 1938.)

[fol. 3381]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 360

PAN-GRACE

Edited by Mr. Rihl.
noon, Jan. 31, 1939. ma

1. One of the Grace directors of Panagra (who shall also be a director of Grace) will be elected President of Panagra and placed in responsible charge of the management of the company. If at any time the Company's affairs are not being conducted to Pan American's reasonable satisfaction, then the President will resign.

2. Pan American will inaugurate on or before April 1, 1939, a second direct trip between Miami and Cristobal, and will maintain an adequate connecting service between Miami, or some other U. S. port agreed upon, and Cristobal connecting with Panagra's through sched-

ules. If at any time Pan American's connecting service between Miami, or some other U. S. port agreed upon, and Cristobal, is not operated to Grace's reasonable satisfaction, then Pan American will cause its directors on the Board of Panagra to take such action as will permit Panagra's applying to the C.A.A. for a certificate to operate this connecting service, provided that Pan American shall not be in any way precluded from maintaining before the C.A.A. that its service is satisfactory and that Panagra's application should be denied.

3. The foregoing is to be brought informally to the attention of the C.A.A. for any suggestions which it may desire to make.

4. It is agreeable to Grace that Pan American continue to receive the share of service fees it is now receiving provided Pan American gives satisfactory service.

4a. Grace and Pan American agree that Pan American-Grace shall continue to pay in the same proportion service fees as now being paid, provided that the services rendered by the respective parties are satisfactory to Pan American-Grace.

(Note) Mr. Roig feels that #4a would be acceptable if #4 as originally written is not considered as expressing the intention of both partners, i.e. both partners are expected to give all service and cooperation possible commensurate with their respective organizations.

5. Any disputes arising under this general plan and every phase thereof, including interpretations of "adequate direct connecting service" referred to in Paragraph 2 above, which cannot be settled by the Board of Panagra, shall be determined by Messrs. D. S. Iglehart, President, W. R. Grace Co., and C. V. Whitney, Chairman, Pan American Airways Corp. If they are unable to agree regarding interpretations of "adequate direct connecting service" they shall appoint an arbitrator who [fol. 3382] shall decide whether Panagra may apply for

the certificate referred to in Paragraph 2 on the conditions therein stated. In case it should be impossible for Messrs. Iglehart and Whitney to act as arbitrators, as contemplated herein, the dispute or disputes in question shall be submitted to the American Arbitration Association for arbitration.

(Note) The underlined part of #5 will be difficult to have accepted by W. R. Grace, but believe otherwise it would be acceptable and not contrary to the conversations Roig and I have had. However, Roig feels that it would be better for both sides to avoid setting up a method of procedure to be followed in case of the unavailability of either Messrs. Iglehart or Whitney.

(Note) Mr. Roig feels that it is most inadvisable to put a time limit on the agreement, and Mr. Friendly states that it is not at all necessary from a legal standpoint. Roig points out that the document at best is a very general plan to set up machinery that can be used in case of disputes.

(Note) Mr. Friendly feels that the wording in #5 as above expressed would cover the case of resignation of either Messrs. Iglehart or Whitney.

[fol 3383] "Any disputes arising under this general plan and every phase thereof, including interpretations of 'adequate direct connecting service' referred to in Paragraph 2 above, which cannot be settled by the Board of Panagra, shall be determined by Messrs. D. S. Iglehart and C. V. Whitney. If they are unable to agree regarding interpretations of 'adequate direct connecting service', Panagra may apply for the certificate referred to in Paragraph 2 on the conditions therein stated."

. . . . . .

The above paragraph was read to me on the telephone on Wednesday, January 18, 1939, by Mr. Harold J.

Roig, and was stated by him to be the substitute text for the arbitration clause in the memorandum agreed between Mr. Iglehart and Mr. Whitney. Mr. Roig further stated that Mr. Iglehart had not intended that paragraph 5 of the memorandum should apply to the provisions of paragraph 2, but that when Mr. Whitney stated to Mr. Iglehart that he, Mr. Whitney, had supposed that paragraph 5 did apply, Mr. Iglehart had worked out with Mr. Whitney the foregoing provision so as to bring about arbitration under paragraph 2 of the memorandum under discussion. Mr. Roig offered to have his secretary dictate this provision and asked for a decision in the morning.

Mr. Roig's secretary dictated the above paragraph to me on the telephone on January 18, 1939 and I immediately furnished copies to Messrs. Trippe, Rihl and Friendly, who were in conference in Mr. Trippe's office.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 361

PRIVATE

March 8, 1939

Memorandum To: Mr H. R. Harris

Following your instructions, the following observations on last year's results are submitted. In addition I would like to make several general observations in which you may be interested.

According to data furnished me by SAGO Traffic, the total Panagra income from revenue sources in which SAGO Traffic is concerned, shows a slight improvement in 1938 over that obtained in 1937 and, therefore, all previous years. Herewith a comparison of the 1938 results with those of 1937.

	1937	1938	Difference
Passenger Traffic	$682,989	$ 653,477	$29,512
Baggage Traffic	33,788	29,608	4,180
Foreign Mail	158,047	180,757	22,710
Air Express	55,624	71,347	15,723
Charters & Freight	34,681	78,332	43,651
	$965,119	$1,013,521	$48,402

Although a small increase in total revenue was secured over the previous year, the picture as a whole is not particularly pleasing, since the increase can be accounted for largely by two factors which cannot be counted upon to save the situation year in and year out, viz., foreign mail and freight flying. The mainstay of our revenue aside from U. S. mail receipts is, of course, and probably always will be, passenger traffic, and in this department in the face of the figures above, we do not appear to have done very well in 1938. Excess Baggage revenue, of course, closely follows passenger revenue, and since a decrease was noted in passenger revenue, it is only to be expected that the same holds true with excess baggage traffic. Air express shows an improvement and it is believed that this traffic will continue to progress more or less satisfactorily despite a good many factors which are and will continue to hold it back to some extent. Foreign mail revenue also shows an improvement, but the results in this department must be qualified as below. Charter and freight flying naturally show a big increase over the previous year owing to the Aramayo job and a number of charters sold in Bolivia. However, as noted above, this traffic is not a dependable source of revenue.

[fol. 3385]

PASSENGER TRAFFIC

An analysis of passenger traffic results offer some encouragement inasmuch as only one section of the line seems not to be showing a certain amount of improvement, the Eastern Division being only one of the four subdivisions which did not show an improvement over the previous year.

However, losses recorded in the Eastern Division were so large as to offset by a considerable amount the improvements noted in the balance of our mileage. While everything considered, the Northern sections of the line did fairly well in 1938, the immediate problem would appear to be in the Eastern Division and until we can obtain some sort of revival there, our principal efforts should be concentrated in that sector.

Several major factors and numerous minor ones contributed to the poor showing obtained. During the year, two of five transandean services were discontinued, which certainly removed some of the sales opportunities previously enjoyed, though it is doubtful that this factor will account for a very large part of the loss in volume. Undoubtedly the principal cause of our trouble lies in the fact that both Chile and Argentina have for some time been experiencing an economic depression which has removed the necessity, in some cases, and in many others the actual ability of the local people to travel internationally not only over our lines, but by any other means of transportation. This is particularly true in Chile where a study of passenger traffic data of all kinds reveals the fact that very few Chileans are traveling beyond the borders of their own country. It should be noted here, too, that a considerable part of the transandean traffic enjoyed in former years consisted of travel by Round South America tourists. The volume of this traffic shows a marked slump during 1938 and of course, this has a very real bearing on the final returns. As you know, we have several plans afoot which we hope will return some of this traffic to us.

It seems probable that no marked improvement in the Chilean situation can be expected for some time, and since we really have little hope of improved Chilean patronage until this takes place, it seems to me we should spend real efforts where there is presently a fair possibility of obtaining satisfactory results, in other words, Argentina.

There is no reason to believe that Argentina will not soon show some signs of pulling out of their present difficulties, and when this occurs, we will naturally recover

some of the volume we have lost. Meanwhile, there are a number of things we can do to help ourselves. Most of the things I have in mind have been rather thoroughly discussed in correspondence with this office, and there does not seem to be any necessity to go into much detail here. However, [fol. 3386] there are two general aspects of the situation which require some very real consideration here in New York inasmuch as there is little SAGO Traffic can do about them further than what has been done already. The first of these is the tariff differential which exists in our rates in the Argentine Chile sector as compared with those of the German and French combination. Even without the rate reduction which they placed into effect in December 1938, the competitors have, in the course of that year, succeeded in booking just about 50% of the purely local business between the Argentine and Chile and vice versa. How much of this traffic was fully paid for we have no way of determining, but it seems entirely logical that they did succeed in some way in increasing their traffic during the year. With the present greatly reduced rates and with the same frequency of service offered by ourselves, that is, three times a week in both directions over this mileage, it is hard to see how they will not eventually cut very heavily into our patronage. So far we have no data which definitely proves that their rates are causing us any trouble, but they have, so far as our information goes, been in effect only one month. It cannot but seem entirely probable that we will not be able to hold our own in the face of competition of this sort, and a rate reduction down to their level, or at least approaching it, seems almost inevitable. Despite the fact that we do have better planes and probably a better all around service between Buenos Aires and Santiago, we might just as well come to the correct conclusion that this is not a governing factor to the extent that low rates are, at least where comparatively short-haul travel by Latin Americans is concerned.

Actually, both the Germans and the French operate quite fair services between these two points. I do not believe that we have actually any right to expect the lion's share of this traffic merely on the basis that we believe we operate a far superior service or that we are more efficient operators

than the Europeans. This idea is definitely not shared by the traveling public to the extent that they will favor our services,

Everything considered, it seems that we will, if we expect to retain our present position or to improve it, inevitably have to make some adjustments in our transandean tariffs. Frankly, most of us concerned with selling this travel are of the opinion that the present rate of $100.00 is too high and could stand a considerable reduction. There is considerable data on this subject available in this office and it is suggested that at this time our course of action regarding possible future tariffs should be determined, in order that when and if we are convinced, as I am sure we will be shortly, a change must be made, the same can be done promptly and without having to go through the whole thing all over again. The other factor, which I am convinced is directly reflected in the income results in the [fol. 3387] Eastern Division is the poor service we offer on the Argentine portion of the Diagonal between Salta and Cordoba. There is a great deal of potential Panagra revenue in this sector but we will never realize on it until we do something about improving the service. My own observation is that all we need do at the present time is to put on one more service between Salta and Cordoba to connect at the latter point with one of the transandean services. However, it may be that some adjustment will be required in the tariffs in this section, particularly the round trip tariffs. The addition of another service over this mileage should certainly result in a tripling of present traffic, but it is quite possible and even probable, that the outcome will be even better. Here again we are merely fooling ourselves when we stress our superior service. For many years the Argentines in this section of the country have used their trains and although they are uncomfortable, they know of nothing better and are perfectly content to continue using them. I do not believe that they will remain content with this state of affairs if they actually experienced what we have to offer, but this will hardly happen until we offer them something they can use at a price they feel they can pay.

In view of the tremendous possibility in this market for us, everything within reason should be done to popularize the service, even if for a year to two it costs us money to do so. I think we can profitably, over a period of time, increase the number of services and reduce the round trip rates until we have built up a comfortable patronage. Once we get these people to flying, it is unlikely that a gradual increase in the tariffs to present levels would send them back to the trains. This may not be, of course, the best solution of our problem, but it at least should go a long way toward getting a reasonable number of these people into the air, and that is certainly the first consideration at this time.

This matter has been discussed at length on many occasions but it might not be amiss to point out again that under present circumstances on the Argentine section of the Diagonal our chief stock in trade—speed—simply does not exist since, except for a very few hours during the week, travel between any of the points on the Diagonal may be accomplished much faster by trains or busses. It boils down to the fact that all we have to offer in this market is a theoretical superiority in service—in other words, comfort, in which the people are not particularly interested since to date they know nothing about it.

The many minor problems existing in the Argentine are all receiving the attention of SAGO Traffic and the local agents, and some small improvement in local traffic can normally be expected therefrom.

[fol. 3388] As for passenger traffic on other parts of the line, last year saw some slight improvement over traffic in previous years as pointed out above. However, we know that the Germans have cut into our local Peruvian volume and the prospects are that they will continue to do so as long as the present rate differential between competitive points exists. In addition to what they are doing to our traffic where we now compete, that is, principally between Lima and Arequipa, it is probable that the same sort of situation will soon exist in the North where we understand the Germans intend to extend their services as far North as Guayaquil, connecting there with SEDTA and finally

with SCADTÀ in Colombia. Thus they may not only give us trouble with local Peruvian traffic but also with international traffic to the North.

Merely as an indication of what this competition may amount to in the future, herewith some figures on their traffic between Lima and Arequipa as compared with our own during the first six months of Lufthansa operation over that mileage.

	May	June	July	August	September	October
Panagra	49	52	70	66	54	56
L'hansa	29	43	57	64	63	88
			Accumulated Percentages			
Panagra	63	58	57	55	53	50
L'hansa	37	42	43	45	47	50

While the above figures do not indicate a marked drop in our own traffic, they do indicate that Lufthansa is definitely increasing their percentage over their total traffic, which is really a serious angle of the proposition. Naturally, they are getting some of Faucett's business as well as ours, but we are definitely not holding our own in this trade.

It is interesting to note that these people were able in six months time to draw up even with us, despite the fact that our schedules and equipment are far superior to theirs. Lufthansa departs from Lima and arrives at Lima at very inconvenient hours compared to Panagra arrivals and departures. This factor plus definitely inferior equipment has not overcome the advantages they secured through the use of more convenient tariffs, and proves again that short-haul traffic is interested in price to a greater extent than they are to comfort.

Since it appears that Lufthansa really intends to extend their line to the North, now appears to be the time [fol. 3389] when we should decide what our course of action should be in meeting their competition when it comes. It seems very unwise to await the actual start of operations

of their line before deciding what we will do at that time, and I believe that we have sufficient data in our hands now to predict what the results will be in the event that we decide to do nothing at all.

For some reason traffic between the Canal and Colombia and vice versa, has not lived up to expectations. The reason for this is unknown to me and results are very surprising in view of the popularity which this service enjoyed when we first opened up the Cali territory and indeed right up to the time service was suspended in August 1937. The Cali Agents have pointed out that there is a rate differential existing between our service and that of other combinations, and this may, of course, account for our lack of volume here. I understand that Mr. Muhlfeld has recently paid a visit to this sector and will probably be able to report on what should be done to improve matters.

AIR EXPRESS

While air express traffic continues to show its accustomed yearly 40% increase, much remains to be done about it in several places, notably Chile, where exchange control conditions practically eliminate any real chance for improvement. It seems quite within the realms of possibility that some means might be found to overcome this particular sort of handicap, and in Chile, as elsewhere, the potential revenue is rather large, someone with a thorough knowledge of the local situation might profitably spend some time on it. I believe Mr. Simon, given the time, might be able to turn the trick.

Mr. Muhlfeld reports, on January 11 in a memorandum to you, that between November 29 and the date of his memorandum we hauled more than two tons of air express in to Cali from the North, principally I take it, sea air traffic from Cristobal. This has been accomplished almost entirely without selling activities on our part since we are not permitted to advertise this type of service. As you know, SAGO Traffic has never agreed to this policy attitude, in view of the actions of other carriers in this field and because we have convinced ourselves that this particu-

lar type of traffic travels only because of the sea/air facility and in no way detracts from the through all air services offered by the system.

Unless the considerations which have promoted our present policy regarding sea/air express are very strong indeed, I am sure we are passing up a very good opportunity [fol. 3390] to bolster up our express revenue by not pushing the sale of this traffic.

A possible and very likely explanation of the comparatively good showing made by express traffic lies in the fact that throughout the year we employed over a large section of our line, a modified air express tariff, which opened up several new fields for exploitation, which fields were completely shut off from us when the former tariff was in effect. The bulk of this improvement is accounted for by the movement of express out of the Argentine to Chile and Peru. Argentina, compared with most Panagra countries, is a seller's market whereas most of the others are importers of the type of goods which normally travels by air. The new tariff is favorable to shippers and consignees of heavier than average merchandise and the situation is in the process of being exploited by our express people in the Argentine and nearby countries. We have a similar situation existing in the North where exports from the Canal could be considerably increased, possibly if a more convenient tariff were in effect, and as you may or may not know, the new tariff referred to here is in effect North to Ecuador. Since we now have a certain amount of available space on our Southbound planes at Cristobal, I believe it would be worthwhile to apply the new tariff in that sector at this time.

For some time now we have not had anywhere along the line, a solicitor who devotes his entire time to the exploitation of our express traffic, nor have we had in SAGO Traffic any individual who is principally concerned with this phase of our business. I believe that the results we are now obtaining in express traffic are derived from the concentrated efforts we made to push the service beginning in June 1936 and extending for a period of about a year and a half. We at least succeeded in arousing a little in-

terest in this traffic amongst our agents and I believe that the work can be profitably continued.

Inasmuch as intra-Panagra express statistics have not been generally available up to now and have never been included in the system statistics, which are published every month, you might be interested in examining the following data on purely Panagra shipments during the month of January 1939.

Country of Origin	*No. of Shipments*	*Weight (Kilos)*	*Weight Charges*	*Valuation Charges*
Panama	19	189.5	$197.03	$ 7.48
Colombia	11	30.0	43.39	1.10
Ecuador	40	107.0	97.27	14.60
Peru	42	62.5	80.01	4.20
Bolivia	3	1.5	3.00	0.30
Chile	22	148.5	227.17	6.12
Argentina	69	409.5	347.44	11.01
	206	948.5	$905.31	$44.81

[fol. 3391] It should be remembered that January is normally and naturally not a particularly good month for air express anywhere on the line, and therefore, that these figures though interesting, are likely to be somewhat on the conservative side if used to project this year's probable results.

FOREIGN MAIL

Although the Green Books, the only financial data normally used by SAGO Traffic, show a $22,000 improvement in revenue from this traffic in 1938 as compared with 1937, it now appears that all of this improvement, plus a considerable additional sum is a result of certain bookkeeping adjustments, and that far from actually obtaining a $22,000 increase, we record in the White Books a $25,000 decrease. Up to this time SAGO Traffic has never been supplied with any such statistics, which can tell us where and why an increase or decrease in mail revenue takes place. I believe

we are now getting certain data which will give us this information. Meanwhile a considerable part of the decrease is accounted for in short returns from the Argentine, where we received some 58,000 Argentine Pesos less in 1938 than we did in 1937. This is no doubt due in part to the decrease in our transandean frequency as well as to the additional service to the States up the East Coast which was inaugurated by Panair in December 1937, and thus was in operation throughout 1938. Another explanation of this decrease can be found in the loss of European mail from Peru to the new Lufthansa service which started operations in May. I am unable to say just what this amounted to, but presumably it comes to a respectable sum.

Frankly, SAGO Traffic has never been particularly concerned with foreign mail traffic, as it has somehow been regarded as outside of our sphere. As Mr. Vidal points out, however, revenue from this source is a matter of great importance to the Company and no doubt, SAGO Traffic should have a Mail Department under the direction of someone who is not only thoroughly familiar with the subject, but able to increase the traffic.

CHARTER AND FREIGHT FLYING

As no freight flying is contemplated for 1939, we cannot count on any revenue from this source during this year. There will always be a certain amount of charter flying, however, and presumably we will obtain about as much revenue this year from this source as in former years. However, the use of charters by the public seems to depend almost entirely on emergencies which arise from time to time, and over which the sales force would appear to have but little control.

SAGO TRAFFIC

Panagra's sales direction center, SAGO Traffic, is undoubtedly understaffed at the present time, particularly [fol. 3392] since such a large amount of time must be spent in connection with the direction of the department's budget. While it is true that the experience gained in this work

during 1938 has been of inestimable value to all who are concerned therewith, the time seems to have arrived now to delegate this work to other than those who should primarily be concerned with increasing the Company's business.

In view of the amount of revenue obtained from foreign mail payments, someone, as Mr. Vidal has pointed out, should be assigned definitely to the promotion of this sort of traffic, and to familiarize himself with all of the conditions on which is promotion depend. We have never had anybody in SAGO Traffic who has had the time or the facility to really do anything in this connection. We actually received a considerably smaller sum from this revenue source in 1938 than in 1937, so now would appear to be the time to seriously think about putting somebody on this job.

At this time we have no employee who can devote very much time to the promotion and direction of our air express traffic. This traffic was definitely unsatisfactory from the time the service was inaugurated until 1936, when it started showing some improvement and has steadily gone forward ever since. While air express is undoubtedly a "natural", I think it fair to assume that some part of the improvement in this traffic can be attributed to the assignment of someone to work on it exclusively, which transpired in 1936. It might also be reasonable to expect that it will not continue to progress unless we again place somebody in charge of this department to make sure that express solicitation, which is a highly specialized job, is revived.

Budget direction in 1938 must have taken up at least one-third of the General Traffic Manager's time, not to mention that of others of his staff. This is true to the extent that on practically every project originated during the year a delay occurred in carrying it through to conclusion, due entirely to the fact that, at certain times of the month, all other work had to be suspended in order to get our monthly budget work out of the way.

One or two general observations regarding the Panagra picture as a whole may be in order here.

It is my frank opinion that after ten years of operation, Panagra finds itself, so far as the Sales Department is concerned, miserably represented throughout the majority of its territory. This may not be at all true and probably is not where operations and executive affairs are concerned, [fol.3393] but in matters of this type the local agency manager or a competent assistant handle them. Not so with sales. This branch of work, which is certainly not unimportant, is left as a general thing, to a local employee of a not-too-high type. Where this condition obtains, and it does rather generally throughout the line, results have been very poor indeed, though probably no poorer than might have been anticipated long ago. SAGO Traffic has spent much time and effort in trying to convince various agency managers to assign better personnel to its work, but so far with comparatively little success. My own experience has been that the local managers do not believe that the amount of extra business a better staff might obtain would, in agency commissions, justify an increased salary expense. This, almost invariably, has been the excuse given when we have found it necessary to demand better attention from the smaller agencies. On several occasions it has been definitely pointed out to SAGO Traffic that despite what might be heard to the contrary, our West Coast agents are very well paid indeed for handling our work. If this is the case, it occurs to me that the method of compensating them might be improved upon from the Sales Department's point of view. If the agents regard their Panagra representation and the direct compensation therefrom as being relatively unimportant as compared with some of their other activities, but are nevertheless properly compensated, would it not be a good idea to find some way to rectify their ideas in this regard? One way of doing this might be to pay them as, if and when they accomplish something for us and only then. This is the way we are presently operating along the Diagonal in Argentina and except for the stations where we obviously have the wrong man acting for us, it works very well.

SAGO Traffic regards for example, the Salta and Tucuman representatives far superior to most of those on the West Coast in similar posts. There is plenty of reason for this feeling. These two agents are always on their toes, know all there is to know about our rules, regulations, what we have to sell and how to sell it, because their only hope of making anything out of their Panagra representation lies in their ability to obtain business for us. If these agents have not so far set the world on fire with sales, it is certainly not because they have not tried, but almost entirely because we have given them, up to this time, so very little to sell.

Another indication that we may not be following the right plan as regards dealings with our agents, can be drawn by making a comparison of the results obtained in Peru by Faucett's agents as compared with those obtained by our own. Certainly few of Faucett's representatives have anything like the standing in their respective communities that our own agents do. They get better results and there can be no question but what they do and have done for years, simply because they know that they [f. l. 3394] must pay attention to their representation, or, in other words, sell, if they mean to stay in business. This is not so vitally important to our own agents, and the results are only what we might have expected, which is to say that Faucett out-sells us by a wide margin.

With but very few exceptions our Agency managers and sub-managers are unable, as pointed out above, to take a long view of the situation and remember that in the long run their Panagra representation really is a rather good thing. On the other hand, they do keep a very close watch on current receipts and there is some justification for this reason in believing that our sales work is for them a relatively unimportant matter. Where this is not the case, for example, in Cali, Colombia, we are, in my opinion, quite ably represented, although in the case of this particular station the staff is comparatively small. The personnel that they have assigned to our work, however, is distinctly high class. To some extent the same might now be said of the Guayaquil Agency, where a competent foreign

employee is directly in charge of all phases of Panagra work and does not forget that sales are a very important part thereof.

Other considerations may of course, make it impossible to follow the course suggested above, which is paying for actual accomplishments when they are effected and not at any other time. If it is impossible to follow a plan of this kind, then some other means should be found to make it very clear to our agents that we expect the kind of attention to our sales work as they give, for example, to Grace Line sales. In a great many of the Coast agencies the Grace Line has succeeded in obtaining services of the very best employees of the individual agencies, in some cases having supplied Grace Line trained men to the agencies, whose salaries, we belive, are nevertheless for the account of the local agency.

Merely in passing it might be worthwhile mentioning here that no later than yesterday, while lunching with a former passenger, whose company gives us a considerable amount of business first and last, I was frankly told that the attention this man received on the West Coast—and apparently the attention shown several of his acquaintances who have made the same sort of trip he had—was markedly inferior to that received on other sections of the system. I personally have heard the same story so many times during the past two years, that there must be some truth in it unpleasant as it is to believe it. However, in the last analysis it is only reasonable to believe that if our routine affairs are not handled to our satisfaction, as they certainly are not, there is no reason to believe that this particular phase of the work is handled any better. Indeed there seems to be quite a sufficient amount of evidence to support the theory that we are not up to scratch in handling passenger traffic, and I believe that the failure [fol. 3395] occurs largely on the ground and not in the air.

Another matter which may be in order to touch upon is our almost complete failure in obtaining the cooperation of non-traffic department people in the Company in

effecting sales, with reference particularly to the piloting force. With a few outstanding exceptions, our pilots neither know nor do they apparently care anything about the Sales Department's problems, to say nothing of their general inability to answer the simplest questions about such fundamental things as tariffs. Pilots certainly get around socially with a great many more potential customers than do any other class of employees, and they could, if they would, furnish the Sales Department with many a good lead, if not with many an actual sale, and the same holds true of many other non-piloting employees. The truth is, unfortunately, that for many years this apathy towards sales has extended even to a general feeling of contempt for the Sales Department itself, and while some improvement in this respect has been noted latterly, it is still true that much might be done to secure further improvement and actual interest in many of the phases of the Sales Department's work, and this, we believe, would result in increased sales. The Sales Department cannot deny that it is itself largely responsible for the attitude described above. Recognizing this fact it is trying to interest non-Sales Department employees in its work, but the cooperation of the heads of all departments is certainly a requisite to any real success in this endeavor.

The whole matter may boil down to the fact that we definitely lack an efficient personnel department. It has been my observation in talking with employees throughout the line that a large percentage of them are not altogether sold on the Company. A certain amount of "grousing" can, of course, be expected, but I believe we have far too much of this sort of thing in Panagra.

Probably few have any real complaint and could generally be made to see the light without too much difficulty, but regardless of the validity or invalidity of an employee's "gripe" it seems obvious that the thing must be cleared up before the Company can expect to receive the loyal and efficient service it has a right to expect from all employees. A really competent personnel supervisor could do a great deal for Panagra and I am sure that every employee would appreciate having a "friend at

court" to whom he would feel free to go with many of the problems which mean so much to the individual and are liable to have such a marked effect on his work.

NEW YORK COPY

SPEED-UP SCHEDULE STUDY.

LIMA, August 7, 1940

Pan American-Grace Airways, Inc.
NEW YORK

In connection with your letter No. 7437-Private, this will confirm our Palmetto cable No. 5 sent to you on August 6th.

As regards the idea of an operation making Miami Cali and Cali Lima in one day runs in both directions as compared to the other combinations of Miami Cristobal and Cristobal Lima in one day runs, the former, of course, from an operating standpoint gives us more leeway than the latter through comparative looseness of schedules. However, as pointed out in our cable, we feel we should undertake this schedule only on the basis of our going ahead as promptly as possible and installing the facilities which will permit a Cristobal Lima and Lima Cristobal operation in one day runs on delayed schedules. Our reasoning in this connection is that under such Miami Cali schedule the frequent delays that will occur northbound due to winter weather in the south can only be absorbed by the operation of Lima Cristobal in one day. Likewise, we should recognize the fact that during the rainy season in the north that afternoon departures from Cristobal for Cali will introduce delays as has been experienced in the past in entering Cauca Valley, and on such occasions a delayed schedule operation of Cristobal Lima following day will place the

trip back on schedule. Also, it is felt that with the early departure that this schedule will call for out of Miami that we can expect delays due to late arrival of connections at Miami, etc. with resulting arrival in Cristobal too late for making the Cristobal Cali deadline departure.

The second point made in our cable No. 5 regarding elimination of Trujillo was made in view of the Cristobal Lima delayed schedule operation plus the generally unsatisfactory field conditions there and we recommend that you give us approval to arrange elimination of this stop prior to placing this speeded-up schedule into effect.

The third point in our cable concerned the important question of handling mail transfer in the Canal Zone. Based on present practice and experience we are somewhat doubtful about the ability to make this Miami Cristobal flight in time to permit working of the mail and still allow sufficient time for us to depart south from there by 1:30 P.M. EST. It now requires the post office two and a half hours to work this mail and even if a post office was established at the airport to save the time of round trip transportation between the airport and town it would still require a two hour period to handle it the way it is now being done. You understand, of course, that this situation is not necessarily the case on northbound flights through the Canal Zone because on such occasions and on basis of all the northbound mail being taken through to Miami so as to permit complete working and consolidation at that point, then the Canal Zone post office only requires this mail for purpose of recording the weights which takes only twenty to thirty minutes exclusive of present transportation time between field and post office. This question of working of mail by Cristobal post office does not seem to be one of inadequate personnel to handle it. As you know, the Canal Zone post office has gone into this phase of it rather thoroughly in the past and have worked numerous systems on the number of men and method of handling to reduce this time to a very minimum. Briefly, from our observation the matter seems
[fol. 3397] to be one that requires just so much time to record each registered letter and consolidate the packets and

sacks for the individual points and that little or no reduction in time for doing this in the Canal Zone can be anticipated so long as the above requirements for handling this mail in this fashion are in effect.

The above remarks, of course, recalls the system used a few years ago when we were making Barranquilla Guayaquil in one day runs in both directions. You will recall, under this schedule, that the U. S. post office completed arrangements to station five men in Barranquilla to handle this mail during the overnight stops there as the schedule did not permit sufficient time during the transfer in Cristobal to work the mail. This idea may immediately bring to mind the thought of the U. S. post office making some such similar arrangement to handle the mail during the overnight stop in Cali under the schedule proposed in your letter under reply.

While this above problem is a matter which will fall largely onto your office to handle and work out the details, suffice it to say here from our view point, there seems to be only two solutions to this mail question which will facilitate our operating the Miami/Cali and Cali/Miami schedule in one day runs. First would be the elimination of *any* requirement for the Canal Zone post office to work the mail and that all this time and work involved be absorbed at the Miami end by the U. S. post office at that point. Second, the arrangement in Cali for handling the mail as afore mentioned.

Irrespective of the above two ideas, the question of having a U. S. post office branch on the airport at Canal Zone is still strongly emphasized because even though the function of such post office would only be to record the weights of the intransit mail the time saved in transportation to and from the airport to down town post office is most important.

After a review of the combinations of days of departures from Cristobal southbound and Buenos Aires northbound, as given in your letter, we advised in words 1 to 8 of our cable 5 that we favored acceding to the proposal made by Panair and covered in the third paragraph of your letter.

Certain opinions on these days of operation will be expressed here for your perusal as they concern our operating problems.

The days of departure from both Cristobal southbound and Buenos Aires northbound are considered excellent from standpoint of traffic movement. As you point out, of course, the inability to make a turn around in the Canal Zone on one trip per week under this proposal will require our stationing an extra plane and crew in the Canal Zone at all times. This, of course, has its bad features, but as pointed out in our study, attached to our letter No. 4100 P that unless we could have a full day layover in Canal Zone between turn around, that an extra plane and crew would be required. In other words, even though the days proposed by you in first paragraph of your letter were used, we feel that at least during the winter season, May to October, that we would have to keep an extra plane and crew in the Canal Zone to avoid southbound delays being introduced into our operations as result of northbound delays which may be expected to be frequent during winter season. Also, the extra plane and crew would eliminate the question which may arise as to excessive flying time for flight crews on the [fol. 3398] turn around at Cristobal without layover on this schedule. This round trip flying time without layover would, as you know, amount to 25 hours in a 60-hour period and might give rise to excessive flying without layover period. Therefore, we do not feel that the disadvantage of the requirement of an extra plane and crew is as great as it may appear on the surface, although the expense item of keeping an aircraft and crew at Cristobal will be appreciable. Naturally, the best combination would be a schedule which would give a full day layover between arrival of northbound trip and departure of southbound. We are assuming, of course, that all these possibilities were thoroughly exhausted by yourselves and Panair and that the proposal they made was the best that could be performed taking the problem of their other services and equipment into consideration. However, looking at a possible combination we wondered if this one was considered:—

Leave Miami southbound Tuesdays, Thursdays and Saturdays same as that shown in your letter which is the most desirable from our standpoint.

Leave Buenos Aires northbound Sundays, Tuesdays, Fridays, arriving Miami Mondays, Wednesdays, Fridays.

These departures are not the best days from Buenos Aires standpoint of traffic for us, unless there is no Saturday departure via east coast, but it does correct some of the operating defects mentioned in the Panair proposal in your letter in that it:—

(a) Permits them to operate the Cristobal Miami run without round trip in one day in 307 even though this would keep their 307 in Cristolal more than in Miami.

(b) Would give us full twenty four hour layover in Canal Zone between our northbound arrival and southbound departure with its advantages already mentioned.

The fourth and fifth points mentioned in our cable No. 5 are sufficiently clear to require no further explanation here.

We await further word from you on this matter with interest.

NEW YORK COPY No. 5269 Private

TRAFFIC PAYLOAD AND SCHEDULES

Lima, March 1st, 1941

PANAGRA
NEW YORK

Attention: Mr. H.J. Roig

Please refer to your P-8452, P-8480 and our 5218.

In reply to your question, "we are entitled to all the payload which we require to insure an adequate and satisfactory connection with our service" and with direct reference to Dobbs' memorandum of January 22nd and in particular that part where he says, "in summary . . . . . most of the west coast business is booked from a distance in advance and has resulted in giving Panagra a fair break of the total passenger load", I have several comments to make.

Payload: You are in receipt of our monthly CRC reports from which you have observed that the load factor over the Balboa Cali sector is now averaging 75% with traffic increasing from 3.6% each month over the preceding month. This indicates we are running at full capacity in this sector. In fact, when we are operating at 55%, we frequently are turning down business. Our figures prove this as you will note from the following study which I just completed:

1.—During January, we had approximately 25,000 kilos of available payload out of Balboa Cali sector on our trunk line services of which 35% or 8,750 kilos were allotted to mail and express. Translated into seats, we had during January about 156 seats. Our reservation control, however, shows we carried 158 passengers. As a matter of fact, we carried 168 passengers but 10 disembarked at Cali.

2. During this same period, we refused 25 passengers out of Balboa and Cali of which we rebooked 9. In other

words, our planes were fully booked. The load factor did not reach 100% because we must provide certain allowances for mail and express about 10% above average loads in order to handle increased loads and varying loads which point is mentioned by Dobbs in his memorandum.

3.—A further study of traffic shows that we received a total of 390 passengers at Balboa and Cali during the period December 1-February 15 of whom only 173 or 45% came from Eastern Division and 217 or 55% from Western Division and Avianca and other System points. In other words, it appears that about 50% of our passenger traffic southbound flows into Panagra via Eastern Division.

4.—The above data explains why we have at times asked Miami to release some of the allottments which are held over Panagra. We must accept long haul business as space requests are received from System points. If we did not follow this policy, we would be holding space open for the Eastern Division and gambling on every trip. In other words, we would be out of money.

5.—We ended the year 1940 with revenue from passengers baggage, express and mail 50% above 1939 and so far this year it looks as if traffic is increasing 3-6% but as we [fol. 3400] have already reached the saturation point up north and over other sectors, I doubt whether with present schedules, we can expect an increase for 1941 of more than 25% above 1940.

6.—A further analysis of our traffic indicates that probably about 10% is composed of long haul passengers who make few, if any, stop-overs; 60-65% who are long haul and make stop-overs and the balance short haul passengers. This again explains the reservation problem, for the broken long hauler must be given preference over the short hauler. From a payload or reservation handling standpoint both of the latter present nearly the same problems.

I think all of the above data shows quite clearly the following:

1.—We can not accept much more traffic than the amount which Panair is now giving us.

2.—Because we cannot accept more traffic, we must necessarily agree with Dobbs that we are getting a "fair break" from Eastern Division.

3.—We can not go to Panair and ask for more space until we also have more space.

4.—To obtain more space with minimum amount of flying we must revise present schedules.

5.—Almost our entire line might be called a bottleneck due to heavy traffic moving between principal cities.

Schedules: Relative to schedules, I believe we should do the following as soon as possible:

1.—Cancel the Cristobal Guayaquil DC-2 service serving Ecuador and replace it with a fourth international DC-3'A service as far as Arequipa, operating on the same schedule as the other three services.

2.—Arrange to serve Ecuador with two DC-2's based in Ecuador connecting with the international services at Guayaquil.

3.—Consider making a connection from Ecuador with Avianca at Ipiales.

4.—Operate international services out of Balboa eliminating Cristobal, Quito and Uyuni and adding Cuzco, Sucre and Rosario with DC-3'A's on Diagonal.

5.—Operate a third service between Arica and Santiago with DC-3'A's.

6.—Extend the fourth service under item 1 south via Chile and/or Bolivia at a later date.

We would then have a west coast service making the following stops: Balboa, Cali, Guayaquil, Talara, Chiclayo, Lima, Arequipa, Cuzco, La Paz, Oruro, Sucre, Salta, Tucuman, Cordoba, Rosario and Buenos Aires. Also Arica, Antofagasta, Santiago, Mendoza, Cordoba, (Rosario) and Buenos Aires. In Ecuador our services would stop at Guayaquil, Cuenca, Loja, Salinas, Manta, Esmeraldas and

Quito with a possible extension to Ipiales to connect with Avianca.

These schedules, besides giving better service to all countries on The Panagra Route, provide for greater frequency and hence actually faster schedules to the long haul stop-over passengers mentioned above, would give us more payload and place us in a position where we could go to Panair and obtain a fourth direct connection out of Miami. Mr. Kirkland is studying various problems concerning equipment and schedules and further detailed information will be forwarded in the near future. In the meanwhile, I trust the above answers your P-8452 and P-8480. If not, kindly advise me.

J. E. Muhlfeld, GSM.

Letter No.
5634

Subject: TICKET OFFICES

Lima, May 7, 1941.

PANAGRA NEW YORK

Att: Mr. C. de Groot

LIMA OFFICE:

Further to our letter No. 5572, the other day I arranged a meeting with Messrs. Shea, Stebbins and Woll during which I pointed out the need for providing Panagra with a

first class modern air line ticket office, located either in the Hotel Bolivar or near vicinity, with neon sign, modern show windows and all the other trimmings which go to make up a modern airline office. Three years ago I had a similar meeting in which the idea was turned down but after pointing out to Mr. Shea that Panagra was now selling more passenger business than Grace Line he took the attitude that whatever was best for Panagra's interest should be carried out.

As a result of our conversation we decided that Mr. Woll would submit to me a budget with full details regarding the proposed new office and that in the meanwhile both Mr. Shea and myself would write to New York to inform Messrs. Iglehart and Roig. Mr. Shea pointed out that Mr. Iglehart had definite ideas regarding Grace offices on the west coast, and it is my understanding that his ideas are that Panagra should be located in the Grace buildings. In any event, it appears that Mr. Iglehart will have to approve the plan of separating the ticket office from Grace & Co., therefore, it is my suggestion that you speak to Mr. Roig and explain to him the need for making the change and also point out that the change in no way affects the Grace Co. organization insofar as Panagra's representation is concerned.

Regarding this last point I would like to state that when Mr. Shea asked me whether this would bring about a change in the Management, I advised him that it would not for the reason that it would merely mean that the ticket office would be moved out of the Grace building to a new location with no change whatsoever in personnel or management. In other words, insofar as Panagra is concerned, we will continue to address our letters to Grace & Co., agents for Panagra, and as far as running the ticket office is concerned, Mr. Woll, Sales Manager, will continue to work directly under Mr. Stebbins and the Grace Management in Lima.

I believe the above should be carefully explained to Messrs. Roig and Iglehart at the time you bring this matter to their attention, otherwise I am afraid it will be a difficult job to sell Grace on the proposed plan.

Subject:

—2—

BUENOS AIRES OFFICE:

Regarding the new Buenos Aires office, I am attaching herewith floor plan which Mr. Roll was kind enough to bring up with him from Buenos Aires and after discussing the matter with him (he is now in Lima) he pointed out that the Shell Mex people had agreed to install the counter and panelling along the walls for their own account and that this would cost them between 50,000 and 60,000 pesos in all including the show windows and other trimmings. It appears that the office will be styled along the lines of the other ground offices in the same building, which from our point of view is satisfactory, for at a later date if we find it necessary to take more floor space it will be a simple matter as the other offices on the same floor are all equipped with counters and furnishings suitable for our use and styled along the same lines.

As regards the show windows, the latest scheme is to have the base or whatever you call it on small rollers so that the display stands can be rolled away from the windows and turned around for dressing. This seems to be a very practical idea and was recommended by Mr. Smith, who also has some other ideas on the matter of furnishing the office. As regards the counter and interior decoration, as stated above, it is our plan at the start for Shell Mex to provide us with passenger and express counters, as you will notice from the attached plan, and panel part of the walls. The remaining part will remain untouched until the new plaster and paint has had a chance to thoroughly dry out. The floor space between the passenger and express counters and windows will be furnished with writing tables and chairs and lounges for passengers, more or less like in the Santiago office. Aside from this, however, no fur-

ther plans have been developed other than that an interior decorator will probably be called in to do the job.

In the meanwhile, however, Mr. Roll and I both would like to have you furnish us with any ideas which you may have and also any sketches or drawings taking into account the fact that we wish, insofar as possible to decorate all offices in such a manner that they will have some family resemblance to each other. As the Argentine company is owned by Pan American Airways about all we can do is suggest that they adopt our ideas but in this regard, we can, of course, count on the full cooperation of the local management.

HJR Series

Ticket Office

New York, June 4, 1941

Mr. Douglas Campbell,
Lima, Peru

Dear Douglas:

When I first read Lima's No. 5634 regarding Lima Sales Office, I did not take it very seriously. In speaking with Woll the other day, however, it appears that he regards this change not only seriously but imminent. I am therefore calling the matter to your attention in order to prevent time being unnecessarily wasted in this connection.

It is my understanding that the facilities provided by the proposed extension to the Grace Building will give ample

opportunity for a Panagra Ticket Office in whatever form seems most suitable. I see no reason for considering any change in the meantime. I have no objection to trying on an experimental basis; the idea of having a representative on an inexpensive basis at the Hotel Bolivar but I see no reason for considering a complete removal of the traffic office.

Very truly yours,

[fol. 3404]

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 366

PAN AMERICAN-GRACE AIRWAYS, INC.
435 East 42nd Street New York, N. Y.

Letter No.
DC-87

Lima, June 9, 1941.

Mr. H. J. Roig,
NEW YORK.

Dear Mr. Roig,

With reference to your letter No. 64, you have no cause for concern with regard to my own point of view on this matter as I have repeatedly told Muhlfeld that any consideration of moving the entire traffic office to another location would simply be a waste of time.

This whole matter is to a certain extent the outgrowth of DeGroot's recommendation that our ticket offices at all points be "streamlined" in order to make them similar to modern travel ticket offices in the States, and also his suggestion that some of them could be better located in the respective cities in order that the traveling public would be more likely to see them. However, DeGroot was looking at this from the point of view of the American tourist who is still only a small part of our business and I think that he overlooked the fact that in a town such as Lima any one who is likely to travel by plane is fully aware of the location of the office.

I am in favor, however, of having a representative with a desk in the Hotel Bolivar or vicinity with proper telephone connections to the ticket office, airport and Reservations Control, as I feel that our tourist clients as well as overnighting in transit passengers are entitled to the additional convenient service that such a setup would make possible.

As Muhlfeld is leaving for New York tomorrow on account of the unfortunate critical illness of his father, you may have an opportunity to point out to him your ideas and general policy with respect to the above.

Sincerely,

(Sgd) Douglas Campbell
Douglas Campbell

Pan American World Airways, Inc. Exhibit 367

August 1, 1941

Director	Assistant Director
Public Relations	Public Relations
New York	New York

PANAGRA PUBLICITY

In accordance with your verbal request of recent date, with Mr. Righi's assistance, I have made a careful study of the public relations record of Pan Grace and the publicity effort made on their behalf by our department, extending back practically to the time of the announcement in February, 1929 of the formation of Pan American Grace Airways by W. R. Grace & Company and Pan American Airways.

In addition, a special detailed study has been made in terms of releases and stories handled, pictures and radio work in an arbitrarily defined period extending from January, 1939 to the present time. A separate report on this period in terms of releases covering Panagra activities is attached. This period was made the subject of special

study because it is roughly within this time that, acting upon specific requests of Panagra management and under a plan of our own devising and approved by that management, we undertook, with certain admitted failures, an intensive specialized effort for Pan Grace of a type and kind never attempted for any other separate operating unit of the System. This catalog of releases covers generally the time in which separately Messrs. Riley, Russell, Curtis and Righi, discussed hereinafter, were exclusively engaged on Panagra work.

This study shows, as does the special report which you recently prepared for the Comptroller's office on work performed for Pan American-Grace Airways by the Public Relations Department, that our efforts have been extensive, consistent and continuous to the end which we had in mind, working with such material and aids as we had at hand. In certain respects it has not been a perfect record but considering all of those many circumstances over which we had little or no control, it has not been as totally bad as is sometimes implied.

At any point in which a study is begun of the plan for the System Public Relations Department to handle and direct publicity for Panagra, we find full agreement of all concerned on two points: (1) that Panagra's interests would best be served publicity and public relations wise by such an arrangement and (2) that the active operating management of Panagra has always admitted that it was without specialized knowledge of publicity and public relations technique. Yet the principal source of criticism is the same as that which admits this lack. The record as a whole does not fully bear out this criticism. In this con- [fol. 3406] nection, it occurs that perhaps we have consistently failed in not bringing directly to the attention of those most interested in a fair and proper presentation of Panagra services and activities the results which we have obtained. This, it is conceivable could lead to misunderstanding and unwarranted criticism. A recent sampling of clippings from all sources, supplied by our clipping bureau, bears this out and shows that in addition to those general System stories which make reference to

services of both east and west coasts of South America, there is a high proportion which makes reference exclusively to Panagra.

First and briefly for the sake of the record, going back to February 21, 1929, the date of the announcement of the organization of Pan American Grace Airways, up to the time Panair began through service operations on the east coast, all of the Public Relations Department's effort, as regards through South American travel, was, of course, done to the end of featuring west coast air travel. The fact was always stressed that the fastest through service from the United States to the most distant capital of South America was obtainable on the west coast. At the time, less than a year ago, of the establishment of through high speed land service on the Brazilian cut off, this always to the lay [illegible] a startling fact, had been well established with the general public.

General releases put out by the System Public Relations office on Latin American services are of three kinds: those which deal with new schedules or special developments on a certain clearly defined route; those dealing with South American air services as a whole and those gotten out exclusively in the name of Panagra. The first is in a minority. Those of the second category have invariably stated that there is in operation American flag service on both coasts of South America and that the operator of west coast service is Pan American Grace Airways.

In the period of special study of this survey extending from January, 1939 to the present time, forty two releases of the last two categories were issued. This is more than eighty per cent of all formal press releases prepared by our department and of this group thirty two or about ninety per cent were gotten out exclusively in the name of Pan American Grace Airways.

The foregoing, it should be borne in mind, is concerned exclusively with news announcements. In addition throughout this period, many special travel and other feature stories, both for newspaper travel sections and magazines, were prepared in the interest of Panagra. A great many

of these were on special assignment. It is understandable that a measure of disappointment in this special category of our Pan Grace efforts has been felt by Panagra for a number of reasons. In terms of travel and established [fol. 3407] tourism with which steamship organizations are far more familiar than airlines, it was natural to look for free publicity in newspaper travel feature pages and travel magazines. If in the period here under study the record is weak, it must be admitted that it is weak for the System as a whole. During the period still continuing of its great expansion, the story of the services of Pan American Airways was continuously carried to the general public in many important news stories in a manner and extent which could never be achieved exclusively through travel pages and in this regard, Pan American-Grace Airways as an established going organization could not hope to participate except as a unit of Pan American Airways System as a whole. Because of a serious lack of man power in the New York office of Public Relations, such specialized effort could not always be made in the exclusive interest of Panagra. Panagra here perhaps has suffered more than the regular Divisions of Pan American because it has always been deemed a function of the Division Public Relations Representative in the field to develop and prepare straight travel stories covering points of interest in the territory served by the lines of his Division. The Public Relations Representative at Lima does not appear on the record to have maintained the same high point in this field of endeavor as has been done by Public Relations Representatives for the Eastern and Pacific Divisions or by the Public Relations office of Cia Mexicana.

Despite all of the foregoing, however, Panagra's interests of a considerably extensive period in this matter have been consistently kept in mind by the New York office. It is fair to state on the record that more effort has been made to develop pleasure travel to colorful parts of the west coast of South American than any other single sector of the Pan American spheres of operation. In the international campaign launched by the Scripps Howard newspapers in 1939 and continued through 1940 to stimulate inter-American

pleasure travel, material contributed by our department consistently featured the west coast of South America. During these periods when there has been available in the New York office a Public Relations Representative, exclusively concerned with Panagra work, the volume of such travel stories has risen impressively.

The shortcomings which are freely admitted as represented in the foregoing situation were among the things which inspired steps toward the hiring of a special representative to be attached to our New York office and to be solely concerned with the affairs and interests of Pan American Grace Airways. This resulted in the placing on our payroll on November 24, 1939 of Mr. Nelson Riley, subsequently assigned to exclusive Panagra work, under your general supervision and the close cooperation of Panagra.

On November 25, in a detailed memorandum over your signature there was outlined to Mr. Roig the method of procedure to be followed under this new setup:

[fol. 3408] On November 30, Mr. Roig acknowledged your memorandum of the arrangement stating:

"Pan American Airways' Publicity Department will act as publicity representative of Panagra in the United States in the same manner as any publicity firm might do. All the facilities of the Pan American publicity organization to be available to this end as may be required.

"Mr. Riley of the Pan American Public Relations Department will be in particular charge of Panagra work in the same manner as one person in any publicity agency might be in direct charge of a particular account. He will devote his time exclusively to Panagra work and will be free to call upon other members of the Pan American publicity department for their cooperation in connection with his work."

This memorandum from Mr. Roig makes reference further to the fact that Mr. Riley was to have full cooperation of the officers of Panagra and Panagra's traffic staff and of the Sego publicity department in Lima. Having been away from the New York office during the greater portion of Mr. Riley's employment, I do not know in this

case to what extent this promised cooperation was lived up to, but I can state for the record that personnel of our department who subsequeatly succeeded Mr. Riley have repeatedly failed to obtain this promised cooperation. On January 5, 1940, while Mr. Riley was still in our employ, Mr. Roig submitted to us certain additions and modifications of the memorandum of agreement referred to above, the points being primarily of a minor nature and involved with details of organization and calling for a clarification of the budgetary responsibilities severally of Pan American and Pan American Grace Airways.

Mr. Riley continued on our payroll until June 30, 1940. He was succeeded on an interim arrangement basis, until a full-time successor could be appointed to Mr. Riley, by Mr. Arthur E. Curtis, Eastern Division Publicity Representative. Certain definite worth while projects to the exclusive benefit of Pan American Grace Airways were carried out during the period when Mr. Curtis was actively engaged as a member of the New York office on Panagra publicity projects. This was particularly true in regard to the development of travel feature stories referred to above, radio work, especially with the "Wings Over America" program of the National Broadcasting Company, and in laying the groundwork for home town passenger press service.

Thru circumstances over which we had no control, Mr. Curtis, who was on temporary assignment in the New York office through special arrangements made by Vice President Evan Young, had to return to his Miami station before we could find a permanent successor to Mr. Riley. [fol. 3409] We were eventually successful in obtaining the services of Daniel Russell who was our own original candidate for the post, but had been passed over by Panagra in preference to Mr. Riley. Mr. Russell submitted his resignation after a period of six months with us, stating as his primary reason his inability to obtain satisfactory cooperation from Panagra personnel in order to carry out various assignments which we had given him.

One of the first assignments which Mr. Riley undertook was to coordinate activities with the Panagra Public Relations representative in the field and stationed at Lima. On

papers it appeared that a satisfactory working arrangement had been set up. In practice, however, the desired objectives failed to materialize. It is difficult to explain this except on the basis of the character of personnel employed, since the method and procedure followed in no radical way differed from the coordination procedure followed in relating the activities of Pan American Grace System and the New York office and its various division public relations representatives. While it might be conceded that the West Coast of South America has peculiar and unusual publication conditions, little of the extremely small amount of material sent from Panagra public relations representative at Lima has either been serviceable or usable in the United States.

The record here under study shows an unsatisfactory supply of pictorial material forwarded from the Panagra Lima office, almost all of it unusable by the United States press. Analysis of material received from Mr. Mandujey, Lima, Peru, during the month of July, follows:

(1) On July 9th a package of glossy prints of Mr. Douglas Fairbanks' visit to Lima was received in this office. The cover memorandum was dated June 28th. The poor quality of the pictures, as well as the generally poor composition of the same, would have made the use of most of the prints impossible but the fact is that the office had already received pictures in large numbers from the East Coast covering this trip and the arrival in Miami of Mr. Fairbanks himself about a week before Lima's photos came to hand had already rendered this material obsolete. There seems to be no justification for 12 days in transit for any spot publicity material.

(2) As of July 18th, we received a copy of a memorandum by Mr. Mandujey to Grace & Co., Santiago, Chile. This memo gave Grace & Co. instructions regarding the publicity for a group of 15 members of the American Youth Hostels, Inc., on the part of their trip by air between Santiago and Buenos Aires.

(3) Dated July 22nd, arriving here July 29th, was a copy of Mr. Mandujey's memorandum to Pan American Airways,

Los Angeles, regarding the arrival at Lima of the members of the "Western States Latin-American Clipper Cruise." As Mr. Manduley states in this letter, Mr. Ramirez Cardenas, from Mexico City, had already informed all necessary elements of the System of the publicity value of the cruise. As a result, New York received pictures from Mexico City, dated July 14th, from which suitable cuts had been made for NEW HORIZONS. The pictures which [fol. 3410] Mr. Manduley mentions in his memo of July 22nd reached New York August 4th and were thus unusable. Further note may be made of the fact that the photographic material was technically imperfect and could not stand reproduction.

The failure of Panagra's field representative in this respect, as much as any other single factor, accounts for the poor showing in Panagra's favor on the record in recent months. Despite repeated queries in this regard, this representative has entirely ignored requests for material, particularly editorial matter which could be used in the company publication, NEW HORIZONS. It is doubtful if the existing, if temporary, setup which exists with Mr. Righi currently handling Panagra work exclusively or your proposal in regard to a permanent arrangement involving Mr. Harner can be expected to work exclusively over any long period unless this field situation is thoroughly overhauled and corrected in the light of what that examination doubtless will reveal.

PAN AMERICAN WORLD AIRWAYS, INC. EXHIBIT 368

WORK PERFORMED FOR PAN AMERICAN-GRACE AIRWAYS, INC.

PUBLIC RELATIONS DEPARTMENT

(New York)

PAN AMERICAN AIRWAYS SYSTEM

[fol. 3412] The Public Relations Department of the Pan American Airways System is constantly concerned with the inclusion and identification of Pan American-Grace Airways with any news or promotional material which can be useful in identifying the progress being made by American aviation in Latin America.

Effort is constantly made to identify this operation with the general functioning and advancement of American aviation in this field. Identification of Pan American-Grace Airways with this subject is a result of cumulative effort, through more than ten years of effort directed to stimulate interest in the Pan American-Grace Airways' operations. As a result, considerably more attention has developed, and a wider acceptance of the services performed by that company has been secured than would have been practical through an independent and unrelated publicity promotion of the company's normal activities.

This involves, as routine practice, the attention of all members of the Public Relations Department. The Department is also available, at all times, to Pan American-Grace Airways for the handling of particular news or institutional matters properly within the range of public relations.

Insofar as Public Relations is concerned, all general releases issued by the New York Public Relations Office, in the name of the System as a whole, and dealing with air transportation generally in South America, identify Pan American-Grace Airways. Such releases are quite numerous. In addition, there is a special type of release frequently gotten out which makes direct reference to "ser-

vices on both coasts of South America." In the latter case Pan American-Grace Airways is always named as the operator of the West Coast-to-Buenos Aires service.

Regular routine of this Department includes considerable telephone work with publications, press associations, radio and other channels of public information through which material with respect to Pan American-Grace Airways' operations and services, details of equipment, and plans of progress are constantly being disseminated. A similar detailed watch is maintained to prevent, or, when this is not possible, to correct publication of misinformation which frequently is transmitted through press channels from the countries served by Pan American-Grace Airways.
[fol.3413] This Department maintains active contact with several hundred agencies for the distribution of public information. The normal routine involves an average of some 70 telephone calls a day for the Department. A proper proportion of these is devoted to subjects concerning Pan American Grace Airways or general subjects in which they have an interest or are identified.

Efforts have been made to employ and maintain a qualified Public Relations Representative whose entire time and attention is devoted to public relations work for Pan American Grace Airways. In those intervals when such an individual is not available, other members of the Department are assigned the specific handling of Pan American Grace Airways work.

The Pan American Airways Photographic Service is constantly fulfilling requests for pictures of scenes in areas covered by Pan American-Grace Airways services as well as actual operation and institutional pictures of Panagra subjects.

In addition to the work of a general and routine nature conducted by this Department, the individual members have conducted such specific work for Pan American-Grace Airways as the attached:

[fol. 3414]

WORK PERFORMED FOR PAN AMERICAN-GRACE AIRWAYS

1. DEPARTMENT: Public Relations
2. NAME of EMPLOYEE: William Van Dusen
3. POSITION: Director of Public Relations
4. WHERE EMPLOYED: New York
5. John Miller, George Jervas, Daniel Sayre.
6. Conferred with Pan American-Grace representatives with respect to the formulation and execution of plans re:

   a. Securing necessary information on personnel of Pan American-Grace Airways as a means of developing feature institutional articles for the hometown press of those individuals to stress the organization, work and importance of the airline.

   b. Assembly of necessary information with respect to the new Pan American-Grace Airways radio system.

   c. For a report on the meteorological work and research conducted by Pan American-Grace Airways for institutional use both on the airline and through the technical and general press of the United States.

   d. Development of a practical system for obtaining names and details of passengers for publication purposes.

   e. Securing the necessary detailed information from South America for the preparation of feature articles pointing out the benefits and attractions of "foreign service" as related to employment with Pan American-Grace Airways.

   f. Securing of feature story material concerning personnel useful for human interest story development with respect to services, particularly in Argentina, Chile, and Peru.

g. Information on details of express traffic for feature stories.

h. Requested details for any new flight equipment plans.

i. Concerning passage and cooperation for authors and writers interested or influenced in traveling the Pan American-Grace Airways routes, reporting on aspects of the service.

[fol. 3415]

j. Relative to the necessary and continuous routine reporting to this office of activities and developments along the airways by the press office in Lima.

k. Development of a system for securing more and improved news and pictures of Pan American-Grace Airways passengers and service activities and illustration material useful to the company travel, traffic and institutional stories.

l. Concerning the use of and settlement for photographs taken by Duncan for "Look" magazine.

m. Respecting news leaks in Ecuador and Bolivia.

n. Concerning applications filed with the C. A. B.

o. In re-editing of the motion picture "Land of the Incas."

Conferred with representatives of Pan American-Grace and Traffic Representatives of the Pan American Airways on behalf of establishing a system through which this Department could be advised of passengers booked to travel over the Pan-American-Grace routes in order that this particular service could be made available to the wire services, to the international radio broadcasting services, and to the general press.

In behalf of Pan American-Grace Airways, conferred with:

a. Authors and writers interested or to be interested in the featuring of material concerning Pan Amer-

ican-Grace Airways in magazine and book publications.

b. Photographers relative to a wider distribution of fishing pictures and promotional credit for Pan American-Grace Airways. In connection therewith, the motion picture producers were conferred with relative to re-editing, addition of material to and new narration for, the Pan American-Grace Airways travel promotion film.

c. Officials of the National Safety Council and the Inter-American Safety Council to secure their agreement to present a separate award to Pan American-Grace Airways for the past year's operations. This successfully secured, the assignment then involved the following:

1. Outline of the certificate draft and direction of the artist.

2. Arrangement for a place at the speakers' table for Mr. Roig to whom the presentation was to be made.

[fol. 3416]
